AI-Assisted Maintenance Order Recommendations

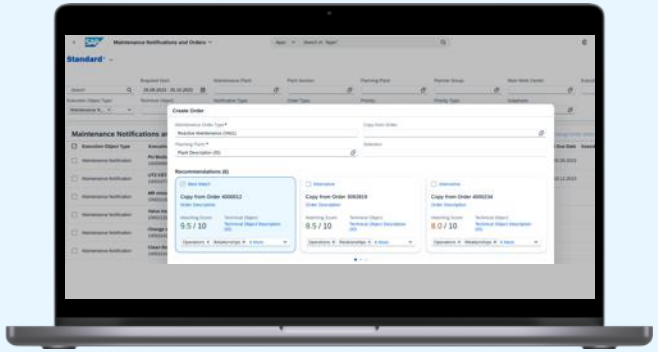
With SAP S/4HANA Cloud Private Edition

Challenge

Mike, Maintenance Planner

"As a maintenance planner, I handle numerous maintenance requests every day. I need an efficient way to plan maintenance orders that minimizes machine downtime while ensuring safety."

Solution



AI-assisted maintenance order recommendation in RISE with SAP uses historical data to suggest maintenance orders based on previous resolutions, making it easy for planners to copy recommen-dations and initiate new orders without starting from scratch.

