Build Visually — Integrate Seamlessly — Collaborate Securely

SAP Business Technology Platform

# SAP Build Portfolios Key Capabilities

Collaborate securely
Foster collaboration and operate with confidence

Enable fusion team development

Share artifacts and leverage complex logic contributed by professional developers

Centralized lifecycle management, monitoring, and governance

Unified lobby

SAP Build Apps - Build apps visually

## Create enterprise apps with drag-and-drop simplicity

Design beautiful user interfaces without coding

Create data models and business logic visually

SAP Build Apps

SAP Build Apps – Key Capabilities
Enterprise-grade apps with an intuitive visual drag-and-drop experience, regardless of skill level

SAP Build Apps

Easy creation of user interfaces with drag & drop

Stand-alone & SAP App extensions

Multi-channel support: mobile & web

Collaborative work on the apps

Integration with SAP or non-SAP systems via REST-APIs & OData

Visual Cloud functions for creating full-stack apps with backend, data models and business logic

Use of SAP BTP authentication and destination

SAP Build Process Automation

SAP Build Code

SAP Build Work Zone

Powerful features for full-stack no-code development
Key frontend capabilities
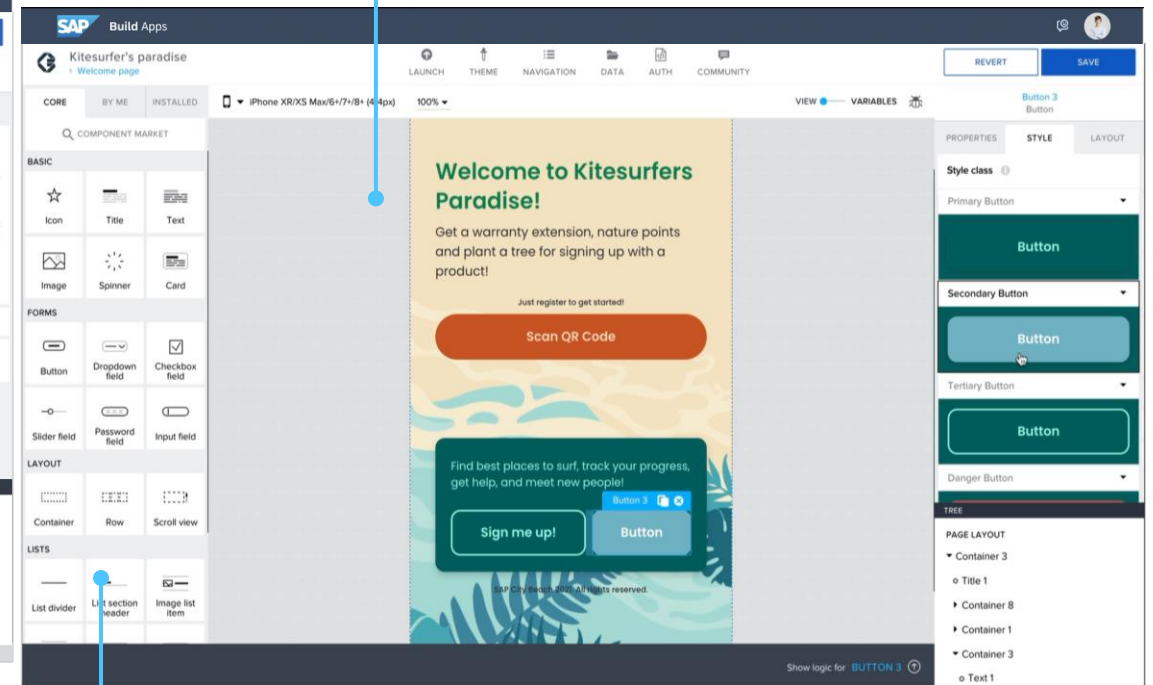

Customizable design themes and navigation
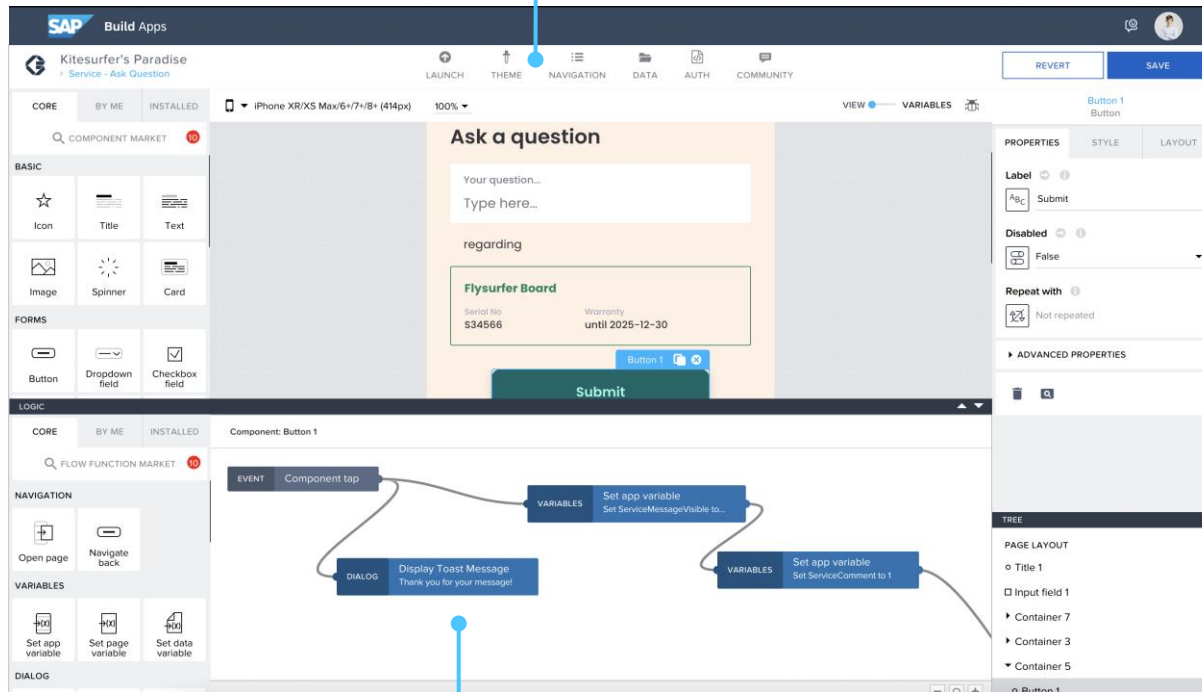

