# Agenda

- 1 SAP Cloud ALM overview for Operations
- 2 OpenTelemetry @ SAP
- 3 SAP Cloud ALM support for SAP BTP
- 4 SAP Cloud ALM support for non-SAP components
- 5 Additional Information

# SAP Cloud ALM overview for Operations

# SAP Cloud ALM

**SAP Cloud ALM** provides businesses with a robust and scalable solution for managing their entire solution landscape in the cloud. It enables faster adoption of innovation and more efficient operations through streamlined processes, increased transparency and improved collaboration.

## Benefits of SAP Cloud ALM

- ✓ **Reduce TCO of solution landscape**
- ✓ **Supports Cloud & Hybrid**
- ✓ **Instantaneously available**
- ✓ **Included in subscription**

## Capabilities of SAP Cloud ALM:

### Implementation

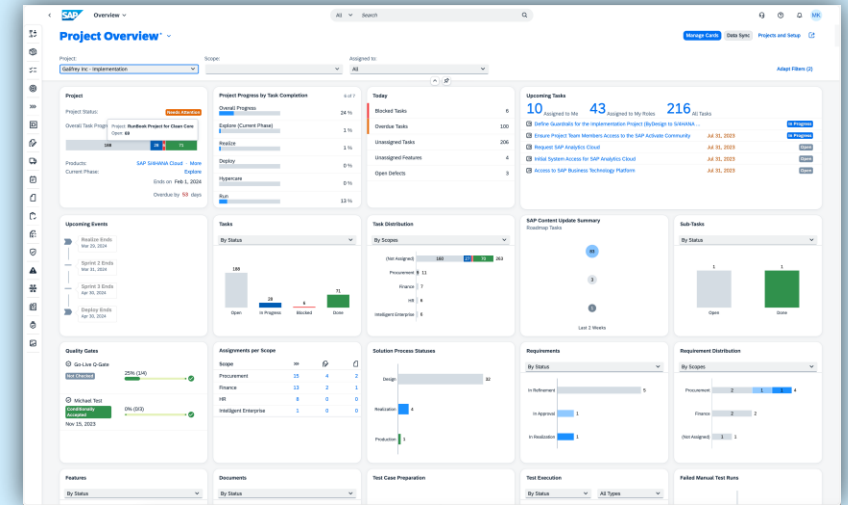

Holistic support for implementation and maintenance of all SAP solutions, covering all aspects from design, build, test and deploy with integrated analytics and traceability

### Operations

Proactive problem detection for integrations, exceptions, jobs, performance and accelerated problem resolution with automated corrective actions integrated into customer service management platform

### Service

Collaborative workspace for consumption of SAP services, management of service results and follow-up activities

## Facts and figures

9200+

Customers around the world

Low TCO

Included in Subscription and Maintenance

Holistic

Supports implementation, Operations & Service

SaaS Native

Solution available across the globe

# Customers Need End-to-End Observability Across ...

## SAP Cloud ALM for Operations

### Cloud and On-premise

How do I monitor my customer solution with BTP center stage?

### SAP and Non-SAP

How do I observe and triage?

### Customer, Partner and SAP Operations

How to foster collaboration between all involved parties?

### All Monitoring Use Cases

How do I monitor business processes, integration, end user experience, exceptions, automation & health?

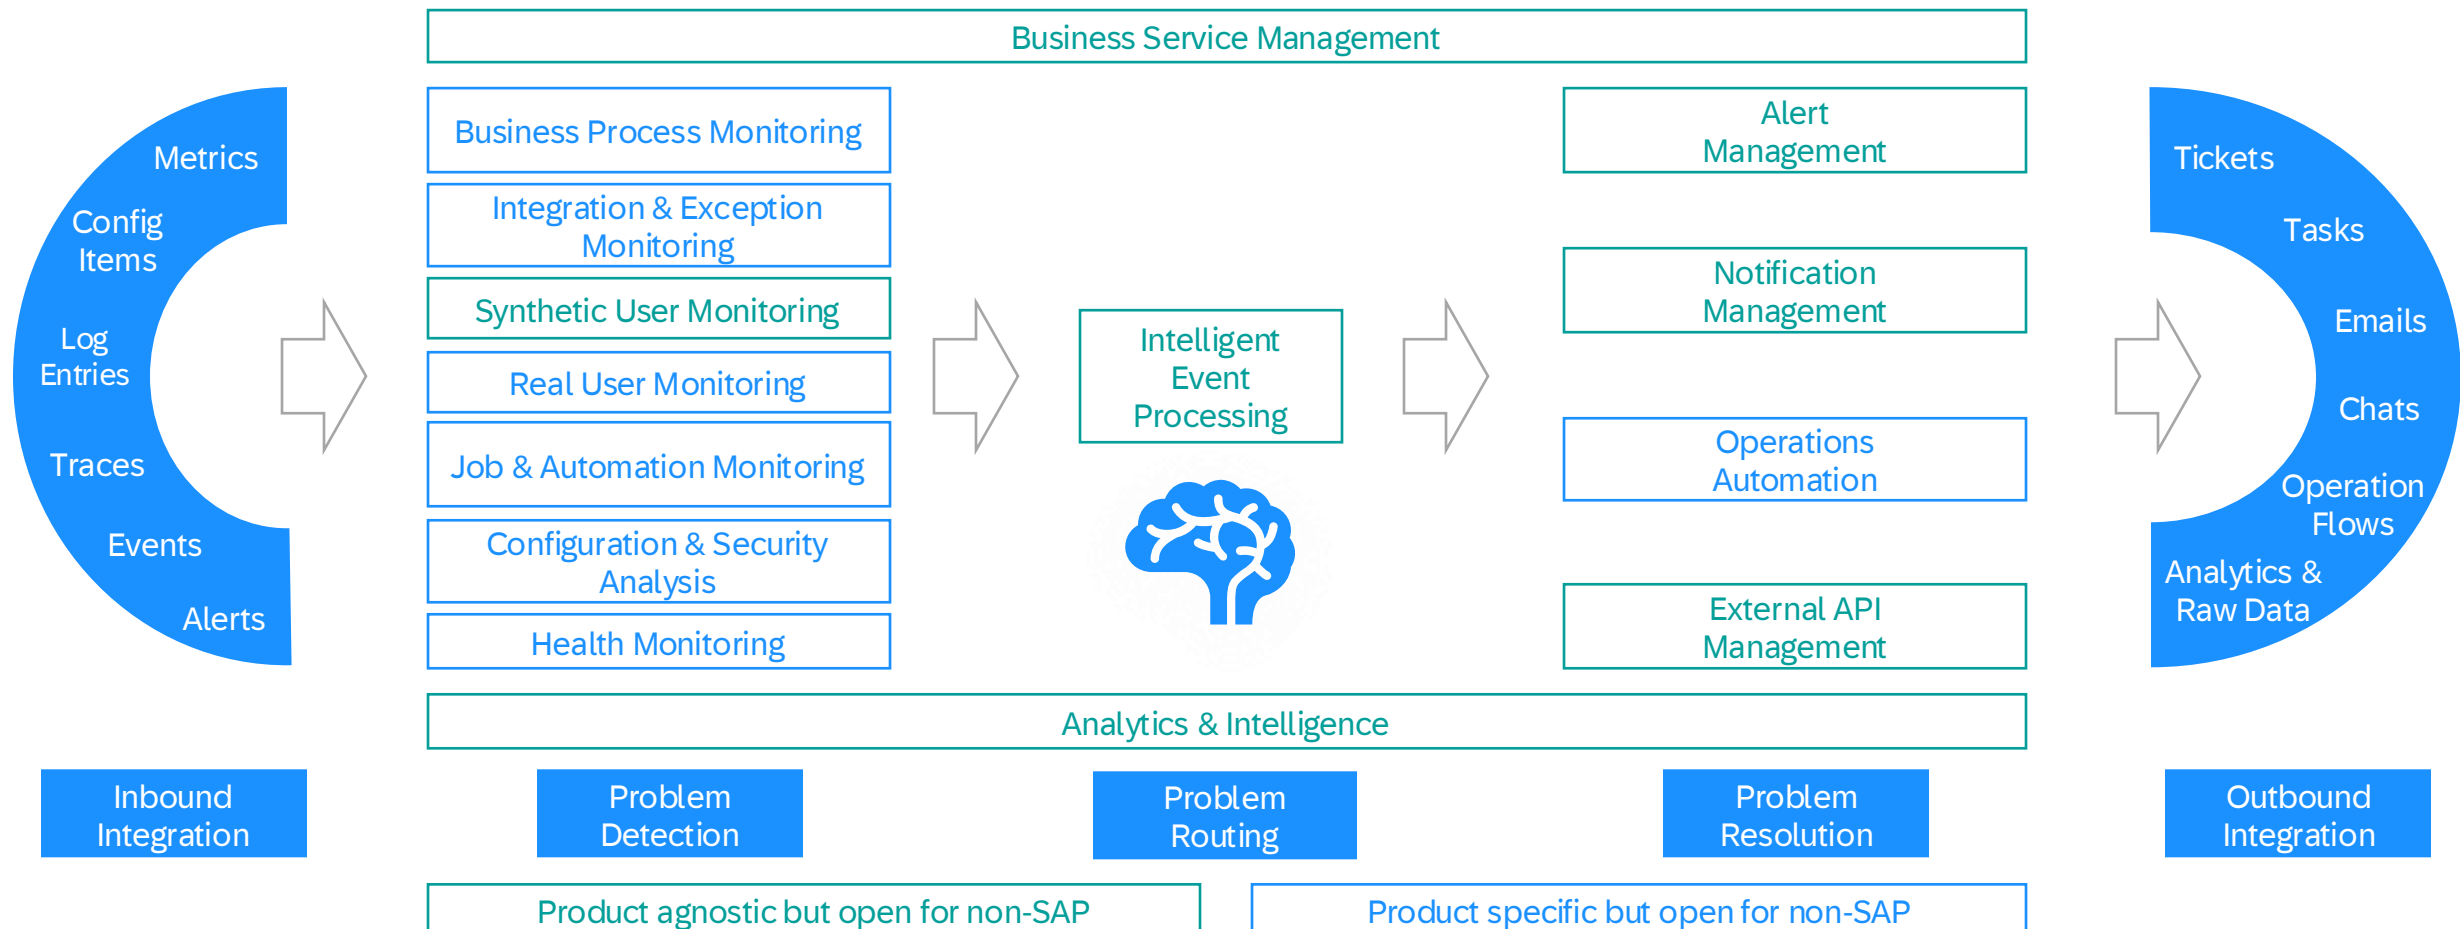

### Quick Problem Resolution

How do I quickly resolve any occurred issue?

