

A banner for SAP Leonardo Live featuring a central burst of colorful, multi-colored streaks (blue, green, yellow, red) radiating outwards against a black background. The text 'SAP Leonardo Live' is centered over this burst, with 'SAP Leonardo' in white and 'Live' in yellow. Below it, the tagline 'Not just another business conference' is written in white. The right side of the banner has a vertical gradient from dark yellow to bright yellow.

# SAP Leonardo Live

Not just another business conference

## The Future of Track and Trace in a Digitalized World

Petra Diessner, SAP

CUSTOMER

# The Future of Track and Trace in a Digitalized World (Innovation Session, 45 minutes)

Optimize customer service levels and track inventory from end to end with cloud-based, multitier logistics network capabilities. See how SAP Global Track and Trace complements and extends our existing on-premise solution portfolio for track and trace. Big Data architecture and easy onboarding and offboarding of business partners supports efficient decision making and business partner communication.

# The business need for **track and trace**

# The challenge: Supply chain risk has increased tremendously – the imperative for track and trace.

Supply chain disruptions have a negative impact on the

**shareholder value** and **reputation** of a brand owner, regardless of the culprit: **the brand owner is always held responsible.**<sup>1</sup>

Global supply chain disruption cost

**\$56 bn**

in 2015.<sup>2</sup>

**72%** of suppliers that have dealt with a breakdown in their supply chains have lacked the full visibility needed to come up with a fast and simple solution.<sup>3</sup>

<sup>1</sup> "From vulnerable to valuable – how integrity can transform a supply chain," PricewaterhouseCoopers

<sup>2</sup> [Research](#) from the British Standards Institute

<sup>3</sup> Study by the [Business Continuity Institute](#)

# The opportunity: The world is increasingly digital and networked.

By 2020

**9 billion**

mobile users in the world<sup>1</sup>

End of 2020

**212 billion**

“things” will be connected.<sup>2</sup>

As digitalization continues to modify the global supply chain landscape, its unprecedented data sources and solutions will lead not only to the demise of disparate information systems but also to the rise of **true end-to-end supply chain visibility**.<sup>3</sup>

<sup>1</sup> [Statista](#), 2014.

# SAP's track and trace mission – supporting our customers in running a Live Business

Offer holistic tracking and traceability, covering the complete value chain, to establish full visibility and built-in compliance for **inventory and products** in our customers' complex supply chains

Since 2001

---

Business process tracking and visibility for goods and assets in transit

**SAP Event Management**

Since 2007/2015

---

Comply with serialization directives (tobacco, agriculture, explosives, and life sciences) and provide product lifecycle intelligence

**SAP object event repository, SAP Auto-ID Infrastructure, SAP Advanced Track and Trace for Pharmaceuticals\***

Since 2012

---

Trace product batch genealogy  
**SAP Global Batch Traceability**

On premise and on SAP HANA Enterprise Cloud | SAP S/4HANA sidecar certified (\*planned)

# How track and trace from SAP already supports customers in their digitalization journey

Life sciences, consumer products (CP):  
**Condition monitoring** to assure product quality

Retail, CP:  
**Geotracking** to allow for best-possible customer service

Automotive, high tech:  
**Automation** through bar code and RFID to reduce efforts and errors

Leveraging the respective application's (basic) IoT capabilities *OR* IoT services within SAP Leonardo IoT Foundation

# Current trends in the track and trace space

# Trends in the track and trace space

Internet of Things (IoT)

Business network support

Exploding data volumes

Multitier visibility

Scalable on-demand offering

Machine learning,  
blockchain

Enticing experience,  
real time

# SAP Leonardo – digital innovation system

- Breakthrough technologies integrated on **SAP Cloud Platform**
- User-centered **design thinking**
- **Accelerators** comprising software and services

SAP Cloud Platform

Internet of Things

Machine learning

Big Data

Design thinking

Blockchain

Data intelligence

# Characteristics of high-potential blockchain use cases

## Blockchain usage criteria

- Multiparty scenario
- Participants as equal partners
- Shared repository
- Multiple writers
- Certain need for mutual control
- Intermediaries to be made obsolete
- Need for transparency
- Transfer of digital assets