Simplified UI creation with drag-and-drop functionality

Visual application logic with flow functions

Rich library of components and 400+ built-in formula functions

Powerful features for full-stack no-code development
Key backend capabilities

Visual data modeling for custom data persistency

Data transformations with extended entities
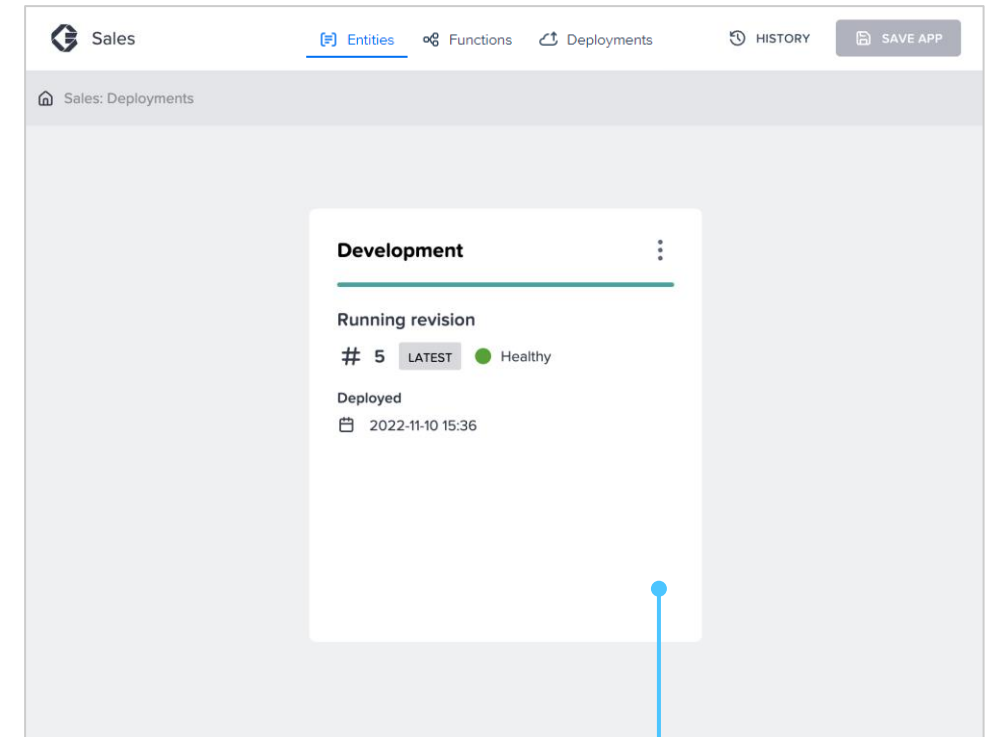

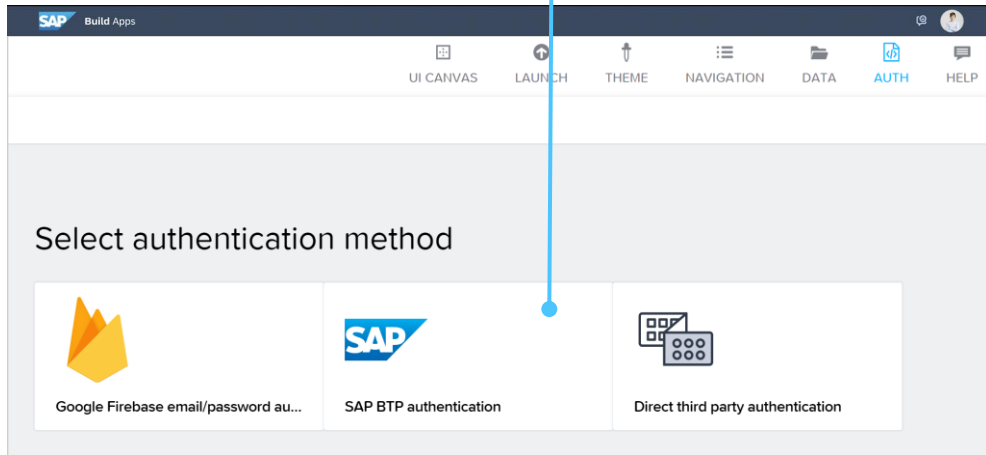

Cloud deployments, informative

migrations & project history

Powerful features for full-stack no-code development
Key integration capabilities

SAP BTP Authentication

Native integration with SAP applications

Visual cloud functions

SAP BTP Destinations

OData & REST API integrations

SAP Build Work Zone - Design business sites visually

Create engaging sites to get work done quickly across enterprise applications

What would you like to do?

Build an Application
Use SAP Build Apps to create web and mobile applications, including cloud-based backends for data and business logic.
Learn more

Build an Automated Process
Use SAP Build Process Automation to automate processes and tasks with drag-and-drop simplicity.
Learn more

Build a Business Site
Create and customize business sites with an easy no-code experience.
Learn more

