

# USAGE OF SAC IN RICHEMONT CSR

SAP BTP EVENT – LAUSANNE, 6<sup>TH</sup> OCTOBER 2022

RICHEMONT

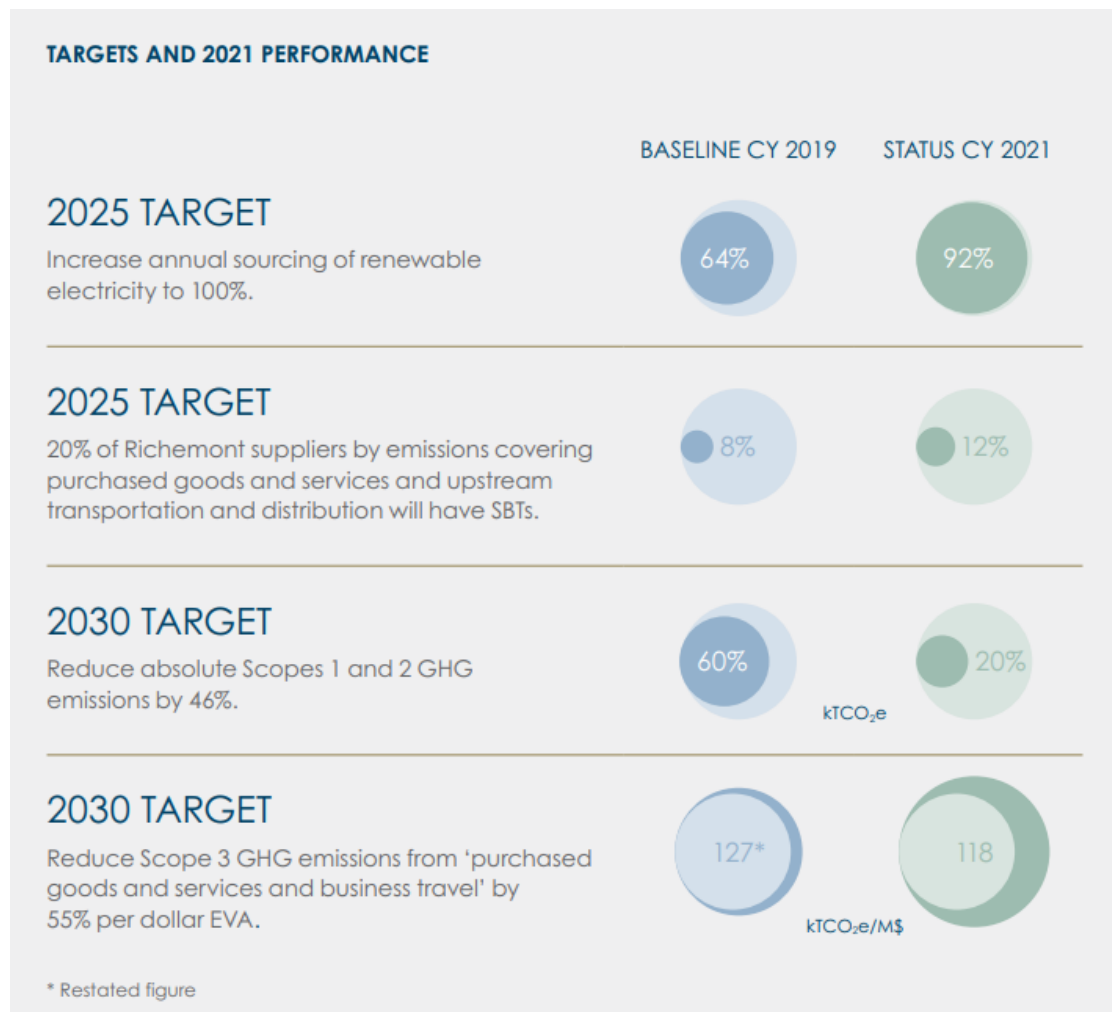

# RICHEMONT INTRODUCTION

- › Richemont, founded in 1988, is one of the world's leading luxury goods groups.
- › User of many SAP solutions.
- › Early adopter of SAC for reporting, now stepping into planning.