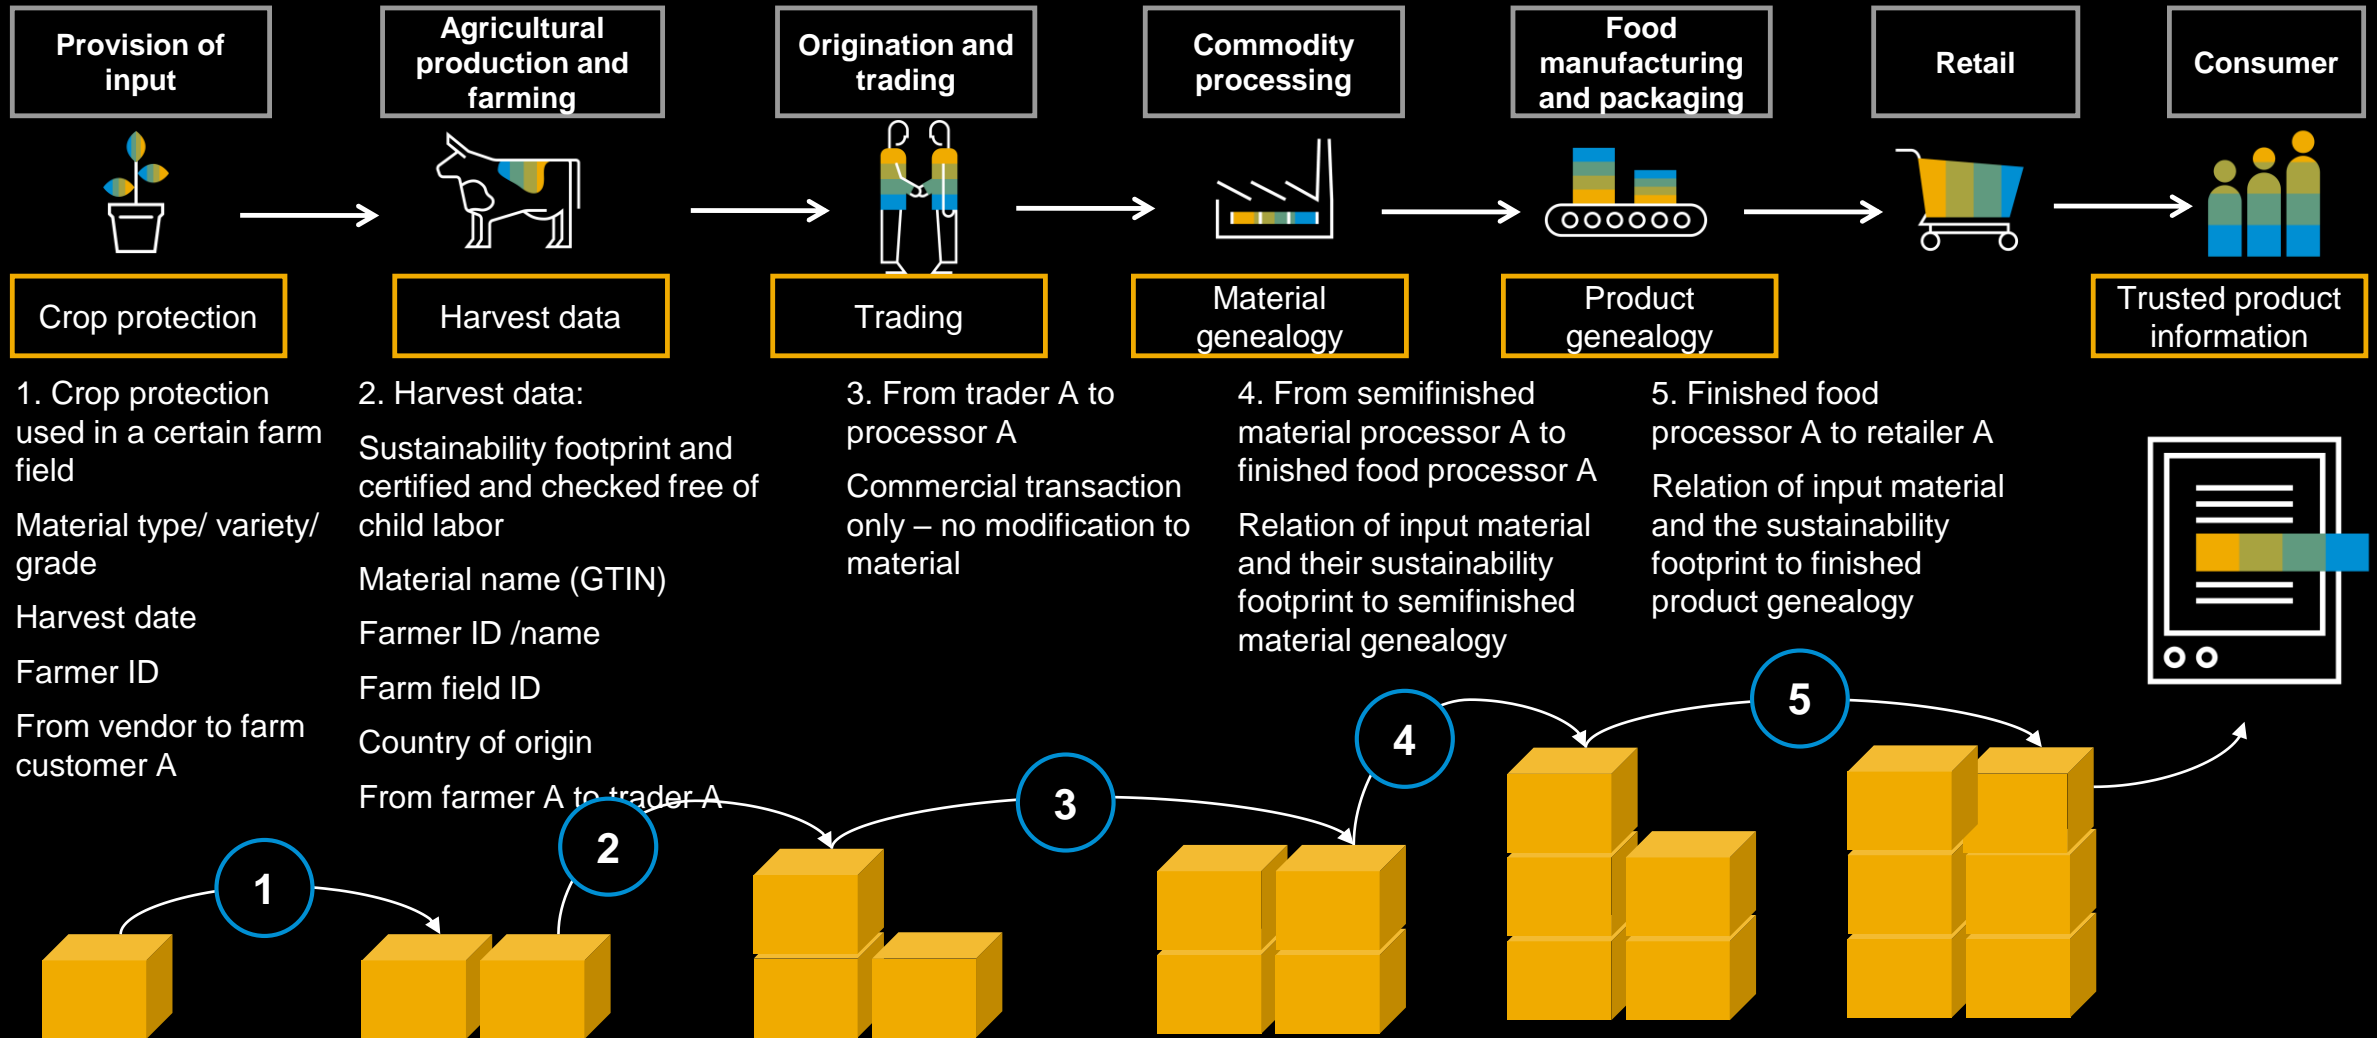

**Food distribution** – authentication and record keeping ► permanent, tamper-proof record of every transaction along the way

**High-value items** – secure ledger to authenticate original versus counterfeit

# Creating a trust chain with an irrefutable record of the material-to-product provenance

# The business need for **track and trace**

# The vision: leverage IoT for real-time insights into your extended supply chain – multitier, end-to-end

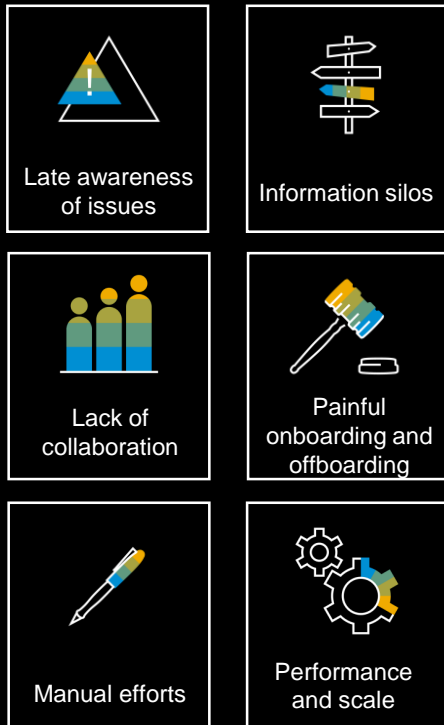

# Capture and share track and trace data across global sourcing, production and fulfillment networks with SAP Global Track and Trace