SAP Build Work Zone

Build personalized business sites with ease

Maximize team productivity with guided experiences and knowledge sharing

SAP Build Work Zone – Key capabilities

Advanced Edition

SAP Build Work Zone

SAP Build Apps

SAP Build Process Automation

Integration Suite

SAP and 3rd Parties

Enrich sites with web content widgets and guided experiences

Empower business users to create, and share content

Organize knowledge with document management & knowledge management

Drive collaboration and increase team productivity with interactive Workspaces

Utilize solution specific ready-made content and content templates

Provide secure and central access to apps, tasks and processes

Enable a personalized and role-based user experience

Leverage business content from SAP solutions, partners and custom-built

Provide an optimized mobile experience via dedicated mobile app

Flexibly customize & extend the solution to your needs
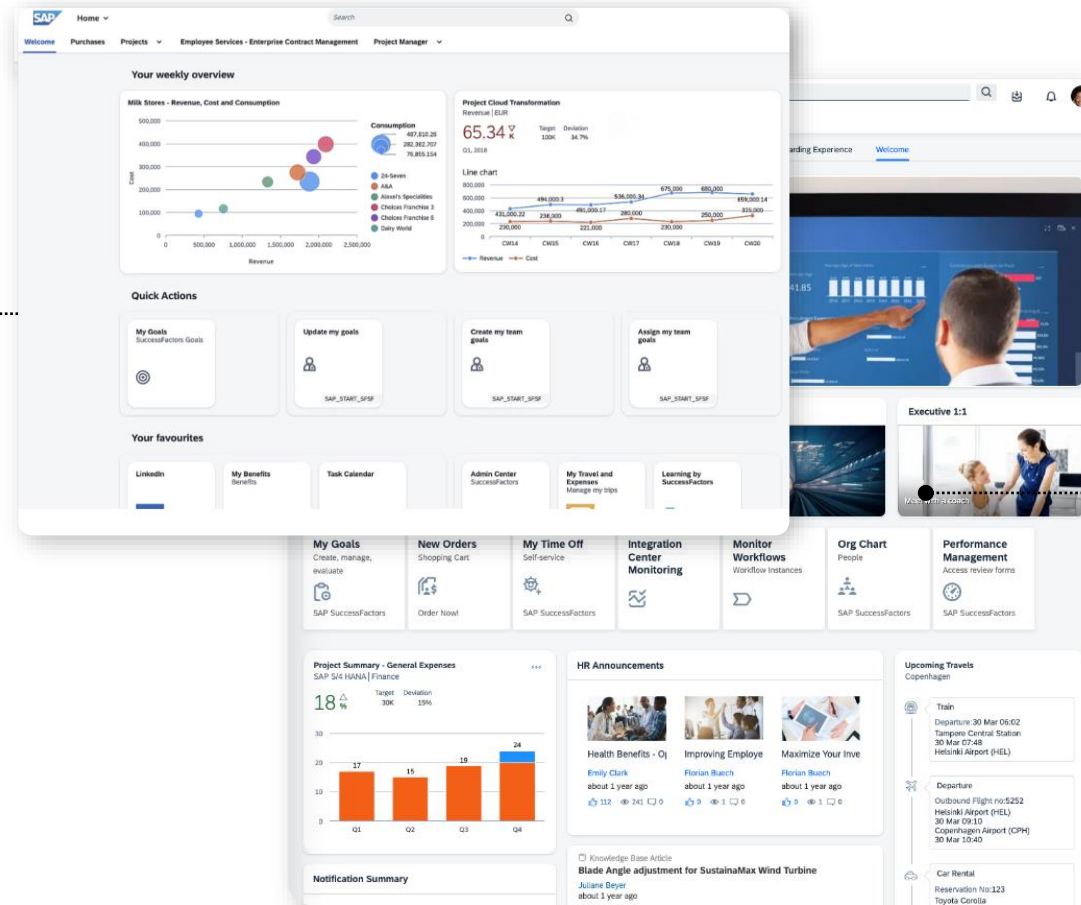

Standard Edition

SAP Build Work Zone

Provide access to applications, processes, and information anywhere on any device

Standard Edition

(formerly SAP Launchpad service)

Access multiple systems
Integrate custom apps
Leverage customizations and extensions

Advanced Edition

(formerly SAP Work Zone)

Extend the standard edition with:
Web content
Empower business users to create and publish content
Integration with 3rd party solutions
Provide solution specific content
And more..

The building blocks of a great user experience

Task inbox

Quickly process incoming tasks and workflow items that matter to you

Search

Discover and find information with powerful content and document indexing

Employee-focused

Personalized and easy to use with role-based data

Conduct surveys and polls

Engage, monitor and measure with embedded Qualtrics surveys

App launcher

A central place for your SAP business applications, data and processes

Knowledge base

Create, retain and share knowledge across the entire organization

Communicate and engage

Self-sufficient, freeform layout and drag-and-drop design to engage employees

Sap business apps

Quick access to SAP S/4HANA and other frequently used business apps

Workspaces

Self-service personal, project, topical, departmental and community workspaces

Ui integration cards

Embed and display SAP and third-party business data from across your organization

Mobile ready

Anytime, anywhere access with responsive web and a dedicated mobile app

Extend and develop

Extend with full IDE based on SAP Business Application Studio

Guided experiences

Run guiding user experiences on top of workflows

SAP Build Process Automation - Automate processes visually
Simplify process and task automation

