SAP

SAP Business Unleashed Innovation Day

When you connect everything,
you can achieve anything.

Unleashed

AI+Data+Applications

Game-Changing Automation for Operational Excellence

Kynan Jones – SAP Cloud Architect

The promise of automation

Speed up processes

Reduce errors

Free up time

But traditional automation had challenges...

Focus on automating individual tasks

Fragmented and incomplete automation
Emphasis on individual tasks, missing the full business process scope

Bot proliferation
Many narrow bots create complexity and increase management overhead

Brittle and expensive
UX-first automation breaks when underlying processes change

It's time for a different approach

Fragmented and incomplete automation
Emphasis on individual tasks, missing the full business process scope

Bot proliferation
Many narrow bots create complexity and increase management overhead

Brittle and expensive
UX-first automation breaks when underlying processes change

Top Differentiators

A holistic hyperautomation strategy

Security & simplicity to enable fusion team development

Extensive industry and Line of Business solutions & third-party connectivity
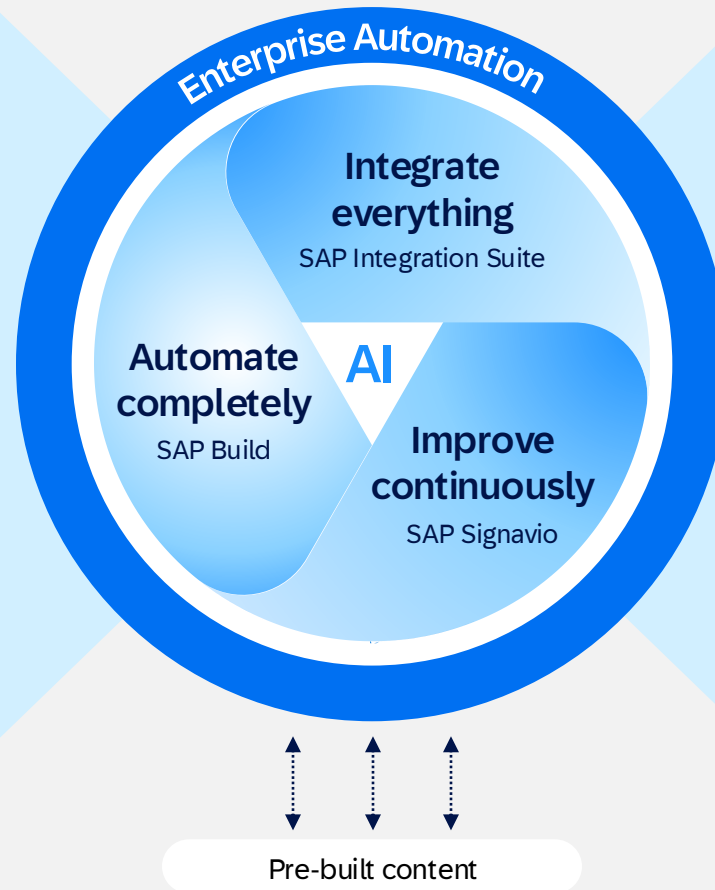

Integrated Business AI capabilities

Fault tolerant UX automation

Only enterprise automation solution built on the foundation of business processes vs. bolt-on alternatives