# SAP Cloud ALM for Operations – For SAP and Non-SAP

GROW  
WITH  
SAP

RISE  
WITH  
SAP

# SAP Cloud ALM for Operations

By the Numbers

**Live Customers** in SAP Cloud ALM for Operations

**Notifications** and **Incidents** created in 2024

**Health Monitoring Metrics** collected per month in 2024

90+

**SAP Products  
supported by SAP  
Cloud ALM for  
Operations**

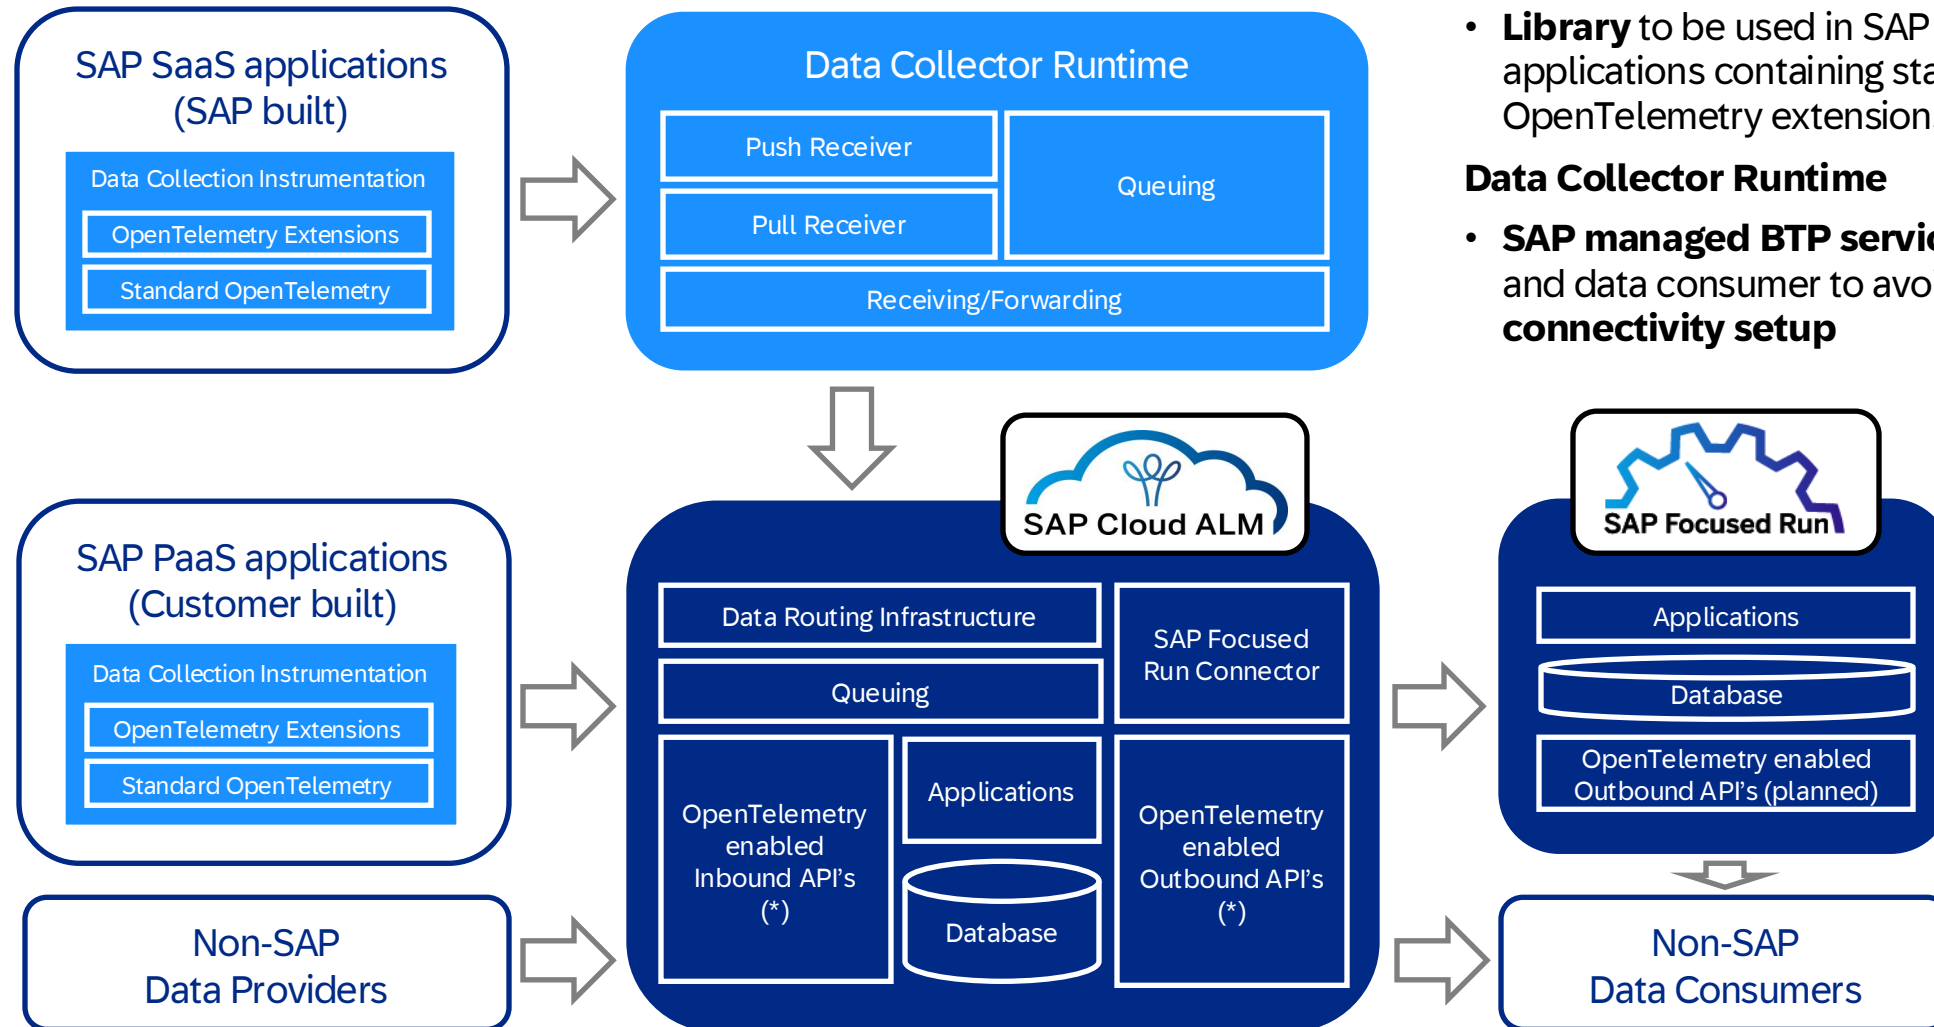

and constantly expanding

# OpenTelemetry @ SAP

# OpenTelemetry @ SAP – Customer Facing Observability

## Data Collection Instrumentation

- **Library** to be used in SAP SaaS and SAP PaaS applications containing standard OpenTelemetry, OpenTelemetry extensions and utility functionality

## Data Collector Runtime

- **SAP managed BTP service** to decouple data provider and data consumer to avoid **customer managed connectivity setup**