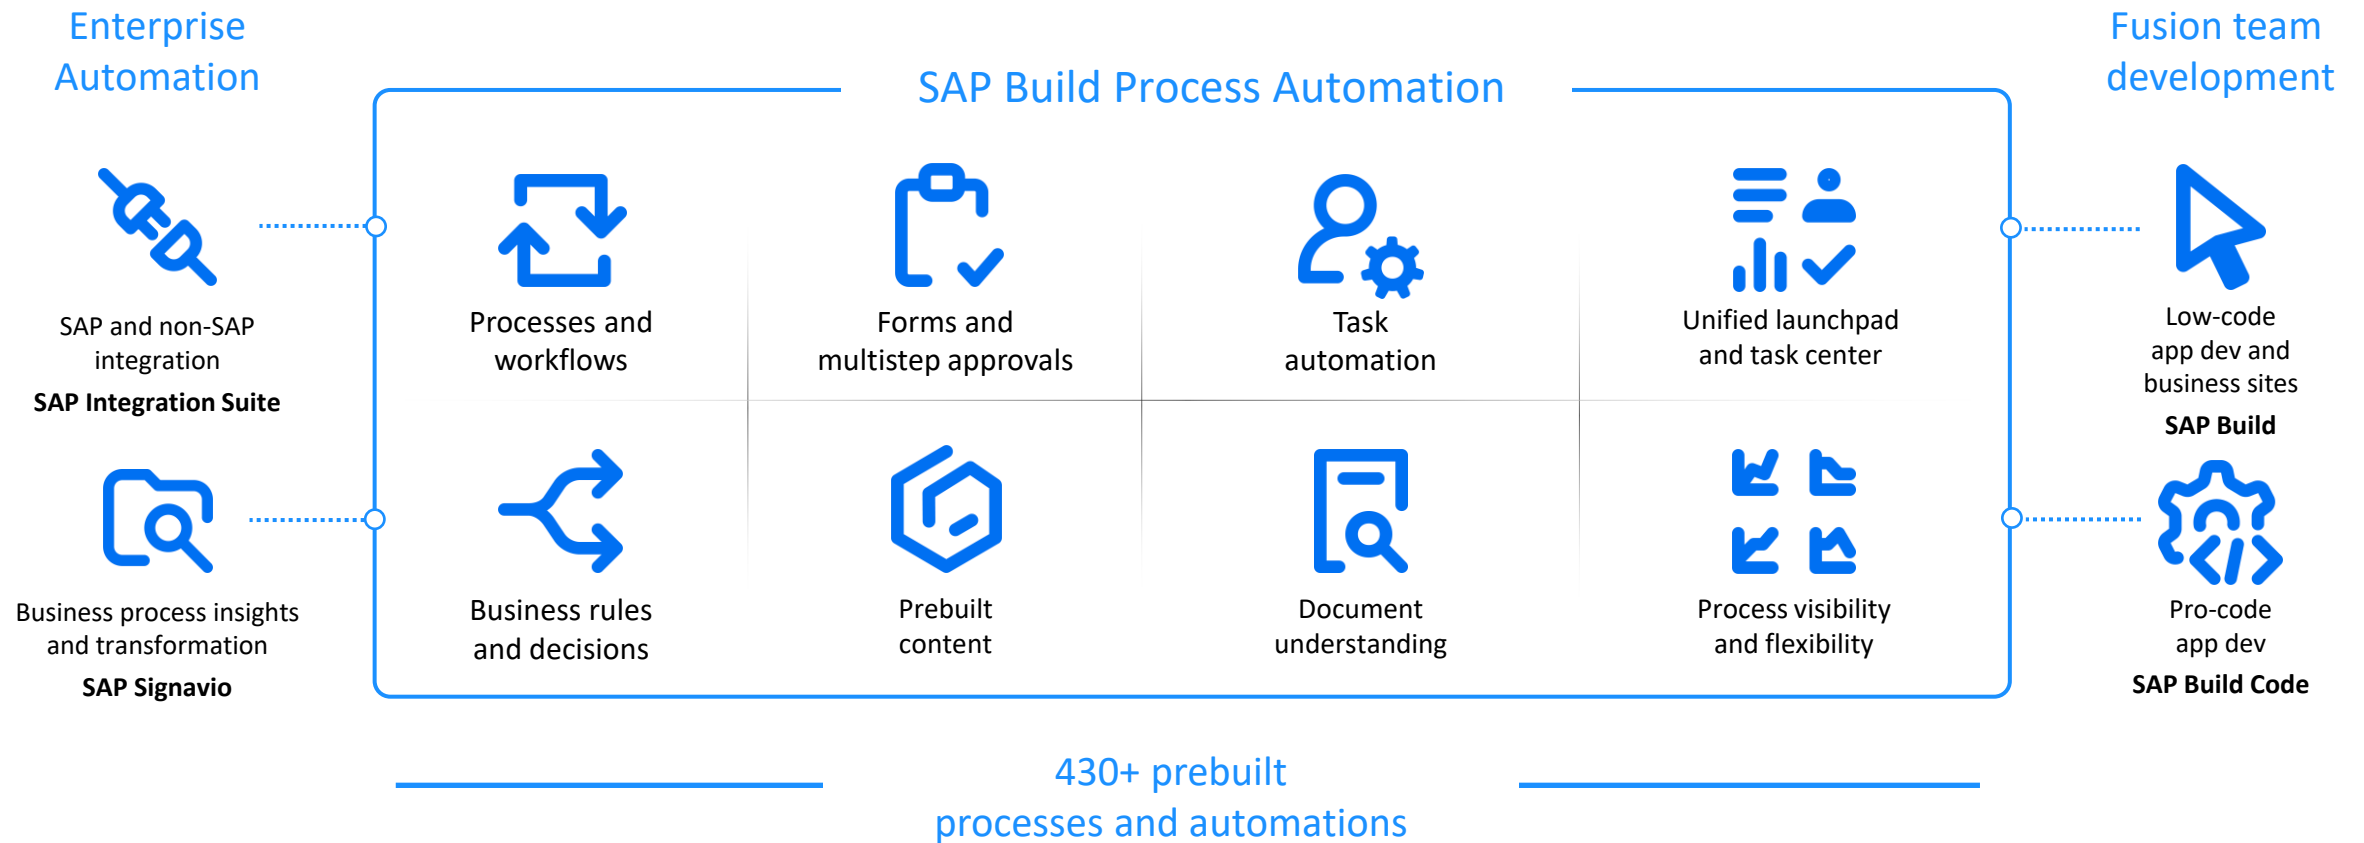

SAP Build Process Automation
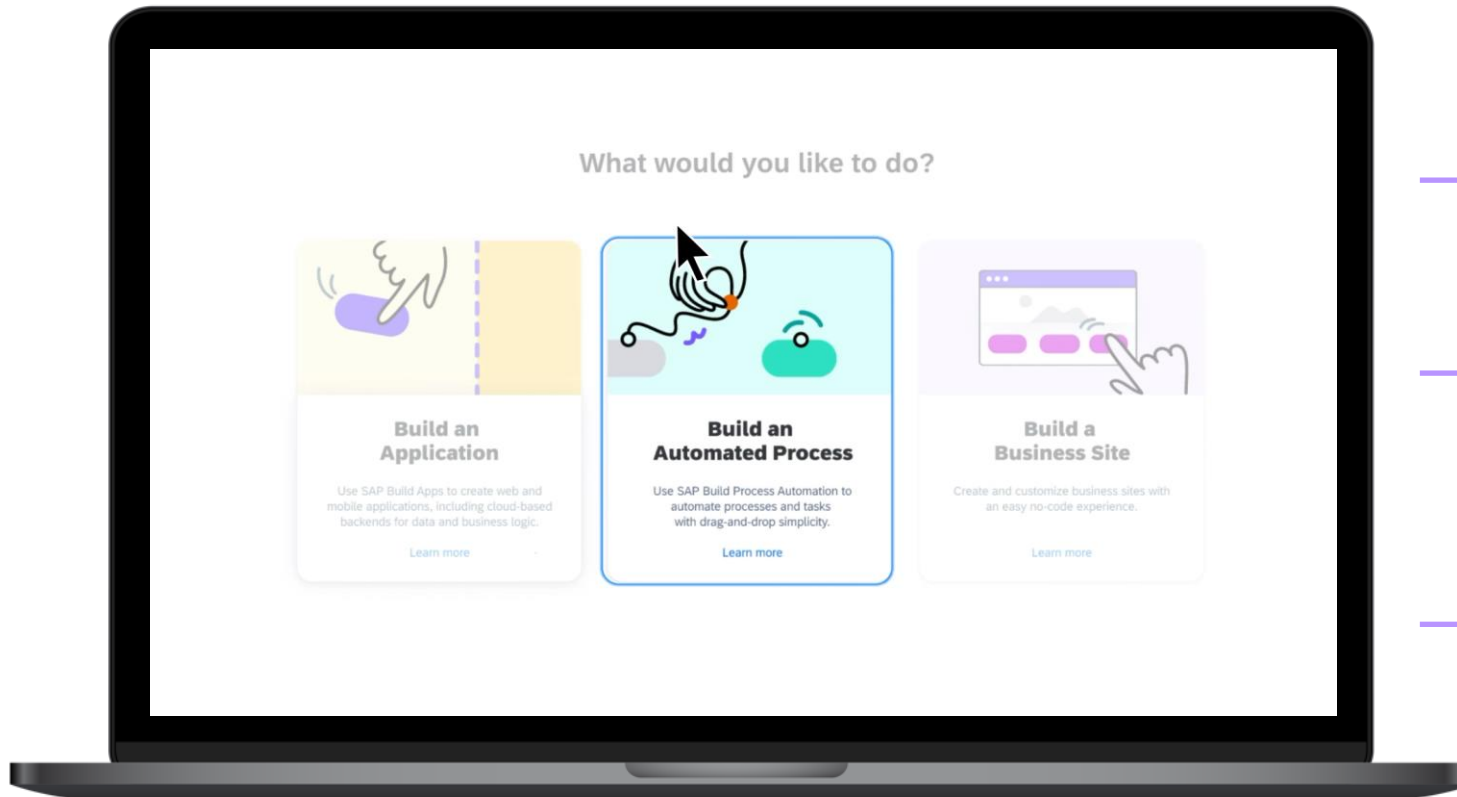

Build with ease using visual drag-and-drop tools