# RICHEMONT ENVIRONMENT TARGETS

- › Sustainability is an important area within Richemont.
- › There are clear processes both for:
  - › Data collection of situation as-is
  - › Mitigation measures for to-be

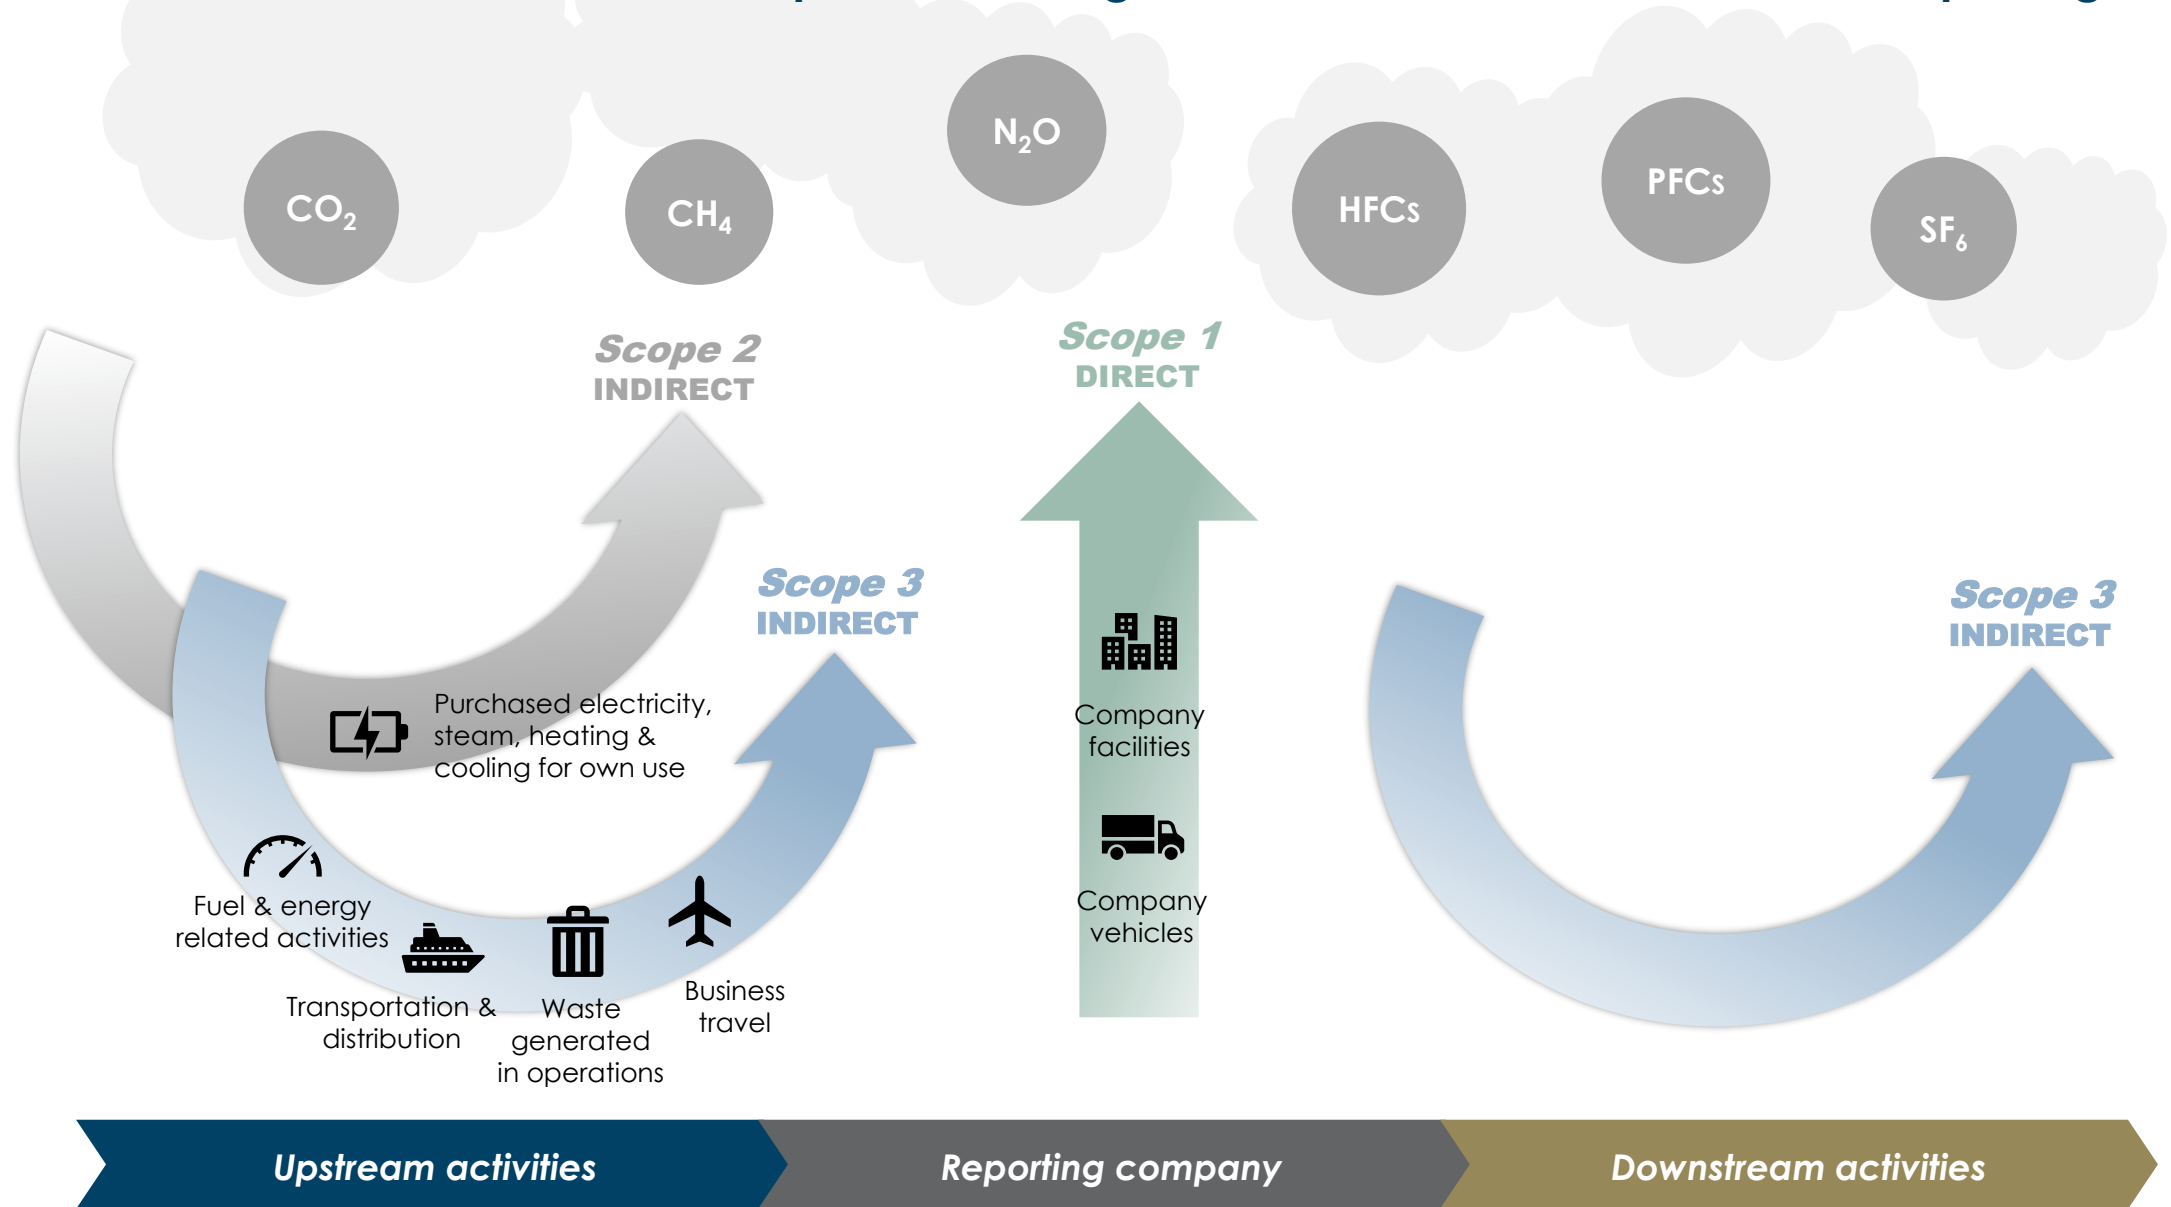

# CSR TOOL USAGE IN SAC

---

- › Group CSR is monitoring and managing the **Carbon Dioxide emissions** across all activities (Fuel; Diamonds and Gemstones; Office Supplies; Buildings; IT Equipment; Business Travel; etc)
- › Local entities and maison headquarters are requested to keep track of all their activities/consumption and input them in screens that we developed in SAC
- › There are converted into Carbon Dioxide equivalent using some logic based on coefficient factors
- › There is an integrated report that aggregates all data