Enterprise Automation with SAP

Future-proof your journey to become an intelligent and automated enterprise

Enterprise Automation

Integrate everything
SAP Integration Suite

AI

Automate completely
SAP Build

Improve continuously
SAP Signavio

Pre-built content

- Integrate applications
- Discover inefficiencies
- Automate processes

Across heterogenous environments

Improve Continuously
Automate What Matters: SAP Signavio Helps Identify Opportunities for Automations and Act on Insights
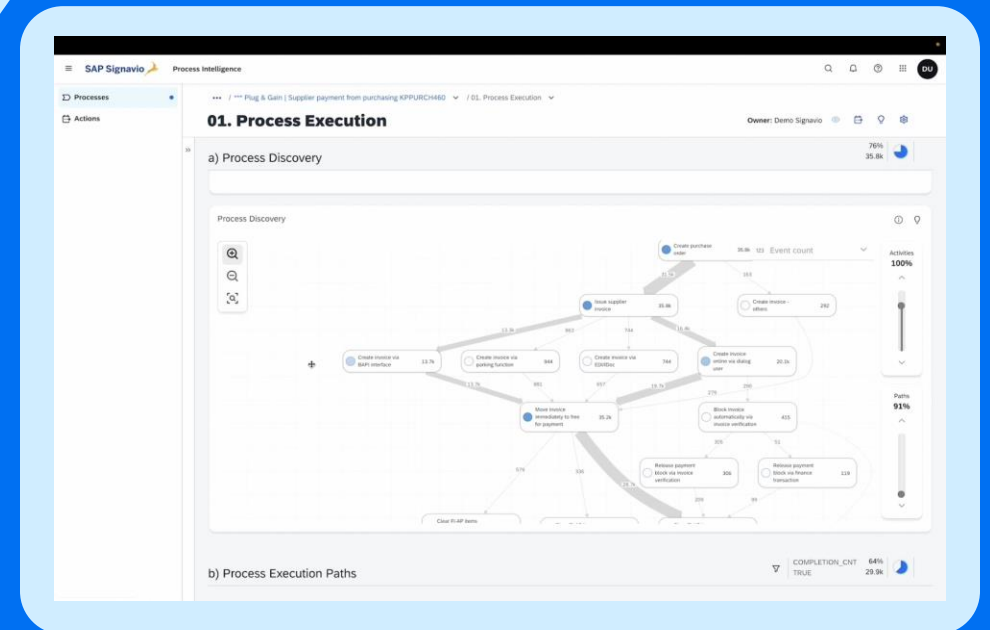

Comprehensive process analysis & mining across multiple enterprise applications

Compare process performance and run simulations using performance benchmarks from thousands of customers

Optimize processes and translate insights into action by leveraging prebuilt business content

Automate SAP Signavio models using SAP Build, raise business events and trigger processes for corrective actions

SAP Signavio

Automate Completely
SAP Build Helps You Automate Across the Enterprise to Improve Efficiency and Reduce Errors
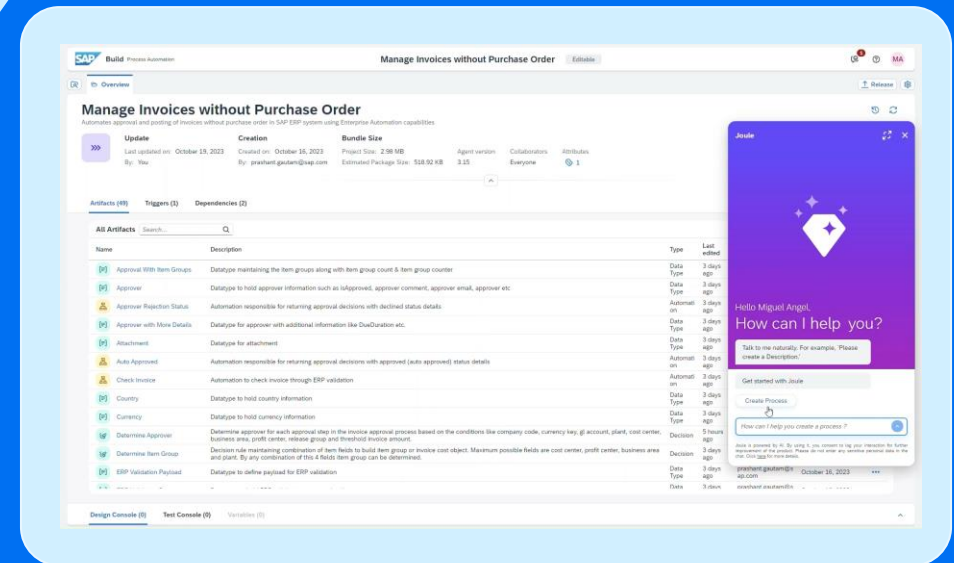

