

SAP Business Unleashed Innovation Day

When you connect everything,
you can achieve anything.

Modernize Your Data Landscape and Accelerate Decision Making with the
Power of **SAP Business Data Cloud**

Pierre Van Rooyen - BTP Domain Advisor

SAP Business Data Cloud

* Launched: 13-February

**When you connect everything
you can achieve anything**

"Without good data you basically don't have AI"

"I think this is a brilliant move by SAP and is definitely one that CEO Christian Klein is clearly making from a position of strength."

"For me, it's a marriage made in heaven" - Databricks CEO Ali Ghodsi, in an interview with CNBC

Agile organizations require closed-loop, immediate decision making

Today's Market Reality - SAP Data Extraction

Current

The hidden tax of data extracts
and ongoing maintenance

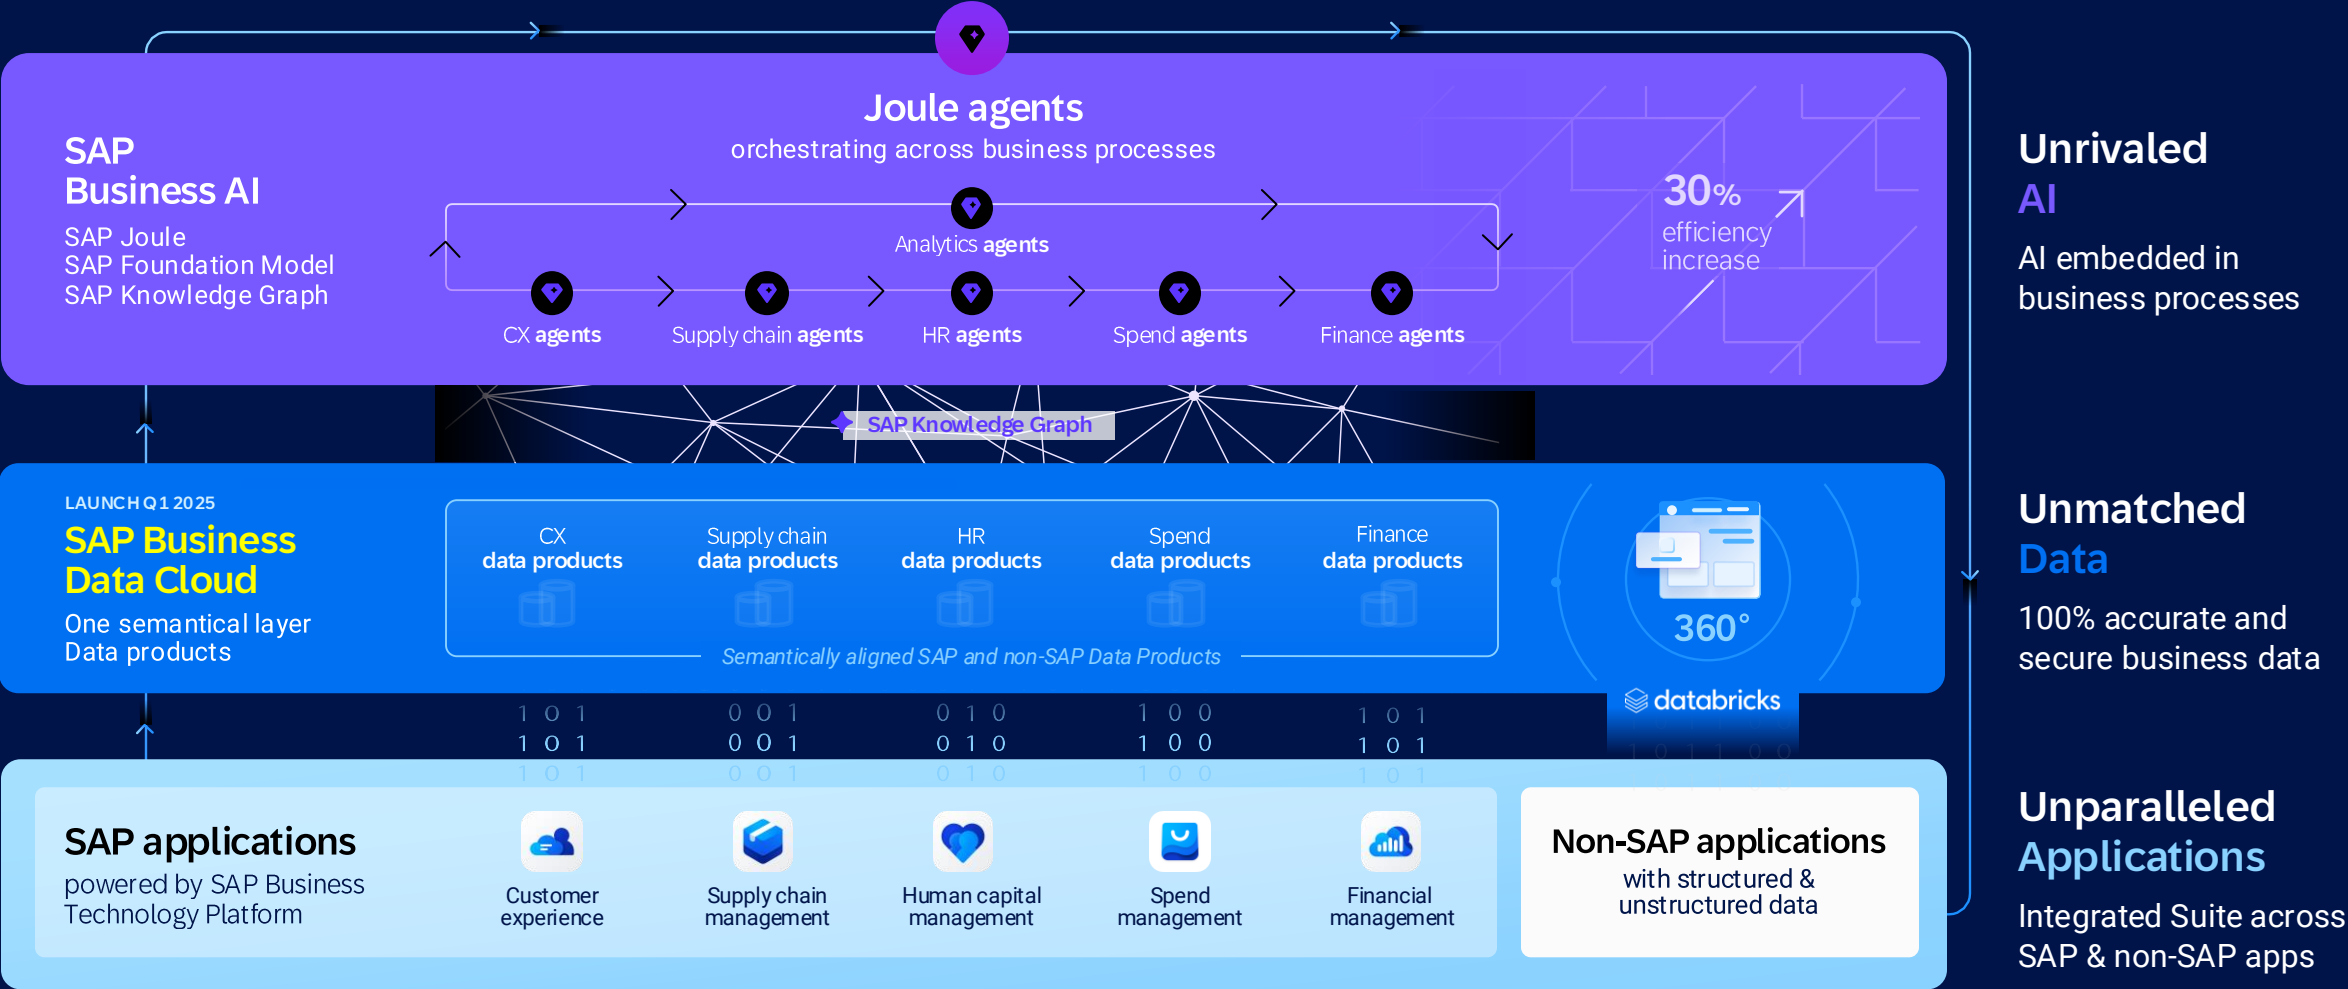

The New Data Economy

Customers and partners can generate unique data products, AI models, and insights apps and fully participate in SAP's data economy