# Overview of the GHG Protocol scopes and categories relevant to the entities env. reporting

# ENVIRONMENTAL REPORTING DATA COLLECTION DIVIDED IN 2 FLOWS

**120**  
Financial  
Entities

Group **Environmental  
Data** Collection

SEM

**2 SAP tools** to  
report data

Annual audit

**26**  
Maisons

SAC

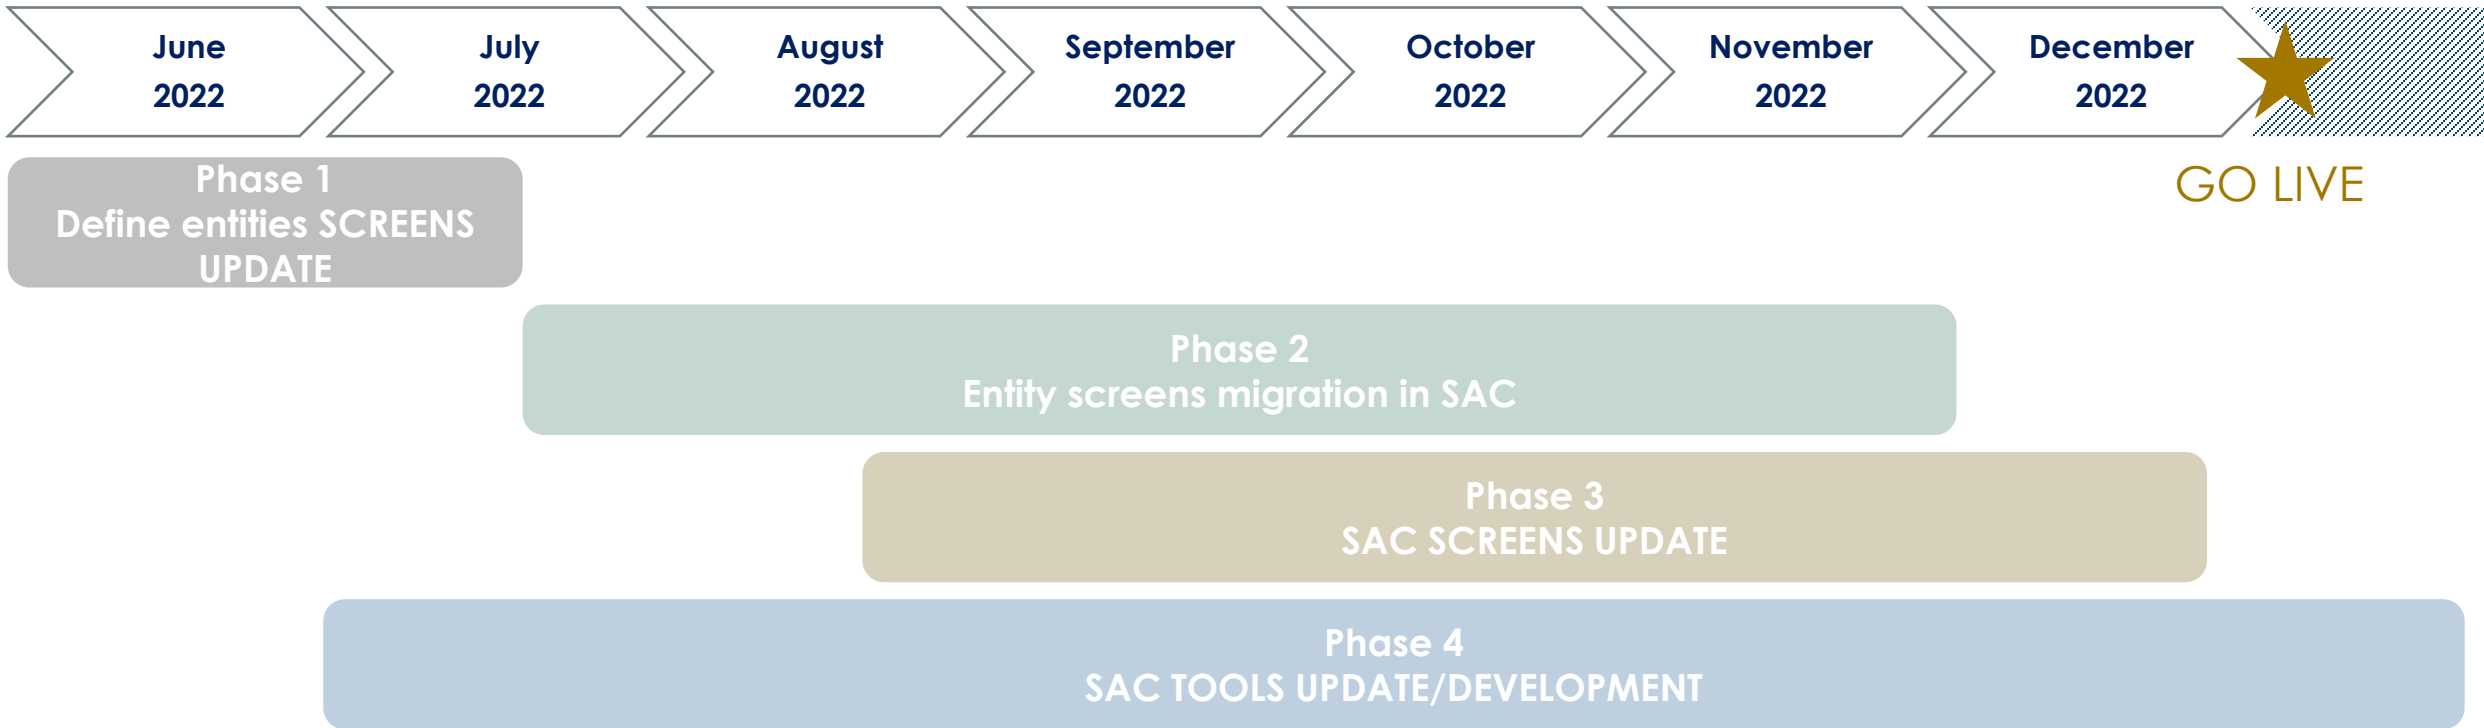

# PAIN POINTS AND BENEFITS OF TRANSITION INTO SAC

## PROBLEM STATEMENT

- It will avoid duplicated tasks (Maintenance, analysis queries...) or duplicated developed (restatement, timing dimension...)
- It will allow compatibility with all existing environmental features (SBT action plan tracker, SBT monitoring tool,...).
- It will increase env reporting efficiency (licences, system,...)
