SAP BTP is the development foundation for SAP developments

Innovation engine for SAP Cloud Applications

by embedding latest intelligent technologies

 Target of 400 AI scenarios embedded into SAP Business Applications running on BTP by 2025

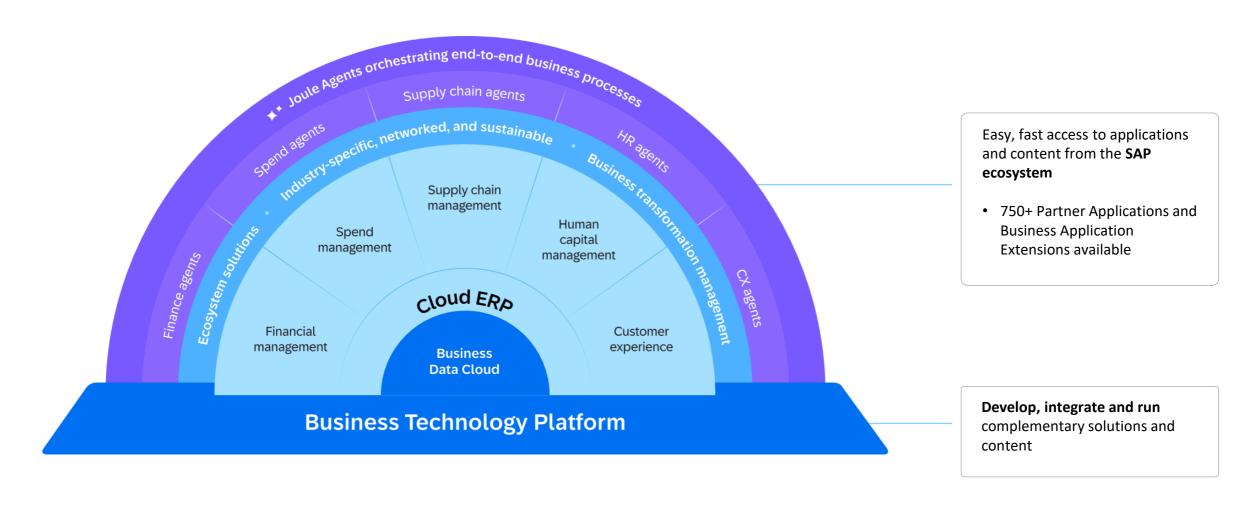

Utilize common platform services

across the full SAP portfolio, enabling consistent **qualities** across all SAP applications.

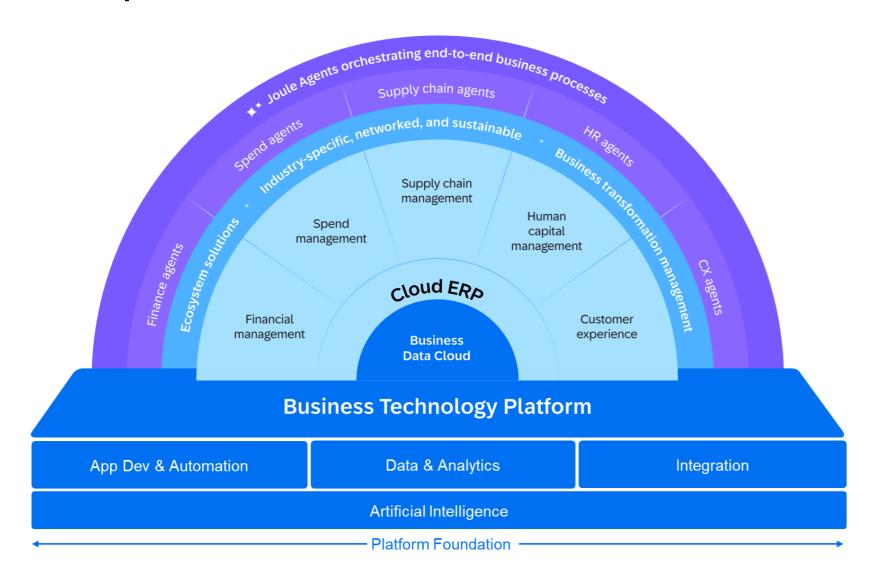

Harmonized technology foundation

in order to build and run new SAP Cloud Applications

SAP BTP is the development and operations foundation for SAP Partners

SAP BTP is the foundation for your individual, integrated and automated business processes

An intuitive, modern development and innovation platform for both, professional IT and citizen and business developers

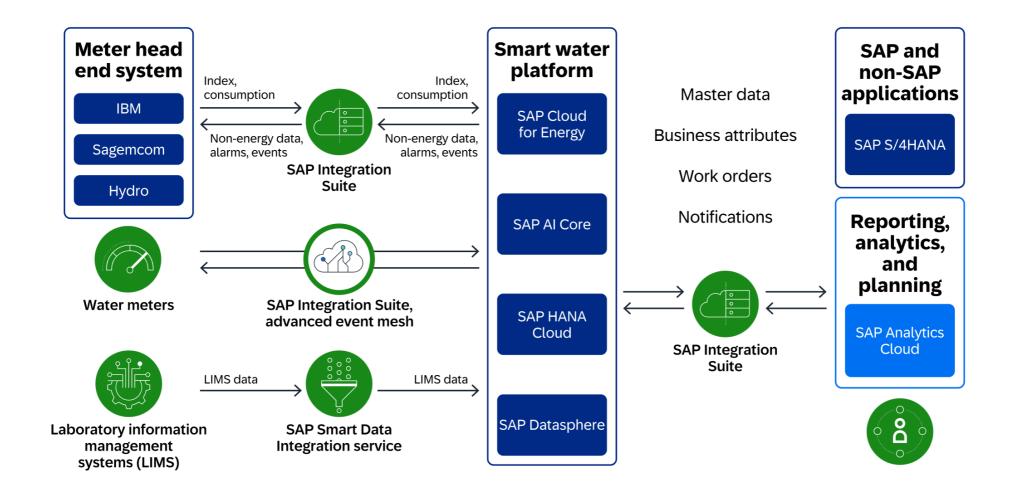

With self-service data discovery, modeling, planning, and analytics

for business users in a governed environment

Including integration solutions to connect and streamline applications and processes across the entire enterprise

Offering built-in data products, integrations, workflows, app templates, and Al services

Customer Example: Farys - Smart Water Platform

We have proven experience to help you succeed.