## A cloud-based track and trace network service by SAP

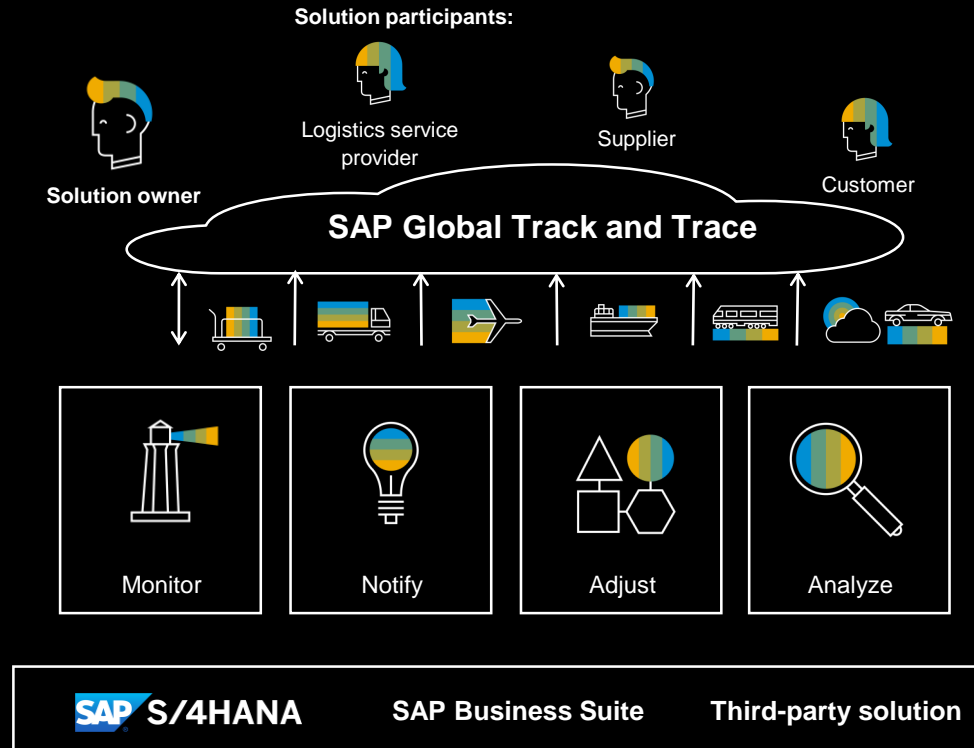

# Cloud-based track and trace, powered by SAP Leonardo

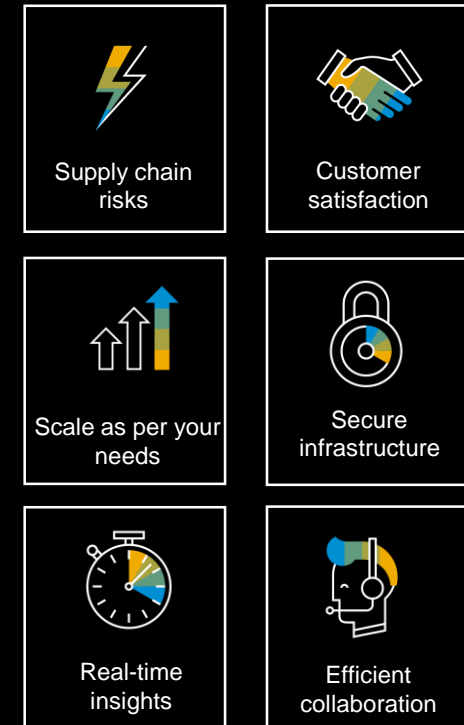

## Challenges

## SAP Global Track and Trace

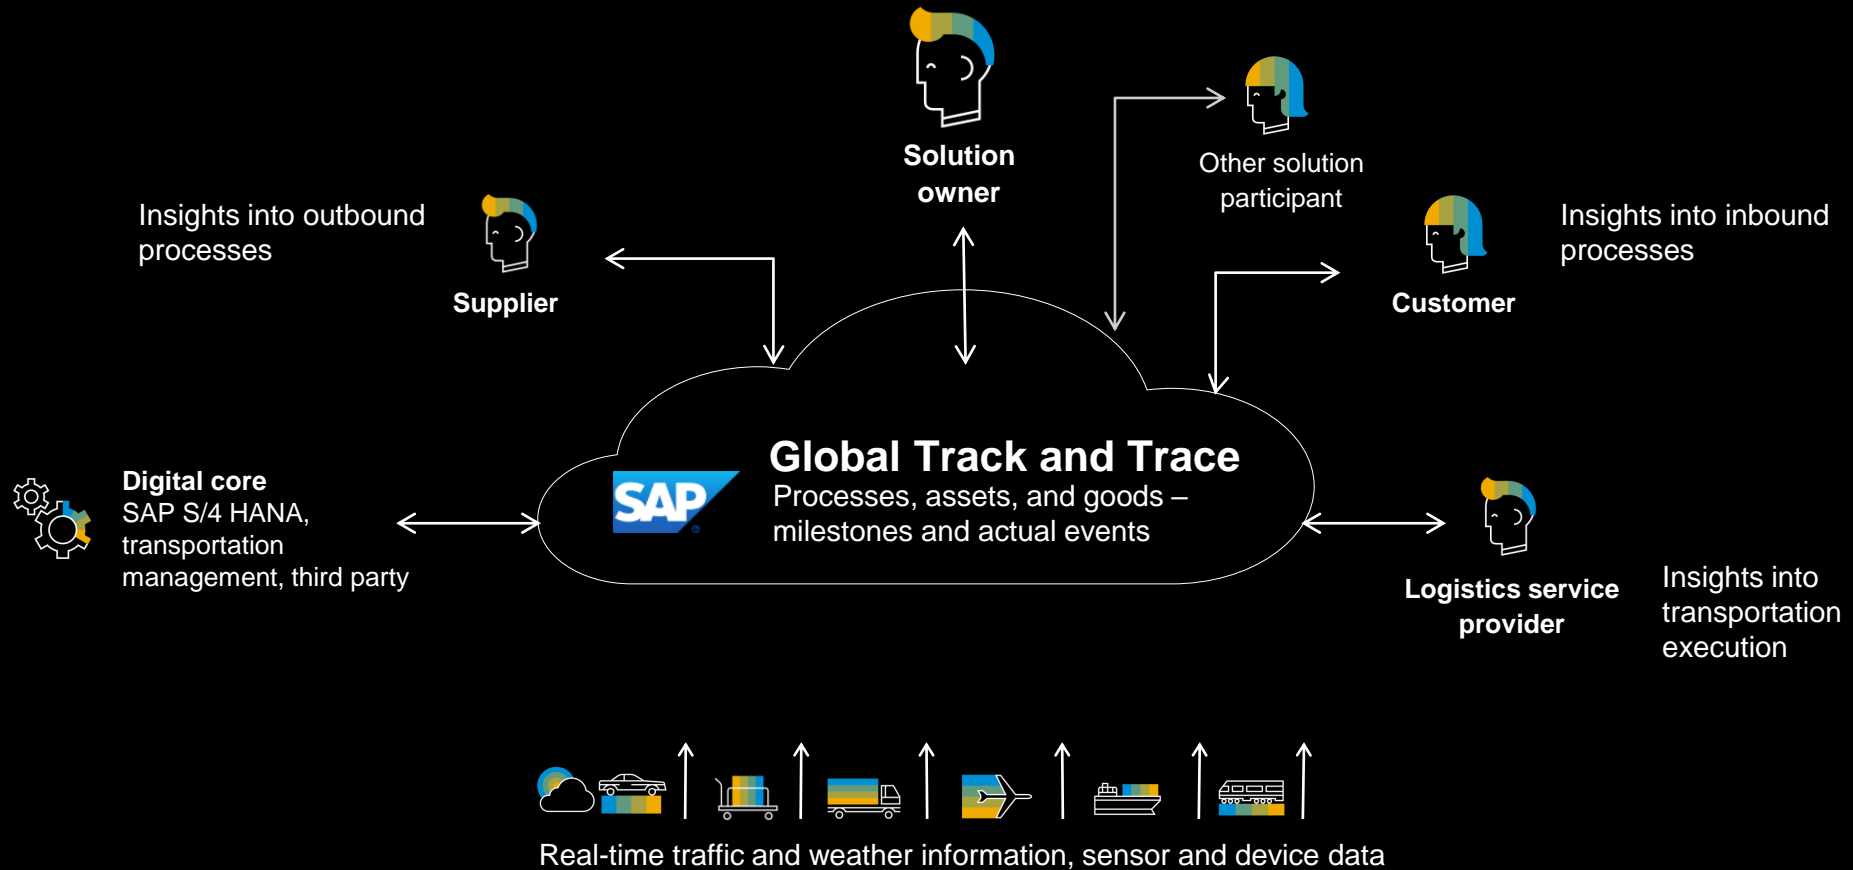

## Benefits

Survey the timely execution of critical business processes and track goods and assets in transit with **SAP Global Track and Trace**

# SAP Global Track and Trace

Onboard business partner ecosystem | Insights into overarching business processes