- It will avoid confusion by having one central system for all carbon figures and analysis.
- SEM will become obsolete in a couple of years.

# PROJECT HIGH LEVEL ROADMAP

# NUMBER OF USERS AND GROWTH (IN SAC)

---

- › For pure reporting
  - › ~20 000 total users
  - › ~800 active users every working day
  
- › For planning (specifically in CSR)
  - › Last Fiscal Year: ~60 total users
  - › This Fiscal Year: ~300 total users expected

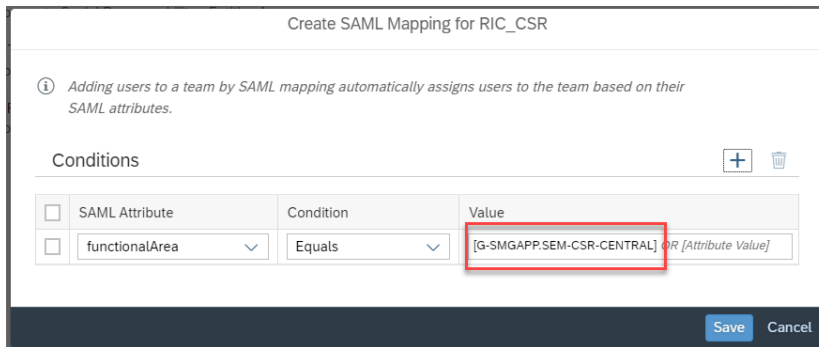

# TECHNICAL POINTS

---

- › **Authorizations**
- › **Data Locking**
- › **Integration of sensitive financial actuals**
- › **Restatements**
- › **Allocations**
- › **Submission status monitoring**
- › **Commitments tracking**

