SAP Integration Suite

The enterprise Integration Suite for hybrid and heterogenous environments

Udo Paltzer
VP Product Management, SAP Integration Suite

March 2023

THE BEST RUN SAP

SAP Integration Suite & ChatGPT

Question to ChatGPT: Can you write a poem about SAP integration flow?

(1)
An integration flow, so smooth and grand,
Connecting systems, hand in hand.
With SAP as the guide, the way is clear,
Data flows seamlessly, without a tear.

(2)
From sender to receiver, with precision and care,
Mapping and transforming, with utmost flair.
Routing the messages, with ease and grace,
No errors or delays, in this digital race.

(3)
A flow so elegant, like a symphony,
A dance between systems, in perfect harmony.
Creating efficiencies, and driving growth,
SAP integration flow, a true masterpiece.

(4)
An integration flow, with SAP as the core,
A bridge between systems, forever more.
A symphony of data, in perfect flow,
SAP integration, the future to know.

[Integration of SAP Integration Suite, Cloud Integration with ChatGPT]

SAP Integration Suite

Leading Enterprise Integration Platform as a Service (EIPaaS) – 3rd year in a row

SAP recognized as a Leader in the 2023 Gartner® Magic Quadrant™ for the third time in a row.

SAP was positioned highest overall in Completeness of Vision among all 16 vendors evaluated.

Magic Quadrant for Integration Platform as a Service, Worldwide

SAP Integration Suite – Recent Innovations

1

Next generation hybrid integration runtime (currently in beta)

- On-premise process orchestration runtime for ground-to-ground integrations
- On-premise API Gateway, execution of API policies & mediations on-premise
- On-premise event bridge from SAP “legacy” to SAP Event Mesh and / or non-SAP event brokers

2

Transition from SAP Process Orchestration to SAP Integration Suite

- Ease the transition from SAP Process Orchestration to SAP Integration Suite
- Assessment, migration, regression test service to accelerate transition from SAP Process Orchestration to SAP Integration Suite

3

Cloud Based B2B

- Trading partner management to centrally manage B2B scenarios incl. individual aspects & requirements of trading partners based on AI / ML and crowd-sourced proposal service
- B2B monitoring to monitor B2B transactions at runtime in corporation with trading partner agreement data

4

Event-driven Integration, API-led Integration

- Advanced Event Mesh available for high-volume event use cases, distributed deployment of event brokers in federated setup, full purpose set of eventing services including event streaming, event management and monitoring
- New experience for API Business Hub Enterprise (customer´s developer portal) with brand & theme customization capabilities
- Graph to expose business data in a single, unified API (currently in beta)
- Additional APIs and integration content for SAP and non-SAP integration, community content on API Business Hub

5

Integration Governance, Low code / no code

- Integration Assessment Capability to define, document and govern an integration technology strategy based on SAP Integration Solution Advisory Methodology (SAP ISA-M)
- Unified developer experience, bringing different capabilities of SAP Integration Suite closer together and offer unified developer experience to manage cloud and hybrid scenarios

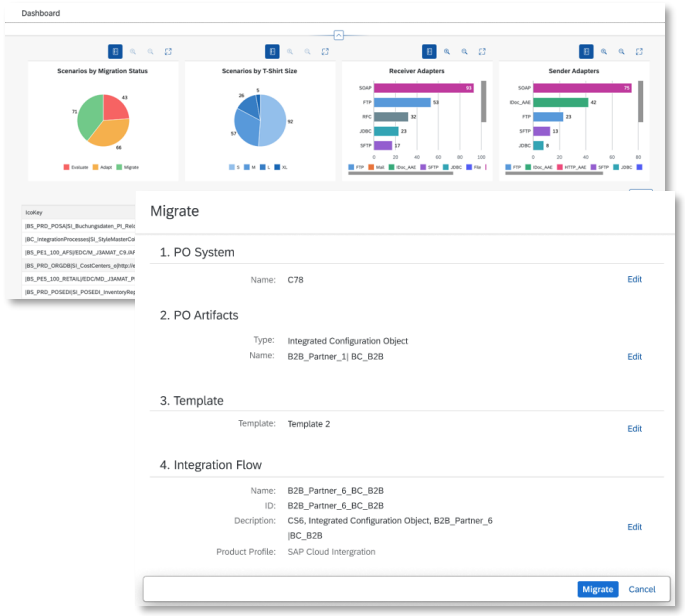
Assessment and migration tools

Accelerate your migration from SAP Process Orchestration to SAP Integration Suite