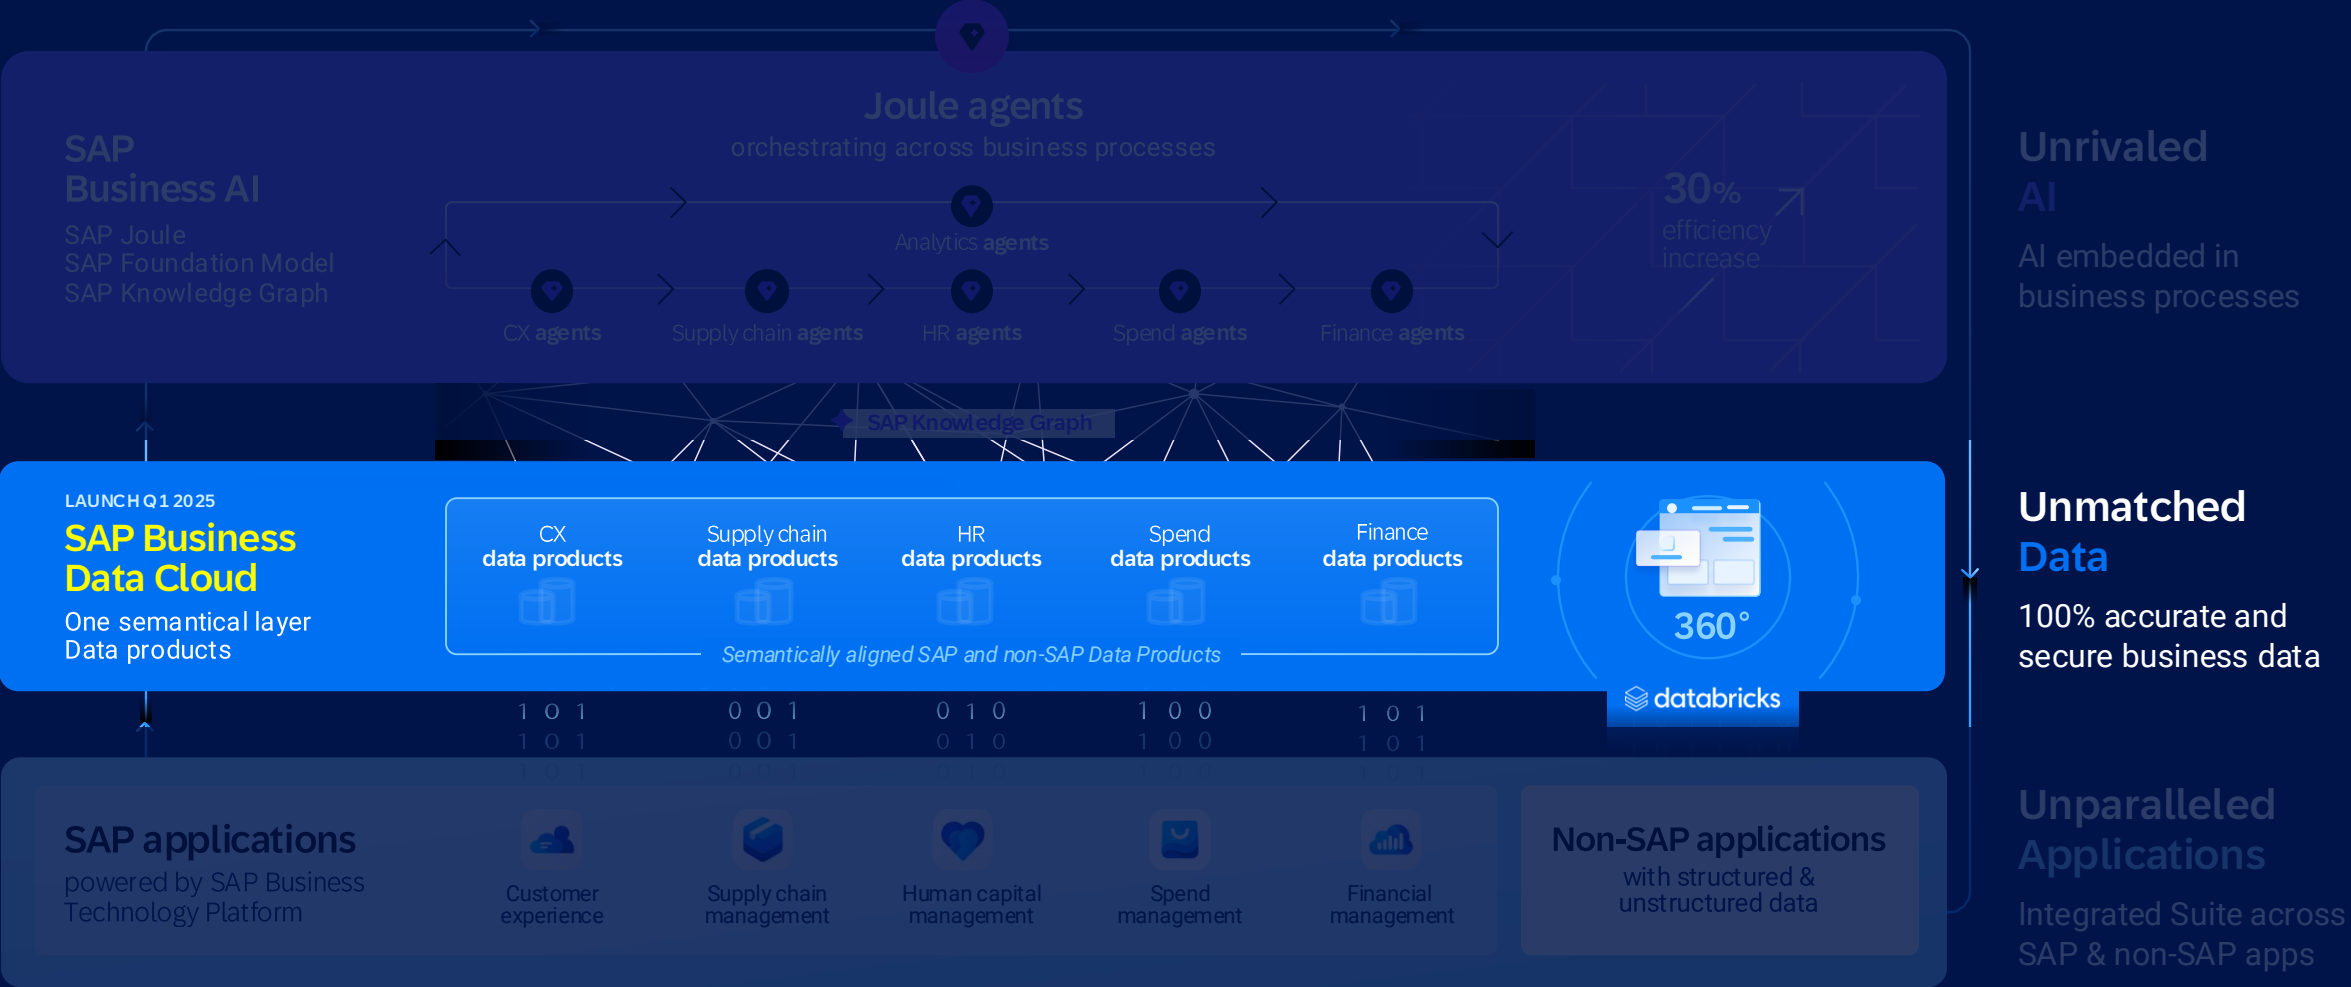

Realizing our vision by bringing together applications, data, and AI

SAP is uniquely positioned to lead companies into this new era of enterprise management

Realizing our vision by bringing together applications, data, and AI

SAP is uniquely positioned to lead companies into this new era of enterprise management

The background of the slide is a solid dark blue. On the left side, there is a rectangular area containing a bokeh effect of yellow and orange light spots against a light blue background. A diagonal line splits this rectangular area from the bottom-left corner to the top-right corner. The top-right portion of this area is yellow, while the bottom-left portion is light blue. Overlaid on this area is the text 'Re-Think' in a large, white, sans-serif font.