# TECHNICAL POINTS

› **Authorizations** – Managed via SAML mappings - from Active Directory groups

# TECHNICAL POINTS

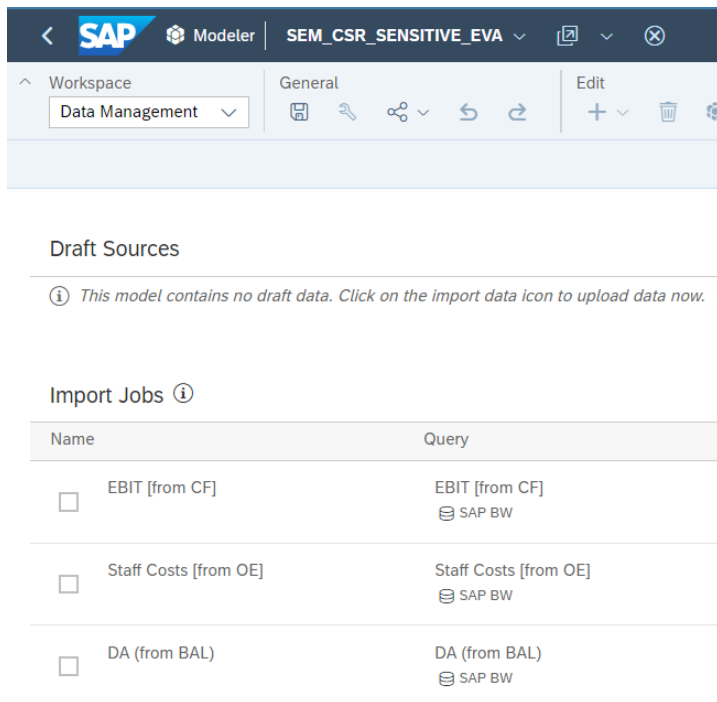

› **Data Locking** – Custom made application to affect multiple models at once

The diagram illustrates the data locking process. On the left, a dark blue box titled "Period Open for Input" contains the text "Current Period 201912" and a pencil icon. An arrow points from this box to the right, where a screenshot of the "CSR - Data collection management" application is shown. The application interface includes a header with the R logo, the title "CSR - Data collection management", and user information "BOAVIDA Jose (RIC-CH)" and "Oct 5, 2022 | 14:33". Below the header, there is a "Period:" field with "201912" selected and a checkmark icon, followed by buttons for "Open current", "Close all periods", and "Unlock all tech". Underneath, it says "Affected models (for check):" and lists model codes: "MS WM SE CG GM PM EB FR LE FG PO CA BT EC TECH". Below this, another set of model codes "MS WM SE CG GM PM EB FR" is shown. A table titled "SEM\_CSR\_MS" is displayed with columns for "Version", "Actual", "Date", and "SEM CSR