For Mike, this means streamlined planning through pre-populated templates, faster decision-making with a self-learning algorithm that adapts to current needs, and minimized machinery downtime by leveraging solutions aligned with best practices.

Benefits

~560 %

ROI

~5,000 hours

saved by streamlining maintenance order creation

Increased

efficiency in maintenance planning

* Based on SAP internal benchmarks and expert views

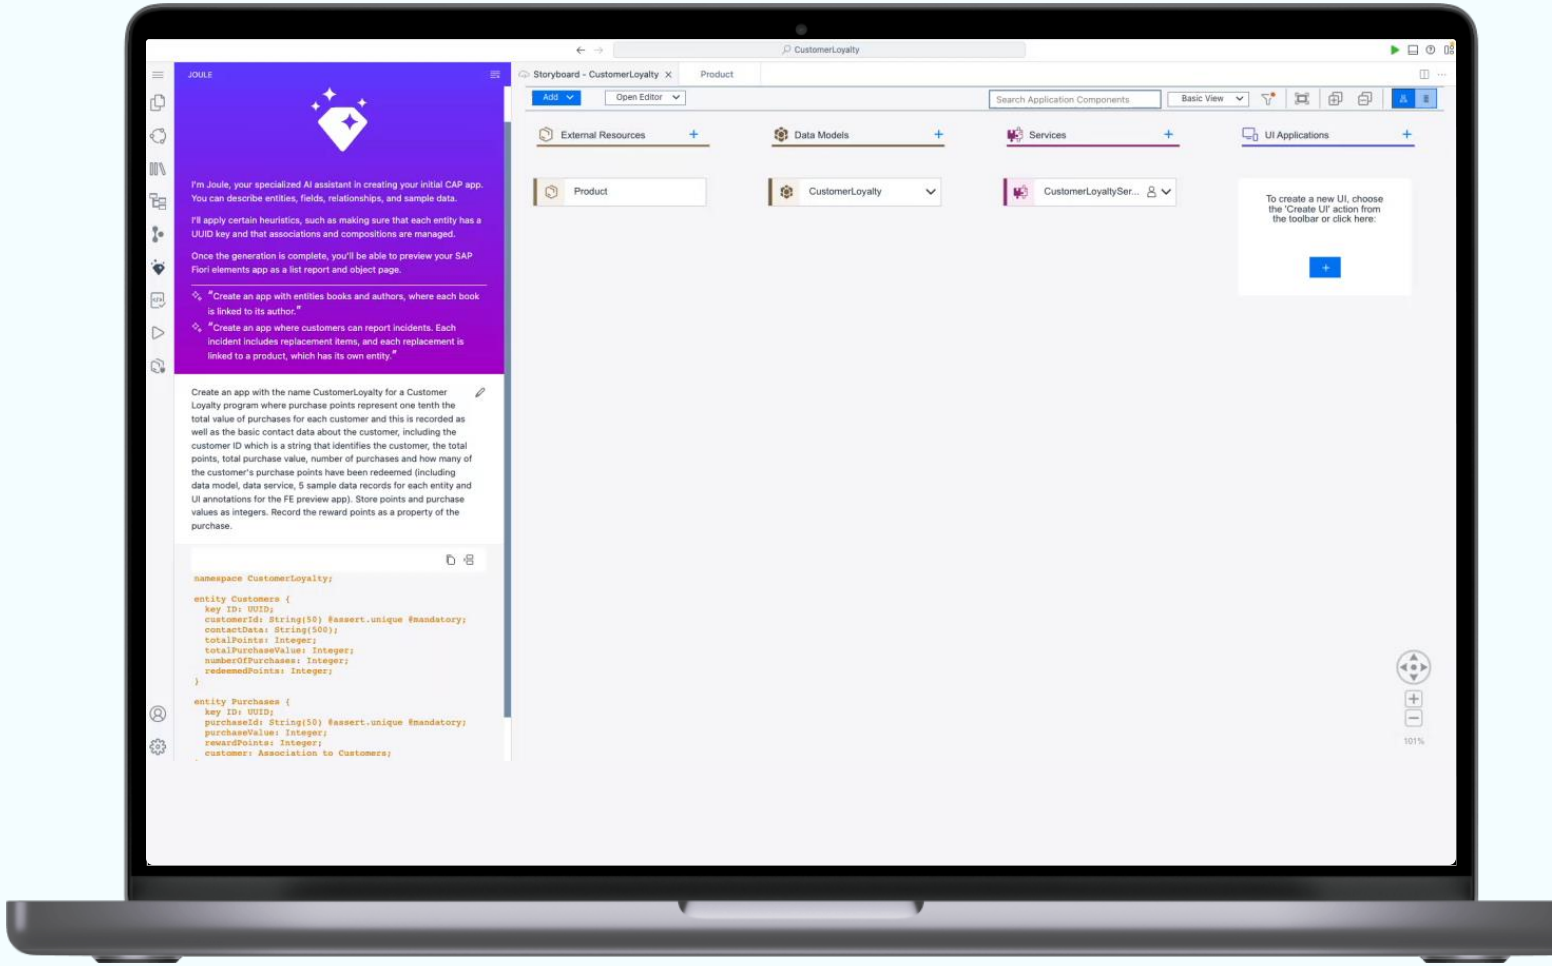
Streamline application development from concept to optimization with Joule for developers