Automate faster with Workflow Management, Robotic Process Automation (RPA), and AI capabilities
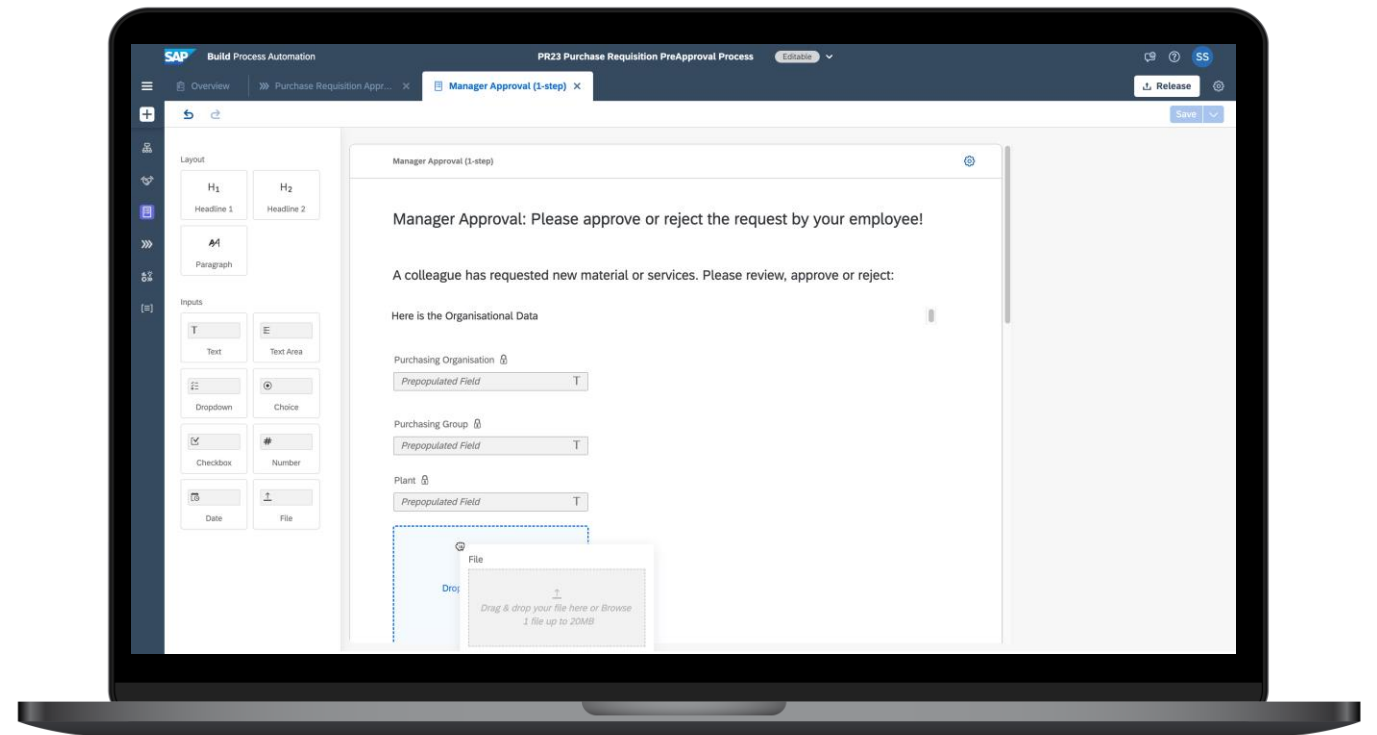

