SAP ERP Maintenance

Maintenance Timelines

Mainstream maintenance

Full scope of maintenance and support, including e.g.

- Legal changes
- Support packages
- Problem resolution
- Global support backbone
- Mission critical support
- Service level agreements*

Extended maintenance (optional)

- Scope of support similar as in mainstream maintenance.
- However, technical limitations and/or other restrictions may limit delivery of maintenance and support.
- Offered for selected versions only
- Additional fee for on-premise deployments, included in the subscription for cloud

Customer-specific maintenance

- Restrictions in maintenance and support service scope apply, including:
- No new legal changes and support packages
- Restricted availability of security notes
- No guarantee for technological updates, e.g. no new kernel versions
- Customer-specific problem resolution for known problems only; may include a fee for solving new problems
- No service level agreements*

Maintenance Timelines

- SAP ERP, private edition is a bridge option for customers that want to benefit from a cloud offering but are not yet ready for a move to S/4HANA.
- Contracts end latest on December 31, 2030.
- SAP ERP, private edition is available on the HANA database (technically requiring EhP 7 or 8) and for Microsoft SQL (EhP 6-8).

Maintenance Timelines

¹ Included with cloud subscriptions

SAP ERP, private edition, transition option

Overview

SAP ERP, private edition, transition option is an offering designed for **customers with large and complex IT landscapes**, who are already on their RISE with SAP journey, but need **more time to transform**. It is **not an offering to postpone transformation** decision.

It includes a subscription for selected core products centered around SAP ERP along with key services to help customers on their RISE with SAP journey while supporting business continuity for an additional timeline of up to three years.

Planned to act as transformation and business continuity service to allow continued use of the SAP ERP system in parallel to the migration activities.

