

The SAP Next-Gen Chapter SAP Business by Design

Purpose

The purpose of the chapter participants is the sharing of experience and the improvement/development of knowledge about SAP Business by Design (ByD) in training for all kinds of ERP lectures.

A cloud-based ERP system builds a very good base for student education in all kinds of study programs. Especially the “modern system look and feel” and the use of the system on every client without any installation is a benefit for trainers and for the students to develop the necessary skills at every time the participants want to. There is lots of good training material available and the experiences with the material and the system should be shared and the cases will be expanded in future to get some additional aspects of finance or HR included into the cases. We will promote the ByD system for training, exchange experiences and foster the development of new curricula content.

We explicitly will NOT be a helpdesk for day to day requests.

The scope of Work for the SAP Next-Gen Chapter Lead is to generally coordinate the group activities online and in the real world. This means to initiate calls and meetings on a regular base and help as the first contact for potential new members. The actual SAP Next-Gen Chapter Lead for Business by Design in EMEA for 2018/2019 is

Dr. Christian Ploder
Management Communication & IT
Management Center Innsbruck
Mail: christian.ploder@mci.edu

The scope of Work for membership in the SAP Next-Gen Chapter may vary from “interested newbie” to expert. Every new member has to be nominated and recommended by an existing member or needs to apply at the chapter lead. Engagement can reach from only interested participation up to build and organize community objectives. Members shall support the Chapter Lead in the Chapter work.

The Business by Design chapter EMEA officially started on September 10, 2018. After the first year of Performance, we will check the status of interest and engagement and decide about further work.

Deliverables & Activities of the Community

1. Developing and testing ByD-related curricula incl. prototypes for teaching
2. Onboarding university representatives to its know-how and curricula
3. Exchange of experiences in training ByD