66 of the 100 largest companies in the world using SAP BTP

29,000 customers

use SAP BTP to innovate faster with business context

Extensive partner ecosystem

3,100 partners with more than **50,000+ members** are trained and enabled on SAP BTP

More than **750 partner apps** are built on SAP BTP

Built-in business content that delivers fast time to value

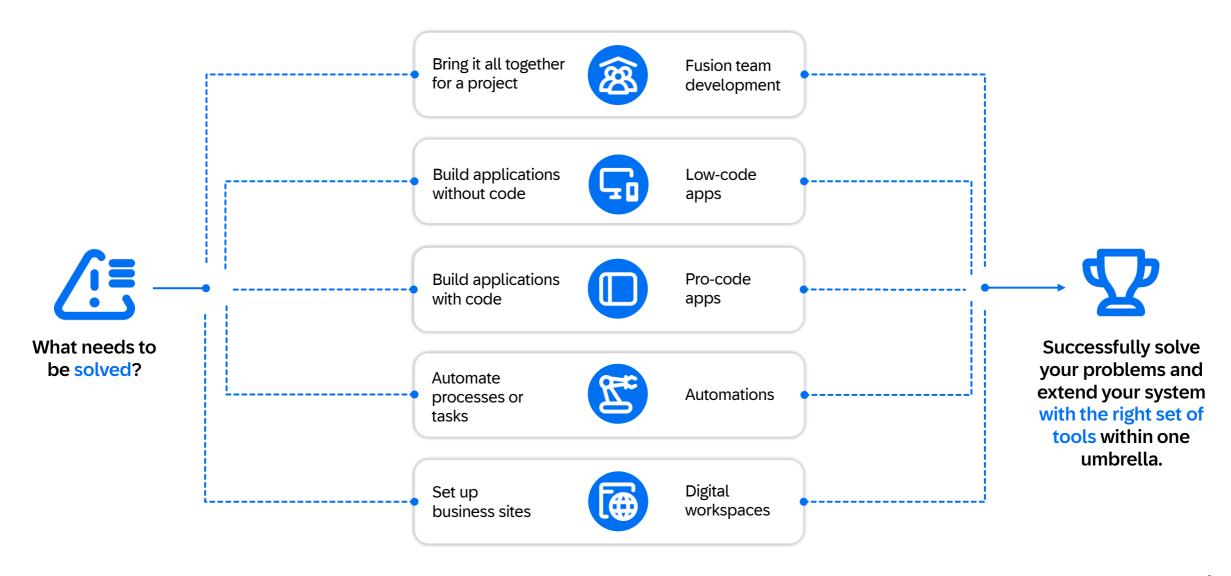

Leverage innovation assets in SAP BTP and built-in business content, including:

- 3,800+ pre-built integration flows
- 650+ business events
- 250+ connectors
- 4,200+ APIs

Sources: Research and internal data from SAP **Learn more:** <u>SAP Corporate Fact Sheet</u>

