Thinkers

Our philosophy

The SAP Young Thinkers program has the mission to "Enable You!th to Shape a Purposeful World." By opening the world of SAP to younger students in schools, the program inspires the next generation to pursue education and careers in STEAM (science, technology, engineering, arts and math) fields. Providing a foundation for digital literacy, students and IT beginners actively experience how innovation methodologies and technology can help shape a purpose focused world.

Providing a foundation for digital literacy, students and IT beginners actively experience how innovation methodologies and technology can help shape a purpose focused world.

Active community

The SAP Young Thinkers community is a global network with motivated partners, offering learning opportunities on topics of digitization, design and innovation, and the 17 UN Sustainable Development Goals (SDGs).

Lifelong learning

The challenges of today's world require new ways of learning to achieve digital skills and foster holistic thinking.

The SAP Young Thinkers community offers interdisciplinary and mixed-age workshops for a variety of educational formats for schools around the world that are pursuing digital education while also bringing a strong focus to how digital technologies can accelerate solutions to the SDGs.

Community
- Schools
- Universities
- Start-Ups and accelerators
- Non-profit organizations
- Companies
- Ministries of education / culture
- Non-governmental organizations

Learning content
- Programming with, for example Snap!