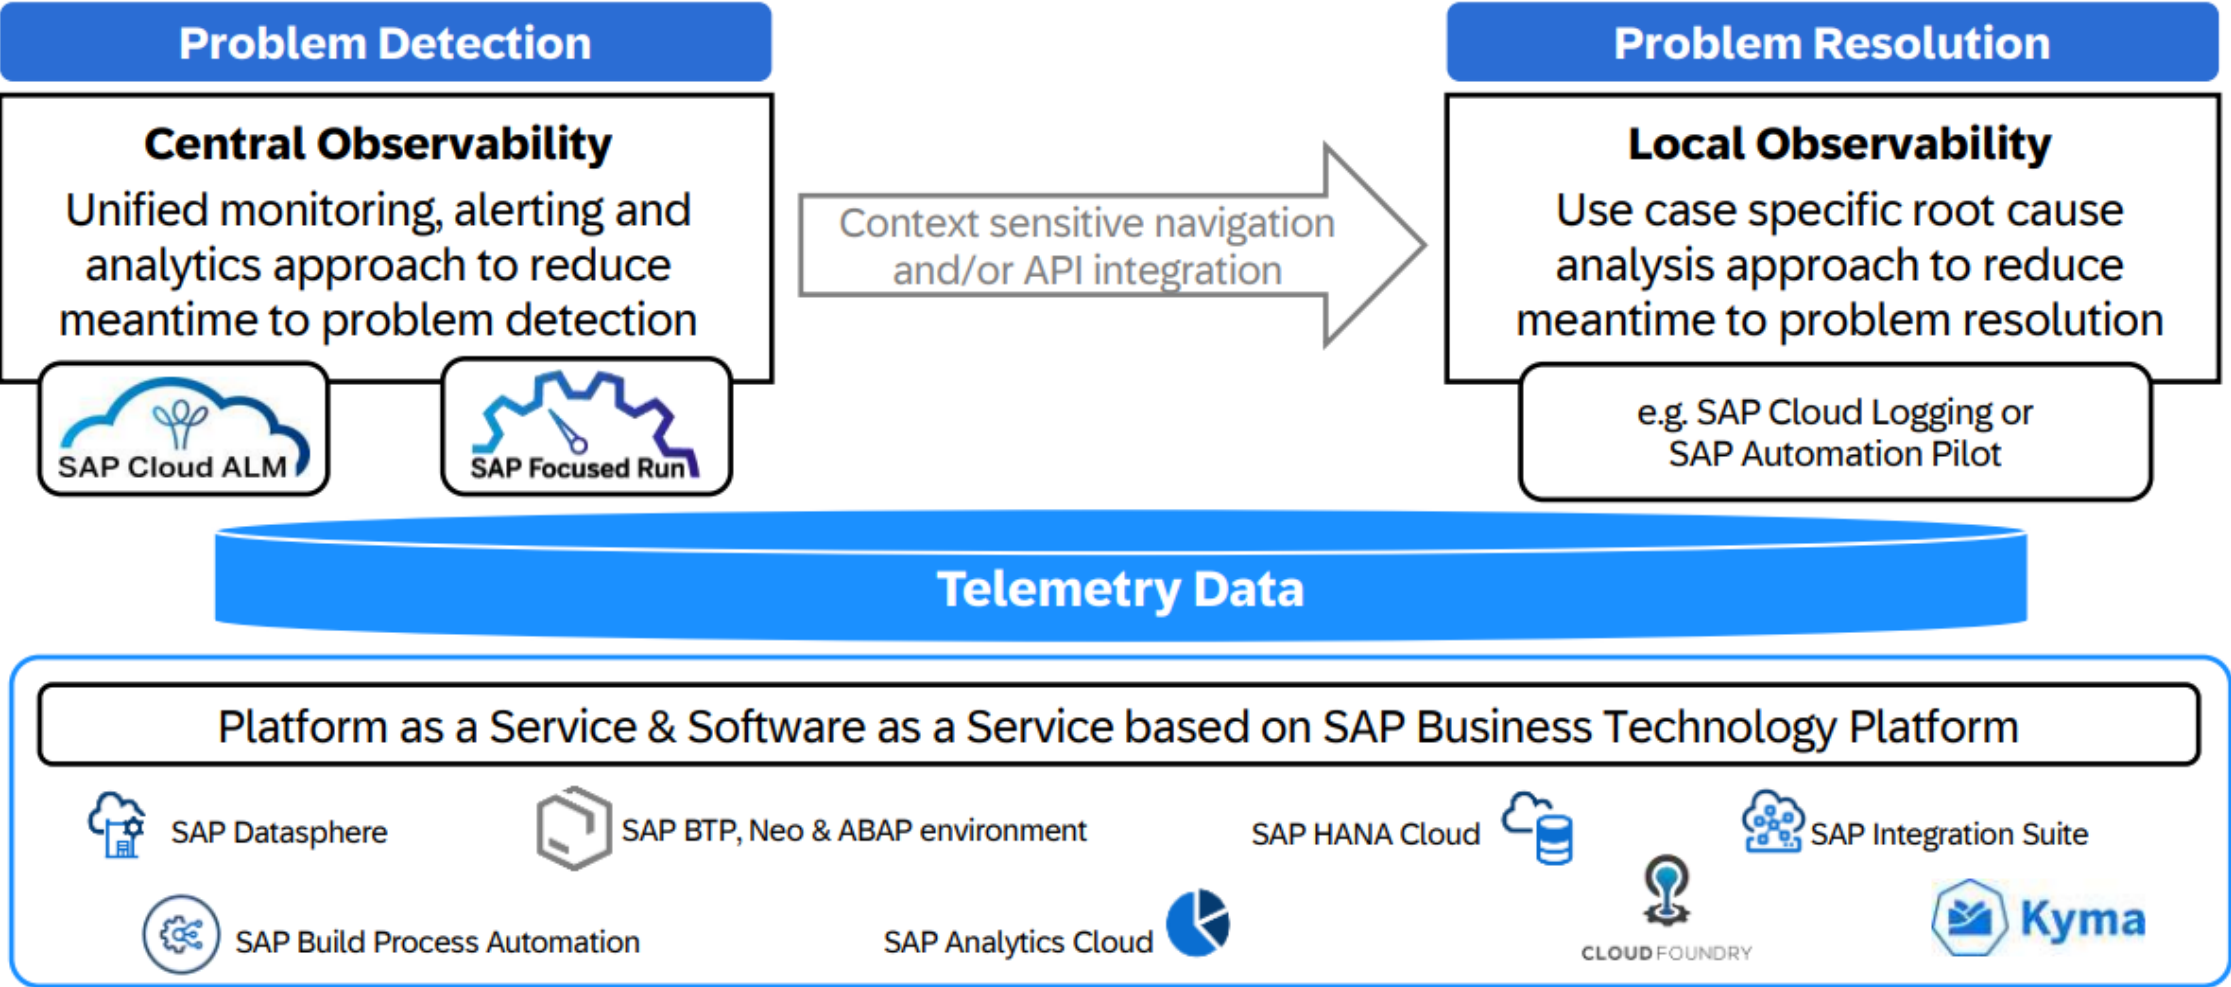

- **OpenTelemetry enabled Inbound API's** to integrate non-SAP data providers
- **OpenTelemetry enabled Outbound API's** to integrate non-SAP data consumers
- **SAP Focused Run Connector** to forward data to SAP Focused Run

(\*) Availability see roadmap

# SAP Cloud ALM Support for SAP BTP

# Problem Detection & Problem Resolution for SAP BTP

# Integration Monitoring for SAP BTP

## SAP Integration Suite Cloud Integration

- Monitoring of messages technically correlated to e2e message flows
- Find more details [here](#)

## SAP Mobile Services

- Monitoring of message send through SAP Mobile Services
- Find more details [here](#)

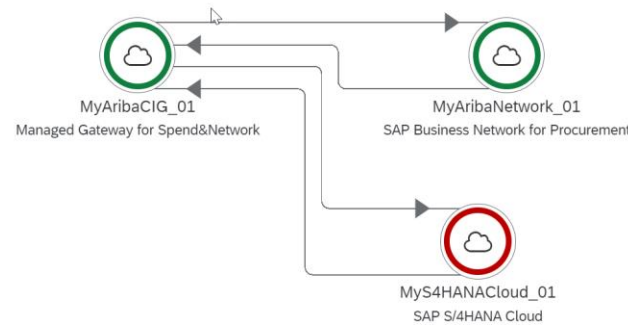

## SAP Event Broker for SAP cloud applications

- Monitoring of events processed via SAP Event Broker
- Find more details [here](#)

## Integration Monitoring

- Unified monitoring of integration artefacts
- Correlation of e2e message flows

## SAP Master Data Integration

- Monitoring of business objects handled by master data integration
- Find more details [here](#)

## SAP Master Data Governance cloud edition

- Monitoring of AIF messages sent to SAP Master Data Governance
- Find more details [here](#)

## SAP Data Intelligence

- Monitoring of messages sent from and to SAP Data Intelligence
- Find more details [here](#)

# Exception Monitoring for SAP BTP

## SAP Analytics Cloud

- Monitoring of exceptions in activity log, which tracks user activities
- Find more details [here](#)

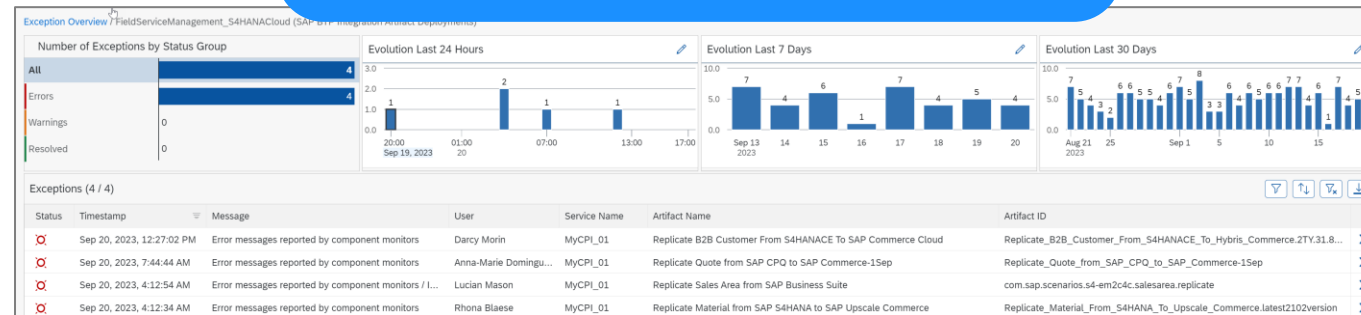

## Exception Monitoring

- Unified monitoring of exceptions
- Visualization of exception details

## SAP Integration Suite Cloud Integration

- Monitoring of exceptions related to integration content
- Find more details [here](#)

## SAP BTP, Neo environment (custom built applications)

- Monitoring of exceptions in custom built java applications
- Find more details [here](#)

## SAP BTP, CF / Kyma env. (custom built applications)

- Monitoring of exceptions in custom built java and node.js applications (OTEL)
- Find more details [here](#)

## SAP BTP, ABAP environment (custom built applications)

- Monitoring of exceptions in custom built ABAP applications
- Find more details [here](#)

# Real User Monitoring for SAP BTP

## Real User Monitoring

- Unified monitoring of end users from performance, functional and utilization perspective
- Correlation of e2e user requests flow based on single request data

### SAP BTP, Neo environment (custom built applications)

- Monitoring of user experience in custom built java applications
- Find more details [here](#)

### SAP BTP, CF / Kyma env. (custom built applications)

- Monitoring of user experience in custom built java and node.js applications (OTEL)
- Find more details [here](#)

### SAP BTP, ABAP environment (custom built applications)

- Monitoring of user experience in custom built ABAP applications
- Find more details [here](#)

# Job & Automation Monitoring for SAP BTP

## SAP Intelligent RPA

- Monitoring of jobs scheduled in SAP Intelligent RPA
- Find more details [here](#)

## Job & Automation Monitoring

Unified monitoring of jobs and automation tasks

## SAP Build Process Automation

- Monitoring of jobs scheduled in SAP Build Process Automation
- Find more details [here](#)

The screenshot shows the SAP Job & Automation Monitoring web interface. The top bar includes the SAP logo, the title "Job & Automation Monitoring", and a "Last Refresh" timestamp of "Sep 20, 2023, 5:50:29 PM". Below the top bar, there's a navigation menu on the left with icons for Monitoring, Services/Systems, and Jobs or Automations. The main content area displays a table of job executions. The table has columns for Name, Type, Execution Status, Application Status, Start Delay, Run Time, Service/System, and Open Alerts. Three rows are visible, all for "SAP Job Scheduling Service Job" in the "MyBtpCloudFoundry\_01" system. The first two rows show failed execution and application status (red X), while the third row shows successful status (green checkmark).

Name	Type	Execution Status	Application Status	Start Delay	Run Time	Service/System	Open Alerts
Products_DeleteProducts	SAP Job Scheduling Service Job	✗	✗	✓	✓	MyBtpCloudFoundry_01	2
Products_UpdateProducts	SAP Job Scheduling Service Job	✗	✗	✓	✓	MyBtpCloudFoundry_01	2
Products_CreateProducts	SAP Job Scheduling Service Job	✓	✓	✓	✓	MyBtpCloudFoundry_01	2

## SAP BTP, CF / Kyma env. (custom built applications)

- Monitoring of jobs scheduled with SAP Job Scheduling Service
- Find more details [here](#)

## SAP BTP, ABAP environment (custom built applications)

- Monitoring of application jobs used in custom built ABAP applications
- Find more details [here](#)

# Configuration & Security Analysis for SAP BTP

## Configuration & Security Analysis

- Regular collection and centralized storage of configuration items and software levels
- Store browser, change analysis and search functionality for mass volume processing

### Credential Store

- Monitoring of security relevant configuration items including recommendations from SAP
- Find more details [here](#)

The screenshot shows the 'Store Browser' interface within the 'SAP Configuration & Security Analysis' application. The breadcrumb path is 'Technical Systems / Configuration Stores of IdentityAuthentication02'. A search bar is present. Below is a table with columns: Landscape object, Description, Store Name, IF, Store Type, and Data range (To). The table lists various configuration items for IdentityAuthentication02.