SAP Build Process Automation

Automate processes and tasks with drag-and-drop-simplicity

Enterprise Automation

SAP and non-SAP integration
SAP Integration Suite

Business process insights and transformation
SAP Signavio

SAP Build Process Automation

Processes and workflows

Forms and multistep approvals

Task automation

Unified launchpad and task center

Business rules and decisions

Prebuilt content

Document understanding

Process visibility and flexibility

Fusion team development

Low-code app dev and business sites
SAP Build

Pro-code app dev
SAP Build Code

430+ prebuilt processes and automations

Forms and multistep approvals

Design forms for requests and approvals

- Drag-and-drop forms builder

- Define clean and easy-to-consume layouts

- Incorporate text, number and date fields, drop-down menus, and check boxes

Forms builder

Task automation

Automate routine tasks with robotic process automation (RPA) capabilities

- Automate repetitive manual tasks, high-volume tasks and multiple-system tasks

- No-code or low-code (JavaScript) experience depending on complexity

- Automation recorder for UI-based automations
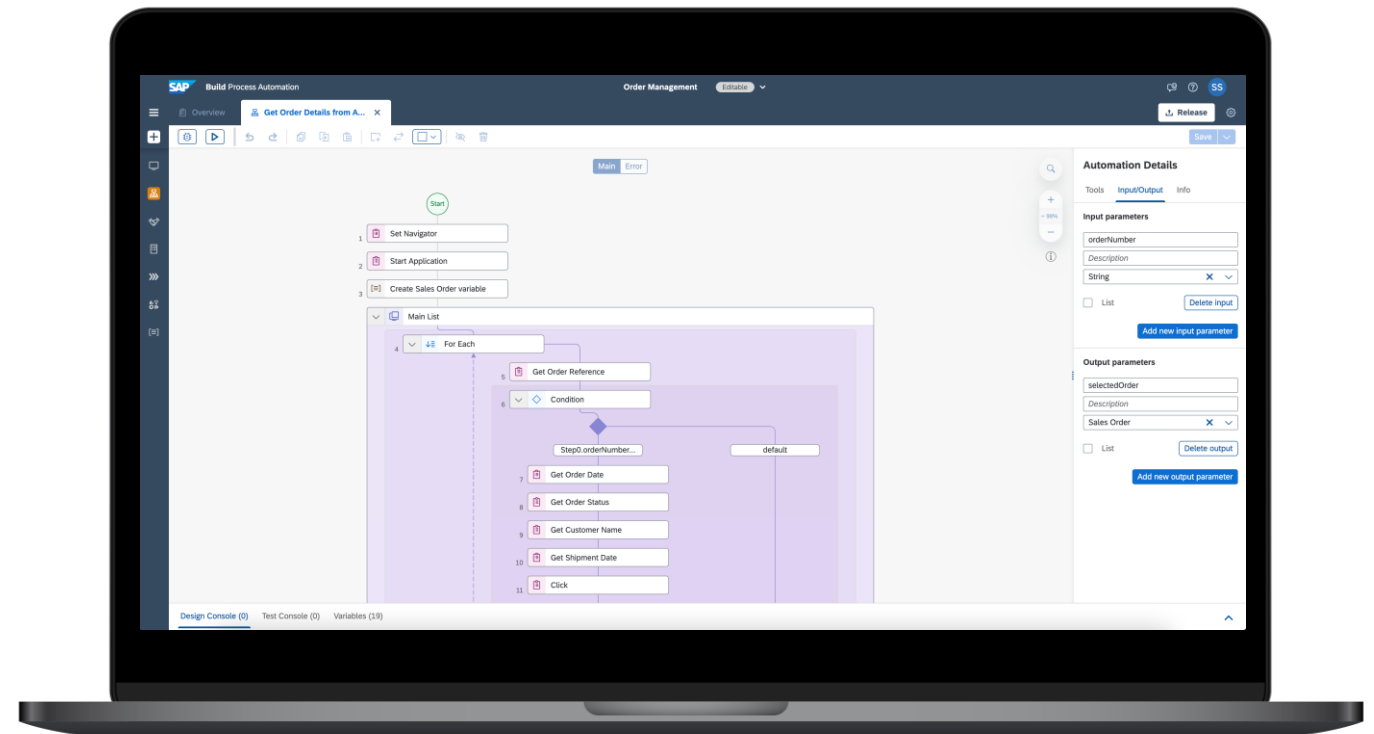

Automation editor

Unified launchpad and task center

Simplify access and improved operations

- Access and process all notifications and tasks across different solutions in one place

- Web and mobile access

- Improve efficiency by delivering a seamless user experience

SAP Task Center

Business rules and decisions

Create and maintain business rules for decision management

- Spreadsheet-like decision tables or text-based rules

- Validation, error-highlighting, orchestration

- Create, maintain, and manage rule versions without relying on IT for additional development effort

