# Agenda

## Presentation of new USMM

- Settings
- USMM: Rule-based Classification Preparation
- Web Dynpro User Interface
- Check Notes
- User Classification
- Rule-based Classification
- Perform Measurement
- Result Transfer

## Future innovations

- History
- Digital Access Report

## Outlook

# USMM: Settings

The new USMM combines all basic settings on one page.

- Clients, Price Lists, User types and E-Mail Address from the tabs of the former USMM

# USMM: Settings

## ▪ RFC Back-Destination from RSLAW\_PLUGIN

# USMM: Settings

- Define parameters for History Administration
- Link to the Role-based Classification (Transaction LICENSE\_ATTRIBUTES)

Systemvermessung Einstellungen

Systemvermessung Information

Systemvermessung Einstellungen

- Mandanten
- Preislisten
- Nutzertypen
- E-Mail Adresse pflegen
- RFC Destination zur LAW Zentrale pflegen
- Parameter zu Historienverwaltung pflegen
- Rollenbasierte Klassifizierung**

# USMM: Rule-based Classification Preparation

## Create rules

The new USMM features the possibility to define a set of rules, which then creates a suggestions for the classification

The image displays two screenshots of the SAP USMM (User System Measurement Measurement) interface. The left screenshot shows the 'Systemvermessung Einstellungen' screen, which includes a tree view of system measurement settings. One item, 'Regelbasierte Klassifizierung', is highlighted with a yellow box. The right screenshot shows the 'Sicht "Regeln" ändern: Übersicht' screen, which displays a table of rules. The table has three columns: 'Regel' (Rule), 'Beschreibung' (Description), and others. The data in the table is as follows:

| Regel        | Beschreibung          |
|--------------|-----------------------|
| DEMO_01_0001 | Auditor               |
| DEMO_01_0002 | Entwickler            |
| DEMO_01_0003 | System Administration |
| DEMO_01_0004 | Workload              |
| TEST         | test                  |

# Further Information

Further information about Rule-based User Classification can be found in the SAP Support Portal under the following link:

[https://support.sap.com/content/dam/support/en\\_us/library/ssp/my-support/systems-installations/system-measurement/information-about-sap-system-measurement/Rule-Based-User-Classification-Guideline.pdf](https://support.sap.com/content/dam/support/en_us/library/ssp/my-support/systems-installations/system-measurement/information-about-sap-system-measurement/Rule-Based-User-Classification-Guideline.pdf)

## User Classification

To ensure that users are evaluated correctly, they must first be classified according to their activities in the system and according to the appropriate price list. The measurement request e-mail specifies the price list that is relevant for you.

**Tip:** The measurement program contains additional classification aids that are not yet described in the current instructions on system measurement:

- ✓ Classification check / Klassifizierungsprüfung
- ✓ Measurement of Non-Dialog Users / Vermessung von Nicht-Dialog-Benutzern
- ✓ Role-based user classification / Benutzerklassifizierung nach Rollen
- ✓ **New: Rule-based user classification / Neu: Regelbasierte Nutzerklassifizierung**

To use the rule-based user classification, the new system measurement program must be implemented. Availability see above.

## Useful Notes & Tips

The most important SAP Notes and tips are available here:

- ✓ Required user types missing in user list
- ✓ General information about online data transfer (SAP Note 1142694)
- ✓ Engine measurement - information about counting method and evaluation
- ✓ Self-declaration of engines - self-declaration of non-measurable products
- ✓ SAP notes for system measurement of engines

# USMM: Web Dynpro User Interface

Within the new USMM, the User Interface for the measurement process runs as Web Dynpro

- By clicking the button  System Measurement , a new browser is opening
- To get directly to the measurement process you can also use transaction USMM2
- In case of problems with the Web Dynpro ensure to check the note 2695241

# USMM: Check Notes

The SAP- supplied note file can be imported into the USMM.

# USMM: Check Notes

After importing this note, a check will be performed directly:

- Does the validity match with the Release/Support Package of the system?
- Is the note already applied to this system?