Landscape object	Description	Store Name	IF	Store Type	Data range (To)
SYSTEM_APP Administration Console	System Application Configuration	IAS_SYS_APP_CONFIG		TABLE	Dec 18, 2023, 4:02:00 AM
SYSTEM_APP User Profile	System Application Configuration	IAS_SYS_APP_CONFIG		TABLE	Dec 18, 2023, 4:02:00 AM
System IdentityAuthentication02	Landscape Information	IAS_LANDSCAPE_INFO		TABLE	Dec 18, 2023, 4:02:00 AM
System IdentityAuthentication02	Identity Authentication Configuration	IAS_CONFIG		TABLE	Dec 18, 2023, 4:02:00 AM
CHARGED_APP test	Charged Application Configuration	IAS_CHARGED_APP_CONFIG		TABLE	Dec 18, 2023, 4:02:00 AM
CHARGED_APP BTP_App2	Charged Application Configuration	IAS_CHARGED_APP_CONFIG		TABLE	Dec 18, 2023, 4:02:00 AM
BUNDLED_APP GBaaS	Bundled Application Configuration	IAS_BUNDLED_APP_CONFIG		TABLE	Dec 18, 2023, 4:02:00 AM
BUNDLED_APP BTP_App1	Bundled Application Configuration	IAS_BUNDLED_APP_CONFIG		TABLE	Dec 18, 2023, 4:02:00 AM
BUNDLED_APP OpenID	Bundled Application Configuration	IAS_BUNDLED_APP_CONFIG		TABLE	Dec 18, 2023, 4:02:00 AM

### Identity Authentication

- Monitoring of security relevant configuration items including recommendations from SAP
- Find more details [here](#)

### Mobile Service

- Monitoring of security relevant configuration items including recommendations from SAP
- Find more details [here](#)

### Destination Service

- Monitoring of security relevant configuration items including recommendations from SAP
- Find more details [here](#)

# Health Monitoring for SAP BTP

## SAP Integration Suite

Monitoring of technical KPI's in [Cloud Integration](#) and [API Mgmt.](#)

## SAP HANA Cloud

Monitoring of technical KPI's for [SAP HANA Cloud](#)

## SAP Cloud Connector

Monitoring of technical KPI's for [SAP Cloud Connector](#)

## SAP BTP, Neo environment (custom built applications)

Monitoring of technical KPI's in [custom built java applications](#)

## Health Monitoring

Monitoring of technical KPI's for BTP SaaS and PaaS

## SAP BTP, CF / Kyma env. (custom built applications)

Monitoring of technical KPI's in [custom built java and node.js applications](#) (OTEL)

## SAP Datasphere

Monitoring of technical KPI's for [SAP Datasphere](#)

## SAP Build Process Automation

Monitoring of technical KPI's for [SAP Build Process Automation](#)

## SAP Intelligent RPA

Monitoring of technical KPI's for [SAP Intelligent RPA](#)

## SAP Cloud ALM

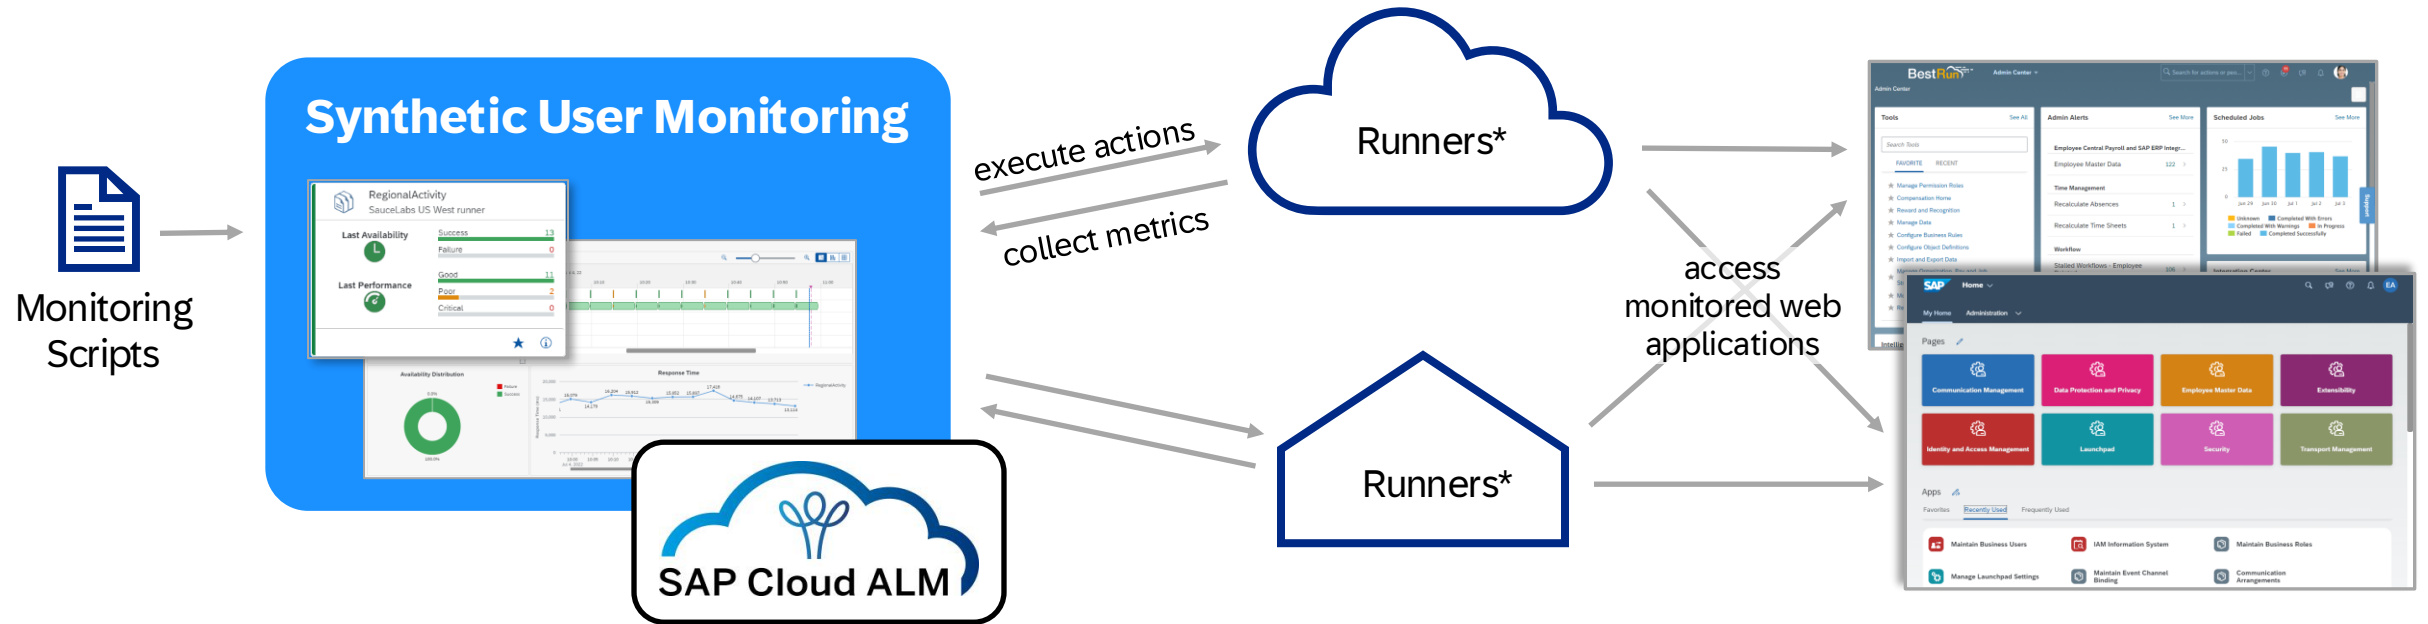

Monitoring of technical KPI's for [SAP Cloud ALM](#)

# Synthetic User Monitoring

## Monitor Performance and Availability of Web Applications from User Perspective

- Monitoring based on custom **Selenium based scripts** → Supports most of the web applications
- Regularly executed on **Selenium remote webdriver infrastructures**
- **Proactive problems detection:** 24x7 monitoring enables detection of performance and availability issues before end users are impacted → Runs **independently on real user activities**
- **Comparable measurements:** Monitoring relies on identical **user scenarios regularly executed** → Allows to monitor the **evolution of the performance and availability** based on comparable metrics

Remark: Generic functionality which is available for all SAP BTP SaaS and PaaS services.

# Business Service Management for SAP BTP

## Business Service Management

- SAP BTP SaaS and PaaS services can be summarized to business services in SAP Cloud ALM
- SAP initiated maintenance, disruptions, degradations, and communication events as available in SAP for Me are exposed to customers and can be used for customer specific service level management

The screenshot displays the SAP Business Service Management interface. At the top, the 'Event Calendar' shows a timeline from July 26, 2021, to August 8, 2021. Below the calendar, three panels provide detailed information about a specific event.

**Event Details (1/9):**

- Event Information:**
  - Name: Nightly Deployment
  - Type: Maintenance
  - Source: Customer
  - Start Time: Jul 4, 2021, 10:00:00 PM
  - End Time: Jul 4, 2021, 11:00:00 PM
  - Duration: 1 Hour
  - Created By: mathias.bley@sap.com
  - Created At: Jun 28, 2021, 12:54:38 PM
  - Status: Closed
  - Recurrence: Yes
  - Description: Apply the latest changes to the DEV environment
- Service Information:**

Service Name	Service Type
SAP BTP Development	Business Service

**Event Details (1/9):**

- Action Log:**
  - mathias.bley@sap.com New Maintenance 6/28/21 at 12:54 PM: Apply the latest changes to the DEV environment
  - SAP Status Update 7/4/21 at 9:59 PM: The event status has been set to "In Process".
  - SAP Start 7/4/21 at 9:59 PM: Started: A maintenance event has started for the business service "SAP BTP Development".
  - SAP Status Update 7/4/21 at 10:59 PM: The event status has been set to "Closed".
  - SAP Completed 7/4/21 at 10:59 PM: Completed: A maintenance event has been completed for the business service "SAP BTP Development".

**Event Details (1/9):**

- Service Information:**
  - Service Name: SAP BTP Development
  - Description: BTP tenants which are used for custom development
  - Use Case: BSM
  - Service Source: API
  - Number of Cloud Services: 3

Remark: Generic functionality which is available for all SAP BTP SaaS and PaaS services.