Build apps, workflows, automations and business sites using visual tools

Quicken time-to-value with pre-built automation packages and built-in AI for document processing and decision support

Intelligent recommendations to assist in information extraction and decision making - use built in AI models or leverage custom models

Integrate with partner solutions for complex task automations with connectivity to non-SAP applications

SAP Build

Integrate Everything

Automation Begins with Integration: SAP Integration Suite Is a Single Solution for All Your Integration Needs
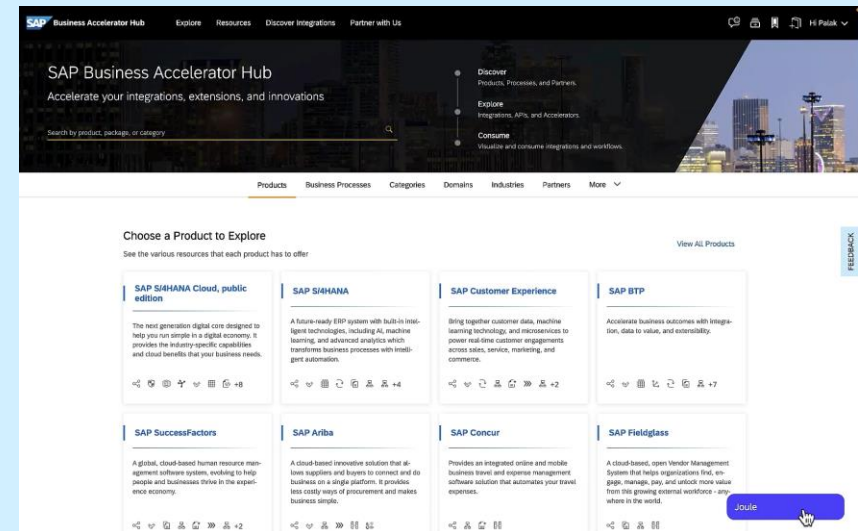

Integrate processes across all your SAP and non-SAP applications in the cloud & on-premises

Enable real-time automation in response to high volume business events using advanced event mesh

Extend integrations to support hybrid and private cloud deployments using Edge Integration Cell
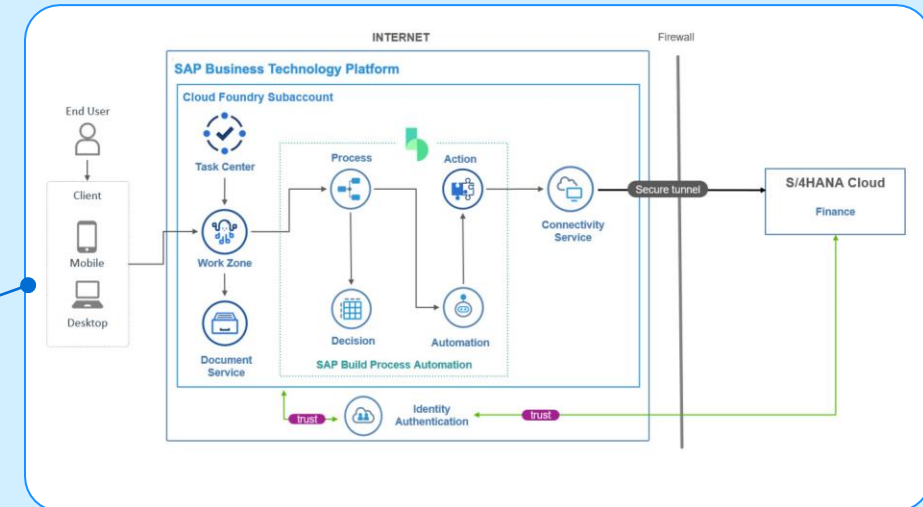