Posting Level". The table has three rows: "Current Period", "Previous Period (Y-1)", and "Next". The "Current Period" row shows "201912" and "202012" with a lock icon and "1.00" for both Dec (2019) and Dec (2020). The "Previous Period (Y-1)" row shows "201912" and "202012" with a lock icon and "1.00" for both Dec (2019) and Dec (2020). The "Next" column is empty. There are "Open" and "Lock" buttons above the table, and a menu icon (three dots) next to the "Lock" button.

Version	Actual	Date	SEM CSR Posting Level	Standard	Standard
Current	Next				
Current Period	201912	202012	🔒	1.00	🔒 1.00
Previous Period (Y-1)	201912	202012	🔒	1.00	🔒 1.00

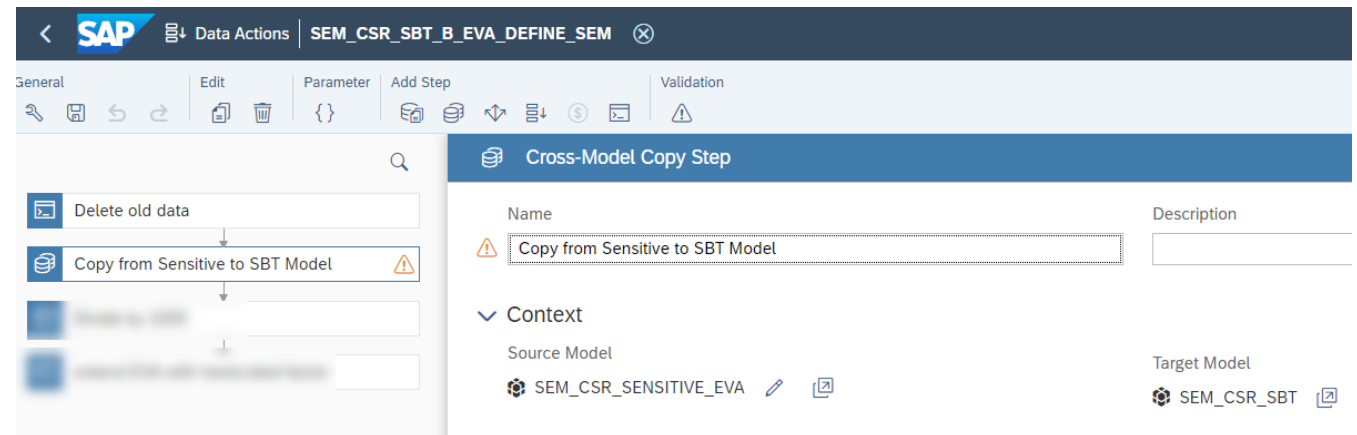

# TECHNICAL POINTS

- › **Integration of sensitive financial actuals** – Intermediary model before main model
  - › Intermediary model with more granularity, some calculations, just for IT
  - › Main model less sensitive, normal users can access it

The screenshot shows the SAP Modeler interface for the model 'SEM\_CSR\_SENSITIVE\_EVA'. The 'Draft Sources' section indicates that the model contains no draft data. Below this, the 'Import Jobs' section is displayed as a table with columns for Name and Query.