CAPABILITIES

Interface assessment tool

- Automatically analyze SAP Process Orchestration interfaces
- Determine migration complexity estimated effort
- Check for technical showstoppers and provide possible workarounds
- Provides detailed reports with analysis per interface

Migration tool

- Semi-automatically create integration flow in the Cloud Integration capability of SAP Integration Suite based on SAP Process Orchestration content
- Template based approach (continuous enhancements)

Constraints

- Generally available as part of SAP Integration Suite, standard/premium edition, and SAP BTP Free Tier
- Supports SAP Process Orchestration 7.5 SP06 and above
- Supports Integrated Configuration Objects only

BENEFITS

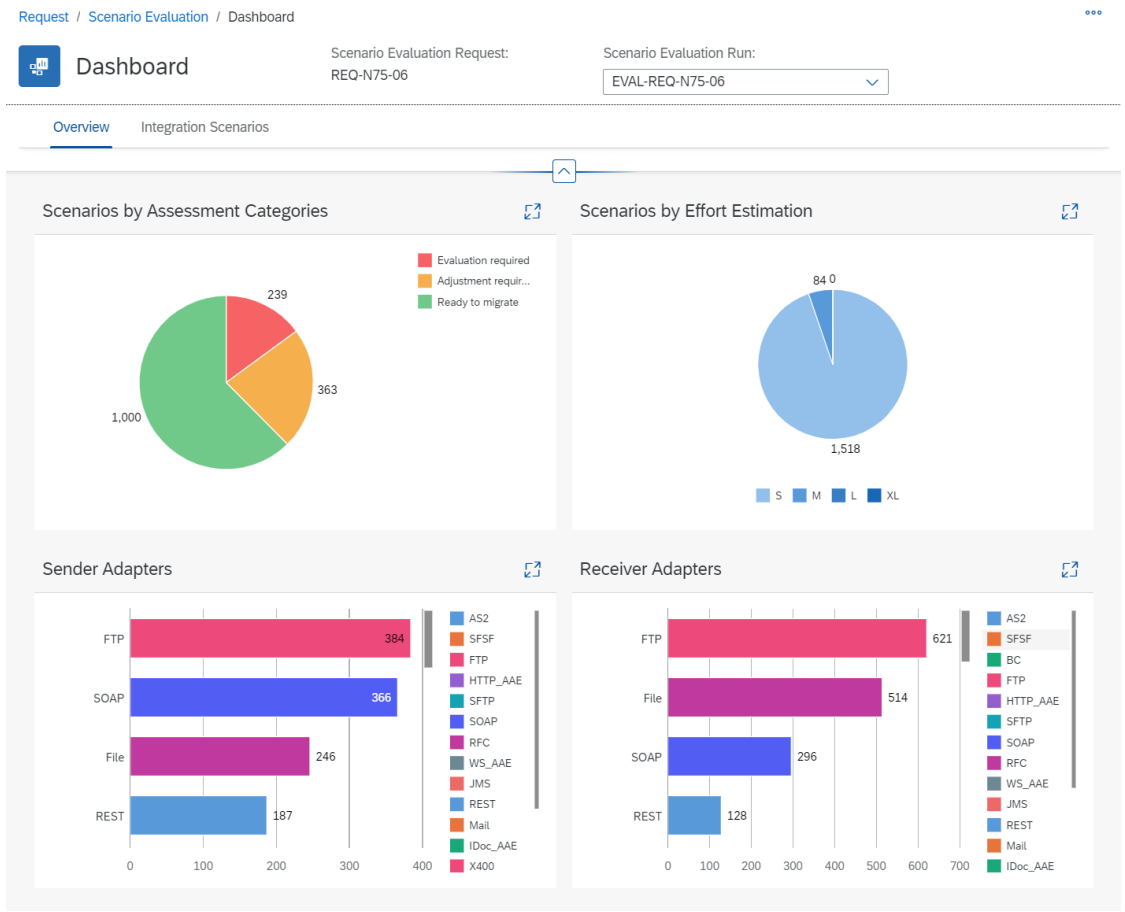
- Transparency of your migration efforts and costs
- Accelerated migration
- Lower cost and project risk
- Included in SAP Integration Suite at **no additional cost**
- Optional: Quick Start Migration Service (Available: Q1 2023)