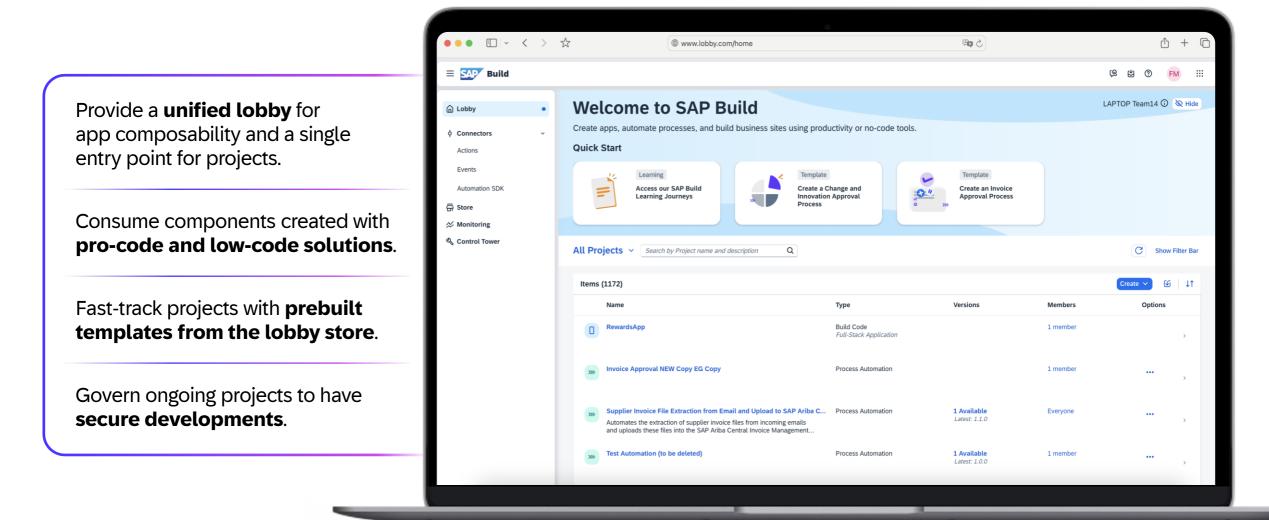

App Development & Automation

One starting point, many possibilities with SAP Build on SAP BTP

Bring it all together for a project

Building with SAP Build on SAP BTP

Build extensions with or without code

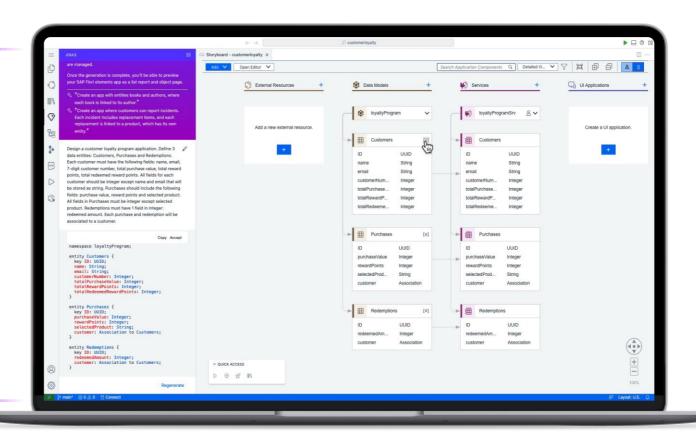

Build visually, traditionally, or with generative AI

Build with the flexibility of the low-code and pro-code methods together.

Get coding assistance from Joule, the generative AI copilot.

Quickly build full-stack, UI, and mobile apps with **prebuilt templates**.

Adapt to different environments and build applications with ABAP, SAP Cloud Application Programming Model and ABAP RESTful application programming model.

ABAP environments

SAP Build Apps

Use SAP Build to maximize your SAP software investments

Mobile and web

Access applications and collaborate across devices.

Create mobile apps, front-end SAP Fiori apps, and digital workspaces.

Build faster and extend to meet your unique business needs.

Al and enterprise automation

Accelerate enterprise automation end to end.

Gain visibility into inefficiencies across your IT landscape.

Rapidly optimize with Al-powered automation.

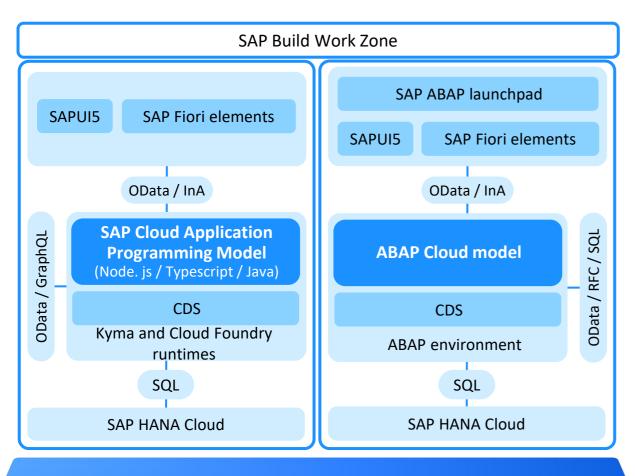

Application Extensions

Enable modern, flexible, and cloud-ready ERP and core systems.

Extend and customize core systems to remain as untouched as possible.

Gain agility, efficiency, reliable data and insights, and reduced TCO.

Build Extensions with Code with Cloud Application Programming Model and ABAP Cloud

SAP BTP Developer's Guide

SAP is offering clear development recommendations and guidelines for application and extension development on SAP BTP.

SAP Cloud Application Programming Model and ABAP Cloud model

These models are the basis for these recommendations and guidelines, building on top of the runtimes below.

Three strategic SAP BTP runtimes:

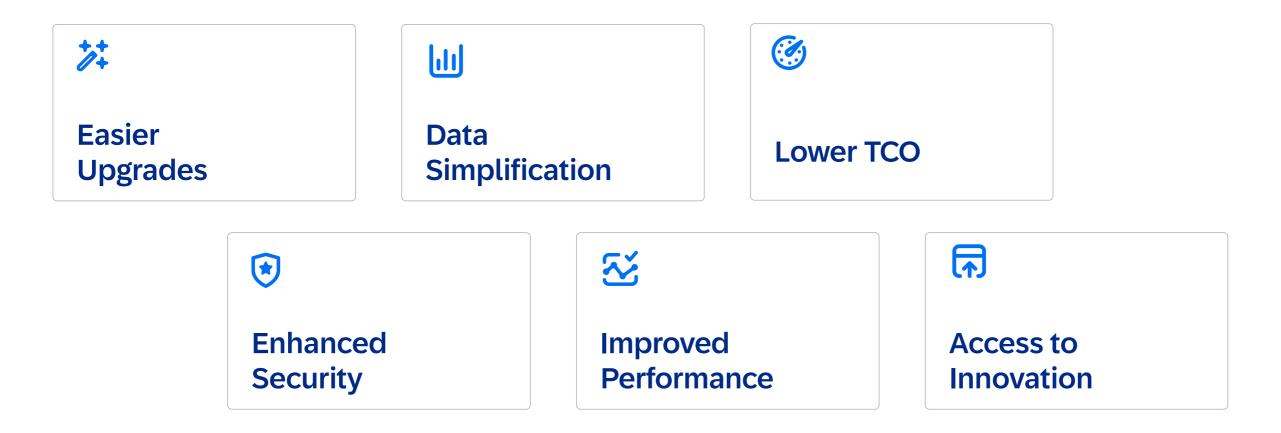

- · Cloud Foundry runtime
- Kyma runtime
- · ABAP environment

SAP BTP Developer's Guide

SAP Business Technology Platform

SAP BTP as side-by-side platform in your S/4HANA Clean Core strategy

"Clean" means up-to-date, documented, unmodified, consistent, efficient and cloud compliant.