SAP ERP, private edition, transition option

Full-Fledged Subscription

Core products centered around SAP ERP

Services

Notes & Corrections

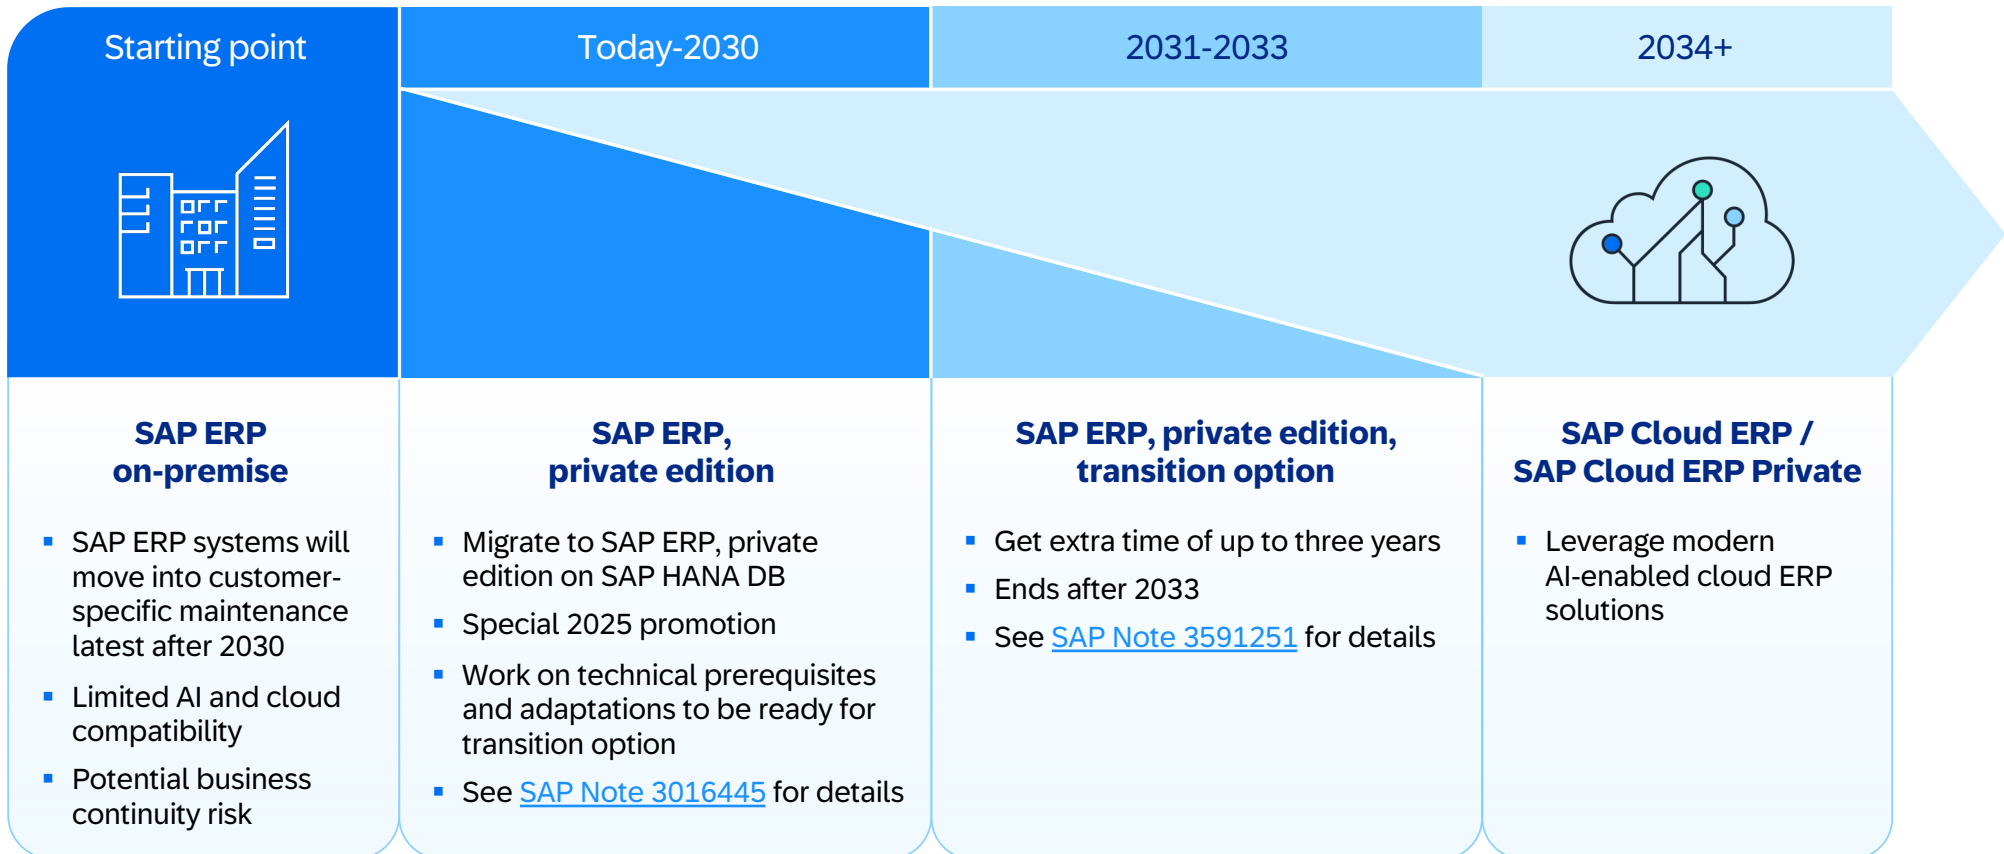

(provision of patches for security, legal and reported software issues, helping to drive business continuity)

Max Success Plan Transition Services

Supporting the transformation and simplifying the management of the dated software release