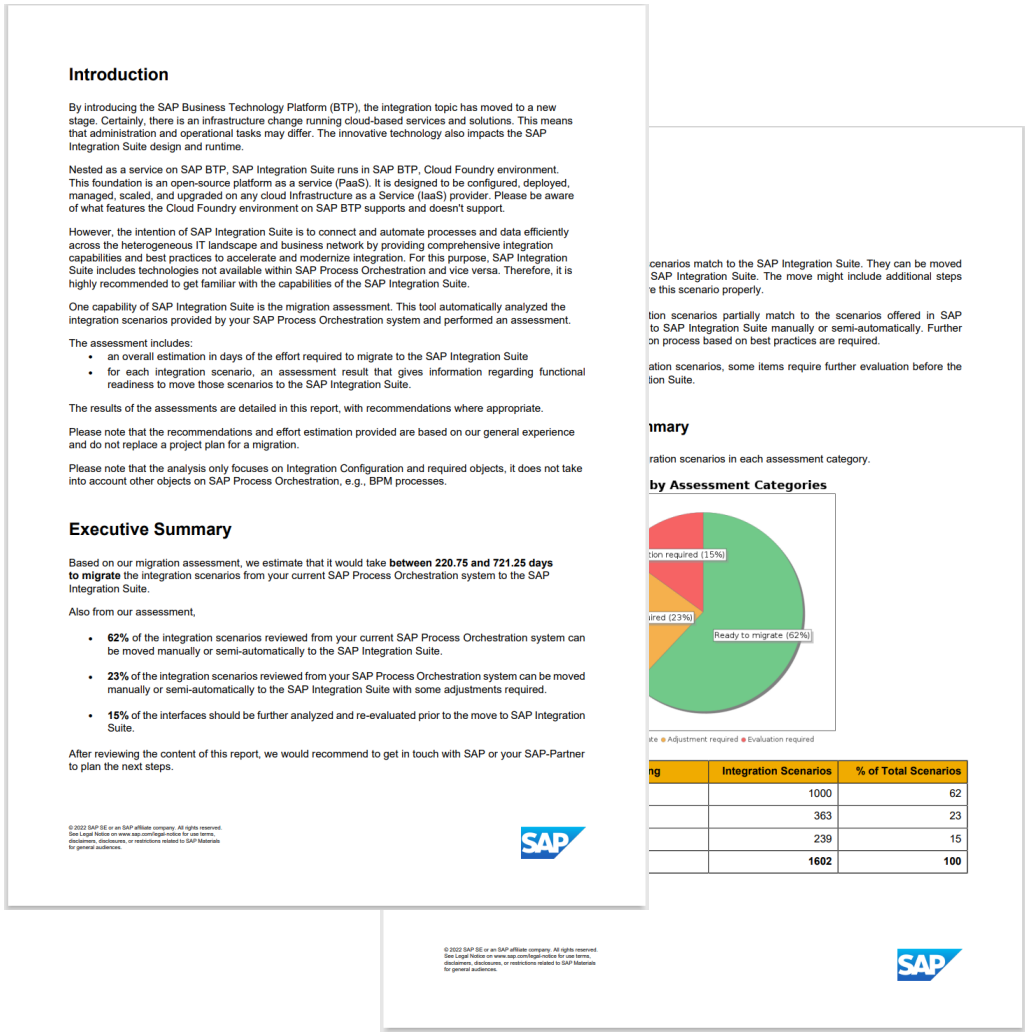
60-90% technical migration time savings for specific supported scenarios

© 2023 SAP SE or an SAP affiliate company.

