

SAP's vision of Finance transformation

SAP's vision of Finance transformation

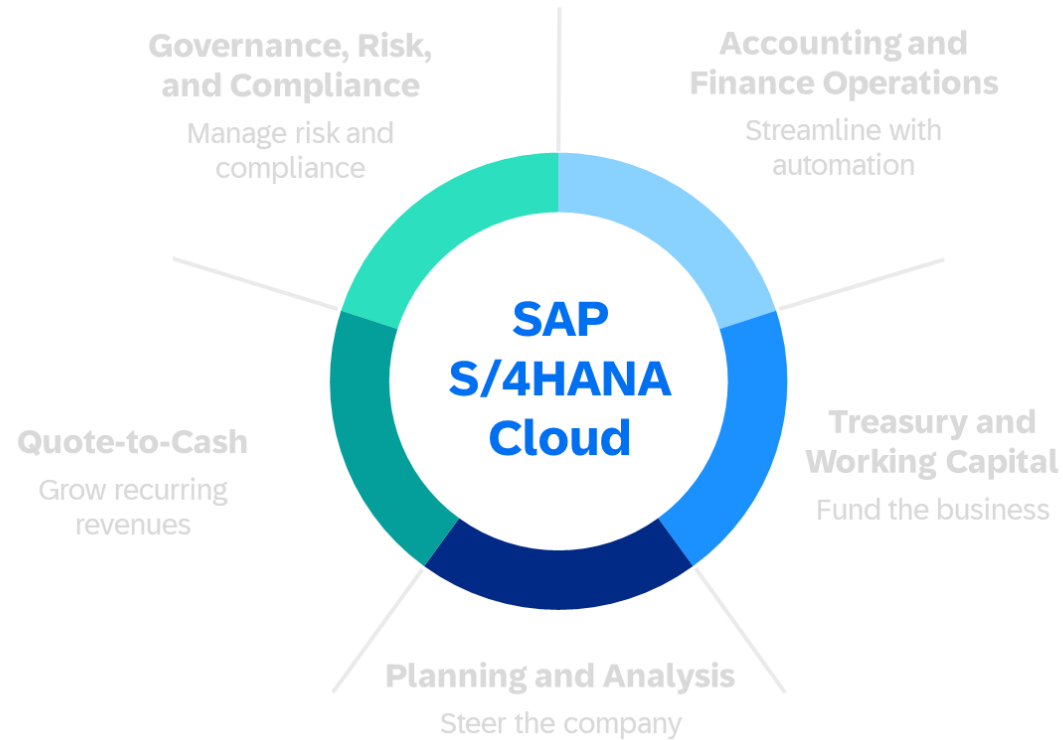

SAP's vision of Finance transformation

A new way of working

Immediate user interface thanks to Fiori APPs, in mobility access, integration with Office, Joule and the Joule Agents to support and guide users in the day by day activities

End to End processes

Complete visibility of upstream and downstream accounting processes, predictive accounting, parallel ledger

Embedded Analytics

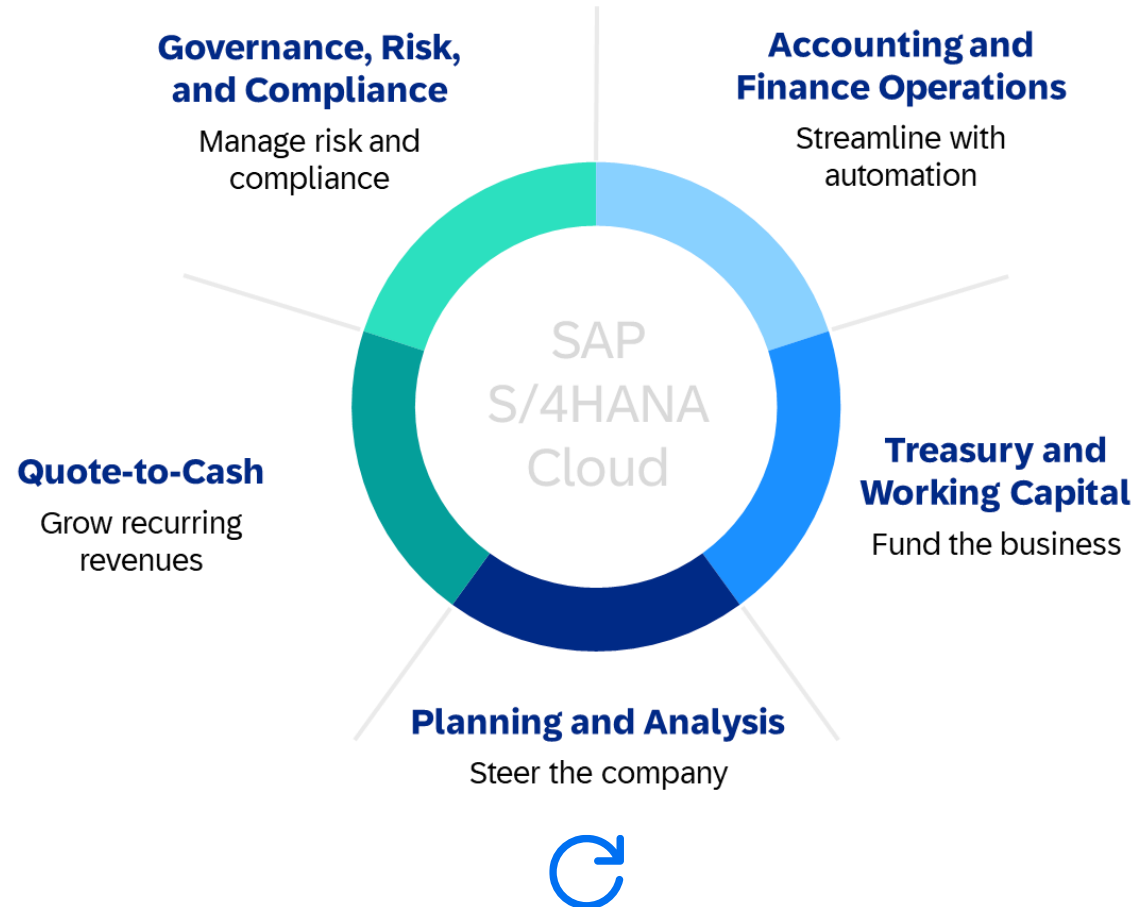

A new way of working enables real-time data analysis within the transactional environment, offering seamless access to interactive dashboards and reports

SAP's vision of Finance transformation

Integrated specific solutions

In order to provide comprehensive coverage of specific Finance processes, SAP offers a series of fully integrated solutions at the interface, process, and data levels, aiming to accommodate different ways of working while ensuring an overall view

Comprehensive coverage

Integrating all aspects of finance, from accounting and treasury to compliance and risk assessment. Their robust platform provides real-time insights and analytics

Flexibility and scalability

Catering to the specific needs and maturity of processes, it is possible to activate specific solution areas gradually and with maximum flexibility, both at the process level and in terms of volumes