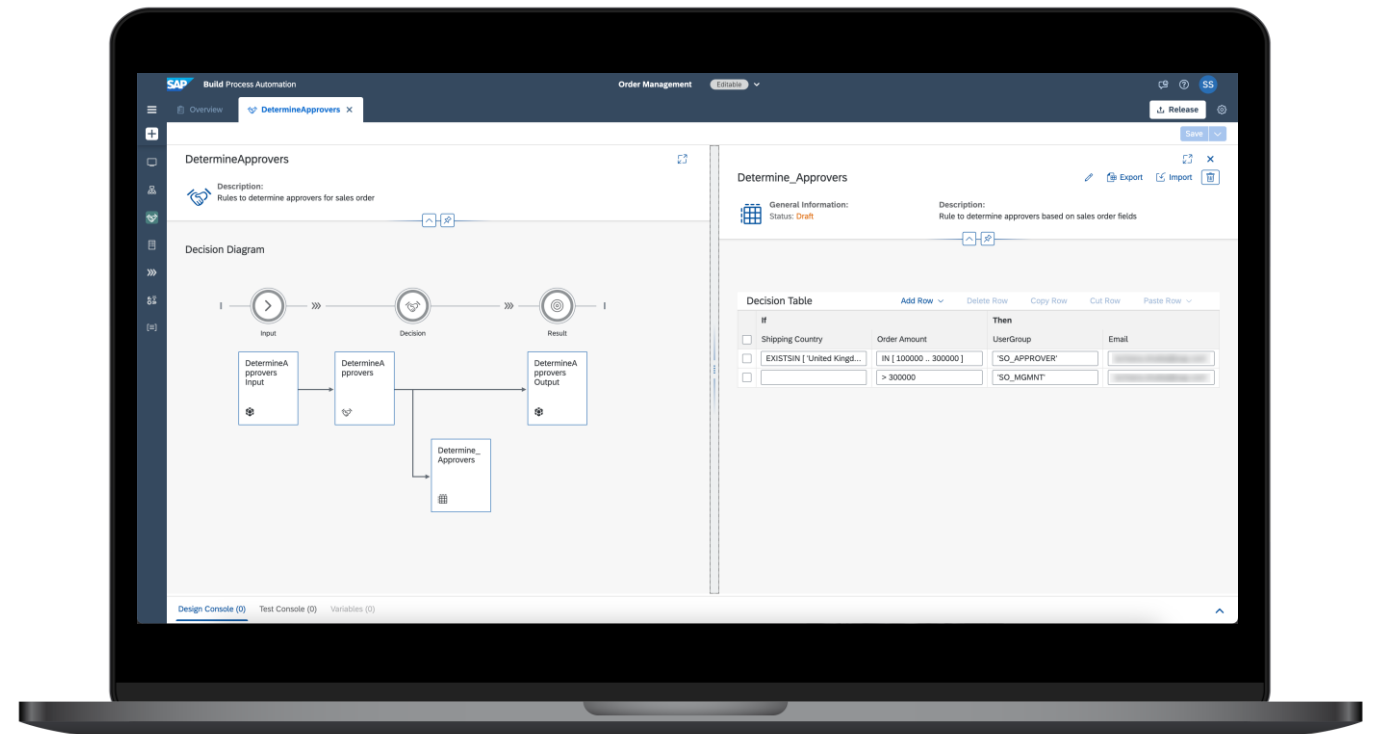

Business rules editor

Document understanding
AI-based document processing to use data from digital documents

- Extract data from digital documents, use them in the process and / or transfer them to your enterprise systems for processing

- Structured and unstructured data sources

- Pre-trained machine learning models and easy template creation without data scientists' support