Migration Assessment Capability of SAP Integration Suite

Sample evaluation results





Introduction

By introducing the SAP Business Technology Platform (BTP), the integration topic has moved to a new stage. Certainly, there is an infrastructure change running cloud-based services and solutions. This means that administration and operational tasks may differ. The innovative technology also impacts the SAP Integration Suite design and runtime.

Nested as a service on SAP BTP, SAP Integration Suite runs in SAP BTP, Cloud Foundry environment. This foundation is an open-source platform as a service (PaaS). It is designed to be configured, deployed, managed, scaled, and upgraded on any cloud Infrastructure as a Service (IaaS) provider. Please be aware of what features the Cloud Foundry environment on SAP BTP supports and doesn't support.

However, the intention of SAP Integration Suite is to connect and automate processes and data efficiently across the heterogeneous IT landscape and business network by providing comprehensive integration capabilities and best practices to accelerate and modernize integration. For this purpose, SAP Integration Suite includes technologies not available within SAP Process Orchestration and vice versa. Therefore, it is highly recommended to get familiar with the capabilities of the SAP Integration Suite.

One capability of SAP Integration Suite is the migration assessment. This tool automatically analyzed the integration scenarios provided by your SAP Process Orchestration system and performed an assessment.

The assessment includes:

- an overall estimation in days of the effort required to migrate to the SAP Integration Suite
- for each integration scenario, an assessment result that gives information regarding functional readiness to move those scenarios to the SAP Integration Suite.

The results of the assessments are detailed in this report, with recommendations where appropriate.

Please note that the recommendations and effort estimation provided are based on our general experience and do not replace a project plan for a migration.

Please note that the analysis only focuses on Integration Configuration and required objects, it does not take into account other objects on SAP Process Orchestration, e.g., BPM processes.

Executive Summary

Based on our migration assessment, we estimate that it would take **between 220.75 and 721.25 days to migrate** the integration scenarios from your current SAP Process Orchestration system to the SAP Integration Suite.

Also from our assessment,

- **62%** of the integration scenarios reviewed from your current SAP Process Orchestration system can be moved manually or semi-automatically to the SAP Integration Suite.
- **23%** of the integration scenarios reviewed from your SAP Process Orchestration system can be moved manually or semi-automatically to the SAP Integration Suite with some adjustments required.
- **15%** of the interfaces should be further analyzed and re-evaluated prior to the move to SAP Integration Suite.

After reviewing the content of this report, we would recommend to get in touch with SAP or your SAP-Partner to plan the next steps.

SAP Integration Suite

Next generation hybrid integration runtime use cases

Hybrid operations

- Hybrid deployment installation, system monitoring and software update (at cloud speed) by customer
- Design, configuration and message monitoring via Integration Studio in Cloud
- Remote API’s for custom integration in existing on-premise monitoring and operations tooling

Integration Flow execution on-premise

- Existing Integration Flows (SAP & customer) may be re-used (design model compatibility)
- Add new Integration Flows for on-premise execution
- Add simple API policies as configurations to Integration Flows with http inbound endpoints

API led integrations

- Design/Implement/Discover/Expose/Manage API’s
- Expose legacy interfaces as modern API’s
- Execute API policies & mediations on-premise

Event bridge

- Expose business events from SAP on-premise applications to SAP Event Mesh and/or 3rd party event brokers

© 2023 SAP SE or an SAP affiliate company.