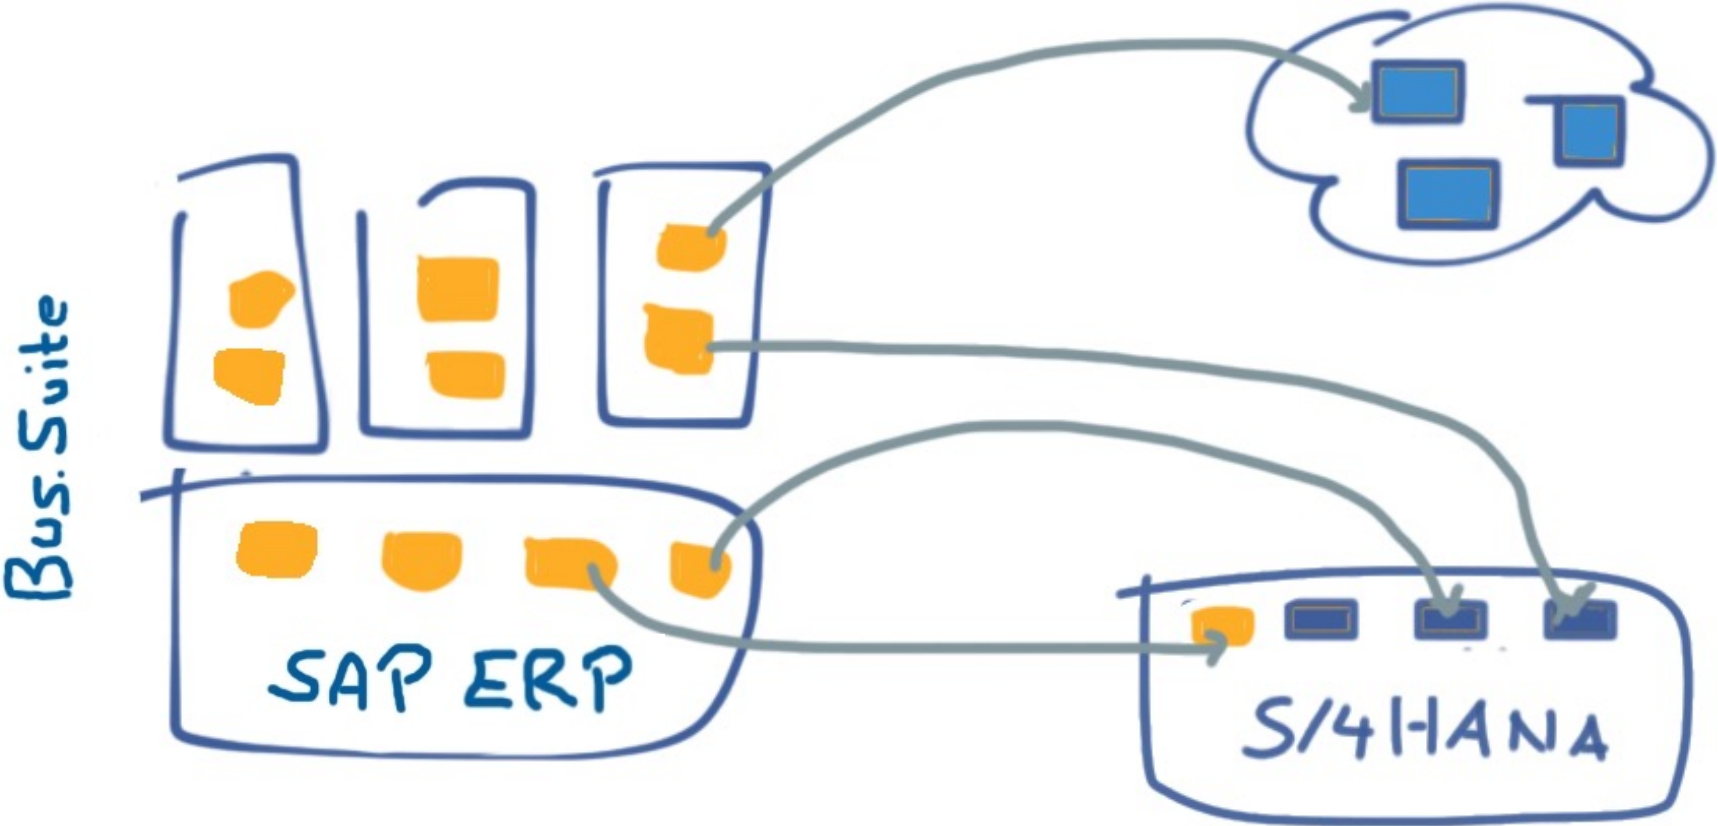

SAP ERP, private edition, transition option

Provides extra time in the context of the RISE with SAP journey

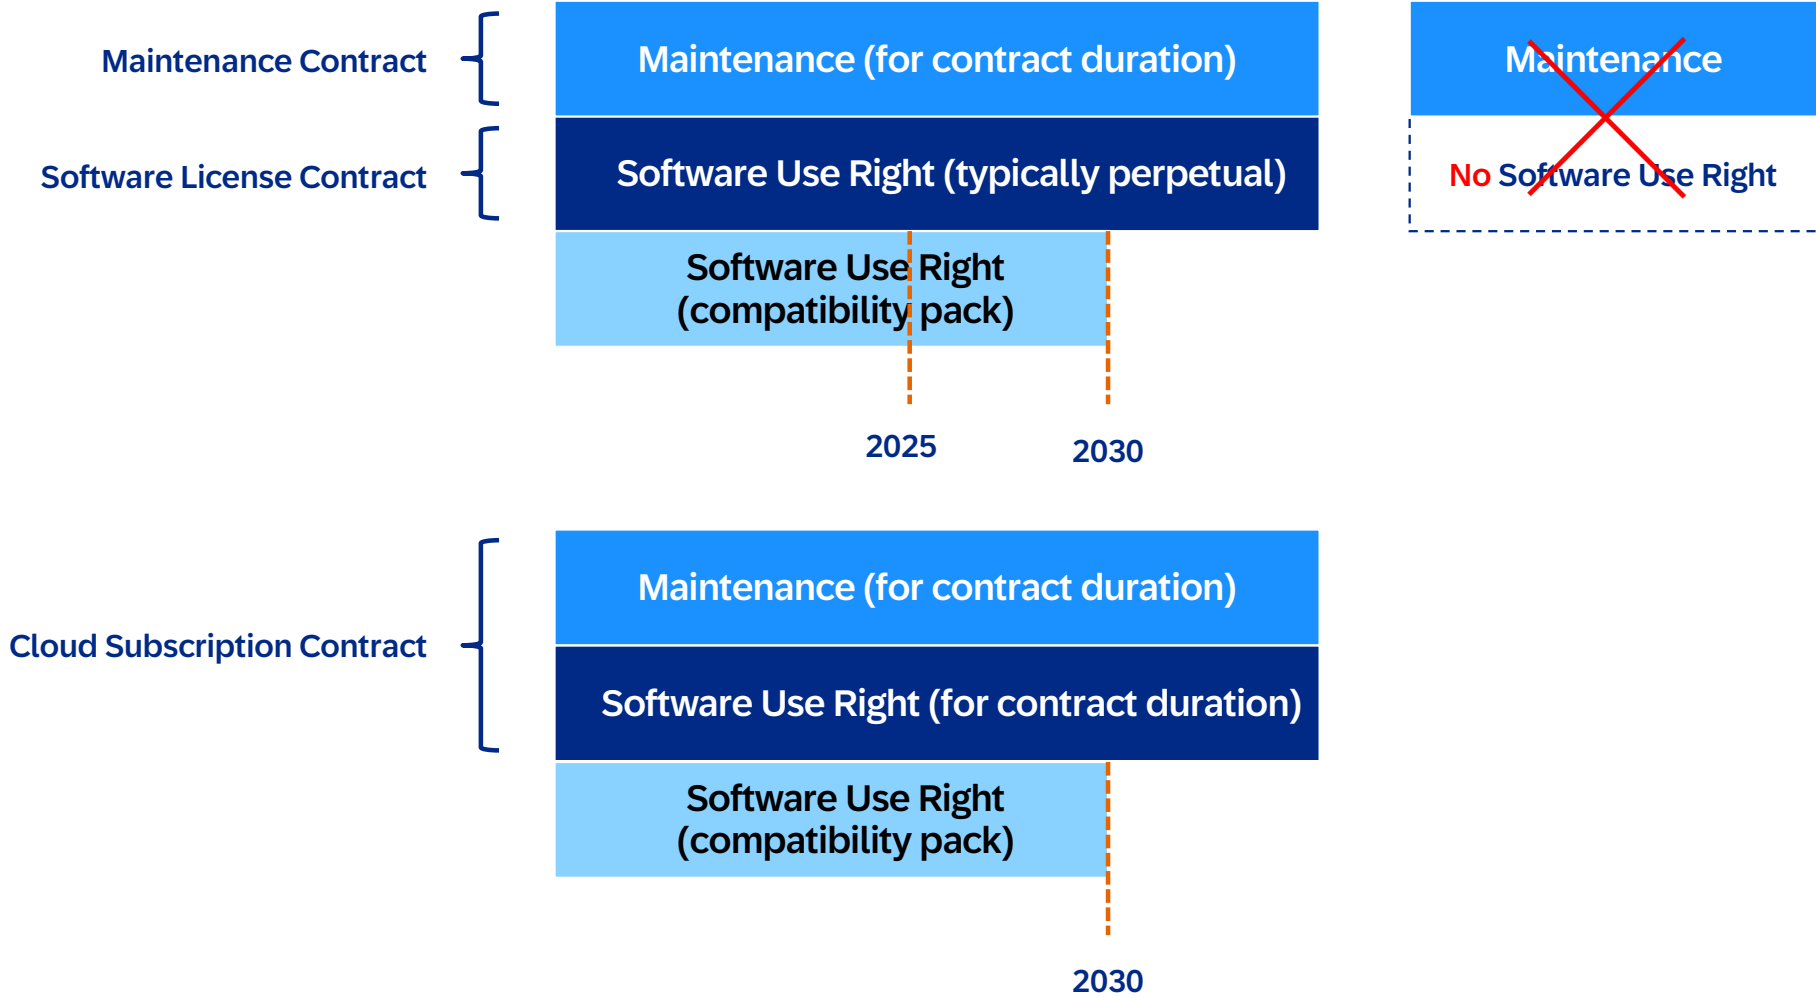

Compatibility Scope

SAP S/4HANA Compatibility Packs

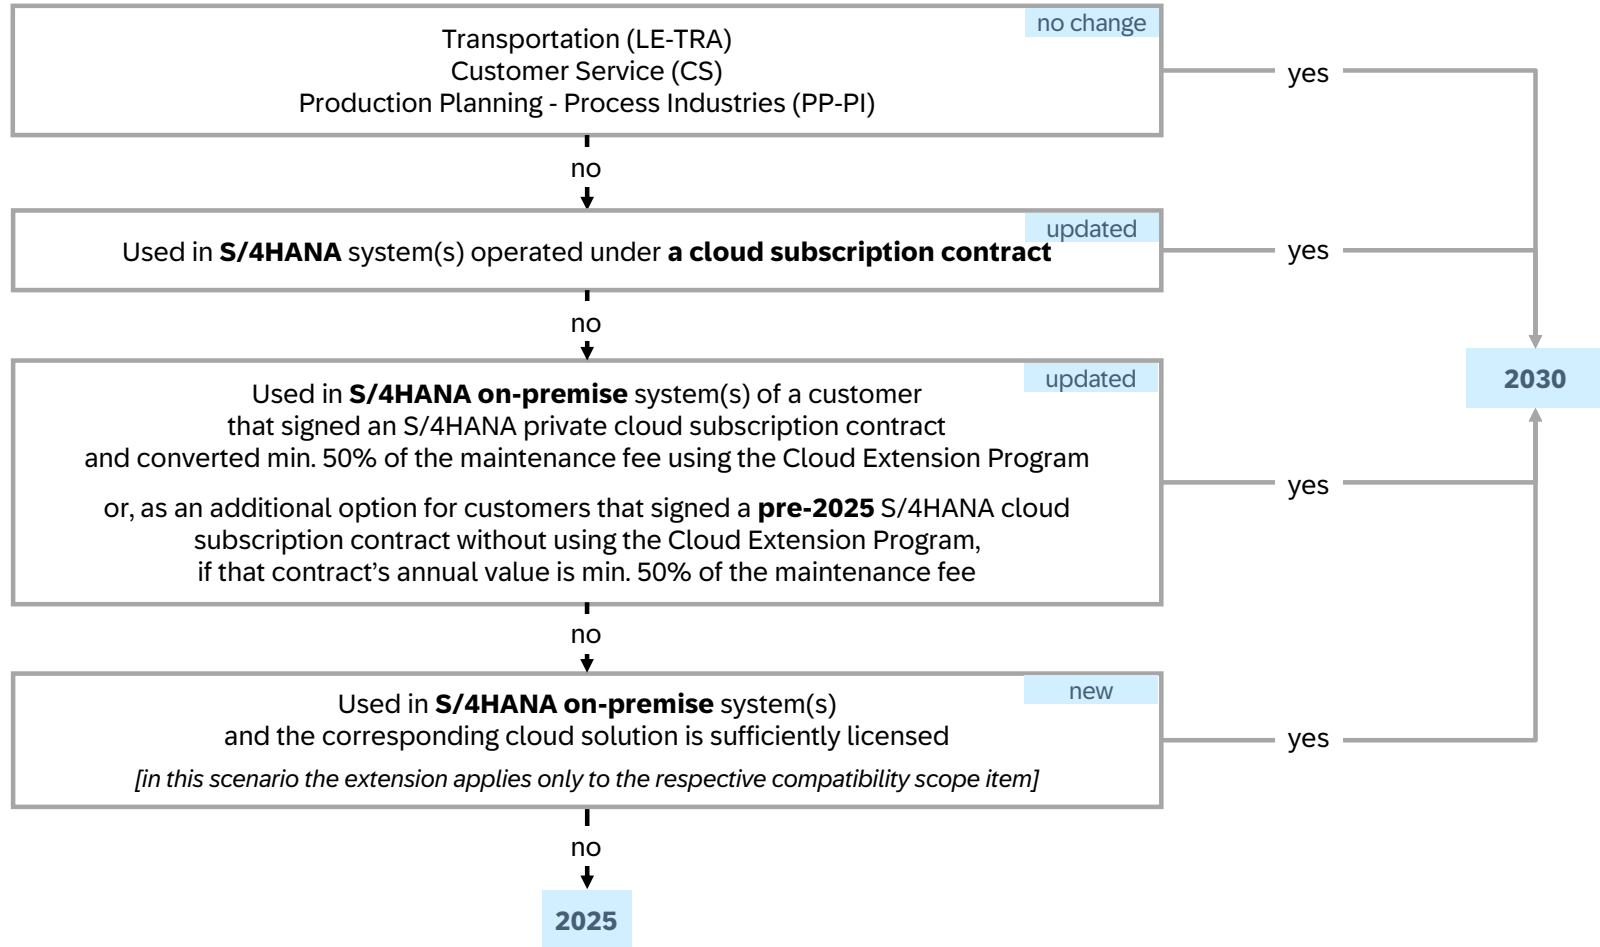

Use Rights versus Maintenance

End of Compatibility Scope Use Rights – High-Level Decision Tree

If the compatibility scope item is...

Detailed Scope

- The compatibility scope usage rights are extended until end of 2030 for all **S/4HANA and S/4HANA Finance systems that are operated under a cloud subscription contract**
