What does the **Future of Work** look like?

What do CEOs **want** for their companies?

Sustainable
business
growth

A culture of
innovation

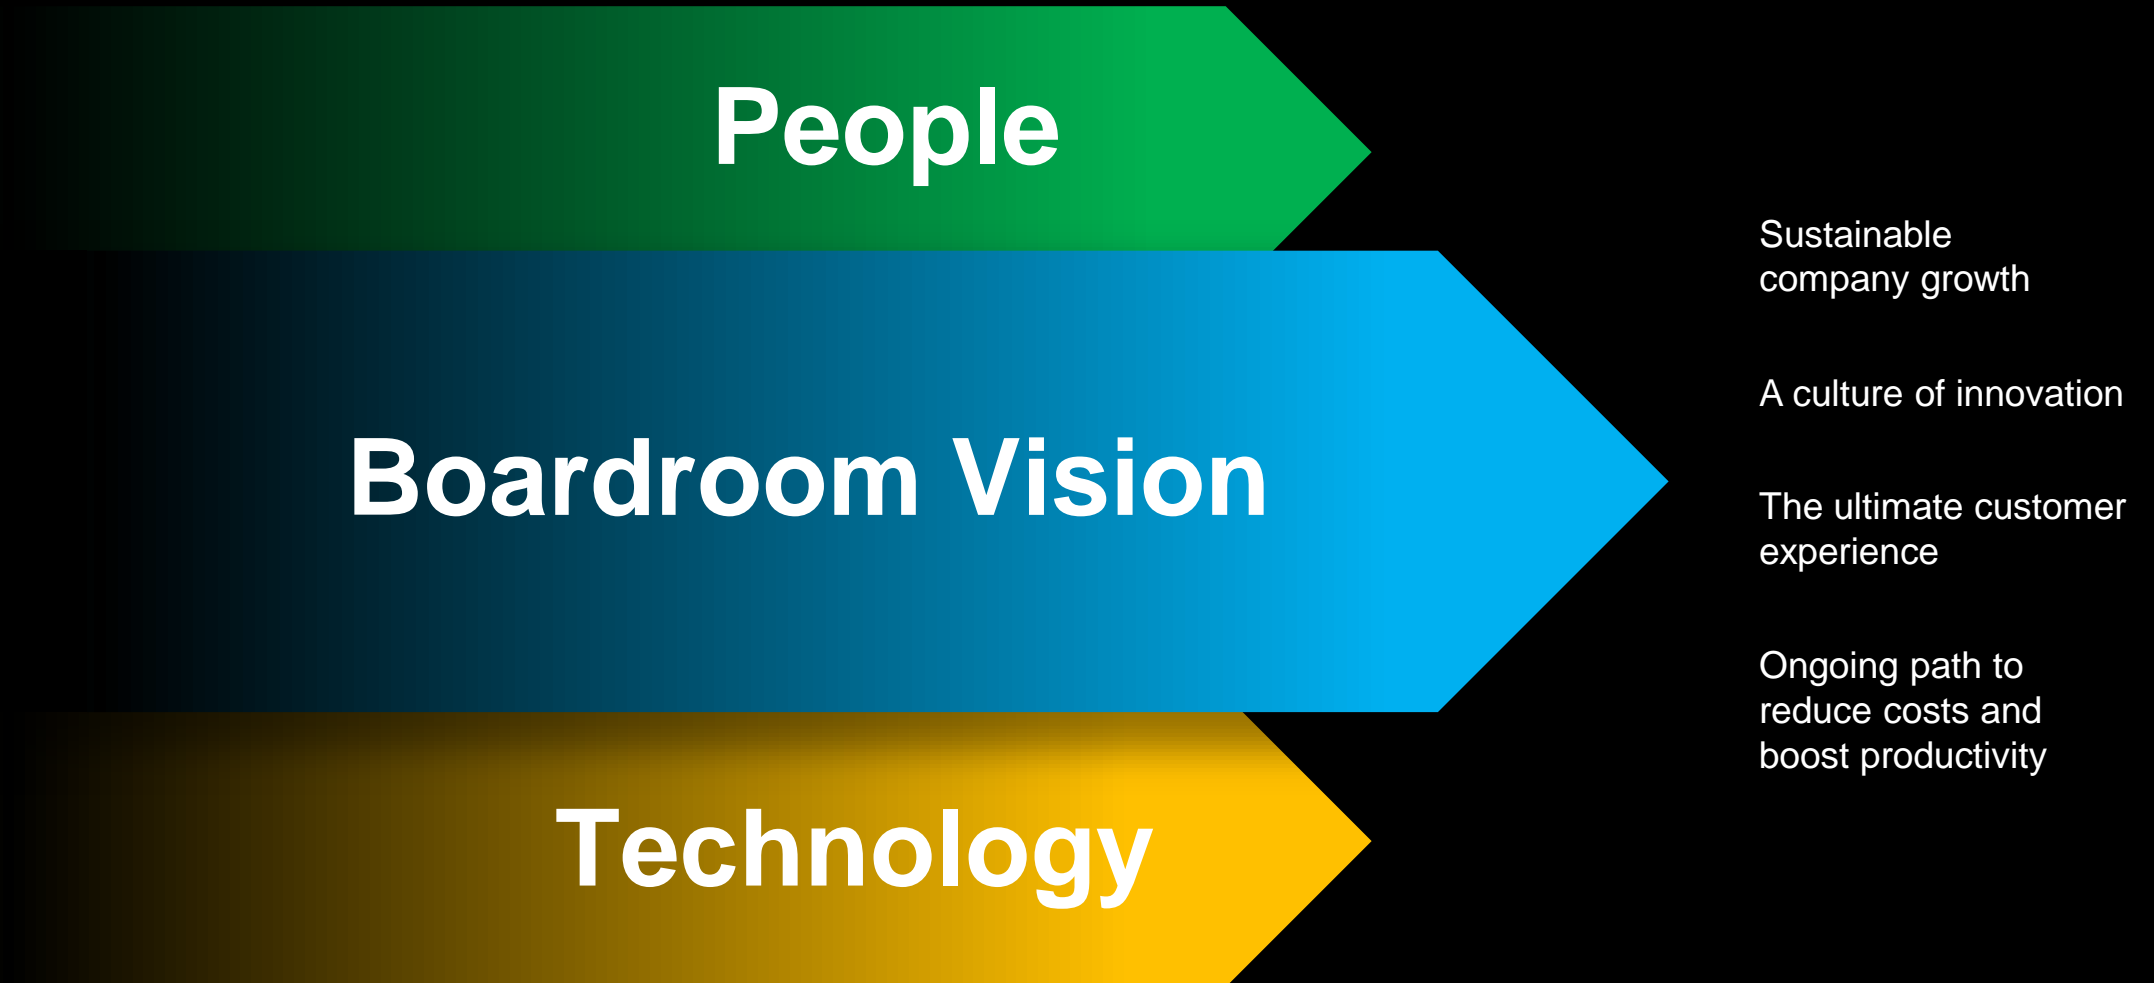

The ultimate
customer
experience

Reduce cost
& boost
productivity

The two biggest **engines** for companies to achieve their boardroom vision

“Every business
transformation is a
people transformation”

The value of people in the **business equation**

Without people, you have data instead of insight, speed without strategy, observations instead of creativity, situations without problem solving, and simply no empathy.

People are your most powerful asset.

The Human Revolution.