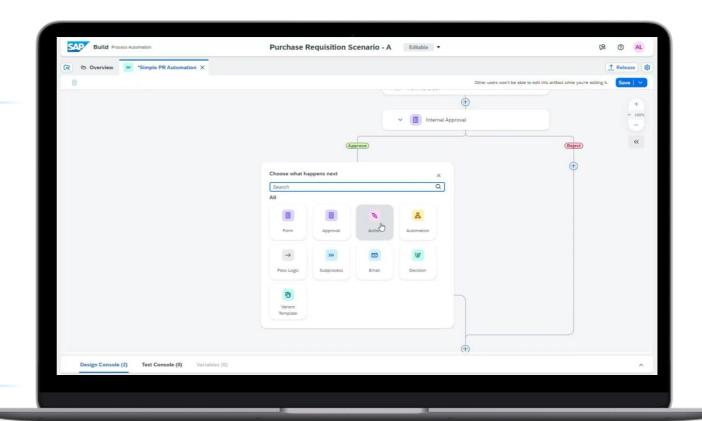

Automate processes

Simplify process and task automation

Create and manage workflows, automations, and business rules with drag-and-drop simplicity.

Develop faster using prebuilt solutions, bots, and connectors for SAP and third-party systems.

Use built-in AI for intelligent document processing.

SAP Build Process Automation

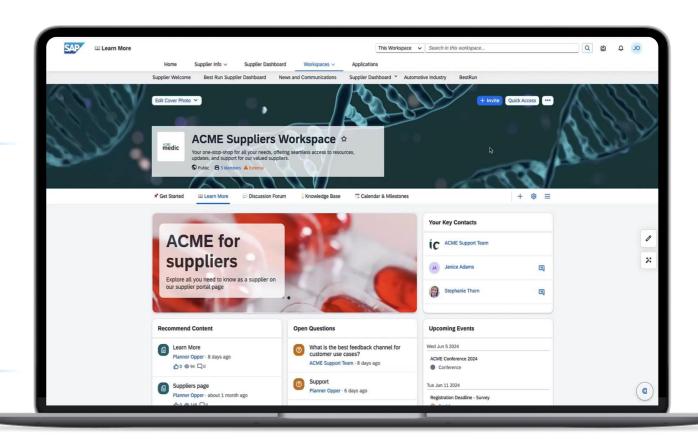

Set up business sites & design digital workspaces

Create engaging sites to get work done quickly across enterprise applications

Build digital workspaces, business sites, and portals with ease.

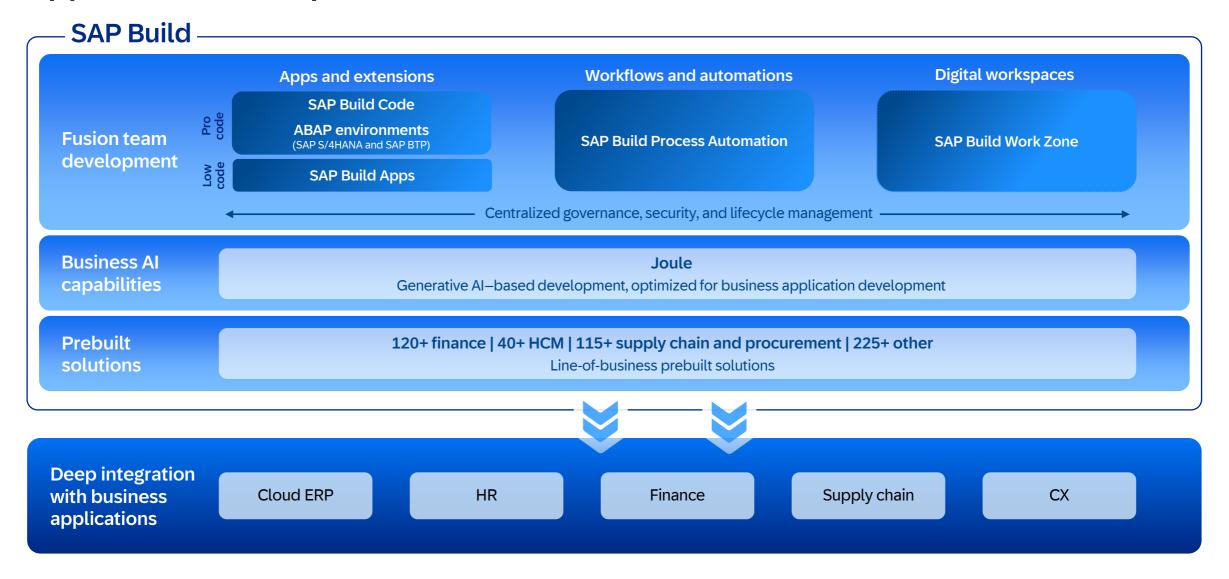

Maximize team productivity with **guided experiences and knowledge sharing**.

Surface personalized recommendations, insights, and actions.