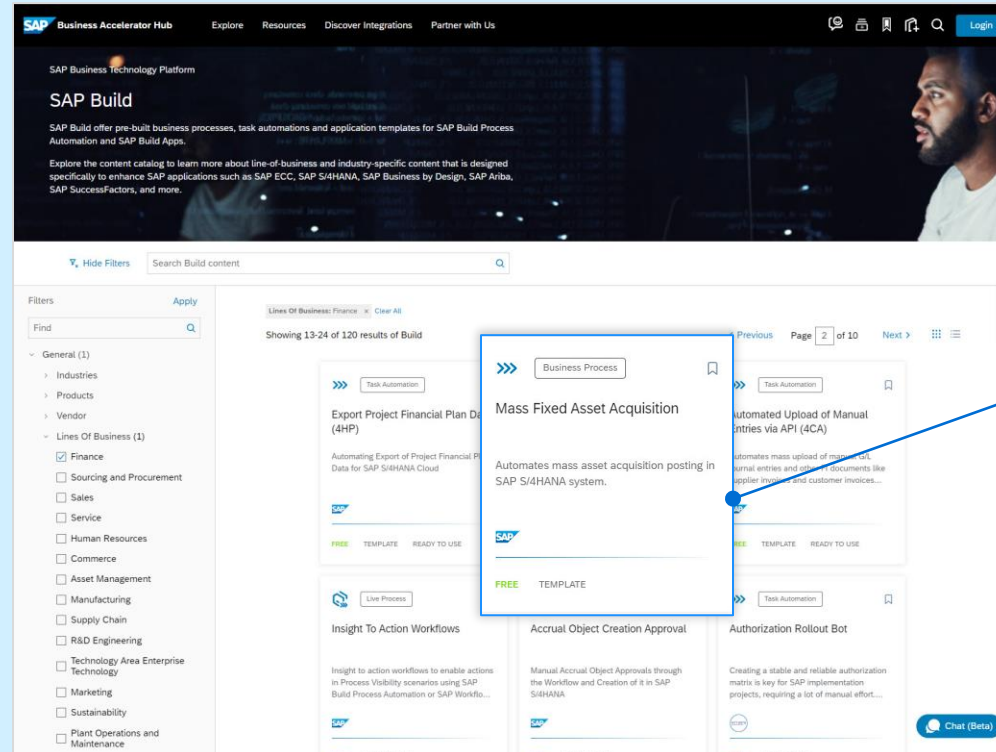

AI based tools for pre-built content recommendations, data mapping and managing APIs

SAP Integration Suite

SAP Business Accelerator Hub
Pre-Built Content to Jumpstart Your Automations –
Fully Maintained and Updated by SAP

250+
connectors (SAP & non-SAP)

3,900+
prebuilt integrations

1,300+
business events

1,200+
automation content

Visit the SAP Business Accelerator Hub

Bring Your Automations to the Next Level
AI for the Process World

Value of AI for the process world

Increase Developer Productivity
Content recommendation and artifact generation

Reduce Transition Time to Cloud
Automated translation of content to accelerate elevation*

Increase Automation Rate
Improved processing of unstructured data

Improve Operational Excellence
Anomaly detection for proactive monitoring and operations

Knowledge and Context Augmentation
AI-augmented access to process data

What we deliver in Enterprise Automation with SAP

SAP Build Process Automation
- Interactive modeling with recommendation and validation
- Generation and summarization of complex artifacts
- Document Information Extraction

SAP Integration Suite
- Automated generation of Integration scenarios
- AI-based anomaly detection for APIs

SAP Signavio
- Process and performance indicators recommender
- Process analyzer (text to insights)

Capabilities

Demo

Experience Enterprise Automation with SAP for Procure-to-Pay proceses

Thank you