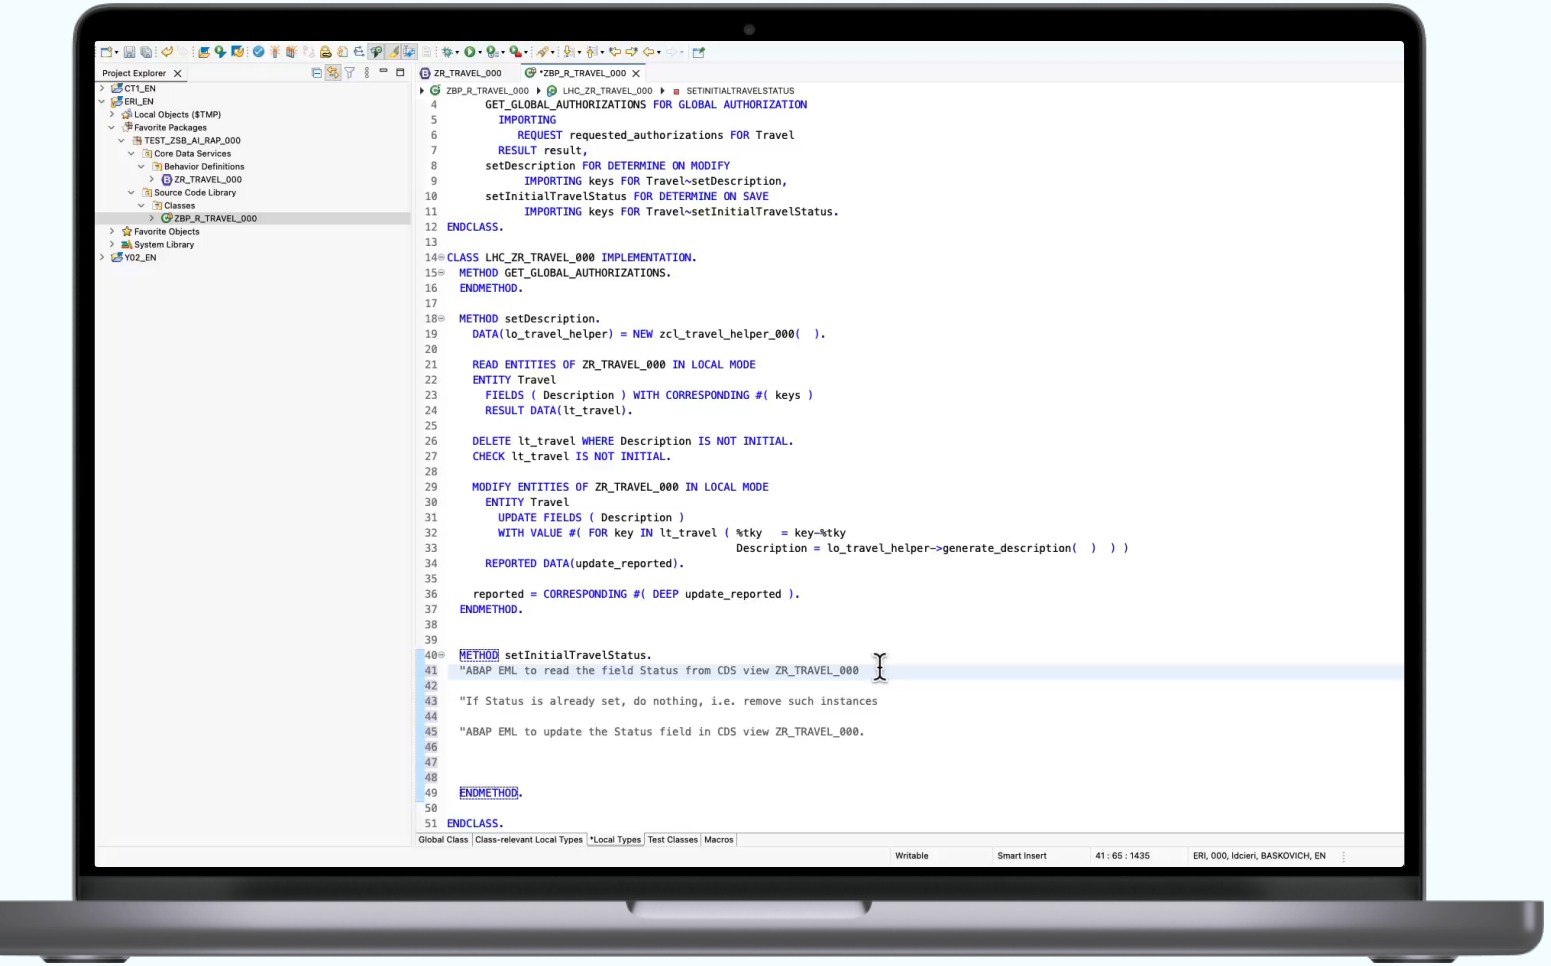
GA

- Generate full-stack applications from scratch
- Generate application & business logic
- Support UI5 freestyle application development
- Generate application UI