# Additional Information

# Exception Monitoring for SAP BTP

## SAP Analytics Cloud

- Monitoring of exceptions in activity log, which tracks user activities
- Find more details [here](#)

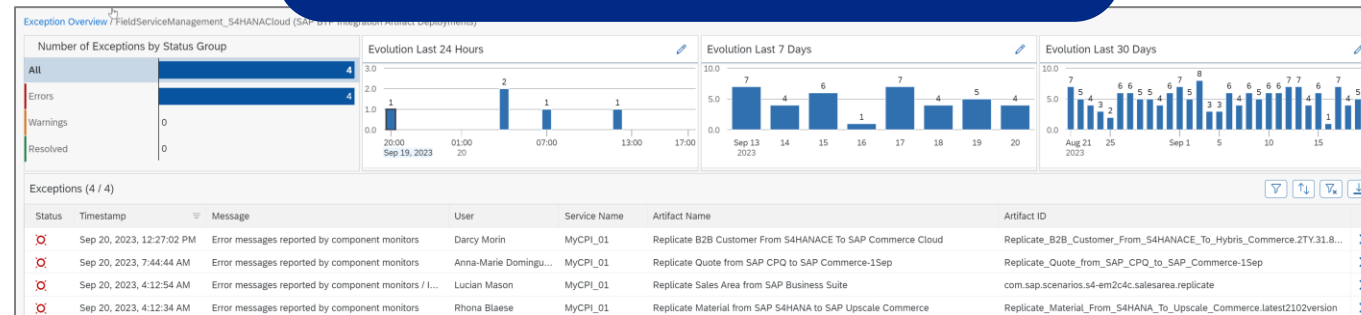

## Exception Monitoring

- Unified monitoring of exceptions
- Visualization of exception details

## SAP Integration Suite Cloud Integration

- Monitoring of exceptions related to integration content
- Find more details [here](#)

## SAP BTP, Neo environment (custom built applications)

- Monitoring of exceptions in custom built java applications
- Find more details [here](#)

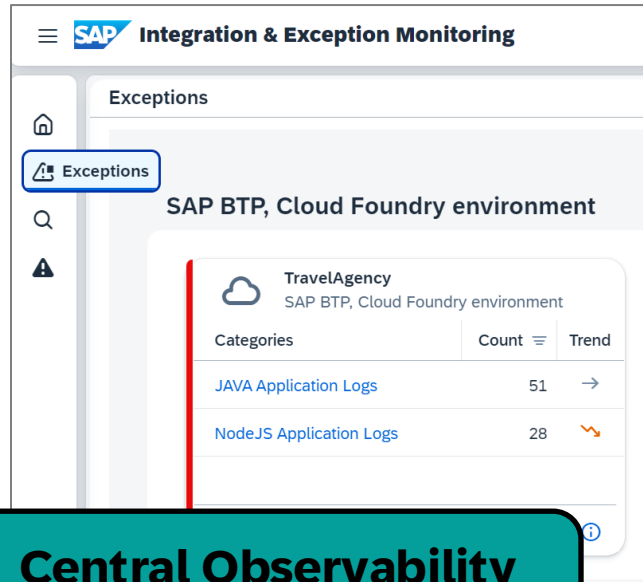

## SAP BTP, CF / Kyma env. (custom built applications)

- Monitoring of exceptions in custom built java and node.js applications (OTEL)
- Find more details [here](#)

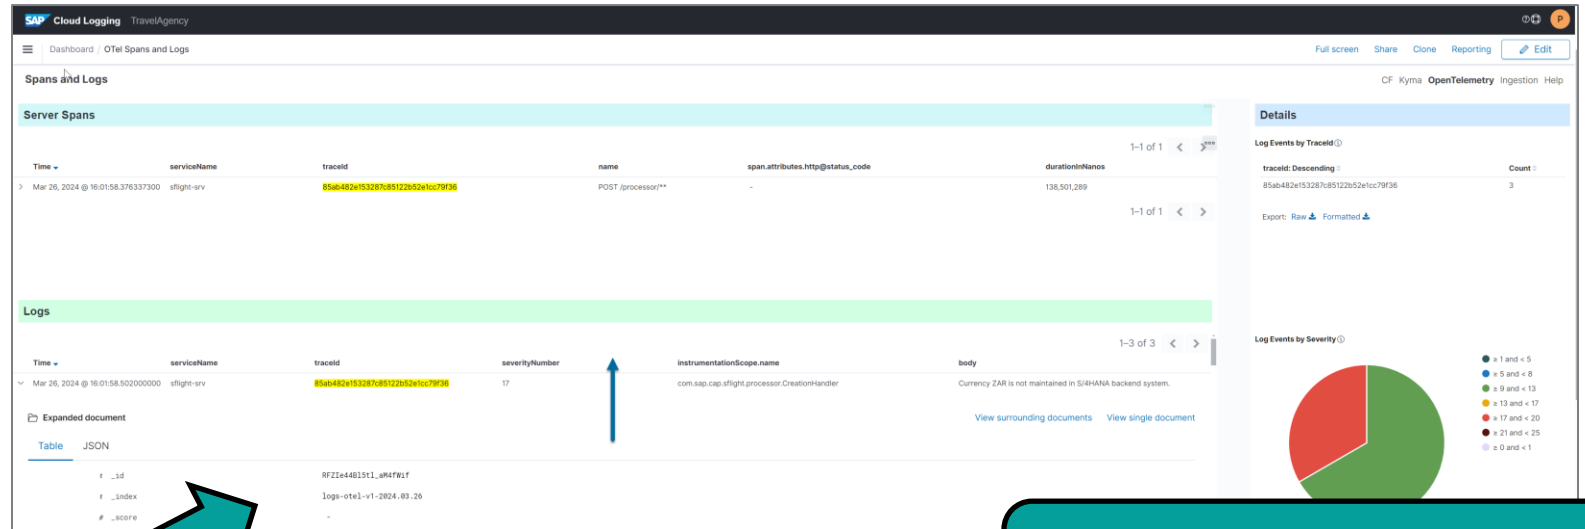

## SAP BTP, ABAP environment (custom built applications)

- Monitoring of exceptions in custom built ABAP applications
- Find more details [here](#)