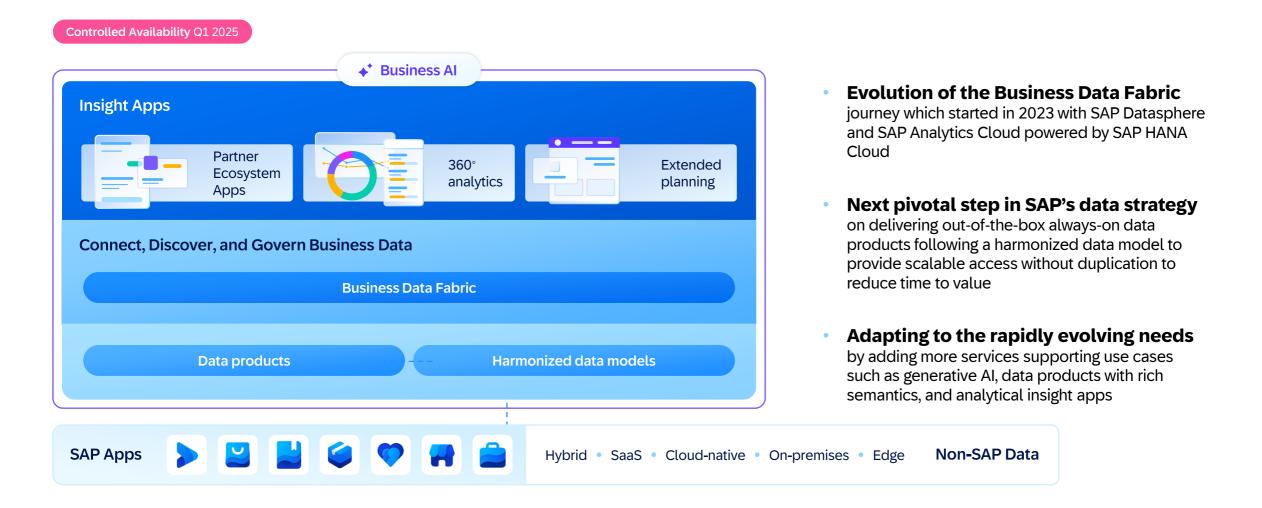

Application Development and Automation with SAP BTP

Data & Analytics

SAP Business Data Cloud

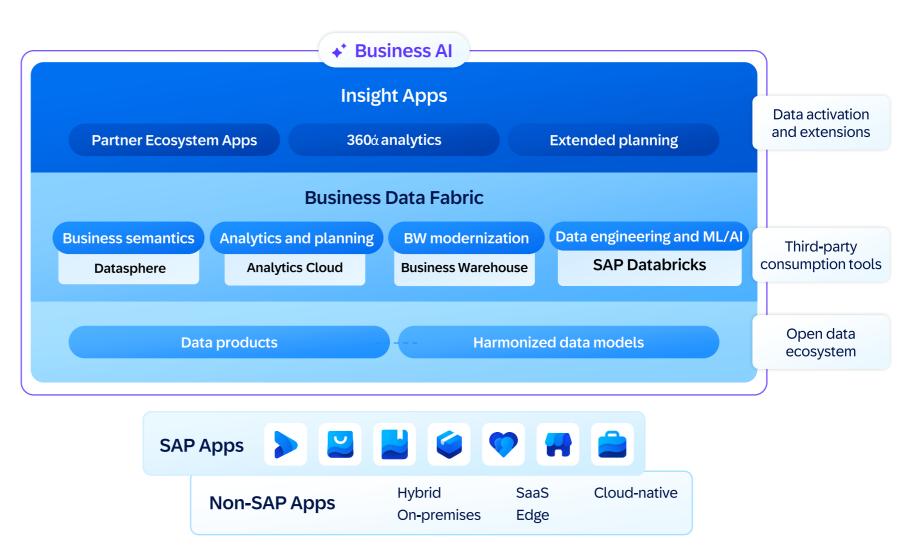

Continue our path towards a Business Data Fabric

SAP Business Data Cloud's comprehensive strategy for enterprise data

The Evolution of Data & Analytics

Delivering the Best TCO with a Clear Path Forward for all SAP Customers

Capabilities gained using SAP Business Data Cloud

Unleash transformative insights

Business-Ready Data Products

- Utilize ready-to-run insights leveraging industry and line Leverage SAP's deep expertise in application infused with trusted AL data and industry best practices with pre-built Drive agile decisions with data products combined planning and
- Ensure consistency and business context with Achieve better business SAP-managed data sets outcomes using predictive and semantics analysis and simulation

Connect all your data

Seamless Integration of **Business Semantics**

- Integrate data from SAP and non-SAP cloud and on-premises sources
- Model, transform and enrich data keeping business context intact
- Provide self-service analytical modeling for business users
- Expose SAP BW in a modern data fabric architecture

Unified and Scalable Data Platform

- Consume SAP data products in advanced pipelines
- Extend SAP data with externally connected data
- Create semantically rich data flows as a foundation for Al
- Build ML models with data science workbench

Augment Decision-Making with AI Copilot

Foster reliable AI

- Ensure accurate results from GenAl
- Interact with data using conversational AI
- Improve productivity with embedded automation and workflows

Simplify and fully integrate your data landscape

Ensure Trust with Governance

Context Aware Insight Apps

of business expertise

analysis

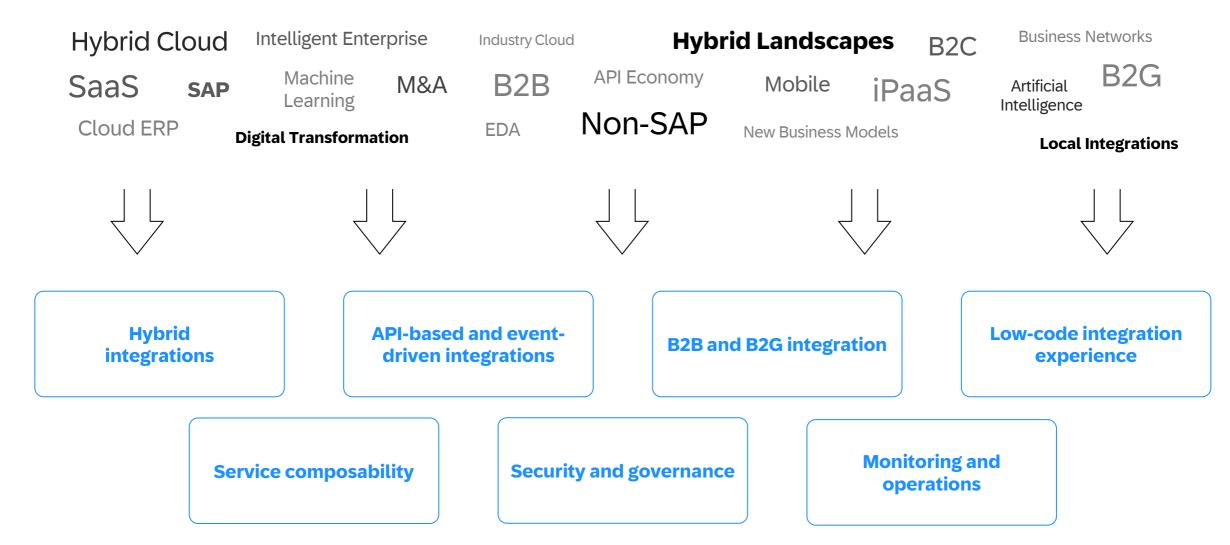

- Harmonize data models and consumption across integrated components
- Automate metadata collection with a common data catalog
- Bolster confidence with centralized control of data access