The result list contains all the notes that can be imported into the relevant System

Notes that are not required in this system, can be excluded from the result list

The screenshot shows the SAP USMM interface for checking notes. At the top, there is a navigation bar with four steps: 1. Hinweise Prüfen (selected), 2. Benutzerklassifizierung, 3. Vermessung durchführen, and 4. Ergebnisübertragung. Below the navigation bar, the title 'Prüfung SAP Hinweise' is displayed. On the left, there is a sidebar with 'Funktionen' and a button 'Hinweisdatei importieren'. The main area is titled 'Übersicht Hinweise' and contains a table with the following data:

| Systemnummer       | SID | Inst. Nr.  | Hinweisnu... | Hinweistext                                  | Engine | Engine Text                              | Softwareko... | Release | SP... |
|--------------------|-----|------------|--------------|----------------------------------------------|--------|------------------------------------------|---------------|---------|-------|
| 000000000312641446 | Y51 | 0020270862 | 1865051      | Categorisation of Folders Management Records | 2107   | 2107 Folders Mgmt: Folders Mgmt. records | SAP_BASIS     | 751     | 17    |

# USMM: User Classification

- Similar to the user classification in the old USMM, this user classification can also be performed in a list.
- However, there are additional selection options in the list.

The screenshot shows the SAP Systemvermessung interface for user classification. At the top, there is a navigation bar with four steps: 1. Hinweise Prüfen, 2. Benutzerklassifizierung (which is highlighted in blue), 3. Vermessung durchführen, and 4. Ergebnisübertragung. Below the navigation bar is a search bar with two dropdown menus: 'Benutzer' and 'ID Vertraglicher Benutzertyp'. The 'Benutzer' dropdown has 'ist' selected and contains the value 'A\*'. The 'ID Vertraglicher Benutzertyp' dropdown also has 'ist' selected and contains an empty field. Below the search bar are buttons for 'Suchen' (highlighted with a yellow box), 'Sichern', 'Abbrechen', 'Klassifizierungshilfe', and 'Regelbasierte Klassifizierung'. At the bottom of the search area are tabs for 'Benutzerklassifizierung' and 'Verteilung'. The main area displays a table of users with their classification details. The table has columns: Benutzername, Vorname, Nachname, ID Vertraglicher Benutzertyp, Techn. Benutzertyp, Entwickler, Letzes Login-Datum, and Klassifizierungsart. The table shows several rows of data, with the first row being A2ETEST, AAKOLK, AB, ABDULLIN, ABRAHAMJOSE, and ARRAHAMSO.

| Benutzername | Vorname | Nachname | ID Vertraglicher Benutzertyp | Techn. Benutzertyp | Entwickler | Letzes Login-Datum | Klassifizierungsart   |
|--------------|---------|----------|------------------------------|--------------------|------------|--------------------|-----------------------|
| A2ETEST      |         |          | 91 Test                      | A Dialog           |            | 11.10.2018         | D Default-Benutzertyp |
| AAKOLK       |         |          | 91 Test                      | A Dialog           |            | 27.04.2015         | D Default-Benutzertyp |
| AB           |         |          | 91 Test                      | A Dialog           |            | 20.12.2017         | D Default-Benutzertyp |
| ABDULLIN     |         |          | 91 Test                      | A Dialog           |            | 01.06.2017         | D Default-Benutzertyp |
| ABRAHAMJOSE  |         |          | 91 Test                      | A Dialog           |            | 25.09.2018         | D Default-Benutzertyp |
| ARRAHAMSO    |         |          | 91 Test                      | A Dialog           |            | 08.06.2017         | D Default-Benutzertyp |

# USMM: Rule-based Classification Execution

The corresponding profile of the rule- based classification needs to be selected, then a new tab with buttons appears.

The screenshot shows the SAP User Master Maintenance (USMM) interface. At the top, there are two dropdown menus: 'Benutzer' (User) set to 'ist' and 'A\*' and 'ID Vertraglicher Benutzertyp' (Contractual User Type ID) set to 'ist'. Below these are search ('Suchen'), save ('Sichern'), cancel ('Abbrechen'), classification help ('Klassifizierungshilfe'), and a dropdown for 'Regelbasierte Klassifizierung' (Rule-based Classification) set to 'DEMO\_01'. The tabs at the bottom are 'Benutzerklassifizierung', 'Regelbasierte Klassifizierung' (which is highlighted with a yellow box), and 'Verteilung'. Below the tabs is a toolbar with 'Sicht' (View) set to 'Standardsicht', 'Export', and two buttons: 'Benutzer klassifizieren' and 'Klassifizierung übernehmen' (both highlighted with a yellow box). A table below lists users: A2ETEST, AAKOLK, AB, and ABDULLIN, all assigned to ID 91 and type Test.