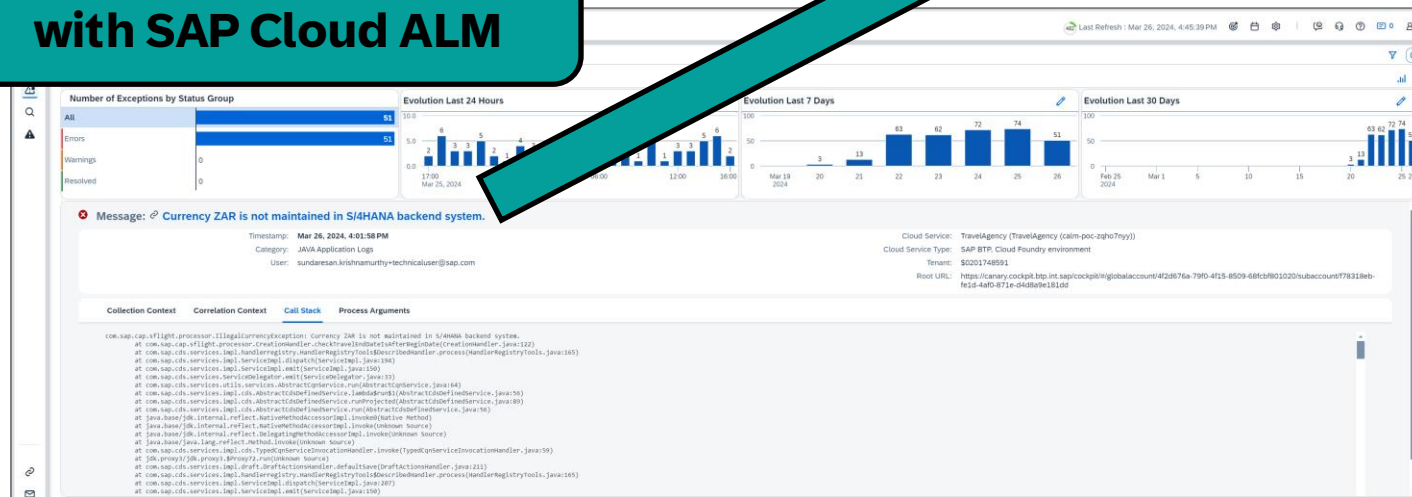

# Exception Monitoring for custom applications built on SAP BTP

**Central Observability with SAP Cloud ALM**

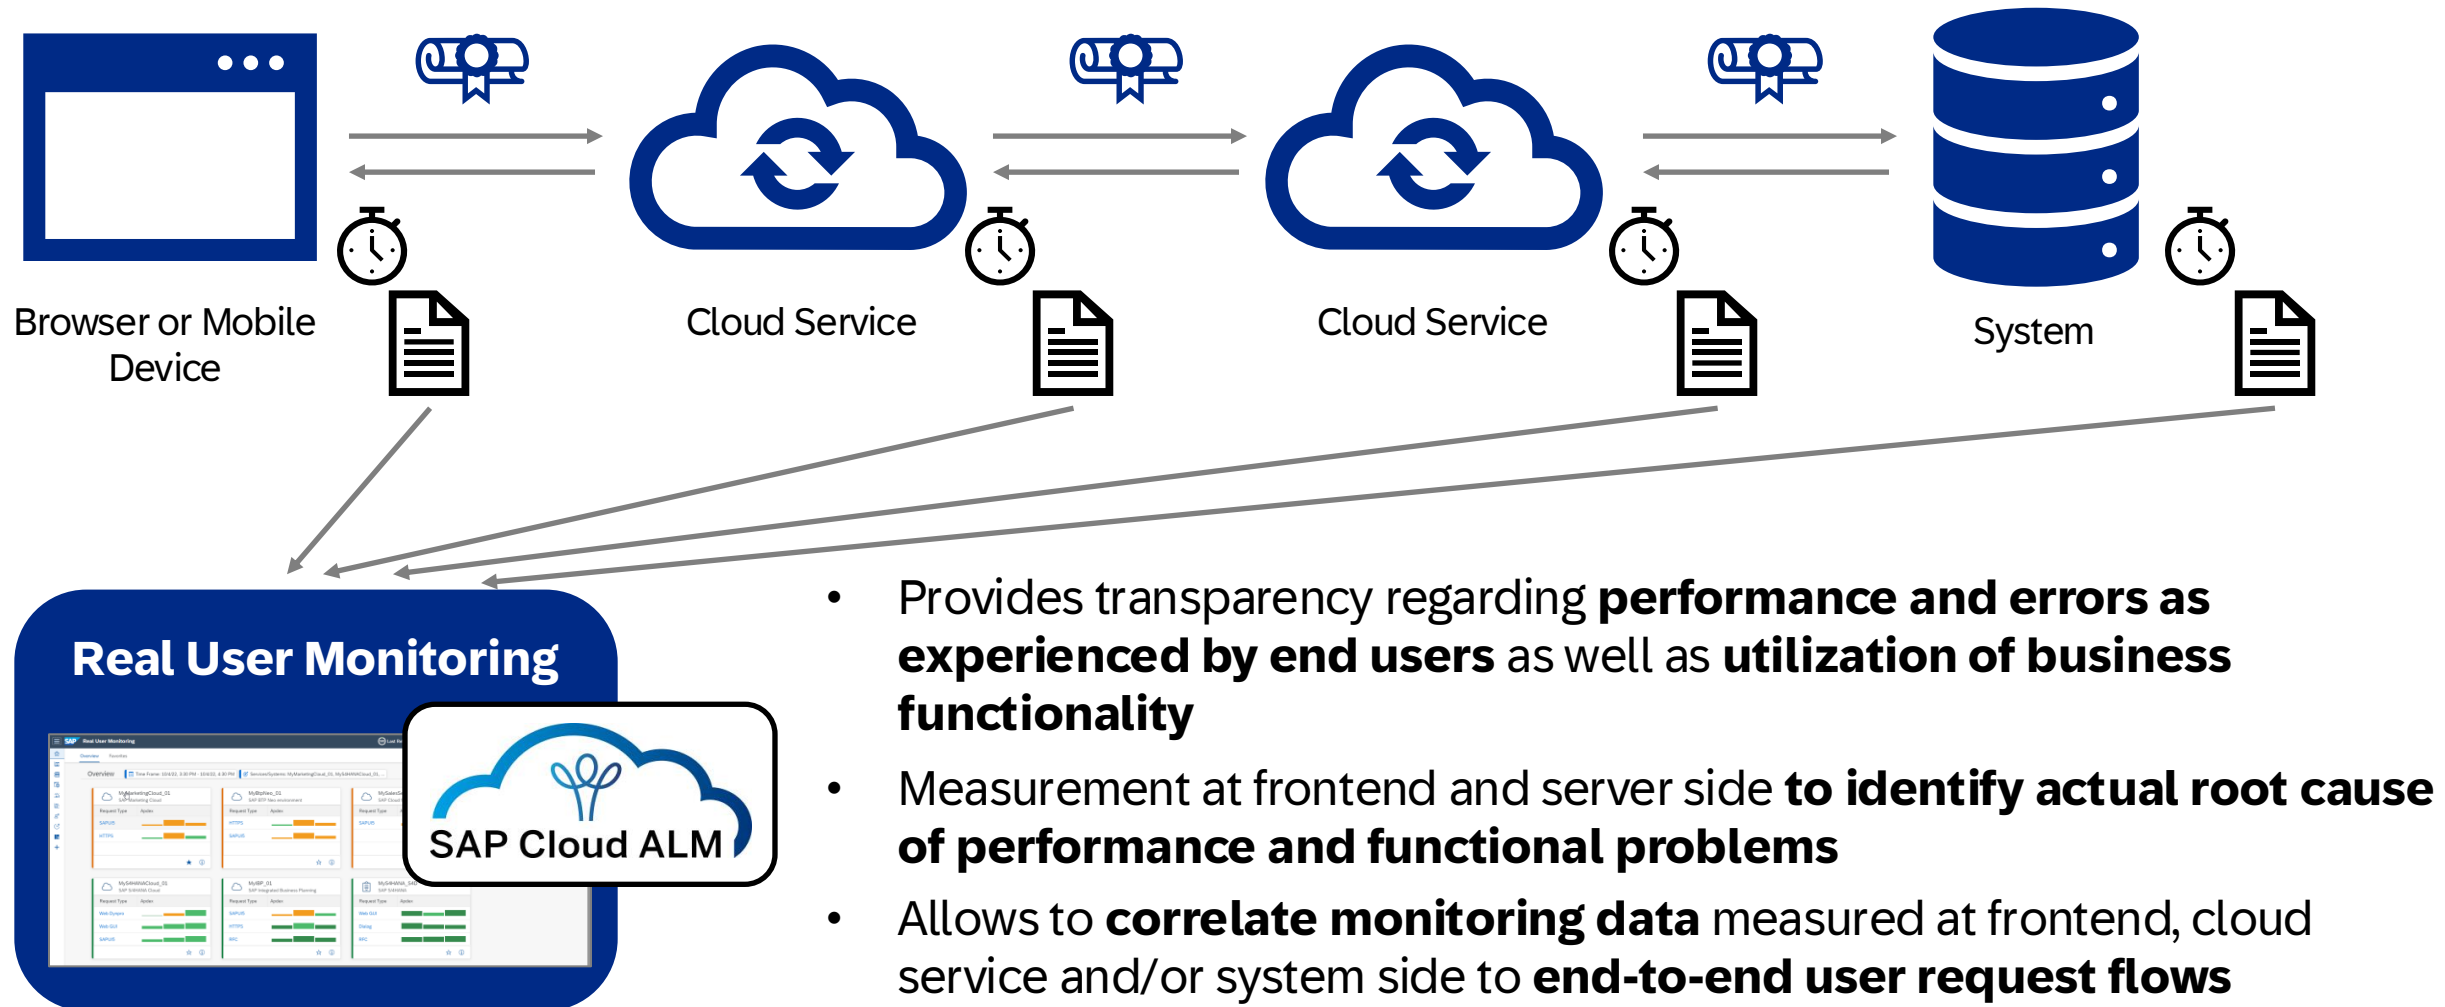

**Local Observability with SAP Cloud Logging**

- Context-sensitive navigation from Exception Monitoring in SAP Cloud ALM to SAP Cloud Logging
- Log entries are retrieved by Open Telemetry based on auto instrumentation and forwarded to both tools

# Real User Monitoring

Allow to Understand Performance and Utilization from End User Perspective

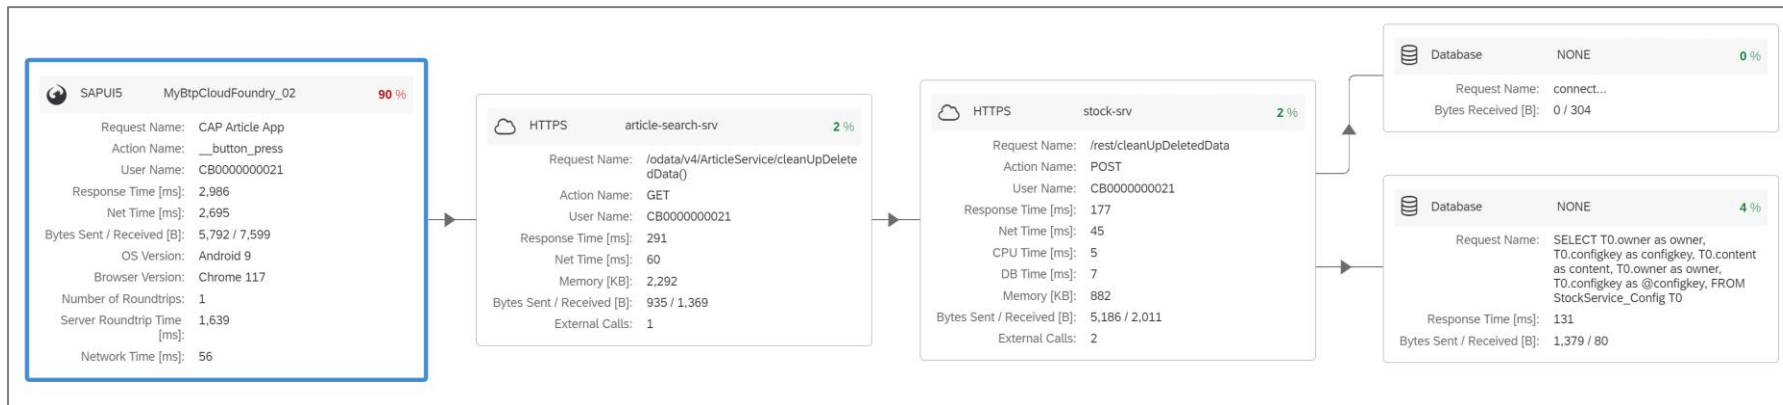

# Real User Monitoring for SAP BTP

## Real User Monitoring

- Unified monitoring of end users from performance, functional and utilization perspective
- Correlation of e2e user requests flow based on single request data

### SAP BTP, Neo environment (custom built applications)

- Monitoring of user experience in custom built java applications
- Find more details [here](#)