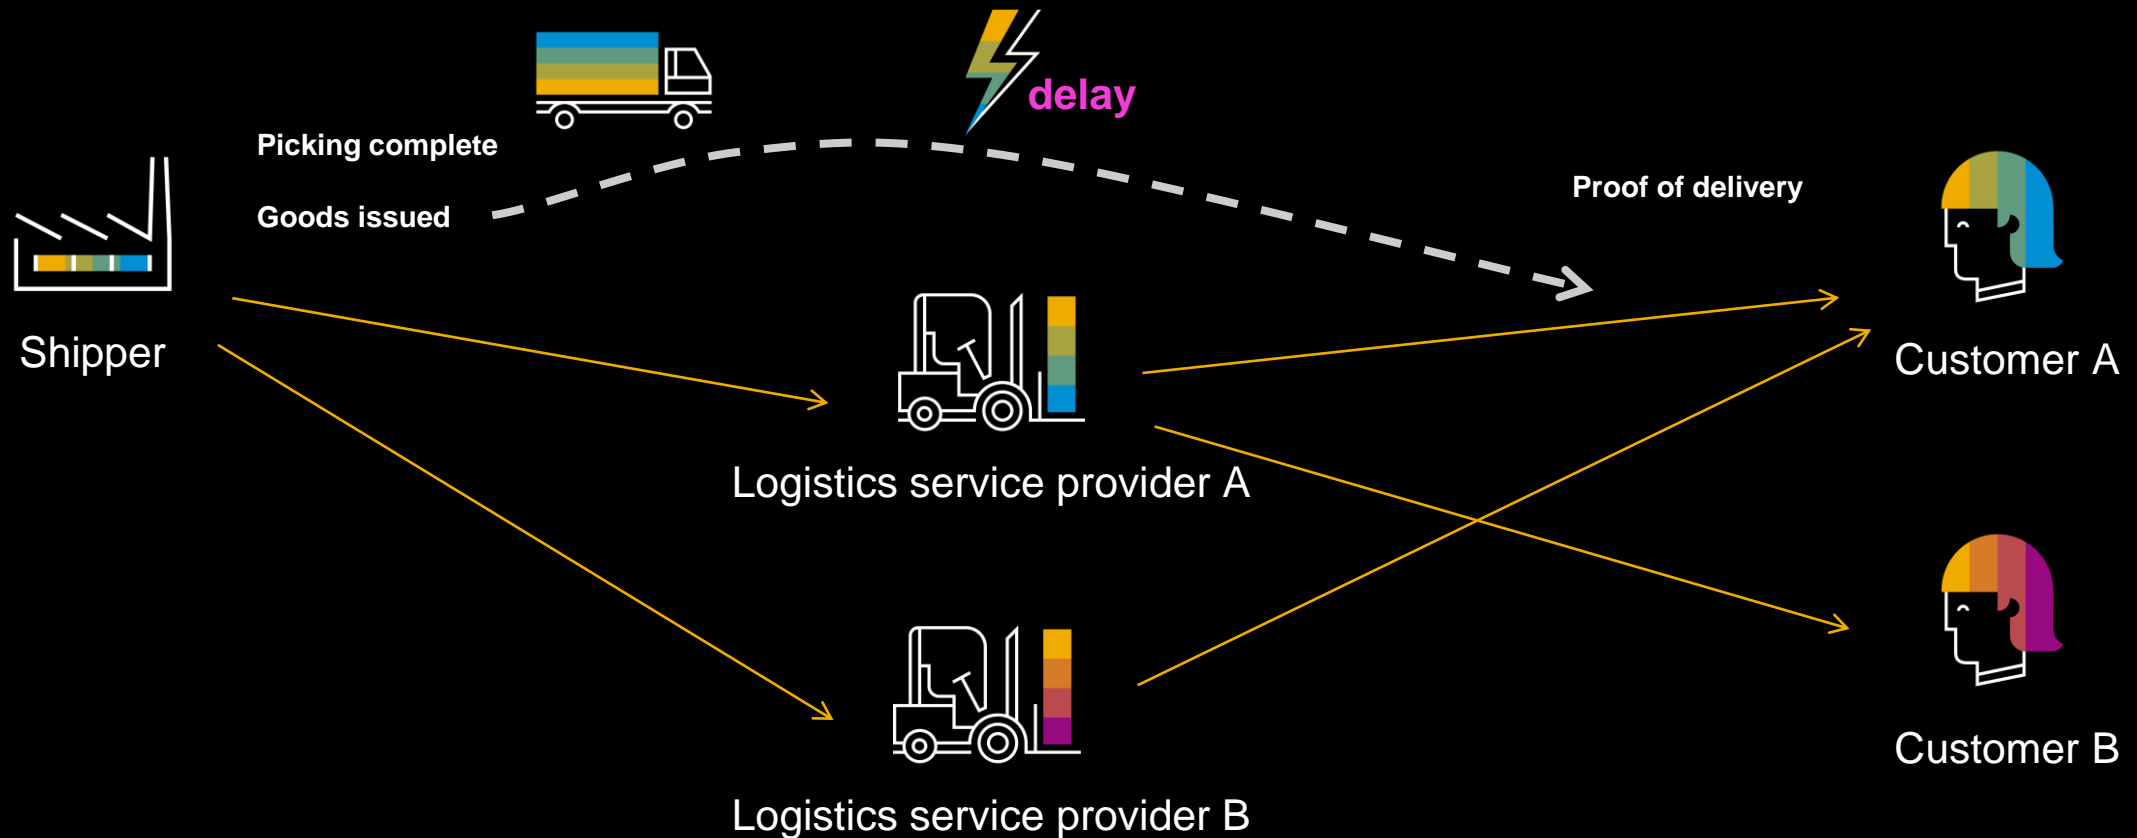

# Demo

# SAP Global Track and Trace

Ready-to-run content: provide real-time delivery transparency in your extended supply chain