|  | Status | Mdt | Benutzername | Vorname | Nachname | ID | Vertraglicher Benutzertyp | ID Neu | Vertraglicher Benutzertyp neu |
|--|--------|-----|--------------|---------|----------|----|---------------------------|--------|-------------------------------|
|  |        | 000 | A2ETEST      |         |          | 91 | Test                      |        |                               |
|  |        | 000 | AAKOLK       |         |          | 91 | Test                      |        |                               |
|  |        | 000 | AB           |         |          | 91 | Test                      |        |                               |
|  |        | 000 | ABDULLIN     |         |          | 91 | Test                      |        |                               |

# USMM: Rule-based Classification Execution

The button „Classify Users“ starts the proposal determination based on the defined rules.

| User Classification      |                 |        |                         |         |                        |                         |                           |        |                               |            |              |              |              |   |

# USMM: Result Transfer

## Functions:

- Send Result to SAP
  - Transmits the measurement result of this system to SAP via SDCCN
  - The button is inactive if the SDCCN is not configured correctly
- Save Result Locally
  - If SDCCN is not available, the result can be saved as TXT or PDF file
  - This should be sent to SAP via E-Mail.
  - Since this file does not contain any user-related data, it must not be used for further processing in a LAW
- Save LAW File Locally
  - If the system measurement is to be consolidated in a LAW, the LAW file can be saved locally as an XML-file. Afterwards it can be uploaded to the LAW
  - Since this file contains user-related data, it is not destined for sending it to SAP
- Send LAW File via RFC
  - If an RFC Destination is maintained, the LAW result can be sent to the LAW central system via RFC

# USMM: Result Transfer

The PDF protocol is displayed in a new browser window

# Availability of the new Developments

The innovations introduced here are included in the software component SAP\_BASIS as of the following Support Packages:

- 7.02 SP21 (SAPKB70221) RTC Nov 2018
- 7.31 SP23 (SAPKB73123) RTC Aug 2018
- 7.40 SP20 (SAPKB74020) RTC Aug 2018
- 7.50 SP11 (SAPK-75011INSAPBASIS) RTC March 2018
- 7.51 SP06 (SAPK-75106INSAPBASIS) RTC Apr 2018
- 7.52 SP02 (SAPK-75202INSAPBASIS) RTC May 2018

A shipment via note is not possible due to technical restrictions

# Further Information

Further information about the new USMM can be found here:

- In the program within the online documentation that can be accessed via the Help Icon.
- In the SAP Portal with the following link:

[https://support.sap.com/content/dam/support/en\\_us/library/ssp/my-support/systems-installations/system-measurement/information-about-sap-system-measurement/Changes-in-the-System-Measurement-Program.pdf](https://support.sap.com/content/dam/support/en_us/library/ssp/my-support/systems-installations/system-measurement/information-about-sap-system-measurement/Changes-in-the-System-Measurement-Program.pdf)

**Changes in the System Measurement Program**  
Introduction of the new System Measurement Program, the changes and the new features

# USMM History

In future, historical measurement data will also be available

- Similar to the LAW Info System, all stored measurements are displayed
- After selecting a measurement set, it is possible to:
  - Save the result locally as a XLM file
  - Display historical values of the additional check (Multiple Logon etc.)

The screenshot shows the SAP Systemvermessung interface. At the top, there is a navigation bar with the SAP logo and the title "Systemvermessung". Below the navigation bar, there is a breadcrumb trail with five steps: "Zurück zum Einstieg", "Hinweise Prüfen" (Step 1), "Benutzerklassifizierung" (Step 2), "Vermessung durchführen" (Step 3), "Ergebnisübertragung" (Step 4), and "Historie" (Step 5). Step 5 is highlighted with a yellow box. Below the breadcrumb trail, there is a section titled "Vermessungshistorie". In this section, there is a table with the following data:

| Vermessungs-Nummer | Vermessen von | Verm. Datum | Vermessungszeit |
|--------------------|---------------|-------------|-----------------|
| 556                | LANGULR       | 02.10.2018  | 16:54:47        |
| 555                | LANGULR       | 02.10.2018  | 16:44:27        |
| 554                | GUTIERREZT    | 02.10.2018  | 00:45:59        |
| 553                | MOLNARS       | 01.10.2018  | 17:31:29        |
| 552                | MOLNARS       | 01.10.2018  | 17:21:21        |
| 551                | HUEGEL        | 28.09.2018  | 10:09:22        |

Below the table, there is a navigation bar with the following links: "Benutzer Details", "Mehrfachanmeldungen", "Anwender Workbench", "Gelöschte Benutzer", "Abgelaufene Benutzer", "Anwender Prof/Ltd. Prof", "Arbeitszeit", "Zukünftige Benutzer", and "Anmeldung nach Ablauf".