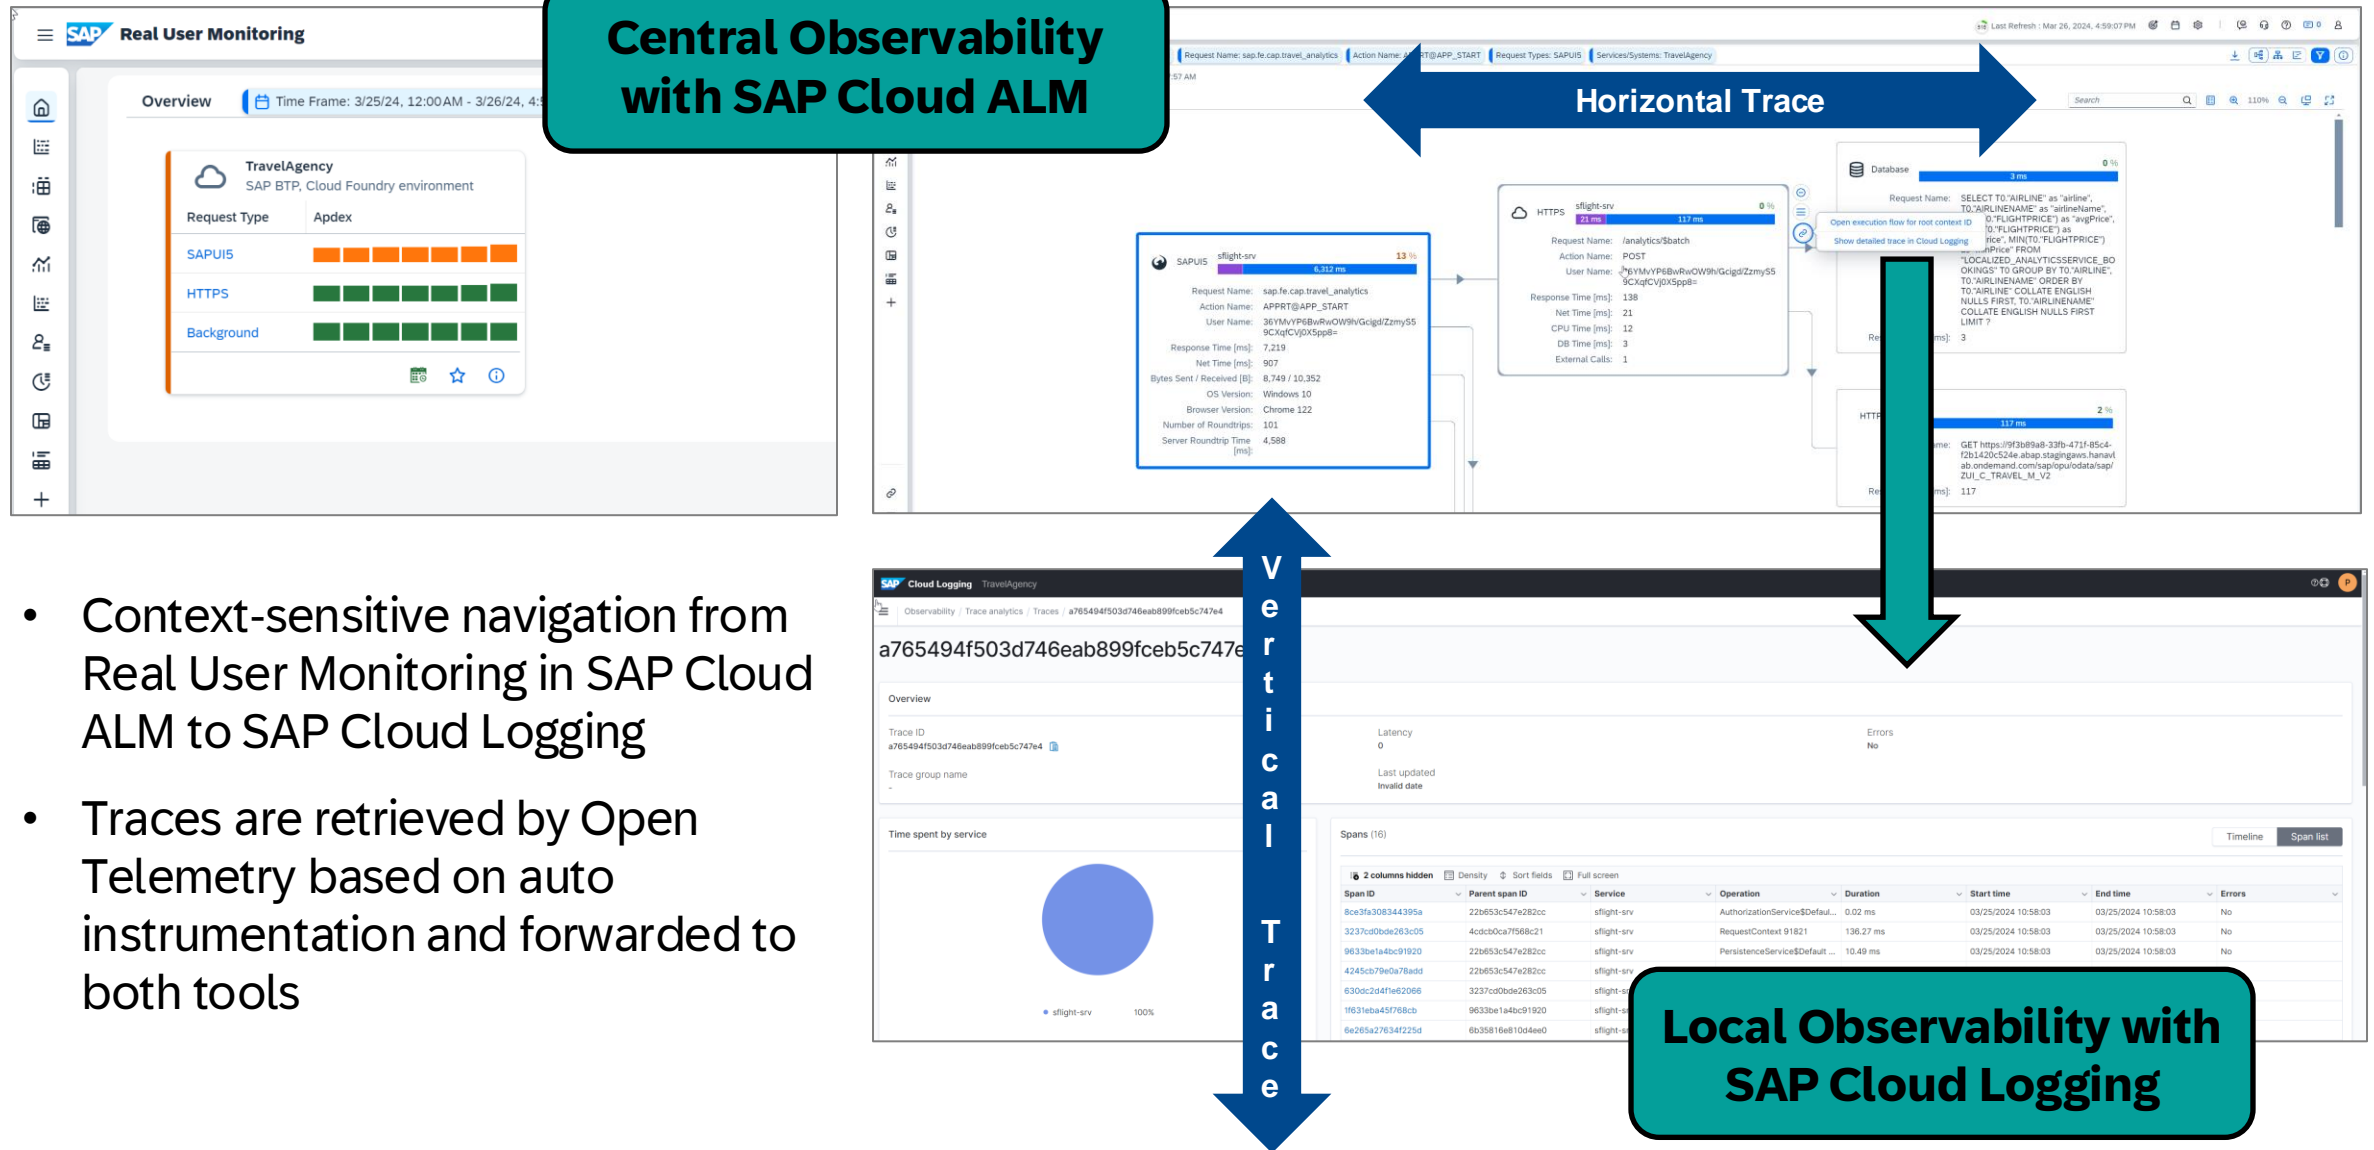

### SAP BTP, CF / Kyma env. (custom built applications)

- Monitoring of user experience in custom built java and node.js applications (OTEL)
- Find more details [here](#)

### SAP BTP, ABAP environment (custom built applications)

- Monitoring of user experience in custom built ABAP applications

# Real User Monitoring for custom applications built on SAP BTP

Remark: SAP Cloud Logging Service isn't part of SAP Cloud ALM subscription

# Synthetic User Monitoring

## Monitor Performance and Availability of Web Applications from User Perspective

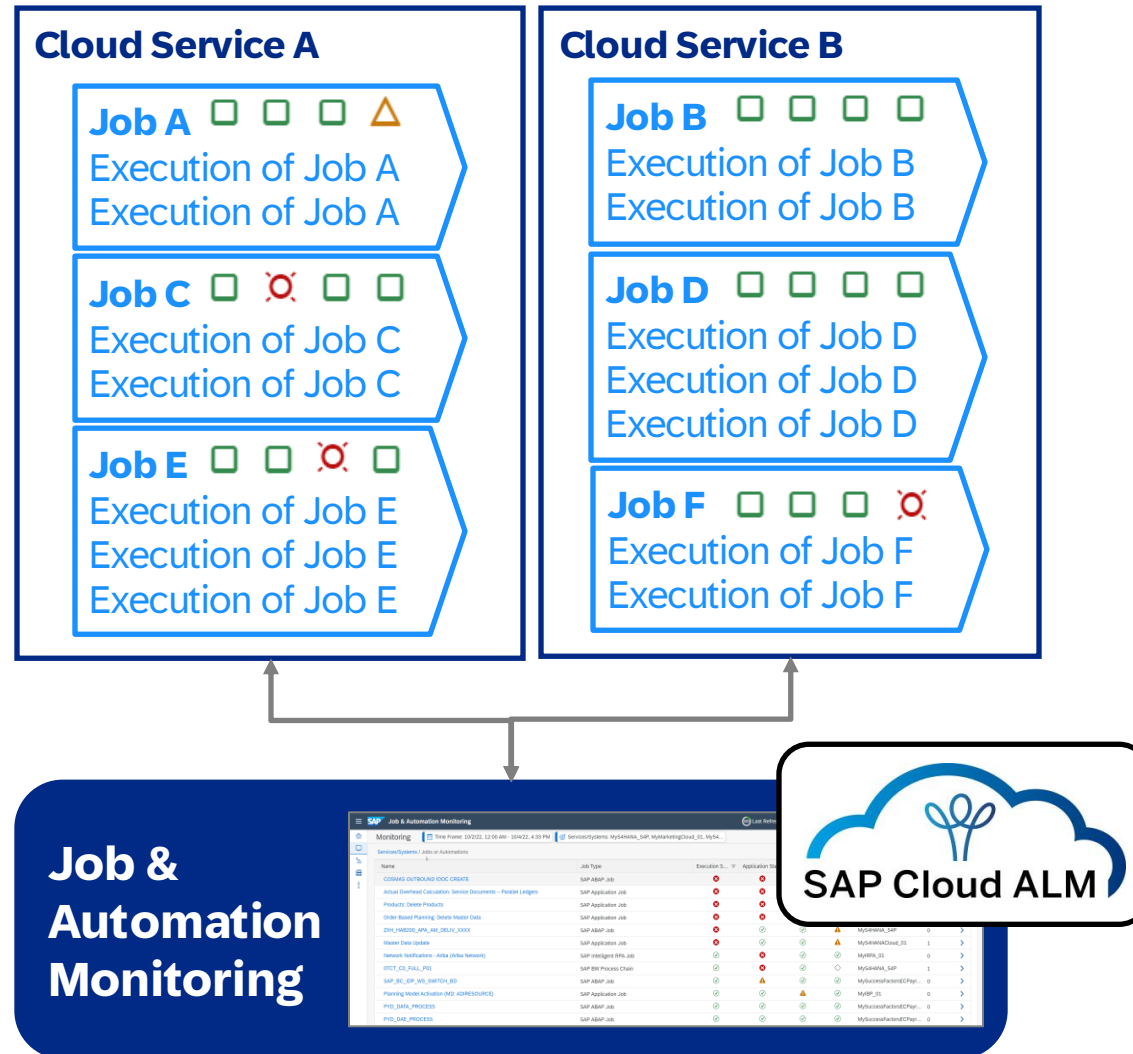

- Monitoring based on custom **Selenium based scripts** → Supports most of the web applications
- Regularly executed on **Selenium remote webdriver infrastructures**
- **Proactive problems detection:** 24x7 monitoring enables detection of performance and availability issues before end users are impacted → Runs **independently on real user activities**
- **Comparable measurements:** Monitoring relies on identical **user scenarios regularly executed** → Allows to monitor the **evolution of the performance and availability** based on comparable metrics

Remark: Generic functionality which is available for all SAP BTP SaaS and PaaS services.