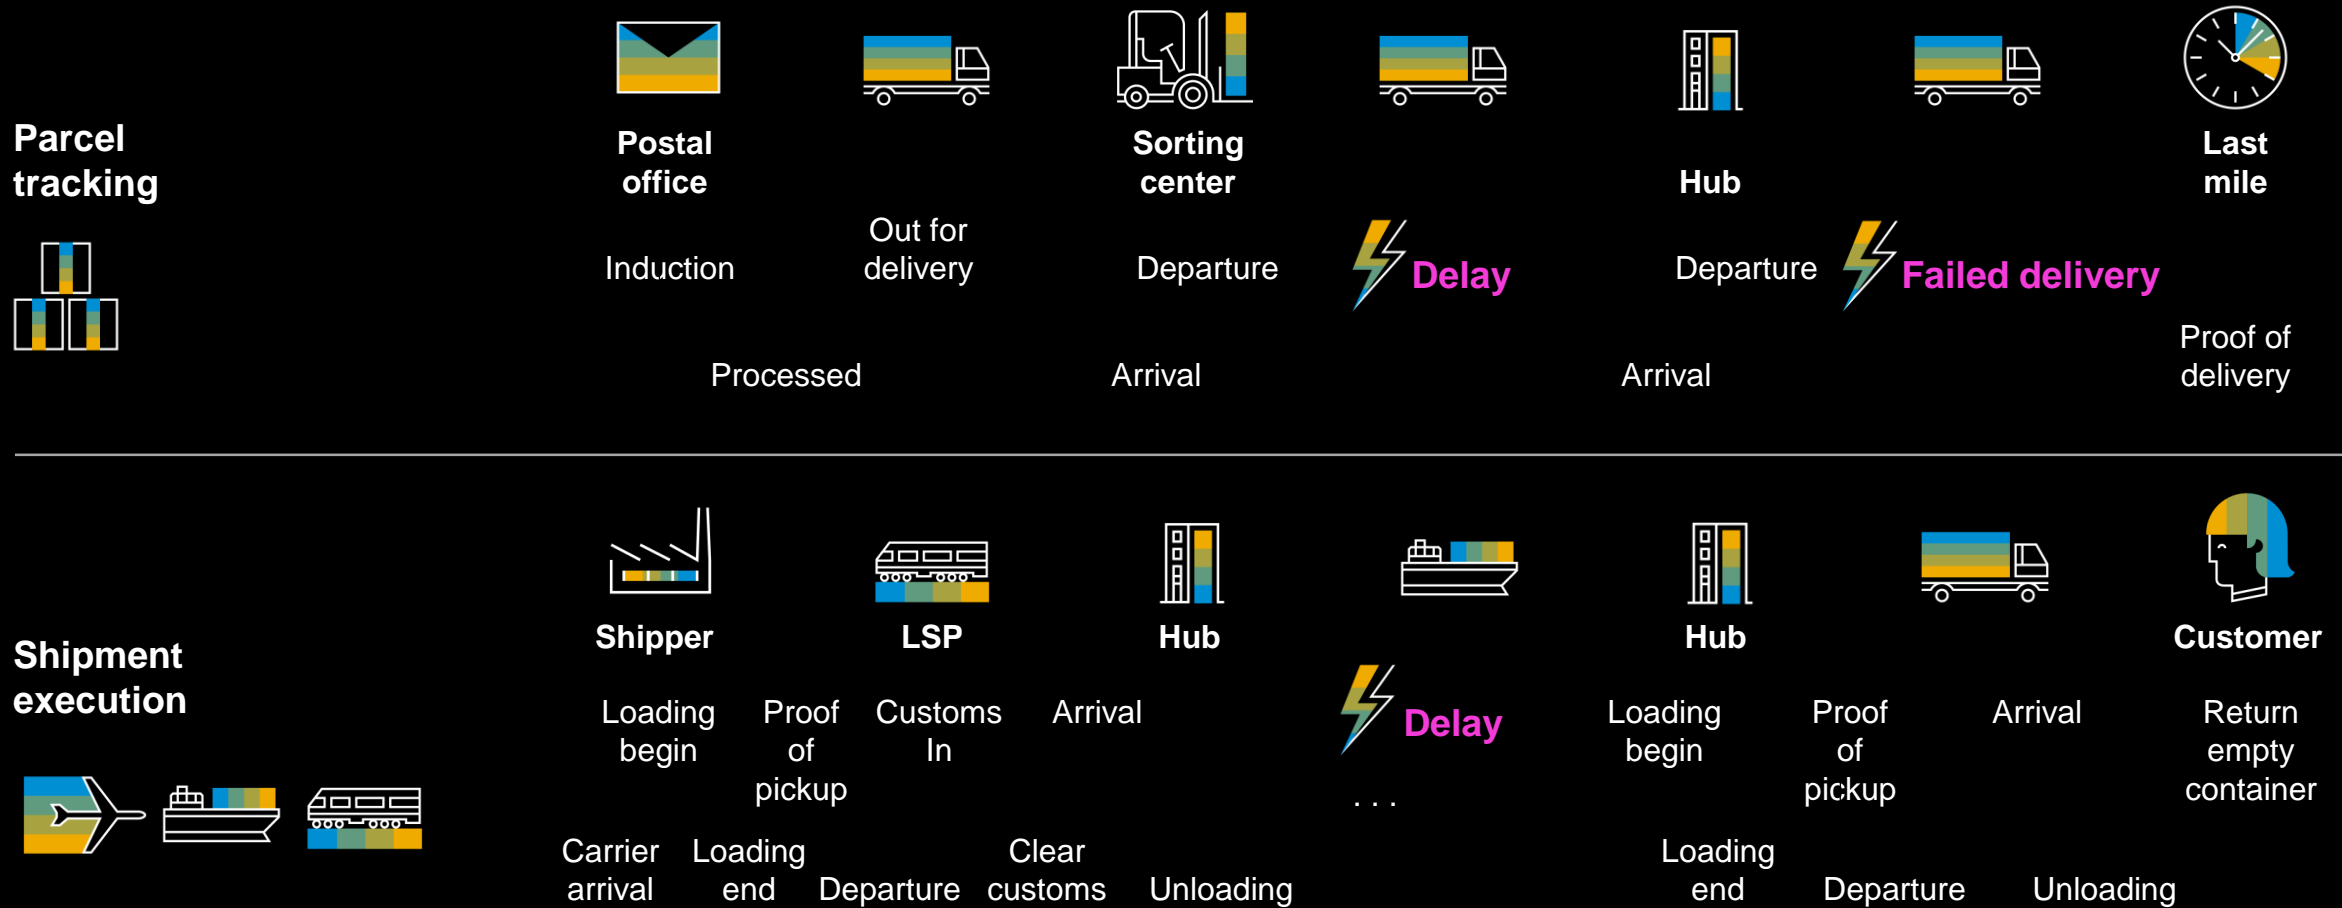

Provisioning and onboarding – master data: business partner

Can be complemented by shipment tracking on a project basis

# SAP Global Track and Trace

Ready-to-build: generic business process and object tracking – examples

Provisioning and onboarding – master data: business partner

# SAP Global Track and Trace

## Setup

- Onboard business partner ecosystem based on consolidated master data
- Integrate with business backend systems
- Activate and/or configure tracking scenarios

## Monitor

- Capture business events from a variety of data sources across your business network in real time