# USMM History

If the option *Save User Data* was active during the measurement, the following options are offered:

- Save the LAW file of that measurement locally
- Display user data of the measurement

# USMM History

The user details of the historical measurements can be selected

The screenshot displays the SAP Systemvermessung interface. At the top, a navigation bar shows five steps: Hinweise Prüfen (1), Benutzerklassifizierung (2), Vermessung durchführen (3), Ergebnisübertragung (4), and Historie (5). The 'Historie' step is highlighted.

The main area is titled 'Vermessungshistorie' and contains a table of measurements:

| Vermessungs-Nummer | Vermessen von | Verm. Datum | Vermessungszeit |
|--------------------|---------------|-------------|-----------------|
| 614                | LANGULR       | 25.02.2019  | 11:10:47        |
| 613                | LANGULR       | 25.02.2019  | 10:58:43        |
| 612                | HOLTMAN       | 12.02.2019  | 17:53:22        |
| 611                | LANGULR       | 12.02.2019  | 16:40:08        |
| 610                | HOLTMAN       | 12.02.2019  | 16:26:07        |
| 609                | HOLTMAN       | 12.02.2019  | 16:17:42        |

Below this, a section titled 'Benutzer Details' shows dropdown menus for filtering users by various criteria:

- Benutzer
- ID Vertraglicher BenutzerTyp
- Klassifizierungsart
- Mandant

At the bottom, another table lists user details:

| Mandant | Benutzer | Techn. BenutzerTyp | Letztes Login Datum | ID Vertraglicher BenutzerTyp    | Klassifizierungsart       | Referenzbenutzer |
|---------|----------|--------------------|---------------------|---------------------------------|---------------------------|------------------|
| 000     |          | A Dialog           | 18.12.2017          | 91 Test                         | D Default-BenutzerTyp     |                  |
| 000     |          | A Dialog           | 07.04.2017          | 55 SAP Business Suite Developer | M Manuelle Klassifikation |                  |
| 000     |          | A Dialog           | 12.02.2019          | 91 Test                         | D Default-BenutzerTyp     |                  |
| 000     |          | A Dialog           | 25.02.2019          | 91 Test                         | D Default-BenutzerTyp     |                  |

# USMM History

If no user details were saved the option will not be visible and also no LAW file can be created

The screenshot shows the SAP Systemvermessung application interface. At the top, there is a navigation bar with five steps: 1. Hinweise Prüfen, 2. Benutzerklassifizierung, 3. Vermessung durchführen, 4. Ergebnisübertragung, and 5. Historie. Step 5 is highlighted with a blue circle. Below the navigation bar is a section titled "Vermessungshistorie". It contains a table with columns: Vermessungs-Nummer, Vermessen von, Verm. Datum, and Vermessungszeit. The table lists several entries, with the last one, row 610, being selected. Below the table are four buttons: Mehrfachanmeldungen, Anwender Workbench, Abgelaufene Benutzer, and Anmeldung nach Ablauf. The "Mehrfachanmeldungen" button is underlined, indicating it is active. At the bottom of the screen, there is another table with columns: Mdt, Benutzername, Anzahl der Mehrfachanmeldungen, Spitzenwert der Mehrfachanmeldungen, and Datum des Spitzenwerts der Mehrfachanmeldungen.

| Vermessungs-Nummer | Vermessen von | Verm. Datum | Vermessungszeit |
|--------------------|---------------|-------------|-----------------|
| 614                | LANGULR       | 25.02.2019  | 11:10:47        |

# Digital Access Report

The measurement of the Digital Access Documents is not part of the standard measurement for the time being. In order to still have an overview of the values, a separate report can be executed, which calls the measurement function modules and displays measured values.

- The functionality is started by the transaction RSUVM\_DAC or the execution of a report with the same name
- The period of the measurement can be chosen
- The last results are displayed
- If a new measurement is started the old results will be overwritten

# Availability of further innovations

The USMM History and the DAC report will be available from the following Support Packages in the software component SAP\_BASIS:

- 7.02 SP22 (SAPKB70222) RTC planned for Nov 2019
- 7.31 SP25 (SAPKB73124) RTC planned for Jan 2019
- 7.40 SP22 (SAPKB74021) RTC planned for Jan 2019
- 7.50 SP15 (SAPK-75015INSAPBASIS) RTC planned for June 2019
- 7.51 SP08 (SAPK-75108INSAPBASIS) RTC planned for April 2019
- 7.52 SP04 (SAPK-75204INSAPBASIS) RTC planned for April 2019