Re-Think

How we **serve** analytical data

ERP data has gravity
....in fact, a lot of it

Moon

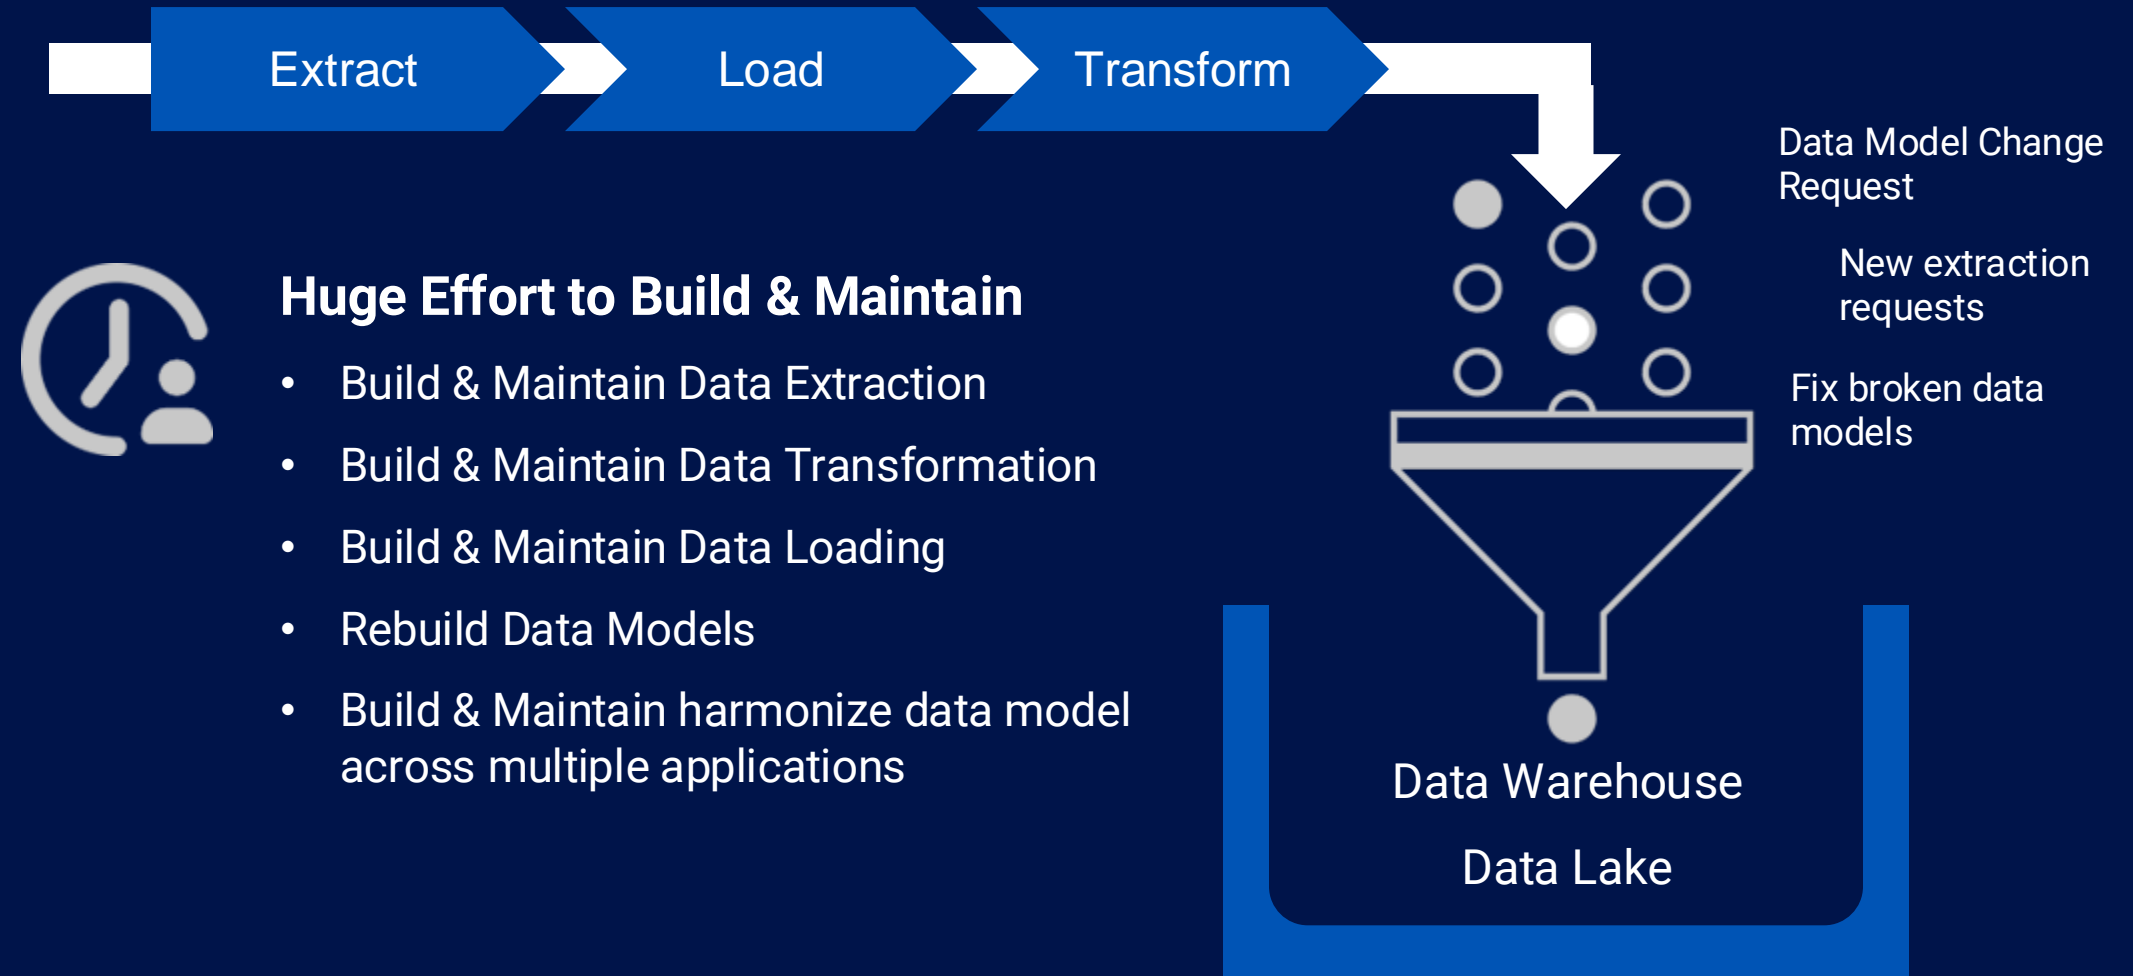

x5.7
Earth

CRM System
900 – 1,500 tables

S/4HANA PCE
15,000 CDS Views

x14.5
Jupiter

Traditional Approach

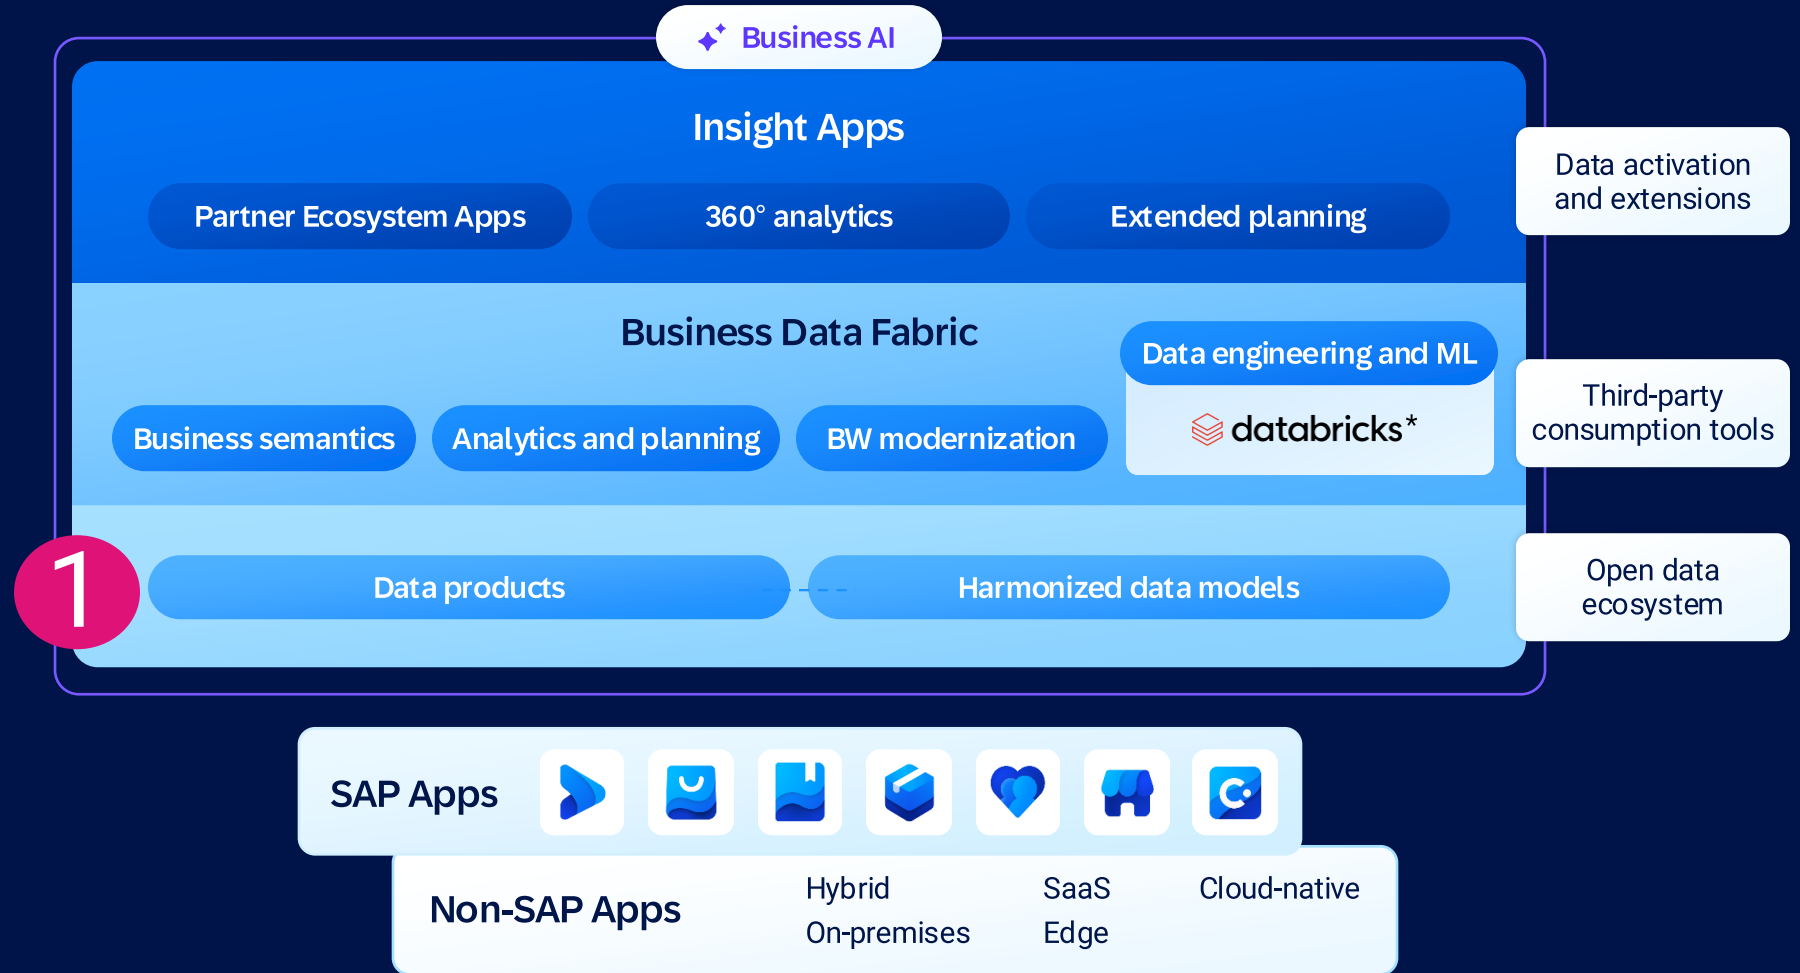

1 Data Products with Business Context

**Private Preview available Q2 2025*

Unleash transformative insights

•

Connect all your data

•

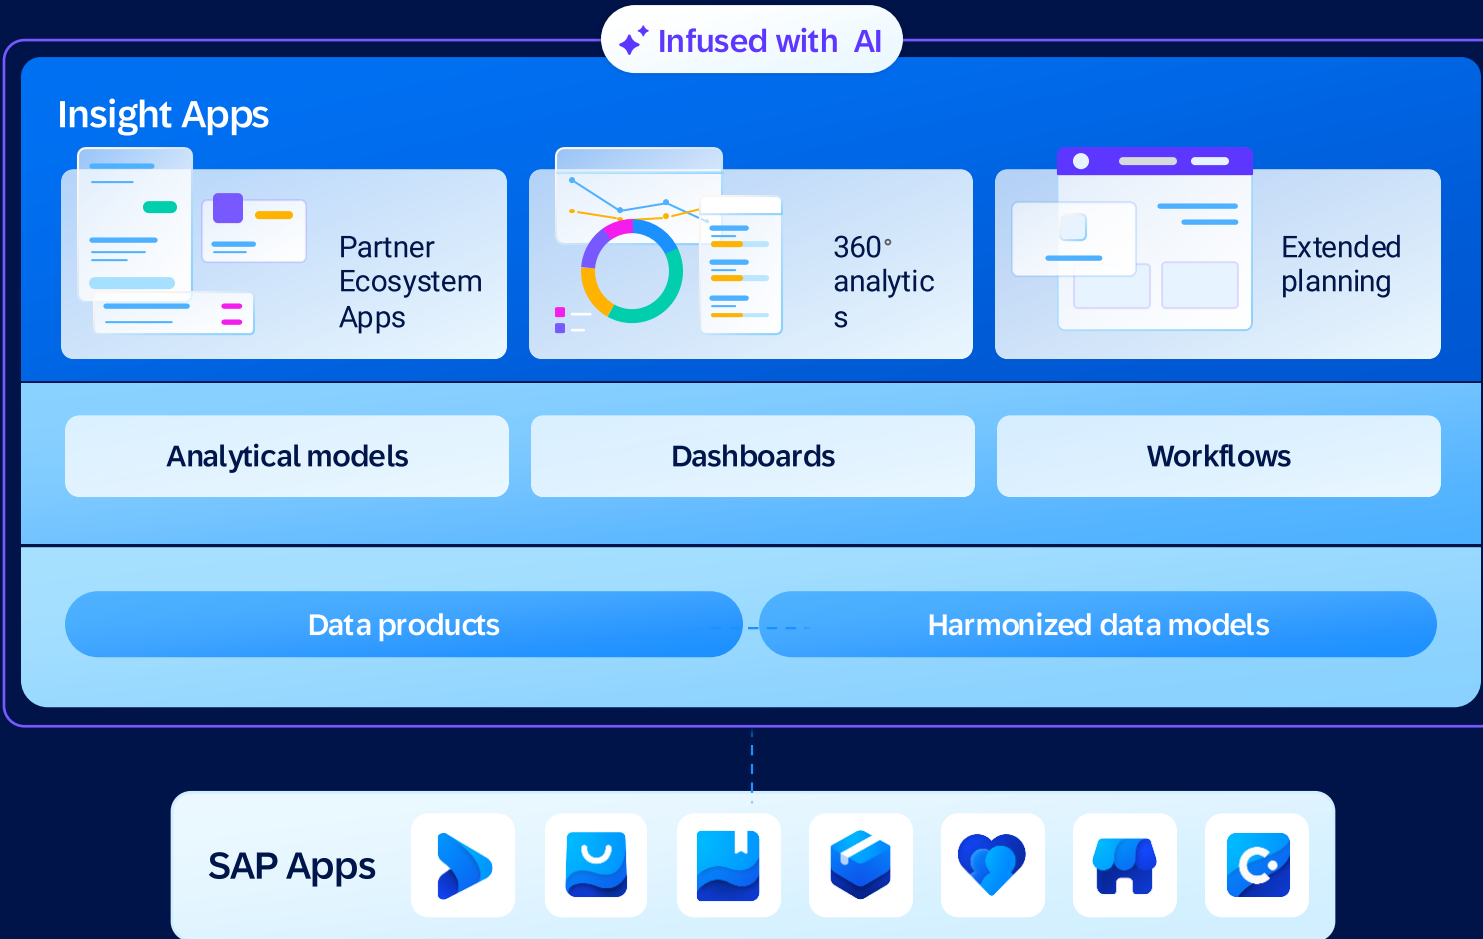

Foster reliable AI

Insight Apps - Gain a deep understanding of your operations

Insight apps provide:

- LoB users with **ready-to-use insights**, to improve decision making and **take action** on critical business signals.