## Notify

- Be informed of deviations from the plan
- Get real-time status updates

## Adjust

- Make informed and timely decisions
- Act on early notification of emerging threats
- Trigger business adjustments

## Analyze

- Allow each stakeholder to access a personalized view of the tracked objects and processes
- Run reports

- SAP back-end integration via SAP Event Management application interface
- Configuration editor

- Via OData interface or SAP Fiori app

- SAP Fiori app search via status

- Manual

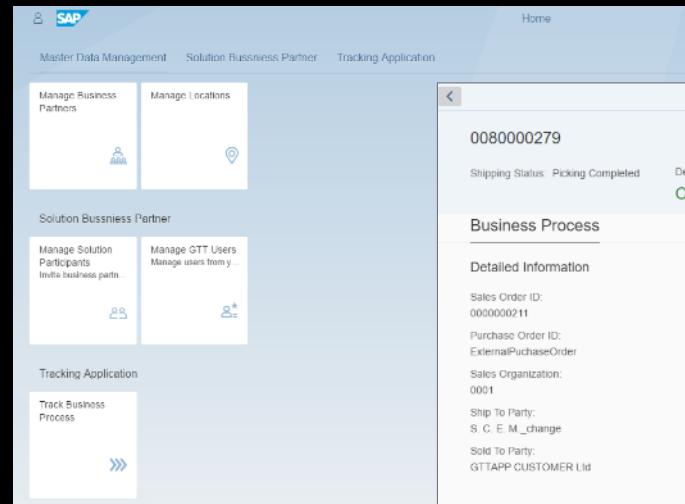

- SAP Fiori app