 - RISE with SAP / SAP Cloud ERP Private predecessors (HEC subscription, STE & EX) are included
- For customers with an S/4HANA private cloud subscription contract, the usage rights are also extended until end of 2030 for still to be converted **S/4HANA on-premise and S/4HANA Finance on-premise systems** if at least 50% percent of the current annual maintenance fee is converted via the Cloud Extension Program
 - Extension starts with the contract sign date and lasts until the contract end date
 - Entitlement is granted for the contract duration even if the threshold is no longer reached (e.g. due to increase in maintenance)
 - Customers subscribed to an S/4HANA private cloud subscription contract before 2025 without using the Cloud Extension Policy alternatively fulfill the criteria if their annual fee as defined in the order form is at least 50% of the annual maintenance fee at signature date
- The extension covers all S/4HANA, S/4HANA Private Cloud and S/4HANA Finance releases, including future releases 2025, 2027 and 2029
 - SAP reserves the right to technically remove some of the compatibility scope items in those future releases
- The existing extension for the three compatibility scope items CS, LE-TRA, PP-PI until 2030 remains unchanged for all S/4HANA systems, including on-premise
- The underlying SAP ERP functionality of the compatibility scope item must sufficiently be licensed for the system where the compatibility scope item is used:
 - If used in S4OP system(s) only → S/4HANA on-premise license
 - If used in S4PCE system(s) only → S/4HANA Private Cloud license
 - If used in S4PCE and S4OP systems → S/4HANA Private Cloud license and S/4HANA on-premise license

How to find out?