A vision for the most powerful way to align the CHRO with the CEO

The business
value of an
engaged
workforce

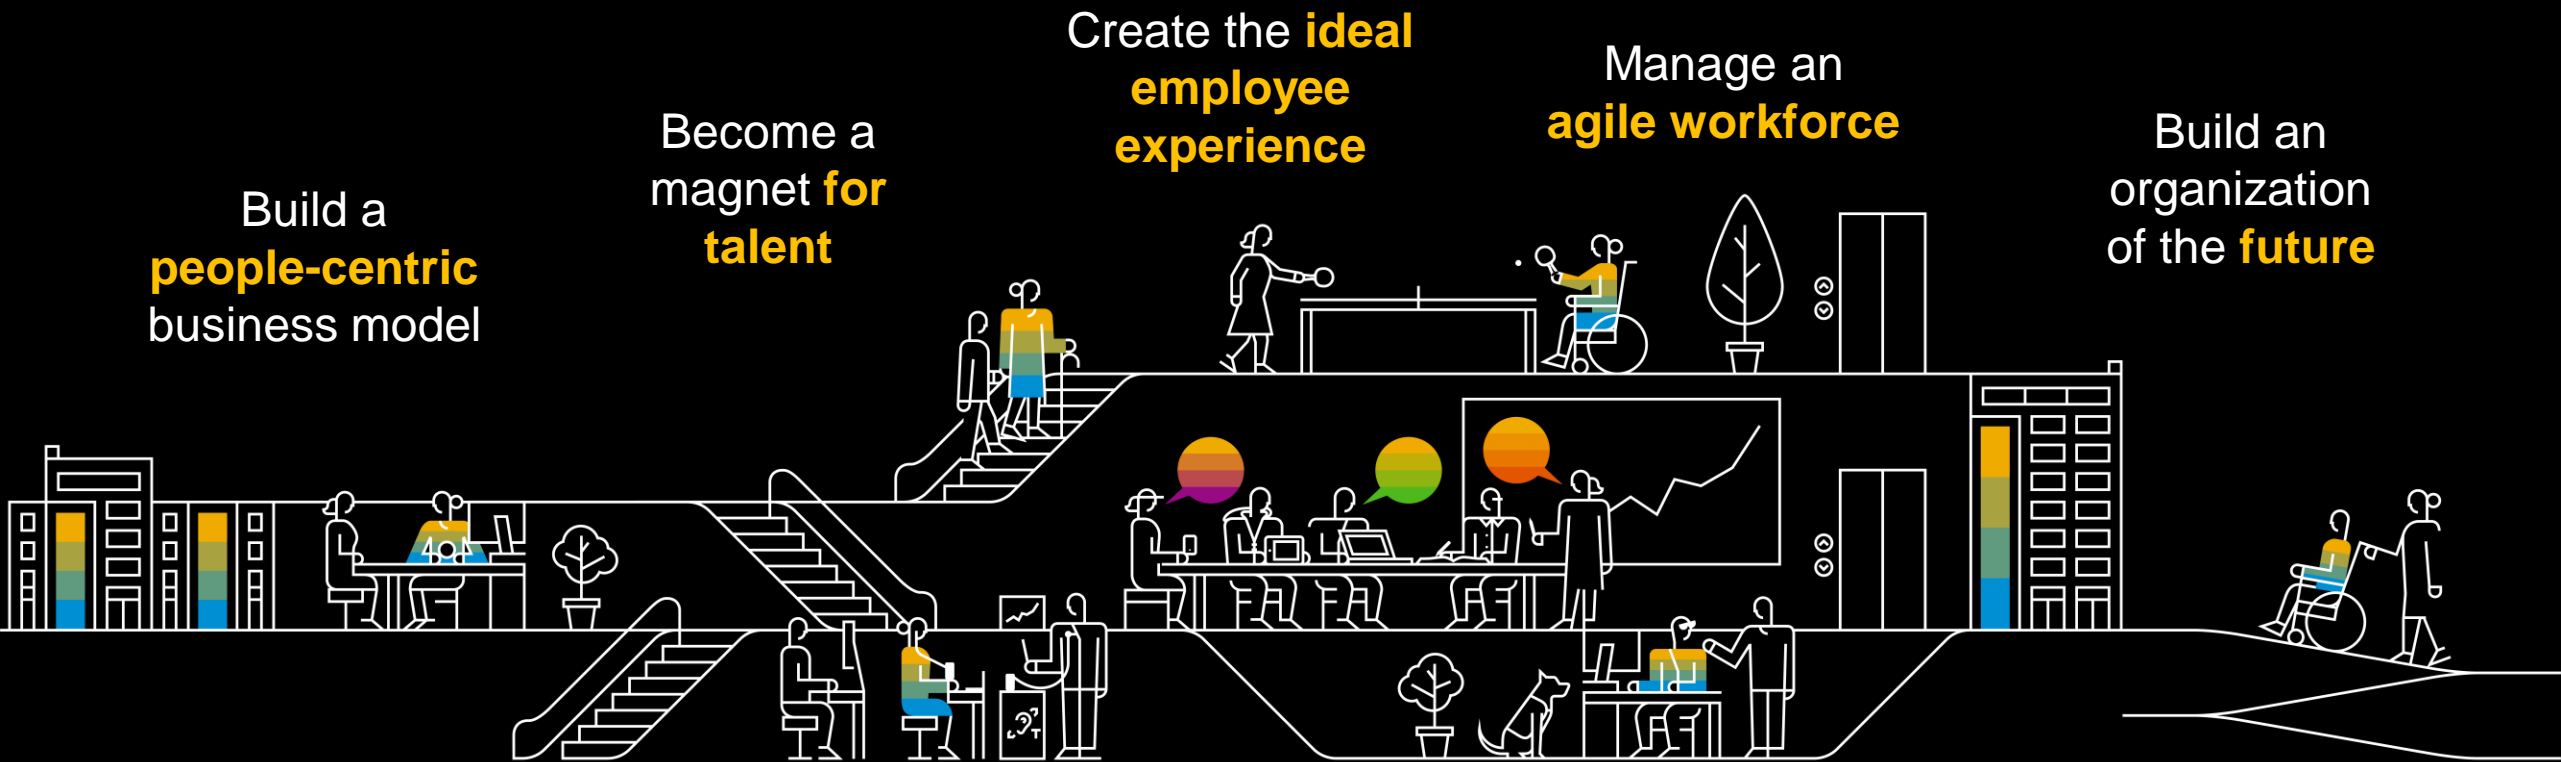

21% greater profitability

17% higher productivity

10% higher customer ratings

Gallup 2016, 2018 Study

The CHRO must be focused on solving the most urgent board-relevant people problems

Are you ready for the Future?

Thank you

Brigette McInnis-Day