- Built by SAP utilizing decades of **industry and functional experience**.
- Insights are enhanced with AI/ML to **uncover hidden insights** and improve decision-making.
- Built on BDC allowing customers to enrich and/or extend insight app's leveraging **SAP and non-SAP data**

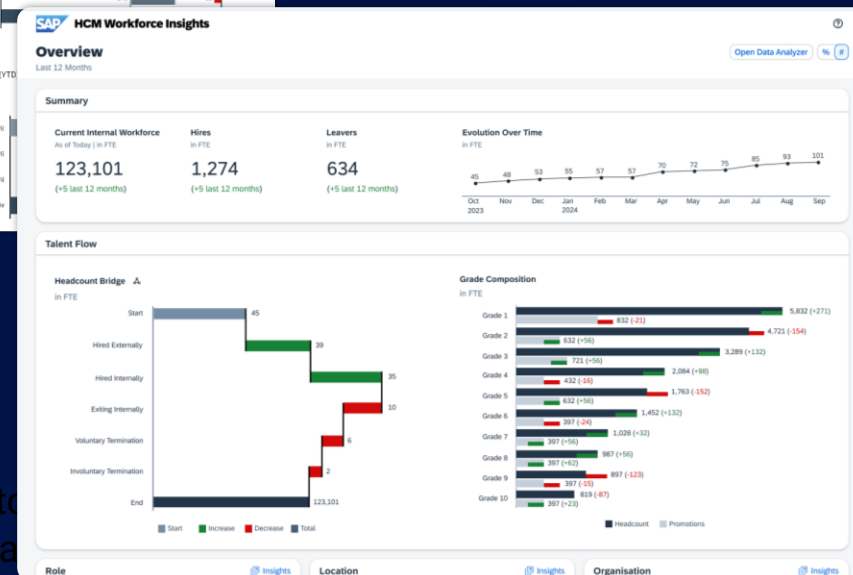

Core Enterprise Analytics

E.g. **Working Capital** - Enabling companies to effectively make use of current assets and maintain sufficient cash flow to meet short-term goals and obligations

People Analytics

Enabling customers to understand their workforce composition and organizational structure.