# Job & Automation Monitoring

## Provide Transparency Regarding Job Executions & Automated Activities

- **Monitoring** ensures **efficient execution of jobs and tasks**:
  - by monitoring **executions status, application status, start delay and response time** for jobs and tasks
  - by providing **details at job on task execution level** to enable root cause analysis
  - by **reducing configuration efforts** by making use of historical execution information
- **Embedded Alerting** enables notification of business and IT users on job & task related disruptions and exceptions
- **Embedded Analytics** allows to analyze root causes and trends based on historical data

# Job & Automation Monitoring for SAP BTP

## SAP Intelligent RPA

- Monitoring of jobs scheduled in SAP Intelligent RPA
- Find more details [here](#)

## Job & Automation Monitoring

Unified monitoring of jobs and automation tasks

## SAP Build Process Automation

- Monitoring of jobs scheduled in SAP Build Process Automation
- Find more details [here](#)

The screenshot shows the SAP Job & Automation Monitoring web application. The header includes the SAP logo, the title "Job & Automation Monitoring", and a "Last Refresh" timestamp of "Sep 20, 2023, 5:50:29 PM". The main content area displays a table of job executions for the service "MyBtpCloudFoundry\_01". The table has columns for Name, Type, Execution Status, Application Status, Start Delay, Run Time, Service/System, and Open Alerts. Three jobs are listed: "Products\_DeleteProducts", "Products\_UpdateProducts", and "Products\_CreateProducts". The first two jobs show red 'X' icons for both Execution and Application Status, while the third job shows green checkmarks. Each row has a blue arrow icon to the right of the Open Alerts column.

Name	Type	Execution Status	Application Status	Start Delay	Run Time	Service/System	Open Alerts
Products_DeleteProducts	SAP Job Scheduling Service Job	✗	✗	✓	✓	MyBtpCloudFoundry_01	2
Products_UpdateProducts	SAP Job Scheduling Service Job	✗	✗	✓	✓	MyBtpCloudFoundry_01	2
Products_CreateProducts	SAP Job Scheduling Service Job	✓	✓	✓	✓	MyBtpCloudFoundry_01	2

## SAP BTP, CF / Kyma env. (custom built applications)

- Monitoring of jobs scheduled with SAP Job Scheduling Service
- Find more details [here](#)

## SAP BTP, ABAP environment (custom built applications)

- Monitoring of application jobs used in custom built ABAP applications
- Find more details [here](#)

# Configuration & Security Analysis

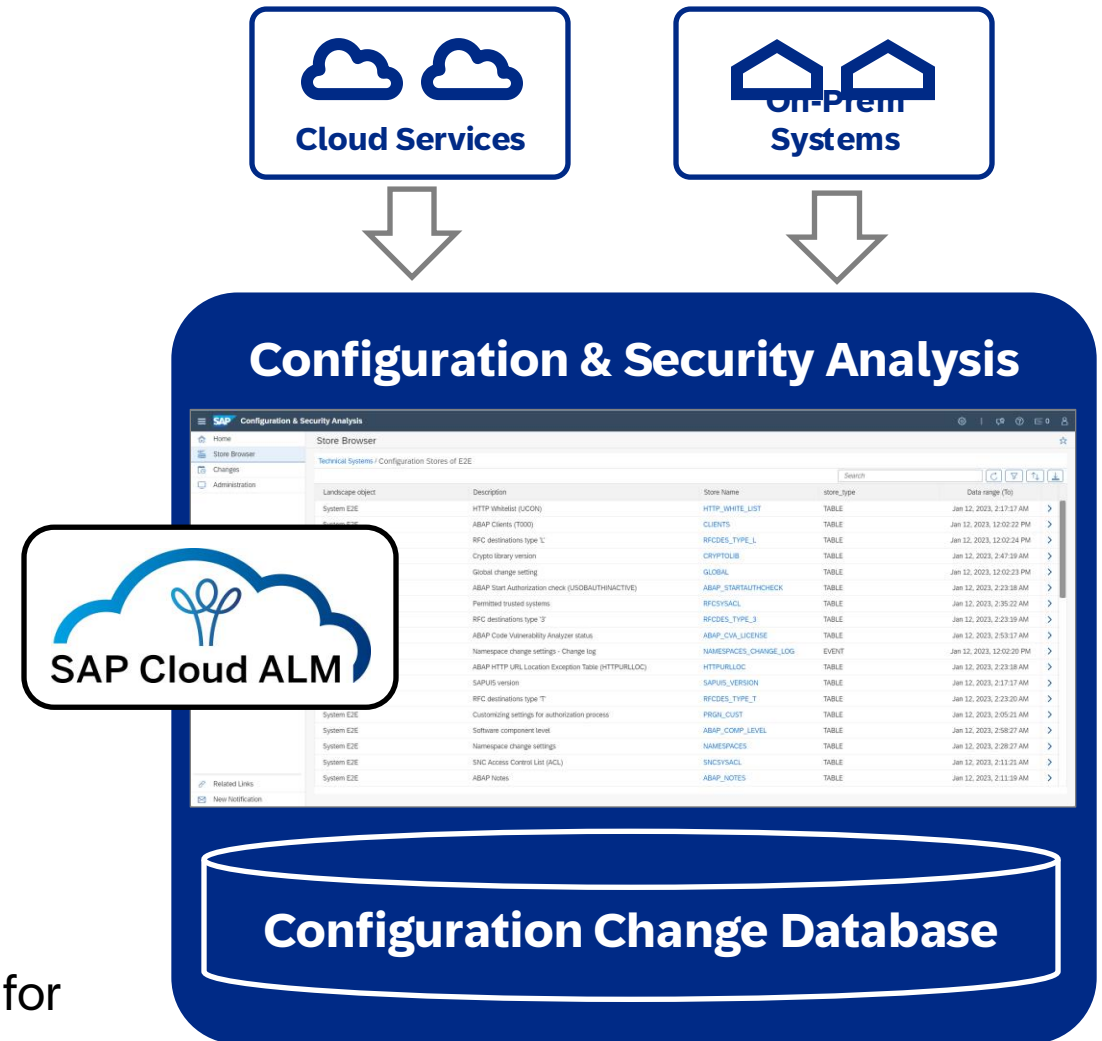

## Validate Configuration Items and Software Levels Automatically and Regularly

### Existing functionality

- **Regular collection of configuration items and software levels** into the configuration stores of the Configuration Change Database
- **Store browser** as user interface to **visualize content of configuration stores**
- **Change analysis** for selected scope and timeframe
- **Search capability** for pattern-based browsing into configuration items of selected scope

### Planned functionality

- **Configuration validation** to compare TO-BE with AS-IS situation
- **Embedded alerting** to notify on critical issues
- **Embedded analytics** to analyze trends and root causes for discovered problems

# Configuration & Security Analysis for SAP BTP

## Configuration & Security Analysis

- Regular collection and centralized storage of configuration items and software levels
- Store browser, change analysis and search functionality for mass volume processing

### Credential Store

- Monitoring of security relevant configuration items including recommendations from SAP
- Find more details [here](#)

The screenshot shows the 'Store Browser' interface within the 'SAP Configuration & Security Analysis' application. The breadcrumb path is 'Technical Systems / Configuration Stores of IdentityAuthentication02'. A search bar is present. Below is a table with columns: Landscape object, Description, Store Name, IF, Store Type, and Data range (To). The table lists various configuration stores such as 'SYSTEM\_APP Administration Console', 'SYSTEM\_APP User Profile', 'System IdentityAuthentication02', 'CHARGED\_APP test', 'CHARGED\_APP BTP\_App2', 'BUNDLED\_APP GBaaS', 'BUNDLED\_APP BTP\_App1', and 'BUNDLED\_APP OpenID'.

Landscape object	Description	Store Name	IF	Store Type	Data range (To)
SYSTEM_APP Administration Console	System Application Configuration	IAS_SYS_APP_CONFIG		TABLE	Dec 18, 2023, 4:02:00 AM
SYSTEM_APP User Profile	System Application Configuration	IAS_SYS_APP_CONFIG		TABLE	Dec 18, 2023, 4:02:00 AM
System IdentityAuthentication02	Landscape Information	IAS_LANDSCAPE_INFO		TABLE	Dec 18, 2023, 4:02:00 AM
System IdentityAuthentication02	Identity Authentication Configuration	IAS_CONFIG		TABLE	Dec 18, 2023, 4:02:00 AM
CHARGED_APP test	Charged Application Configuration	IAS_CHARGED_APP_CONFIG		TABLE	Dec 18, 2023, 4:02:00 AM
CHARGED_APP BTP_App2	Charged Application Configuration	IAS_CHARGED_APP_CONFIG		TABLE	Dec 18, 2023, 4:02:00 AM
BUNDLED_APP GBaaS	Bundled Application Configuration	IAS_BUNDLED_APP_CONFIG		TABLE	Dec 18, 2023, 4:02:00 AM
BUNDLED_APP BTP_App1	Bundled Application Configuration	IAS_BUNDLED_APP_CONFIG		TABLE	Dec 18, 2023, 4:02:00 AM
BUNDLED_APP OpenID	Bundled Application Configuration	IAS_BUNDLED_APP_CONFIG		TABLE	Dec 18, 2023, 4:02:00 AM

# Health Monitoring

## Check Application Health of Cloud Services and Systems

- **Monitoring of technical KPI's** for services and systems:
  - By executing **application health checks for SAP SaaS services**
  - By delivering **metrics for customer applications** built at SAP Business Technology Platform (SAP PaaS Services)
  - By providing metrics for **light-weight system monitoring** for SAP ABAP and associated system types e.g. SAP Cloud Connector
- Provides **embedded alerting** including the capability to **trigger notifications and corrective actions**
- Allows **embedded analytics** to **analyze trends and root causes** for discovered problems

# Health Monitoring for SAP BTP

# Intelligent Event Processing / Alert Management / Notification Management

## Process Events from Different Sources and Initiate Follow-Up Activities

- **Central intelligence** for **efficient event routing** between internal and external producers and consumers
- **Unified event processing** based on rules for **automatically as well as manually triggered events**
- Enables **centralized event handling** via event log viewer as well as **alert handling** via use case specific alert inbox
- **Foundation for intelligent correlation of events** e.g. correlation of manually generated notifications with automatically generated alerts
