Chapter 3, 4: scope of S/4HANA LoB- and Industry Solutions

Guiding Principle: No surcharge on like for like functionality

- Principle of **ONE** drives us to deliver only **ONE** solution for **ONE** business problem
- Even if ERP capabilities are realized in a solution that comes with its own license, we do not charge in case solely the functional scope is used, that is described as part of the S/4HANA Enterprise Management

Compatibility Packs in SAP S/4HANA

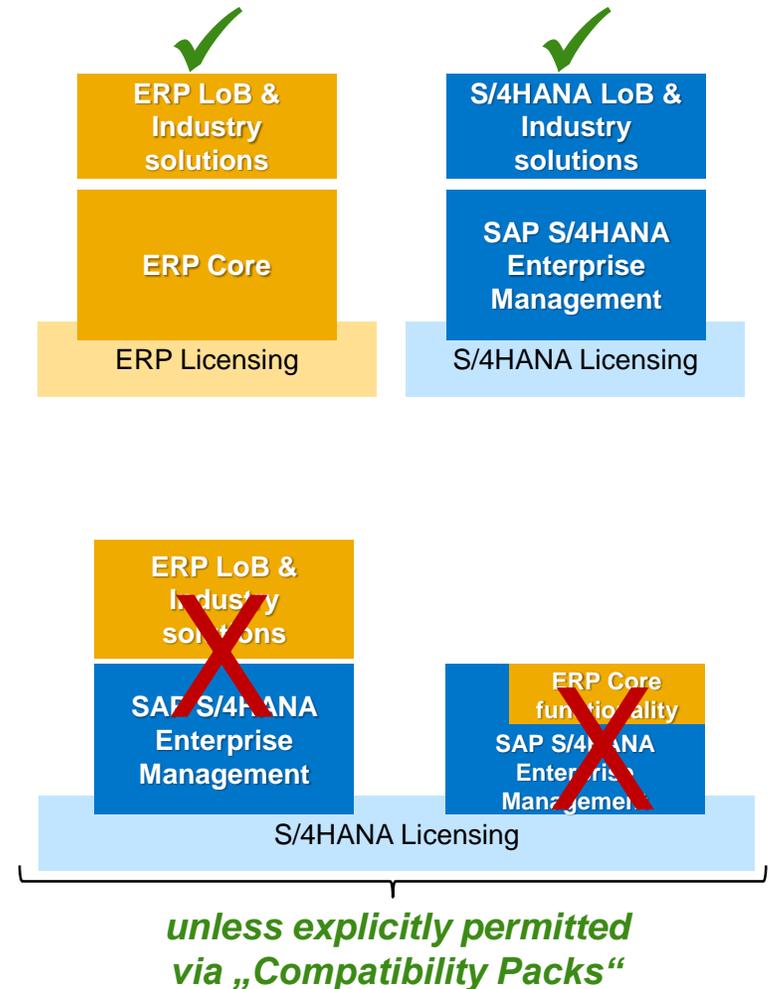

Motivation

Why allow the use of Compatibility Packs on SAP S/4HANA?

- Make transition easier for customers using SAP ERP/Business Suite
- Allow sufficient time for redesign of business processes under S/4HANA

Only SAP S/4HANA solutions are allowed to run on an SAP S/4HANA installation

- SAP S/4HANA is a new product, not the legal successor of SAP ERP/SAP Business Suite products
- Separation of the commercial worlds is essential [via Software Use Rights (SUR)]

Compatibility Packs in SAP S/4HANA

Overview

SAP grants a timely restricted⁽¹⁾ use right for specific classic SAP solution functionality⁽²⁾ to S/4HANA customers, at no extra cost⁽³⁾

(1) restricted until the end of 2025

(2) whitelist: compatibility packs as documented in note [2269324](#) and in the Software Use Rights (SUR)

(3) condition: customer has licensed SAP S/4HANA and the classic solution

Compatibility Packs are only required for solutions which are installed on the SAP S/4HANA instance – not for side-by-side installations.

SAP aims to replace these classic solutions by the end of 2025 with a genuine S/4HANA solution.