Enabling customer composition and

Insight Apps across all SAP Application Pillars

Core Enterprise Analytics

- Working Capital
- Finance Foundation
- Sales Analysis
- Enterprise Asset Mgt
- Service Analysis
- Solution Business
- ++

Spend Analytics

- Spend Control Tower
- Procurement analysis
- Supplier risk analysis
- Contract Management
- Consolidated Spend analysis
- ++

People Analytics

- Employee Central
- Learning
- Skills
- Recruiting
- Talent
- ++

Customer Analytics

- Customer Data Platform
- Customer Management
- Sales planning & analysis
- Stock forecasting
- ++

Supply Chain Analytics

- Order Management
- Inventory and Costing
- Procurement
- Manufacturing
- ++

Partner Ecosystem Apps

Re-Think

How we **leverage** analytical data

New BI Dashboard Request

Data Model Change Request

New Extraction Requests for Machine Learning

New Add Hoc Analytics Request

Central Data & AI Team

Fix Broken Data Models

New Planning Simulation Request

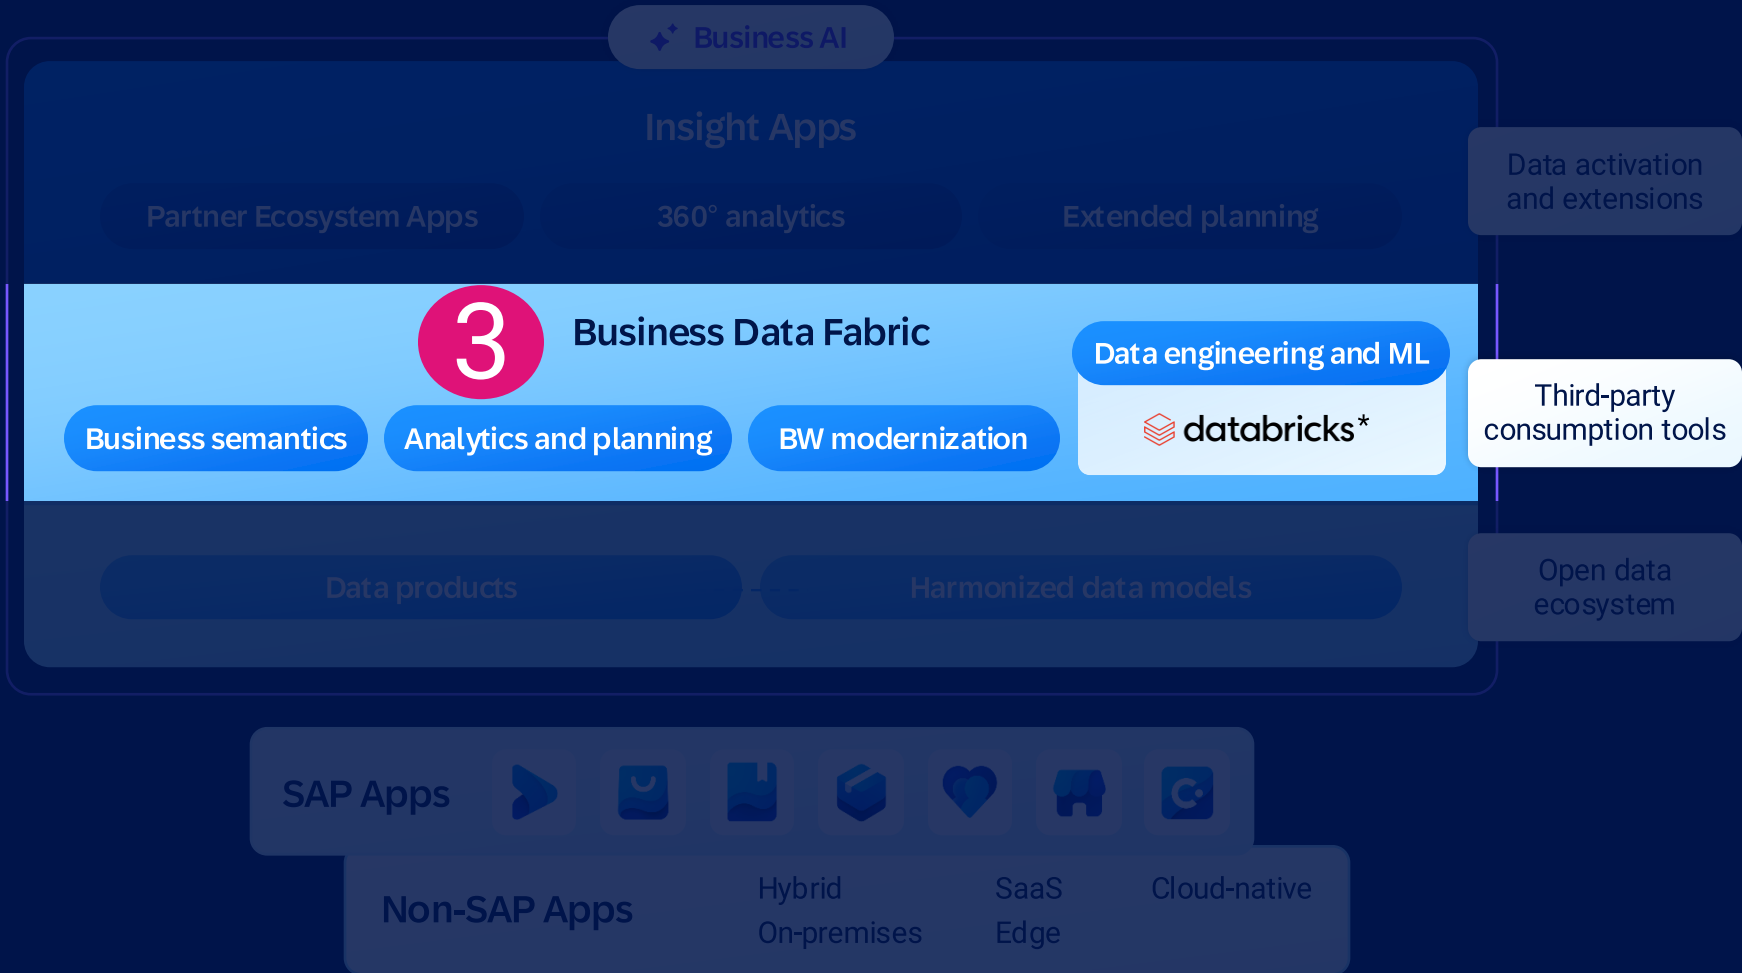

3 Best in Class Analytics, Data Engineering and ML Tooling

Announcing

SAP Business Data Cloud

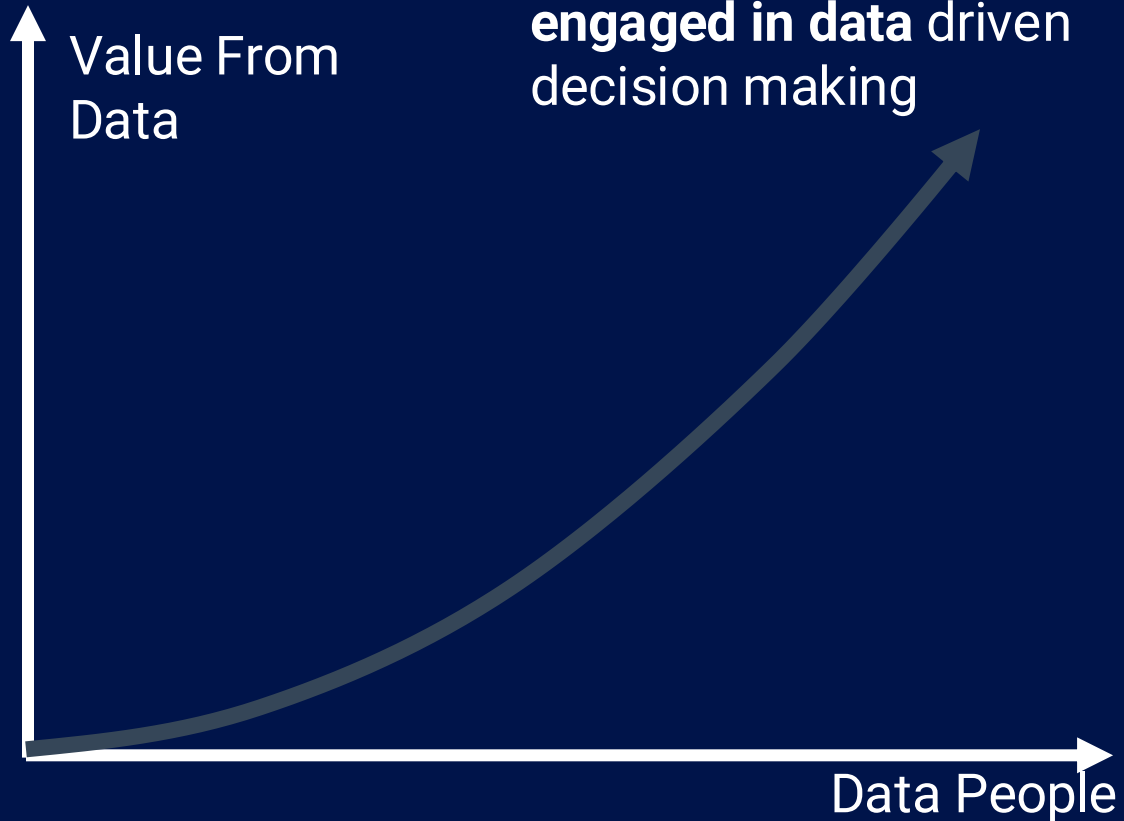

Controlled GA Q1 2025
Full GA April 2025

**Private Preview available Q2 2025*

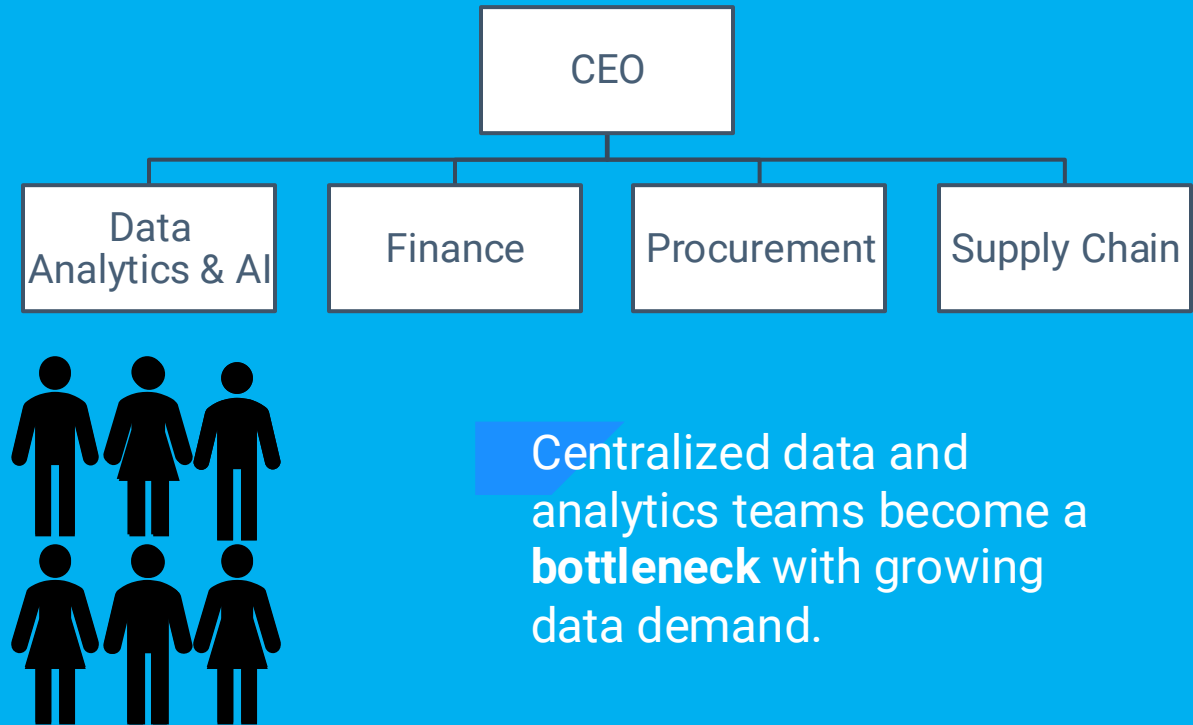

YES

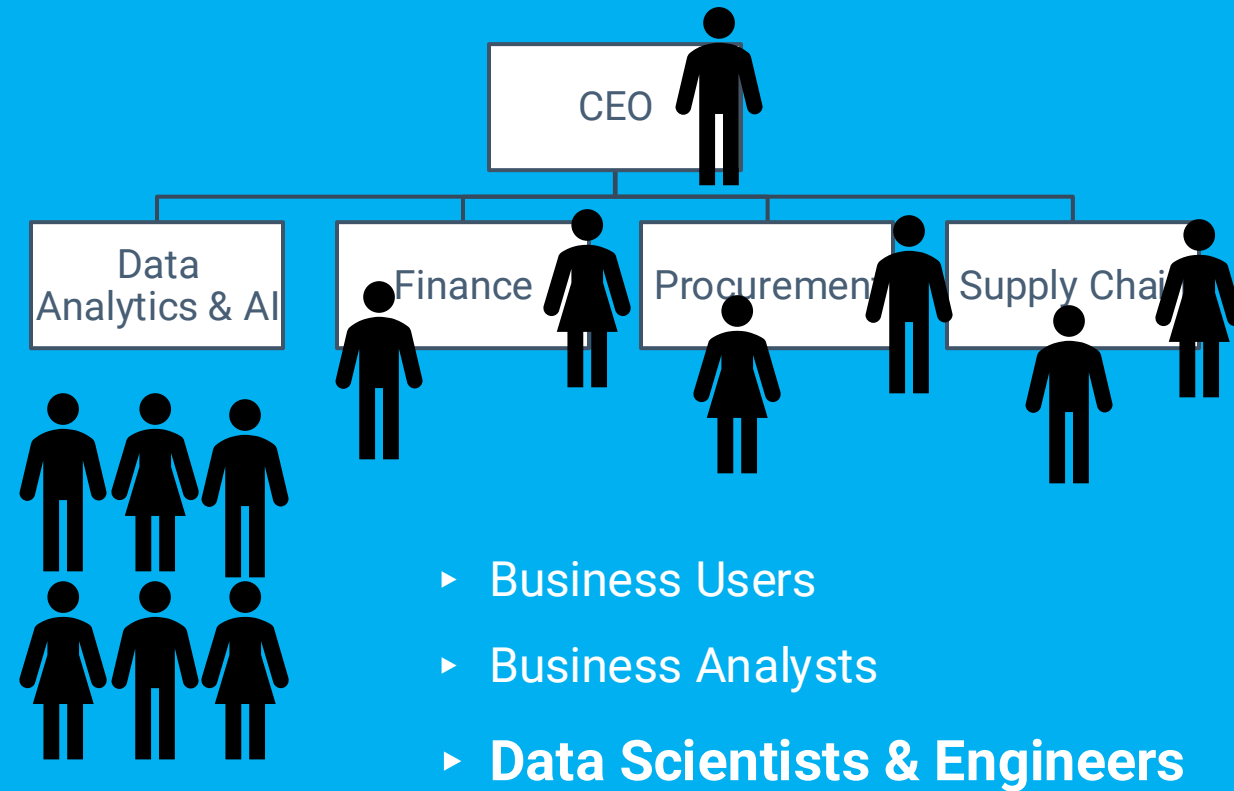

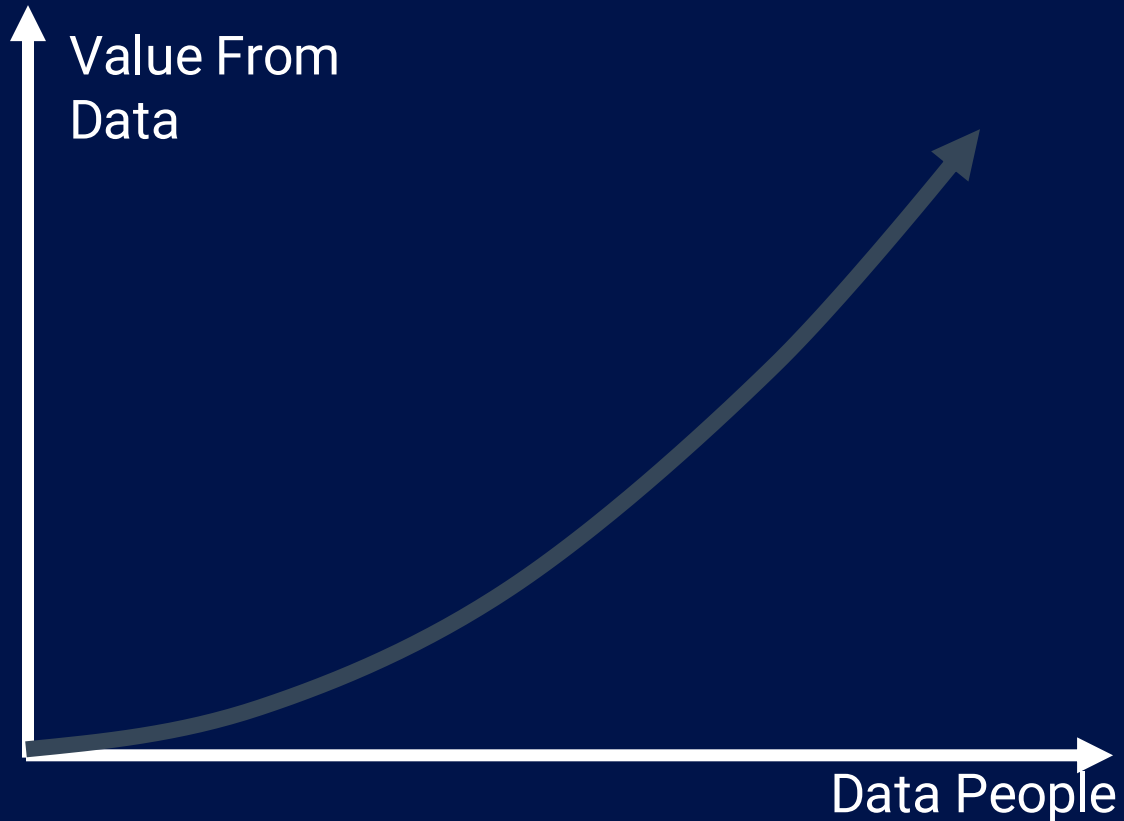

Data Value increases with the number of **people engaged in data** driven decision making

BUT

Mobilize a Large Population of Data Users across Single Unified Platform

Mobilize a Large Population of Data Users – Single Unified Platform

Low Code / No Code

Pro Code

Business User