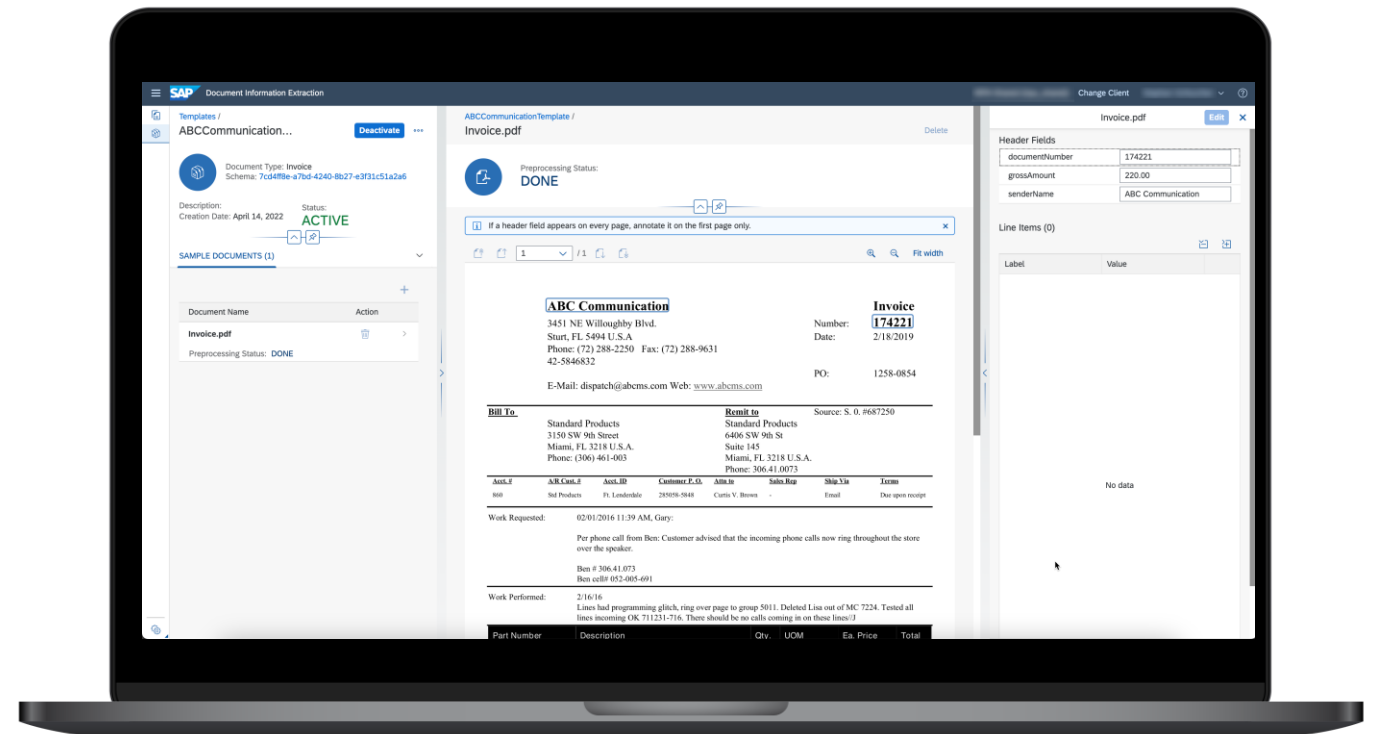

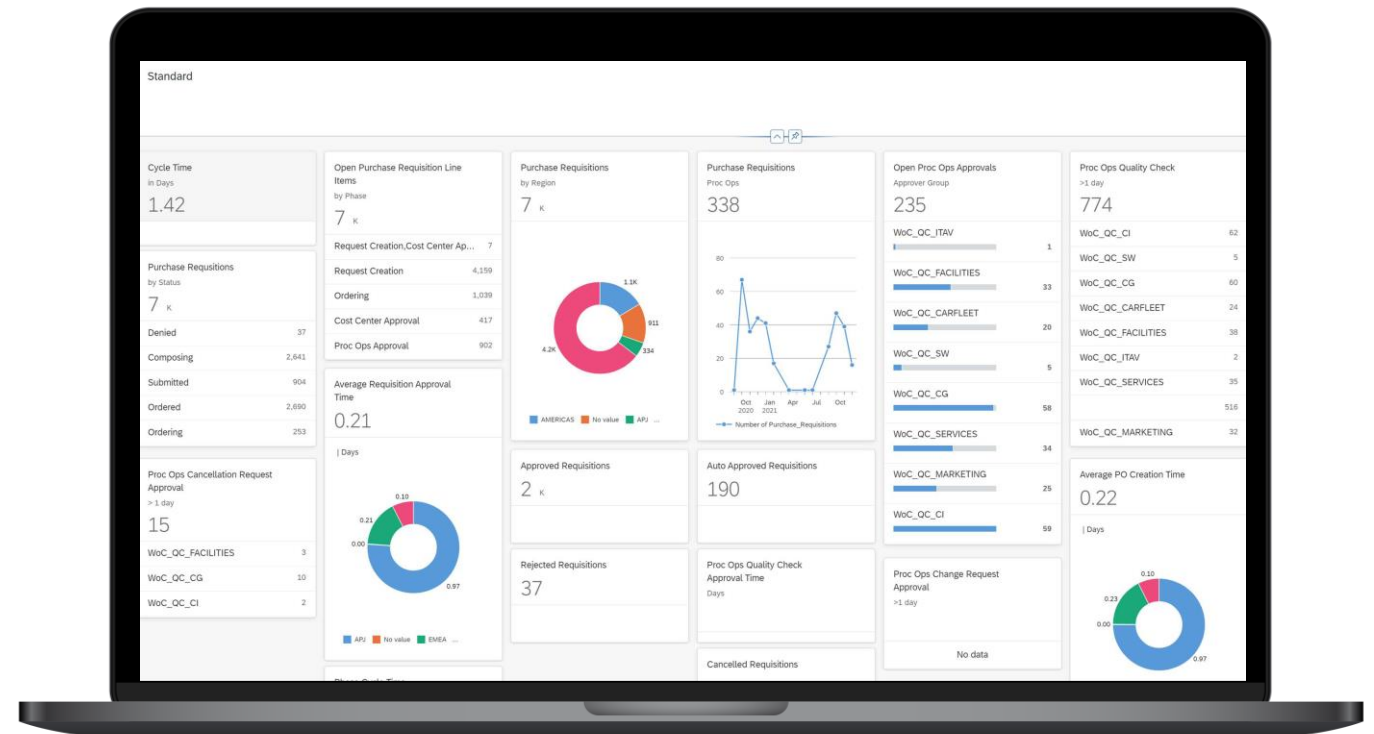

Data extraction template creation

Process visibility
Monitor and manage process performance

- Monitor processes in and across SAP and third-party applications

- Event-driven process views and AI-based cycle-time predictions

- Milestones, service-level-agreements and key performance indicators tracking

Process visibility dashboard

Integrate seamlessly

Develop faster using pre-built workflows, bots and connectors for SAP and non-SAP systems
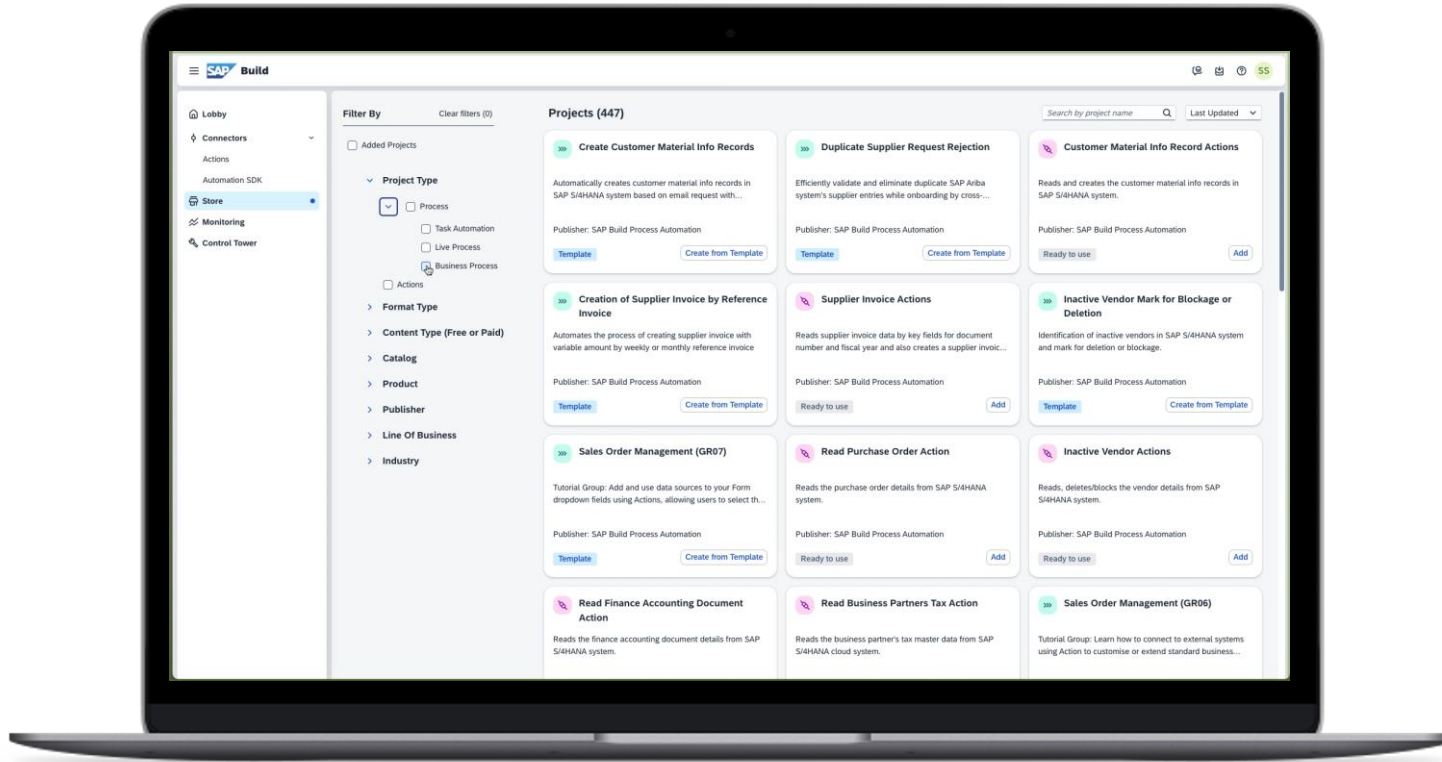

Content store

430+ of process content packages, RPA bots and connectors

Connect with applications, processes and data across SAP and non-SAP systems

Use business data without loosing context and meaning