Scale Through **Ecosystem** Integration

- Integrate with industry leading data and AI partner solutions
- Enhance decision-making with trusted industry data enrichment
- Leverage partner domain expertise to enhance and discover use cases

Integration

Quickly evolving hybrid landscapes

SAP Integration Suite

One holistic & modern platform for integration and innovation needs

Define and govern your Integration Strategy

Enabling agility

Holistic set of capabilities supporting all integration patterns for transforming and modernizing integration in hybrid and heterogeneous landscapes

Higher Flexibility

Eventdriven integration

API-centric integration

Hybrid: Multi-cloud, private

Extensibility and openness

SAP **Integration Suite**

Faster time to value and simplification

Prebuilt integrations Low-code. AI-based

Operated by SAP

Third-party connectors

Security of investment in SAP software

Migration support

Reuse of code and skills

Lifecycle management

E2E Monitoring

Consolidate

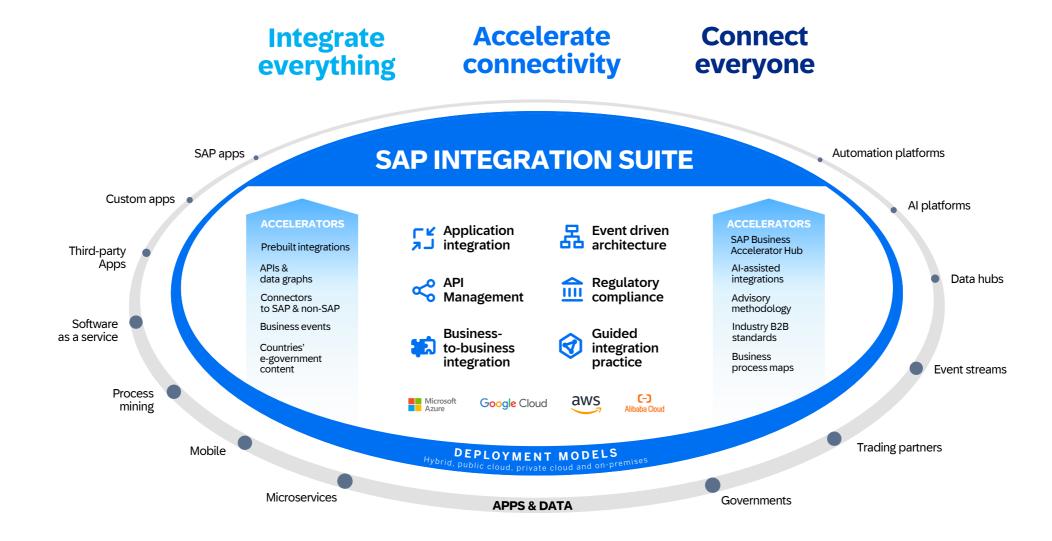

Third-party integration platforms

Modernize

SAP software – Legacy Integration

SAP Process Orchestration SAP Process Integration **Custom-built direct Integrations**