Prefers predefined dashboards and planning applications.

Business Analyst

Performs ad-hoc analytics and builds dashboards for others. Is comfortable working with data and building data models

Data Scientist

Leverages Python notebooks to create AI and machine learning models

Data Engineer

Build data pipelines and performs complex data transformations.

Infused with AI

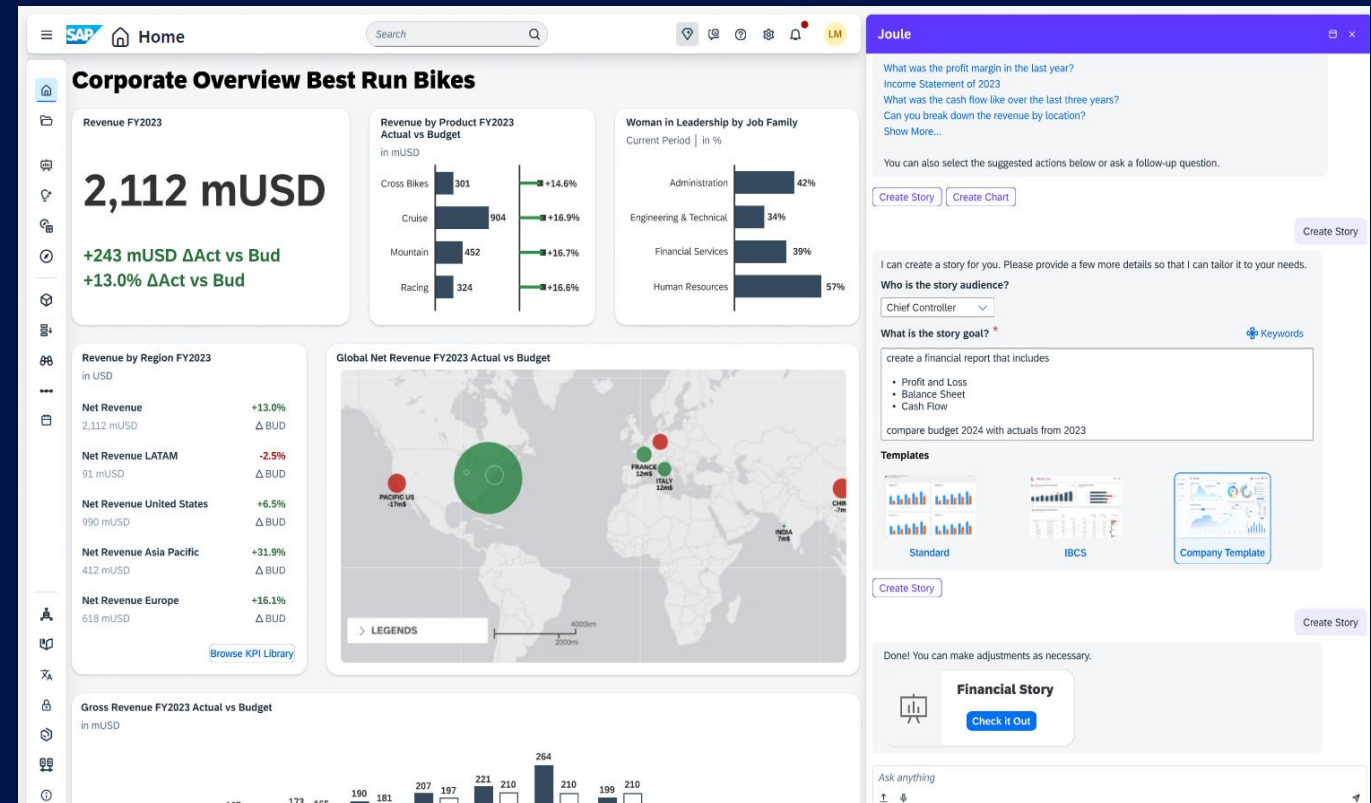

Self Service Analytics and Planning Joule co-Pilot for Analytical Data

Low Code / No Code

Business
User

Business
Analyst

- Joule co-pilot to simplify & automate complex processes for planning and business simulation
- Automate metadata creation of data catalog assets (descriptions, tags, glossary, and KPIs)
- Provide users with simplified access to data, for discovery, understand, and sharing data assets with simple inquiries

