Note: The following blog describes the new Change Request Management Insights functionality available within SAP Readiness Check for SAP Cloud ALM. For an overview of the other checks available in SAP Readiness Check for SAP Cloud ALM, refer to this [blog](#).

Dear All,

Today, we are excited to announce that SAP Readiness Check for SAP Cloud ALM now provides additional insights into the usage of Change Request Management capabilities in an SAP Solution Manager system to support the planning of the transition of your change-controlled landscapes to SAP Cloud ALM.

The new **Change Request Management Insights** check reads and collects the usage details for all active change cycles in your SAP Solution Manager system. It allows you to quickly identify the usage of individual change request management capabilities within each cycle and see which systems of your landscape are managed by each cycle.

Change Request Management Insights - Overview

The chart in the dashboard card summarizes the total change documents created within the active cycles, aggregated by transaction type. This chart provides an overview of the change types being managed within the change cycles in your change-controlled landscapes. Note that only active cycles at the time of the data collection are used to create this visualization. The chart contains several internal change control up to date.

Top 10 from the SAP Cloud ALM October 2024 Update

Top 10 Highlights from the SAP Cloud ALM October 2024 Update

SAP Cloud ALM continues to evolve with new features that enhance project management, monitoring, and traceability. Here are the top 10 highlights from the latest October 2024 update:

1. Mass Assignment of Project Tasks to Quality Gates

The new mass assignment feature allows users to assign multiple project tasks to quality gates efficiently. This enhancement is particularly useful for managing large-scale projects efficiently.

Context	Status and Planning	Object

Introduction

More than one year ago I [asked SAP about the possibility to include custom metrics for Cloud ALM Health Monitoring](#) in S/4 on-prem. It would be easily solved by adding a BADI during the Health Monitoring metrics collector, I even tested it with the debugger and it worked nicely.

The proper solution is available in S/4 HANA Public Cloud with the [Schedule Metric Provider Collection Fiori App](#) but unfortunately it hasn't been made available to the Private Cloud edition, even in S/4 2023... This limitations are all explained in this [blog](#) from [@TuncayKaraca](#).

Alternatively I also created custom "Use Case" for the `/sdf/alm_setup` transaction implementing the interface `/sdf/if_calm_task`. This also works but it could be broken any moment when upgrading the ST-PI component since it's not "Class Case".

The good news is that Cloud ALM offers a [Raw Data Inbound Metrics API](#) and it allows us to send our own custom metrics for an existing system/service. And not only from ABAP but from any REST client. There are some blogs describing this API but none of them really explains how to use it in detail so I decided to create this blog to go a bit deeper into the subject.

Create a BTP CALM API instance with Raw Data Inbound Metrics

The screenshot shows the SAP Support Portal homepage. At the top, there is a navigation bar with the SAP logo and 'Support' on the left, and links for 'My Support', 'Products', 'Tools', 'Maintenance', 'Offerings & Programs', 'ALM', and 'Explore SAP' on the right. A search icon, a user profile icon, and a globe icon are also present. Below the navigation bar is a large blue banner with a white search box. The search box contains the text 'Welcome to the SAP Support Portal' and 'Search for SAP Notes, SAP Knowledge Base Articles, SAP Community content, documentation and more in SAP for Me (login required)'. Below this is a search input field with the placeholder text 'Enter keywords or an SAP Note / KBA number' and a 'Search' button. Below the search box is a section with the text 'Log into SAP for Me to manage your SAP products or get support. Use the quick links below for direct access to specific tasks.' and a blue 'Access SAP for Me' button. To the right of this section is a blue 'Contact Us' button with a speech bubble icon. Below this is a grid of quick links, each with an icon and a label: 'Get Support (Case, Expert Chat...)', 'View Cases', 'Software Downloads', 'Manage Users', 'Request Keys', 'Manage Remote Connections', 'View Cloud Availability', 'Edit System Data', 'Visit the SAP Community', and 'View Product Documentation'. There is also a 'Customize' button with a gear icon. Below the quick links is a section titled 'Features' with the text 'Achieving Success Together: The New SAP Services and Support eBook' and a small image of people.
