

INTELLIGENT PLANNING OFFER

Intelligent Planning is an offer from WISEO to assist you with the digitization of your supply chain deploying SAP IBP and following SAP best practices model.

SAP IBP Key Features

SAP IBP is a cloud solution for your supply chain planning powered by SAP HANA®. It includes:

-  Integrated Sales and Operations planning (S&OP)
-  Forecasting and Demand Management
-  Inventory Planning and Optimisation
-  Interoperability with other SAP solutions

Solution Key Benefits

- Unify & automate processes for coordinated planning
- Improve demand & forecast accuracies
- Make decisions & seize opportunities faster
- Analyze in real-time your KPI's
- Increase revenue with on-time delivery & low stocks
- Maintain customer service

A dedicated methodology to build and test a core system

To set up your new supply chain, VISEO recommends a roadmap comprised of three stages to implement SAP Integrated Business Planning with a S&OP standard process.

1

Preparation

- System requirement review
- Technical & functional workshops
- Proof of value to build general design after Core Team validation

2

Realization

- Classical steps of Build
- Business & IT change management
- Training & User acceptance tests

3

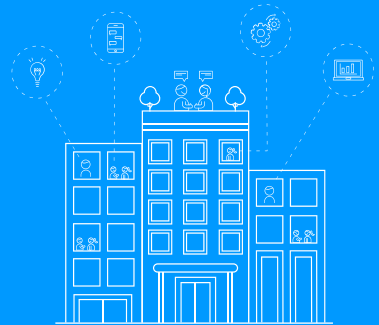

Migration & Support

- Conversion from your former solution
- Application maintenance services

Why VISEO?

- A strong team comprised of Supply Chain experts
- Global end-to-end vision
- Expert in Change Management
- 20 years of experience in SAP ERP implementation projects

VISEO has the knowledge, the experts and the methodology to ensure the success of your project.