A Bridge Into the New World – Side-by-side versus On-stack Installation

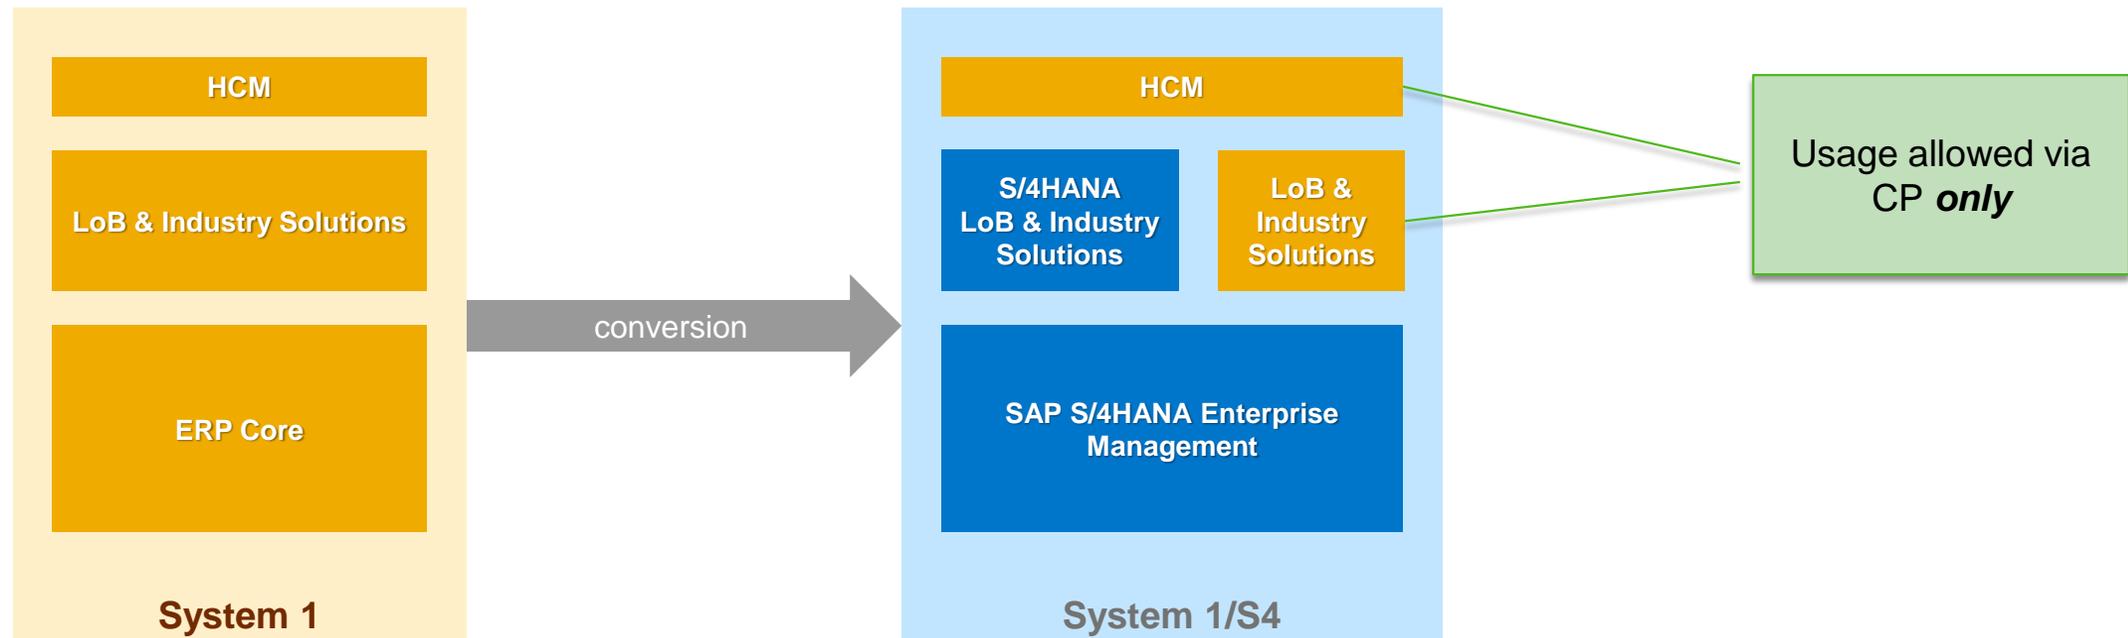

Running a classic SAP ERP solution side-by-side with SAP S/4HANA does not require a Compatibility Pack.

Chapter 3, 4: scope of S/4HANA LoB- and Industry Solutions

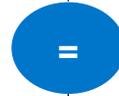

SAP S/4HANA Cloud Licensing

Licensing User Access to Digital Core via Full Usage Equivalents

NEW as of
January
2019

Full Usage Equivalents

- Full Usage Equivalent is a kind of **flexible user** and can be **used for all type of users**
- Different user types can be **converted with specific ratio** in FUE
- Concept of Full Usage Equivalents currently available for S/4HANA Cloud, single tenant edition
- SAP plans to extend this concept also to S/4HANA Cloud

S/4HANA Cloud user types

0,5	SAP Developer User
1	S/4HANA for advanced use
3	S/4HANA for core use
30	S/4HANA for self-service use

Example – how to use the FUE for different user types

40 Prof Users	= 40 FUE
75 Functional Users	= 25 FUE
270 Productivity Users	= 9 FUE

SUM	= 74 FUE

**NEW as of
January
2019**

Customers benefit from the FUE model

FUE can be seen as flexible users

By adding up all user types customers can reach a higher tier and a better price

Example:

2018 Licensing Model

License Material	# users	FUE ratio	# FUEs	Tier
S/4HANA Cloud Advanced Use	70	1:1	70	1
S/4HANA Cloud Core Use	210	1:3	70	2
S/4HANA Cloud Self-Serve Use	600	1:30	20	2

2019 Licensing Model

License Material	# FUEs	Tier
S/4HANA Cloud for Enterprise Management	160	2

Customer can re-allocate their users to avoid shelf-ware during their life-cycle

Example:

Before re-allocation

User type	# users	FUE ratio	# FUEs	Swap FUEs	Swap Users
Advanced Use	70	1:1	70	-10	-10
Core Use	210	1:3	70	+10	+30
Self-Serve Use	600	1:30	20		

After re-allocation

User type	# users	FUE ratio	# FUEs
Advanced Use	60	1:1	60
Core Use	240	1:3	80
Self-Serve Use	600	1:30	20