Integrate everything to innovate now

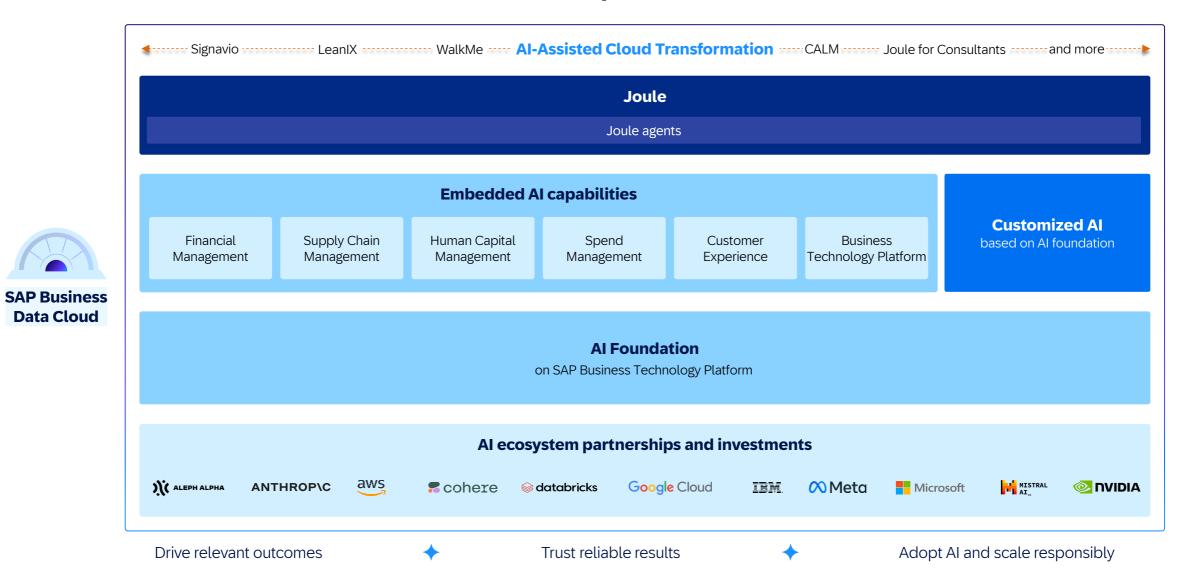

SAP Integration Suite – Facts and Numbers

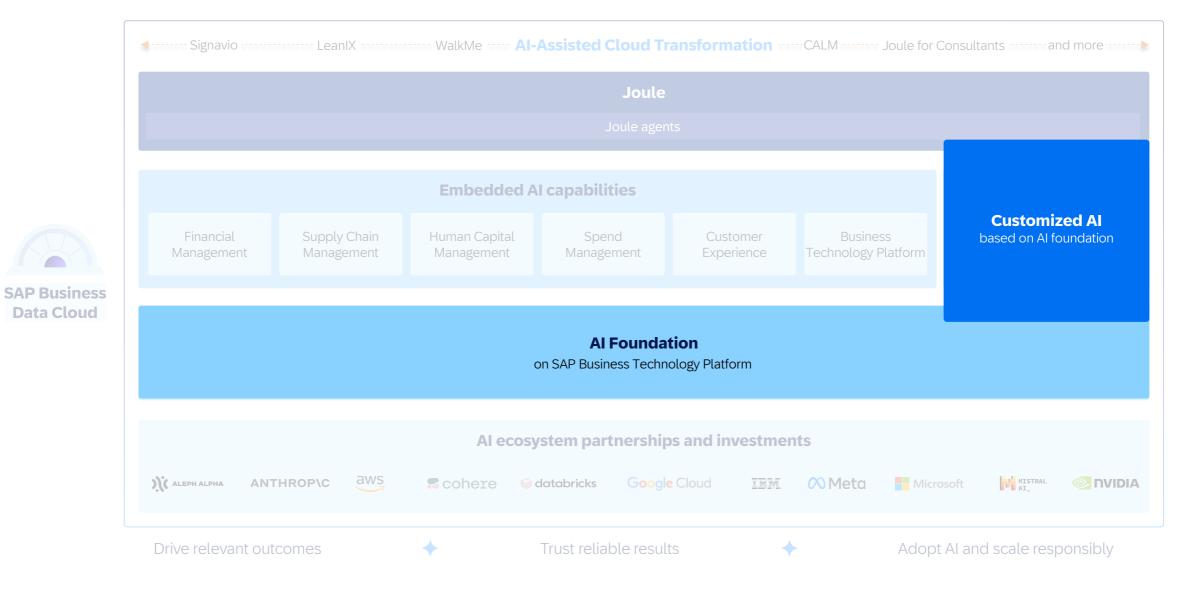

Artificial Intelligence

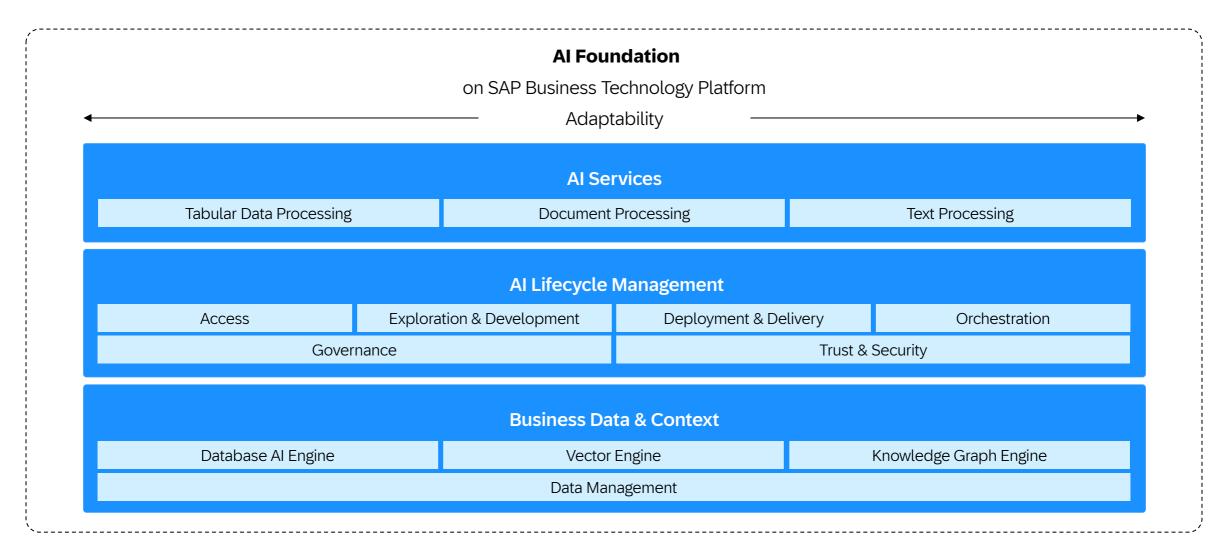

Our Business AI is embedded across the portfolio

AI Foundation is a complete set of services for AI developers on SAP BTP

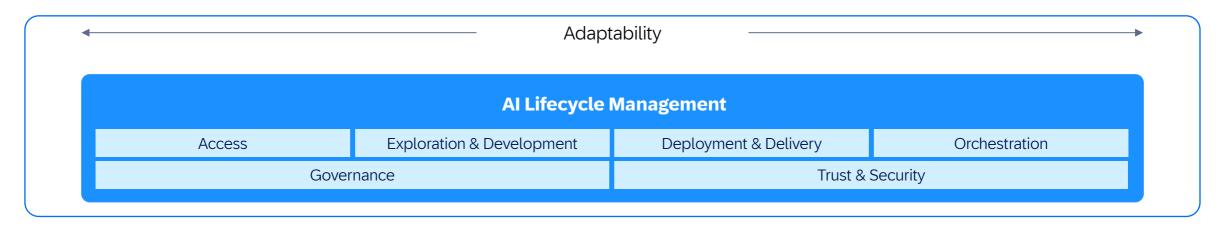

Al Foundation is a complete set of services for Al developers on SAP BTP

Generative Al Hub

Develop, deploy, and manage custom-built AI solutions and AI-powered extensions of SAP applications.

Speed up AI development with access to the broadest set of frontier AI models, infrastructure and tooling.

Extend SAP applications with AI & build custom AI solutions

Combine AI models with your unique data to build powerful custom AI solutions or extend SAP applications.