SAP Integration Suite

Next generation hybrid integration runtime constraints

Topology

- Every next generation hybrid integration runtime instance belongs to exactly one SAP Integration Suite tenant
  - Cloud based tooling for design and monitoring
  - Re-use of identity provider and secure store (runtime caches in Hybrid deployment option to bridge up to 4h cloud connectivity loss including instance restart-ability during offline time)
- One SAP Integration Suite tenant supports multiple next generation hybrid integration runtime instances
- Existing integration runtimes co-exist with next generation hybrid integration runtime instances within one SAP Integration Suite tenant

Consumption

- Next generation hybrid integration runtime an optional extension of SAP Integration Suite
- Next generation hybrid integration runtime provides Cloud Integration Flow model compatibility, i.e. existing Integrations Flows may be deployed and executed without model changes

© 2023 SAP SE or an SAP affiliate company.

SAP Integration Suite

Advanced Event Mesh

Run Simple

SAP Event Mesh & SAP Integration Suite, advanced event mesh

Fully-managed services for enabling **enterprise-grade event-driven architectures**

SAP Event Mesh

- **Low entry barrier** to event-driven architectures with **pay per** use-based pricing
- **Integrate and extend SAP applications** in an event-driven way based on SAP Integration Suite
- SAP **BTP Deployment** and **native event broker** for SAP S/4HANA, free add-on for custom ECC events
- **Openness and focus** combined by supporting open standards and providing extra benefits for SAP ecosystem
- **Scales well** with certain **set limits**

Advanced Event Mesh

- **Complements SAP Event Mesh** for more demanding scenarios
- **Enterprise-grade** performance, reliability, security and governance; scales to **very large use cases**
- **Distributed mesh of event brokers** deployed **across environments** in **private or public clouds**
- Full purpose set of **eventing services** including event streaming, event management and monitoring
- **Advanced features** like dynamic message routing and fine-grained filtering

© 2023 SAP SE or an SAP affiliate company.

High-level comparison – SAP Event Mesh and advanced event mesh

	SAP Event Mesh	Advanced event mesh
Recommended for	**SAP's event-driven ecosystem** and third-party components around the ecosystem	**General purpose** including SAP ecosystem
Target scenarios	**SAP to everything**	SAP to everything and **everything to everything**
Main use cases	Integration and extension	Integration, event streaming, and event-driven backbone
Numbers	▪ Message size up to 1 MB ▪ 10 GB of storage ▪ Guaranteed throughput of 250 KBps	▪ Message size up to 30 MB ▪ 800 GB of storage ▪ Up to billions of events per day
Interfaces	REST, JMS, AMQP, MQTT over WebSockets	REST, JMS, AMQP, MQTT, SMF over WebSockets and direct
Deployment	On SAP BTP	Almost anywhere including cloud and on premise
Pricing	Usage-based pricing, starting with zero cost	Various T-shirt sizes, grows with your business
Advanced features	▪ Facilitated connectivity to selected SAP software back ends ▪ Integration into SAP services and solutions	▪ Opening on payloads ▪ Support of transactions ▪ Support of replay of events ▪ Distributed tracing support (planned upcoming charged add-on capability)

© 2023 SAP SE or an SAP affiliate company.

SAP Integration Suite

Key Take-Aways, Questions and Answers

Run Simple

SAP is a leader in integration!

Leading Vision

- **Comprehensive and enterprise-grade integration platform** covering all integration styles and landscapes
- **3000+ out-of-box integration flows, mappings** to accelerate integration projects
- **Fully vendor managed multi-cloud service**

Execution for customer success

- **20+ years of experience** in providing ubiquitous, enterprise-grade integration platform
- **Customers** leverage SAP Integration Suite in creating connected experiences (A2A, B2B, B2G, API, events, …) driving their digital transformation across industries globally
- **SAP Integration Suite** is **central to SAP BTP** and the enabler of **end-to-end business processes** across SAP LoB, partners and third-party applications
- Recognized as **Leader** in Gartner´s Magic Quadrant 2023 for Enterprise Integration Platform as a Service