Enable faster and smarter development with AI-assisted code refactoring

GA

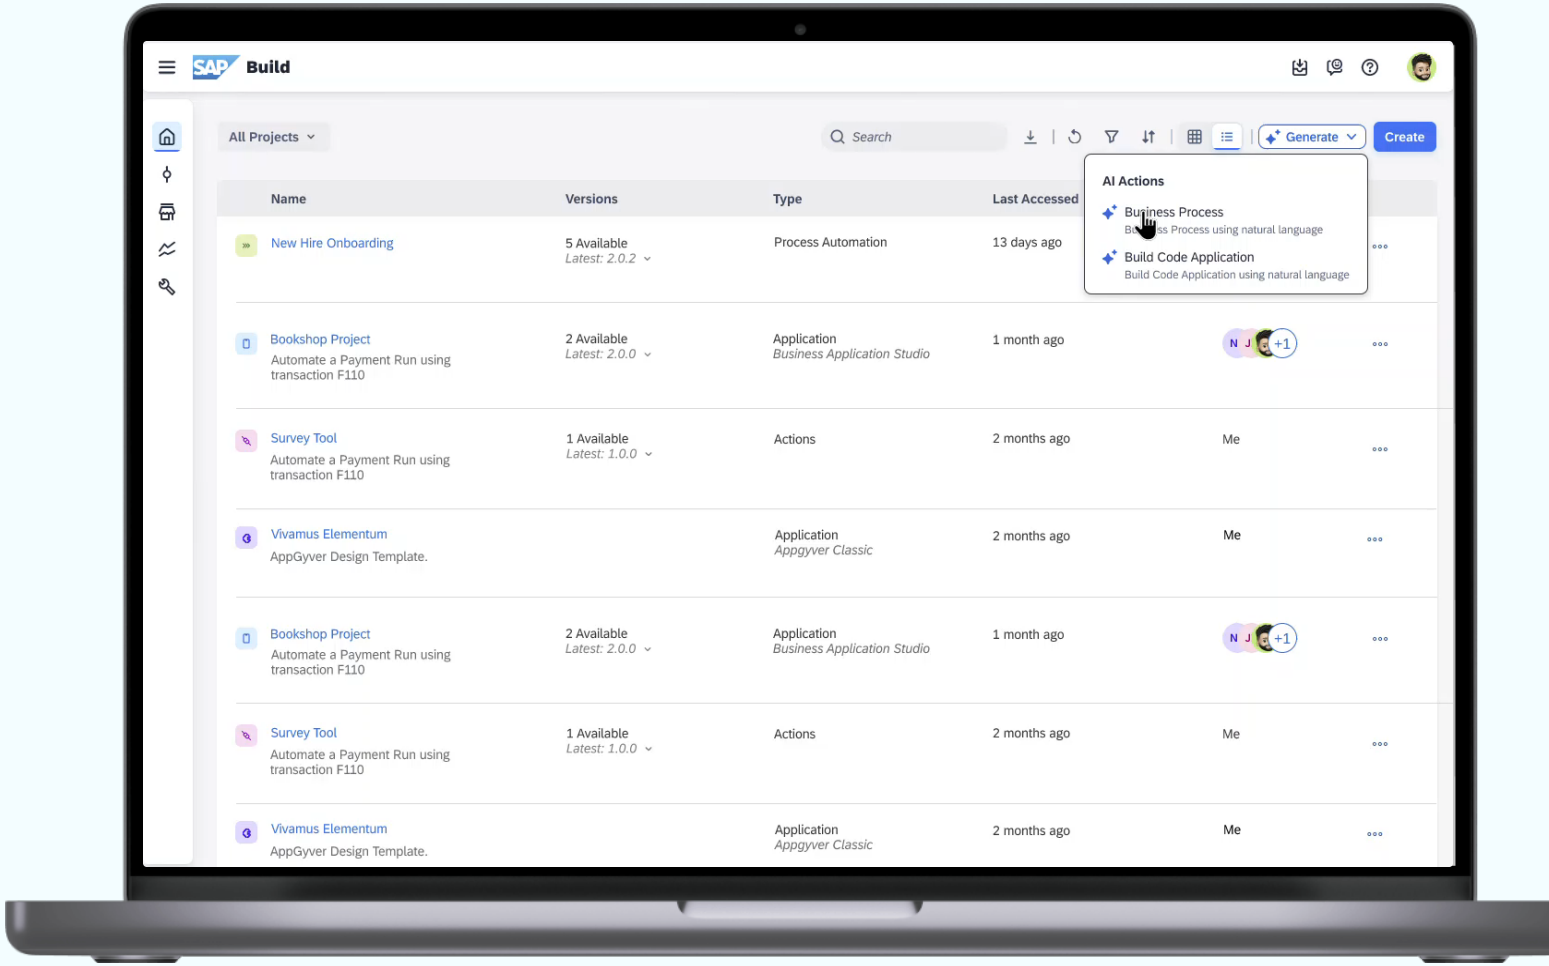


- Inline code completion in Java/JavaScript and ABAP
- Code refactoring available in ABAP environment and SAP Build Code
- Code explanation, code search, and comments generation

Accelerate low code automation and application development with AI

GA

- Generate processes, decisions, forms, and scripts
- Summarize complex artifacts such as processes and decisions
- Generate UI intuitively from data entities without code