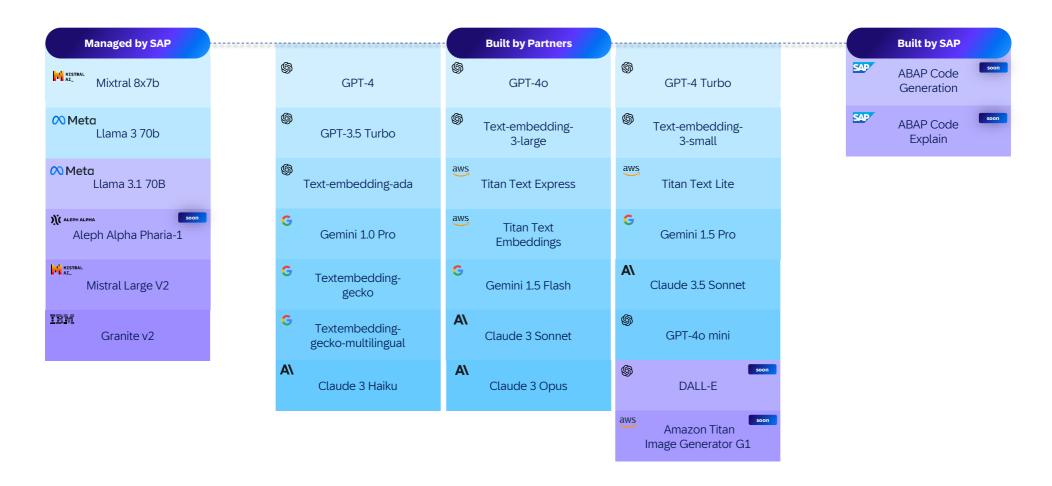

Safeguard your data & develop AI responsibly

Safeguard your data and maintain full control of your AI lifecycle with SAP's trusted privacy and security policies, and a centralized orchestration approach.

25 models available

Generative Al Hub

SDKs and client libraries

Leverage developer focused tooling such as powerful SDKs and client libraries to enhance your applications with generative AI and build new custom AI solutions much faster and easier.

Platform Foundation

SAP Foundational services

Runtimes & Application Lifecycle Management

Choose the perfect foundation for your development

SAP BTP offers three runtimes: Cloud Foundry providing simple deployment and handling for cloud applications, Kyma for more complex application requirements, and the ABAP Environment to continue existing development efforts.

With integrated DevOps tools as well as openness to leverage existing tools and pipelines, SAP BTP streamlines the application lifecycle to accelerate development, deployment and operations.

Security & Compliance

Securing your business processes and ensuring compliance

SAP BTP ensures top-tier security and compliance with built-in authentication, single sign-on, and strong authorization controls.

It supports global compliance requirements and simplifies audit logging for custom apps, allowing you to focus on development while ensuring data security and compliance.

Persistency

Trust SAP with your data in our persistency services

SAP BTP provides SAP HANA
Cloud, a secure, reliable
database-as-a-service that
combines in-memory
database and data lake
solution. It handles all data
types — structured,
unstructured, graph, vector
and more — in one platform.

This serves as the optimal foundation for all your applications, data and Al scenarios.

Connectivity

Connect all types of applications

SAP BTP ensures seamless, secure connectivity across hybrid IT landscapes, integrating public cloud, private cloud, and on-prem systems.

This allows you to integrate your existing IT investments without disrupting your core operations.

Administration and operations

Manage your stack

SAP BTP offers comprehensive administration and operations tools for enterprise management, including account control, entitlements, and centralized automation.

This enables proactive management, optimized resource use, and supports enterprise-level governance.

SAP BTP Build-Out and Data Center Strategy Based on Hyperscaler & SAP Infrastructure

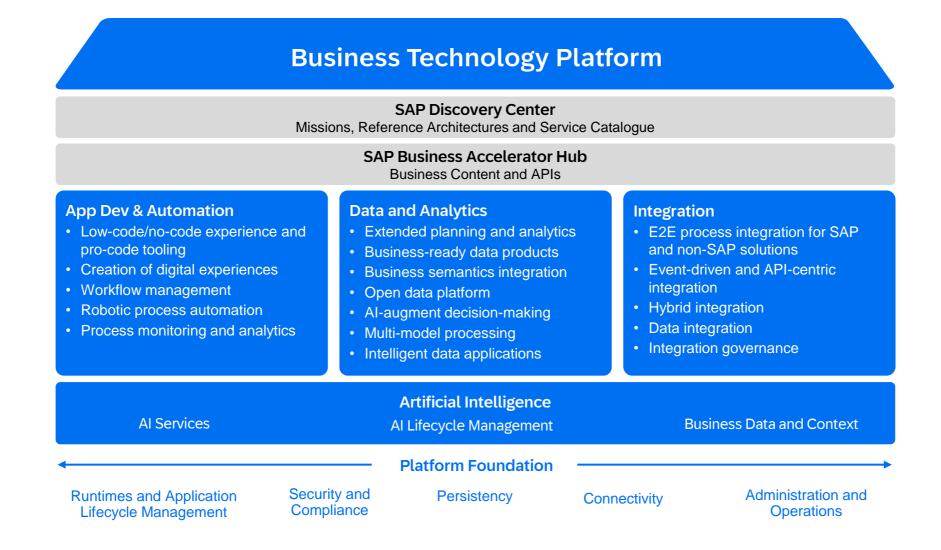

- Multi-cloud foundation is coming to SAP's data centers
 - Mid-2025 SAP will start to offer the multicloud foundation for SAP BTP additionally from SAP-operated data centers
 - 8 locations planned until mid 2026
- Continued evolution of partner-based locations
 - 10+ new BTP data center based on hyperscaler infrastructure until mid 2026
- Aligned service availability:
 Following our build-out strategy for SAP BTP services, the scope of the planned service portfolio per data center is focusing on our flagship SAP BTP services

Discover the details of SAP's plans regarding BTP data center build-out on SAP Roadmap Explorer