1 Service Summary

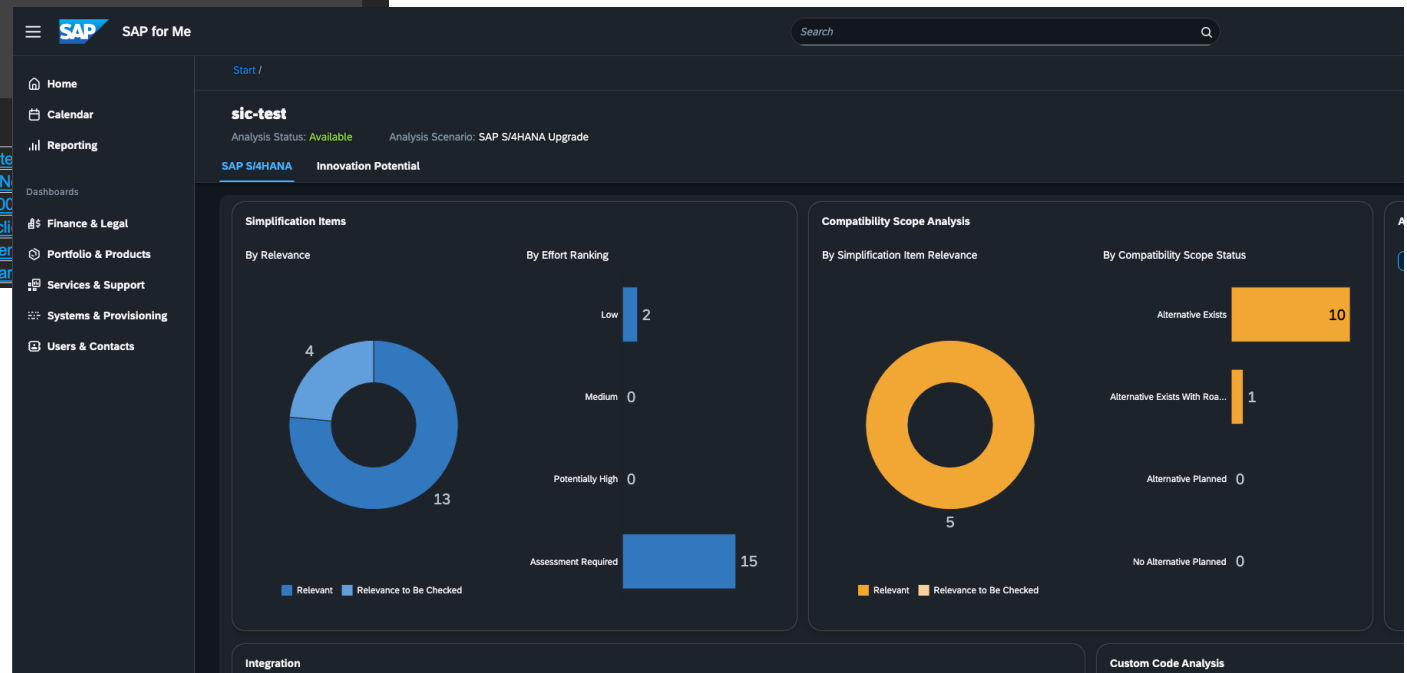

This EarlyWatch Alert session detected issues that could potentially affect your system. Please evaluate the recommendations.

ALERT OVERVIEW

- Usage of functionality provided under compatibility packages with limited support
- SAP Software on this system is outdated. Support with SAP Security Notes
- Users with critical authorizations, which allow to do anything in client 00
- Users with critical authorizations, which allow to do anything in other clients
- Some SAP Notes solving side effects in SAP Finance are not implemented
- Some SAP Notes solving side effects in SAP Materials Management are not implemented