Self Service Data

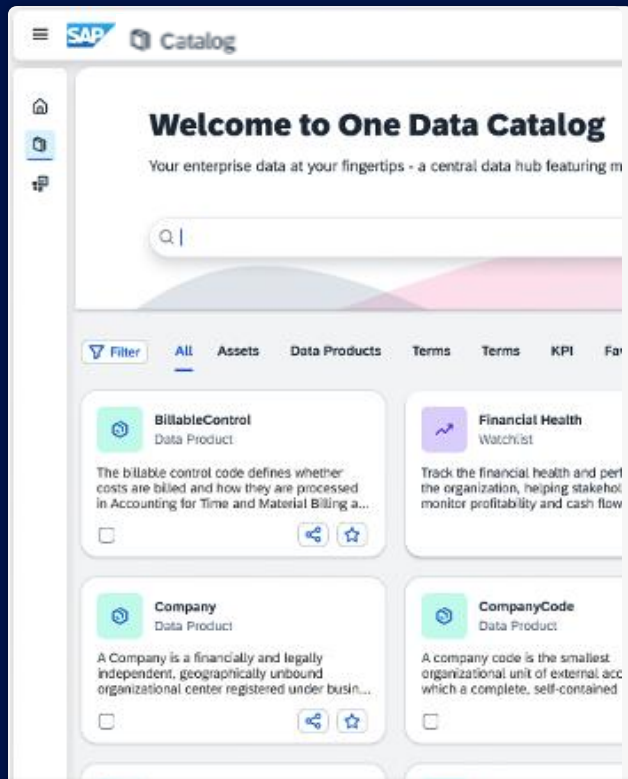

Low Code

Business Analyst

Discover

Discover Data Products in BDC's One Catalog

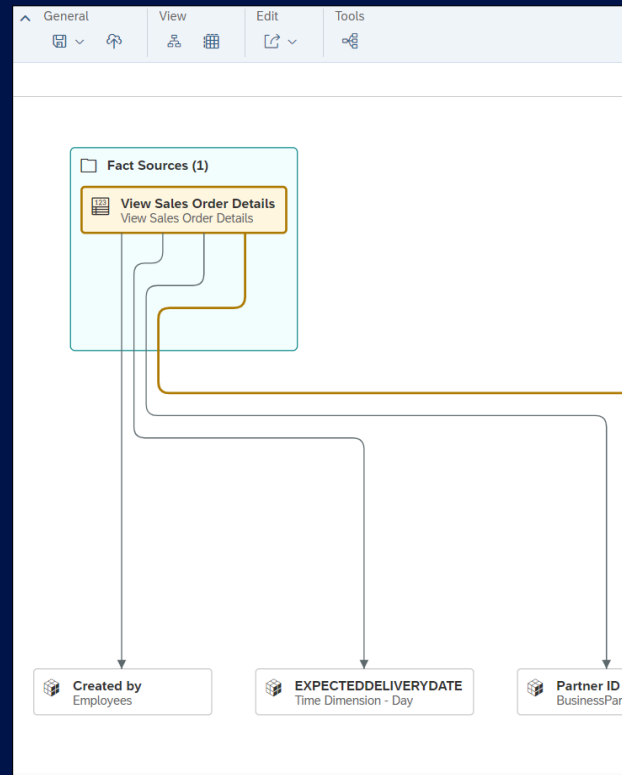

One Data Catalog

Model

Create OLAP Models on the fly

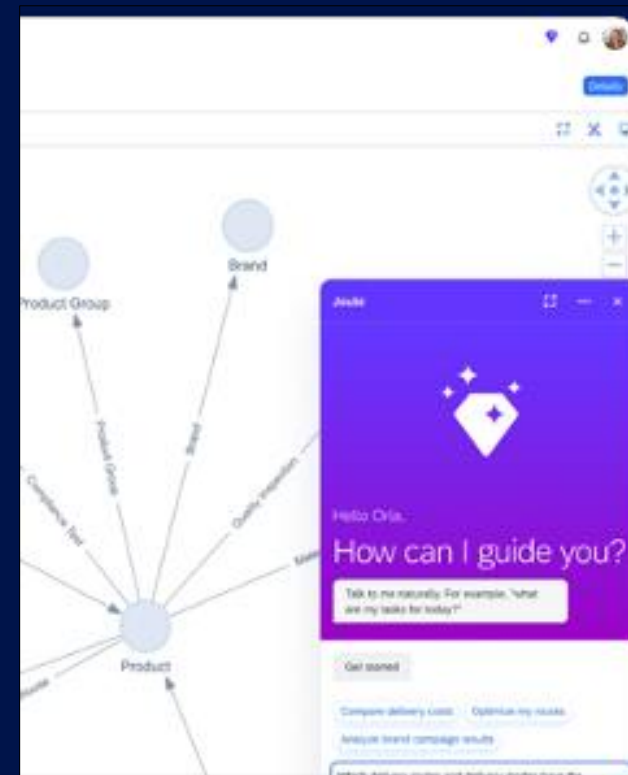

Data Builder - no/low code

Explore

Ask about relationships in your data models

Knowledge Graph

Mobilize a Large Population of Data Users – Single Unified Platform

Low Code / No Code

Pro Code

Business User

Prefers predefined dashboards and planning applications.

Business Analyst

Performs ad-hoc analytics and builds dashboards for others. Is comfortable working with data and building data models

Data Scientist

Leverages Python notebooks to create AI and machine learning models

Data Engineer

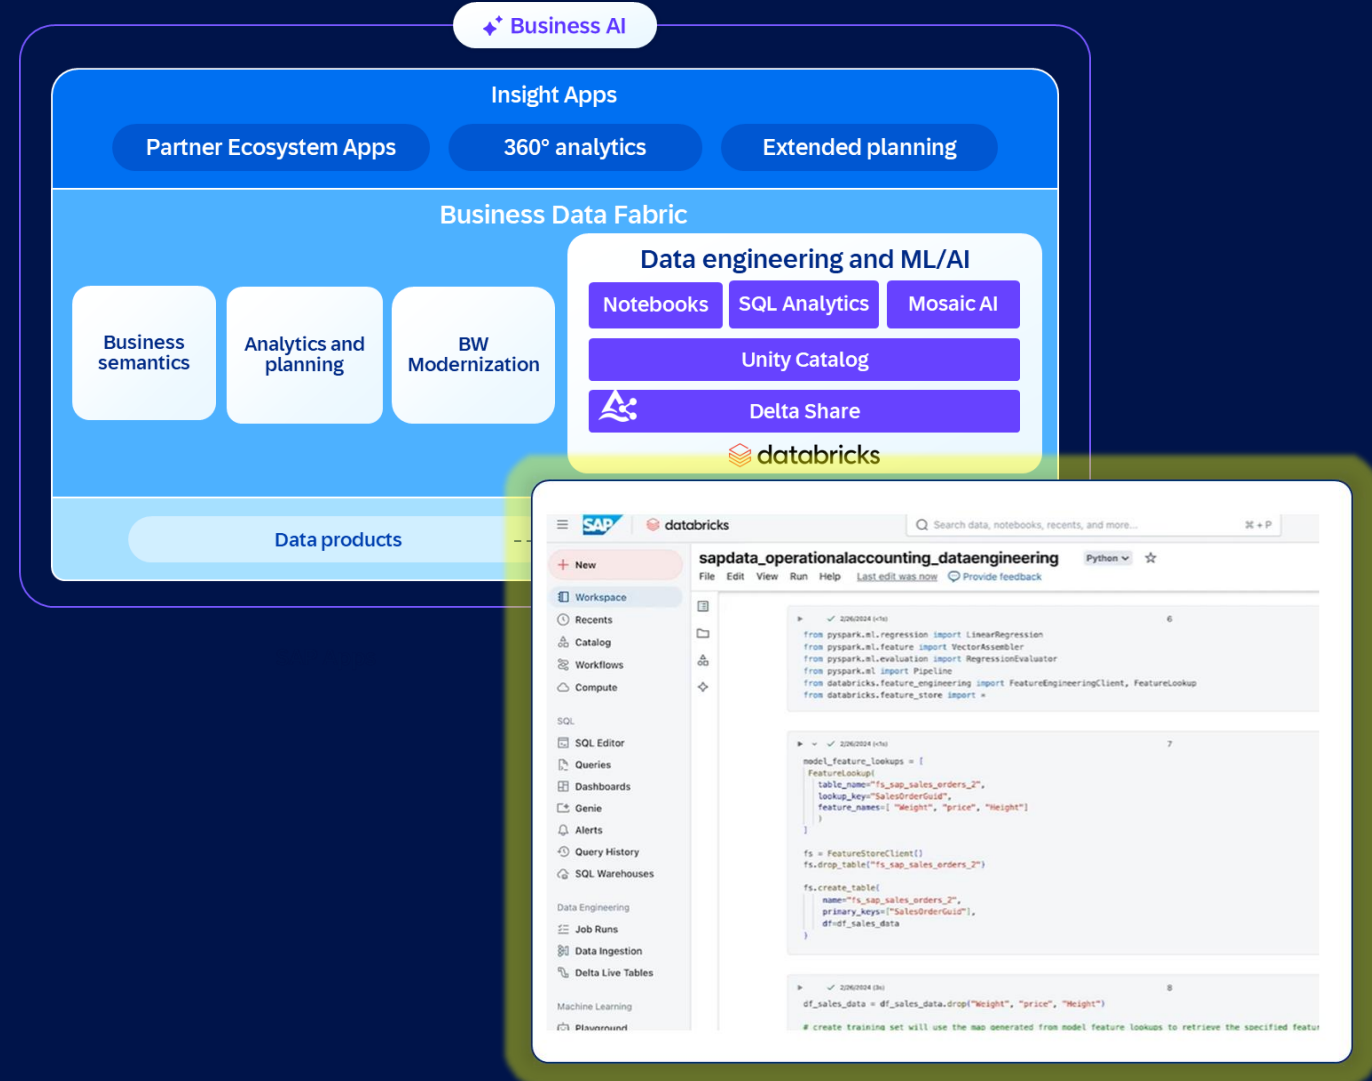

Build data pipelines and performs complex data transformations.

Practical use of AI

Value provided to data science personas

- Access to all data products - trusted, up-to-date SAP data
- One data catalog allows easy access to find all relevant data quickly
- SAP data easily accessible via delta share – no copying of data
- Allows data science roles to work with **familiar tools**
- Easy sharing of AI/ML insights

*Databricks will be part of GA version

**Now let take a look at what
this all adds up to**

**From trusted data to
meaningful AI**