Integrated AI for low-code development

GA

- Generate process artifacts with ready-to-use templates
- Summarize complex artifacts, including processes and decisions
- Create UIs automatically from data entities without coding

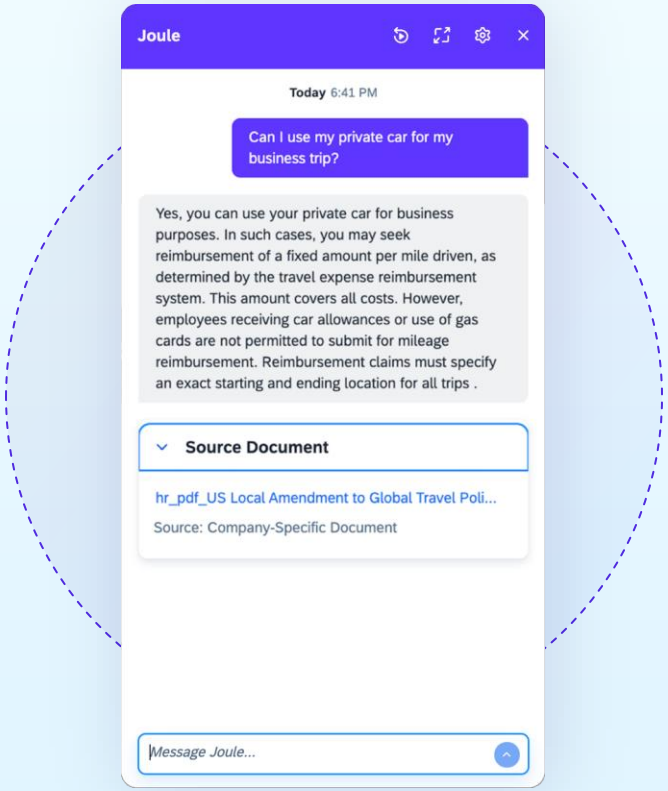
Document Grounding

Fast and reliable insights from your business documents

AI-assisted document grounding enables you to use your **own specific** unstructured or semi-structured documents (such as HR policy documents) to **provide answers to user questions in Joule**.



Grounding combines large language models (LLMs) with advanced information retrieval to enhance response quality and accuracy, without the need for training or fine-tuning with company-specific data.

Saves time spent finding, opening, and reading documents

Conversational Q&A on your unstructured business data

Delivers **grounded answers** in seconds from SAP workflows

Builds trust

Reduces ambiguity

Minimizes hallucinations

In 2025, we plan to introduce user and permission management. This will enable customers to manage document-access of their users.

Finance

Explore how we embed AI across the process

Plan to Optimize Financials

- Planning, Budgeting and Forecasting
  - Natural language query
- Management Accounting
- Financial Analysis

Record to Report

- Gather financial data
  - Request assistant
- Record data
  - Automated emission factor mapping
- Reconciliate data for accuracy
- Consolidate data
  - Financial business insights
  - Error resolution
- Prepare financial statements
  - Explanation of fixed asset depreciation keys
  - Journal Upload

Treasury & Working Capital Management

- Provide real-time audit and compliance reports
  - Regulatory change manager - Joule
- Combine financial data
  - Financial business insights
  - Error resolution
- Manage accounts and timely payments
  - Hotel receipt itemization
- Reduce financial and reputational risks
  - Behavioral insights for contract accounting
  - Business Integrity Screening for SAP S/4HANA Cloud Private Edition
- Enhance efficiency in using working capital
  - Intelligent invoice error classification
- Manage cash flow to optimize liquidity

Manage Risk & Compliance

- Risk and Opportunity Management
  - Regulatory change manager - Joule
- Control and Compliance
  - Regulatory change manager - Joule
- Data Security and Threat Prevention

Manage Global Tax and International Trade

- Manage customs duties, VAT, & other transactional taxes
  - Configuration for US tax jurisdictions
- Ensure accurate tax data & compliant invoices
- Fulfil various reporting requirements
  - AI-assisted ESG report generation
- Handle direct taxes

Analyze & Improve

- Obtain process insights and action recommendations
  - Process analyzer
  - Performance indicators recommender