Name	Query
<input type="checkbox"/> EBIT [from CF]	EBIT [from CF] SAP BW
<input type="checkbox"/> Staff Costs [from OE]	Staff Costs [from OE] SAP BW
<input type="checkbox"/> DA (from BAL)	DA (from BAL) SAP BW

The screenshot shows the SAP Data Actions interface for the action 'SEM\_CSR\_SBT\_B\_EVA\_DEFINE\_SEM'. The 'Cross-Model Copy Step' configuration is visible, showing the Name 'Copy from Sensitive to SBT Model' and the Context settings.

**Context**

Source Model	Target Model
SEM_CSR_SENSITIVE_EVA	SEM_CSR_SBT

# TECHNICAL POINTS

## › Restatements – Concept of posting level

The screenshot shows the SAP Fiori interface for 'SEM\_CSR\_PLEVEL'. A table is displayed with the following data:

Member ID	Description	Read	Write
1	Standard	TEAM:RIC_CSR;TEAM:RIC_CSR_ENTITIES;TEAM:RIC_CSR_ENTITIES_EXTRA;TEAM:RIC_CSR_REPORTING;TEAM:RIC_SEM_IT	TEAM:RIC_CSR;TEAM:RIC_CSR_ENTITIES;TEAM:RIC_CSR_ENTITIES_EXTRA;TEAM:RIC_CSR_REPORTING;TEAM:RIC_SEM_IT
2	Restatement	TEAM:RIC_CSR;TEAM:RIC_CSR_ENTITIES;TEAM:RIC_CSR_ENTITIES_EXTRA;TEAM:RIC_CSR_REPORTING;TEAM:RIC_SEM_IT	TEAM:RIC_CSR;TEAM:RIC_SEM_IT

# TECHNICAL POINTS

---

- › **Allocations** – number of tracked CSR topics require distribution of produced emissions
  - › E.g. Employees from multiple Maisons share the same building
  - › Gathered emission generating data are valorized and emissions are proportionally allocated to the corresponding Maisons based
  - › Multiple allocation keys – **FTE** for buildings related, **Expense** data for travels, etc.

# TECHNICAL POINTS

- › **Submission status monitoring** – matrix of CSR topics & Maisons for central team
  - › **1.** Not started, **2.** In progress, **3.** Completed (+ 0. Not tracked)
  - › Valorization pushes from 1. to 2.
  - › Validation from 2. to 3.
  
- › Tracked in each topic

## › Commitments tracking – actions taken by maison to reduce generated emissions

**R** SBT Planning AVDEEV Vadim (EXT-RIC-CH)  
Oct 6, 2022 | 01:08

**Step 1:**  
Add required members and fill in the fields, including reduction action and reduction (%)

**Topic Detail:**  
For the following CSR topics, please use "Other" Topic Detail:  
Scope 1, Scope 2, Scope 3.1- Catering/Printed materials/Water, Scope 3.7- Employee commuting

**Step 2:**  
Once the data are entered, click on the "Save and apply calculations" button

Save and apply calculations

### Input and Reports

[Go to previous page](#)

## NEXT STEPS

---

- › Higher data collection frequency
- › Simulations – external factors, scenarios
- › Simplified file drag'n'drop data collection
- › Further process automation
- › Extended commitments tracking
- › Other business areas integration

RICHMONT
