SAP Sapphire 2026: Recap

Shilpa Vij, Udo Paltzer

The SAP Business AI Platform is here!

Watch to learn more: [Explore the strategy and road map for SAP's unified platform](#)

Key announcements | [Innovation Guide](#)

Curated API exposure for MCP servers	Enables developers using SAP Integration Suite to create MCP servers by only exposing the most relevant sets of APIs. This will better align API exposure to agent needs and strengthen agent readiness. General availability is planned for Q2 2026.
AI gateway within SAP Integration Suite	Will provide governed AI access into API-centric integration scenarios. By combining API management and integration with SAP AI Core, organizations can create more secure, cost-aware and context-rich AI interactions across SAP and third-party systems. General availability is planned for Q4 2026.
New agentic orchestration capabilities	Will help enable event-driven automation across SAP and third-party systems. By coordinating specialized agents within governed workflows and triggering actions based on business events, organizations can automate cross-system processes better and respond to change faster. This fosters movement from static process execution toward more adaptive operations: actions can be initiated in real time, manual interventions can be reduced, and complex processes can run more resiliently across hybrid landscapes. General availability is planned for Q4 2026.
Real-time data ingestion	Will capture, process and deliver real-time events and data to AI and application services. This can strengthen contextual grounding, support agent-driven workflows and enable timely and relevant responses. It also helps organizations connect live business signals with AI-driven experiences, enabling improved AI output quality, reduced latency and more responsive, context-aware processes across SAP and third-party systems. General availability is planned for Q4 2026.

Key announcements | [Innovation Guide](#)

New migration agent

Will help customers modernize SAP's process integration and orchestration (PI/PO) artifacts. By identifying reuse opportunities and generating compatible Groovy scripts for custom adapter modules and Java mappings, this agent will help accelerate transition to the cloud, expand modernization coverage and improve artifact quality and maintainability. General availability is planned for Q3 2026.

Analytics agent for API management

Will allow users to ask questions in natural language and receive dynamic insights in both visual and textual formats. This will make it easier to explore API data, move beyond predefined dashboards and make informed decisions. General availability is planned for Q4 2026.

Joule added to SAP Integration Suite

Introduces a more intuitive approach to managing the integration lifecycle from design to operations. Users can take advantage of this capability within SAP Integration Suite to generate integration flows more efficiently, streamline message transformations and accelerate error resolution. General availability is planned for Q3 2026.

SAP Cloud ERP Integration with Atlassian Jira

Murthy V

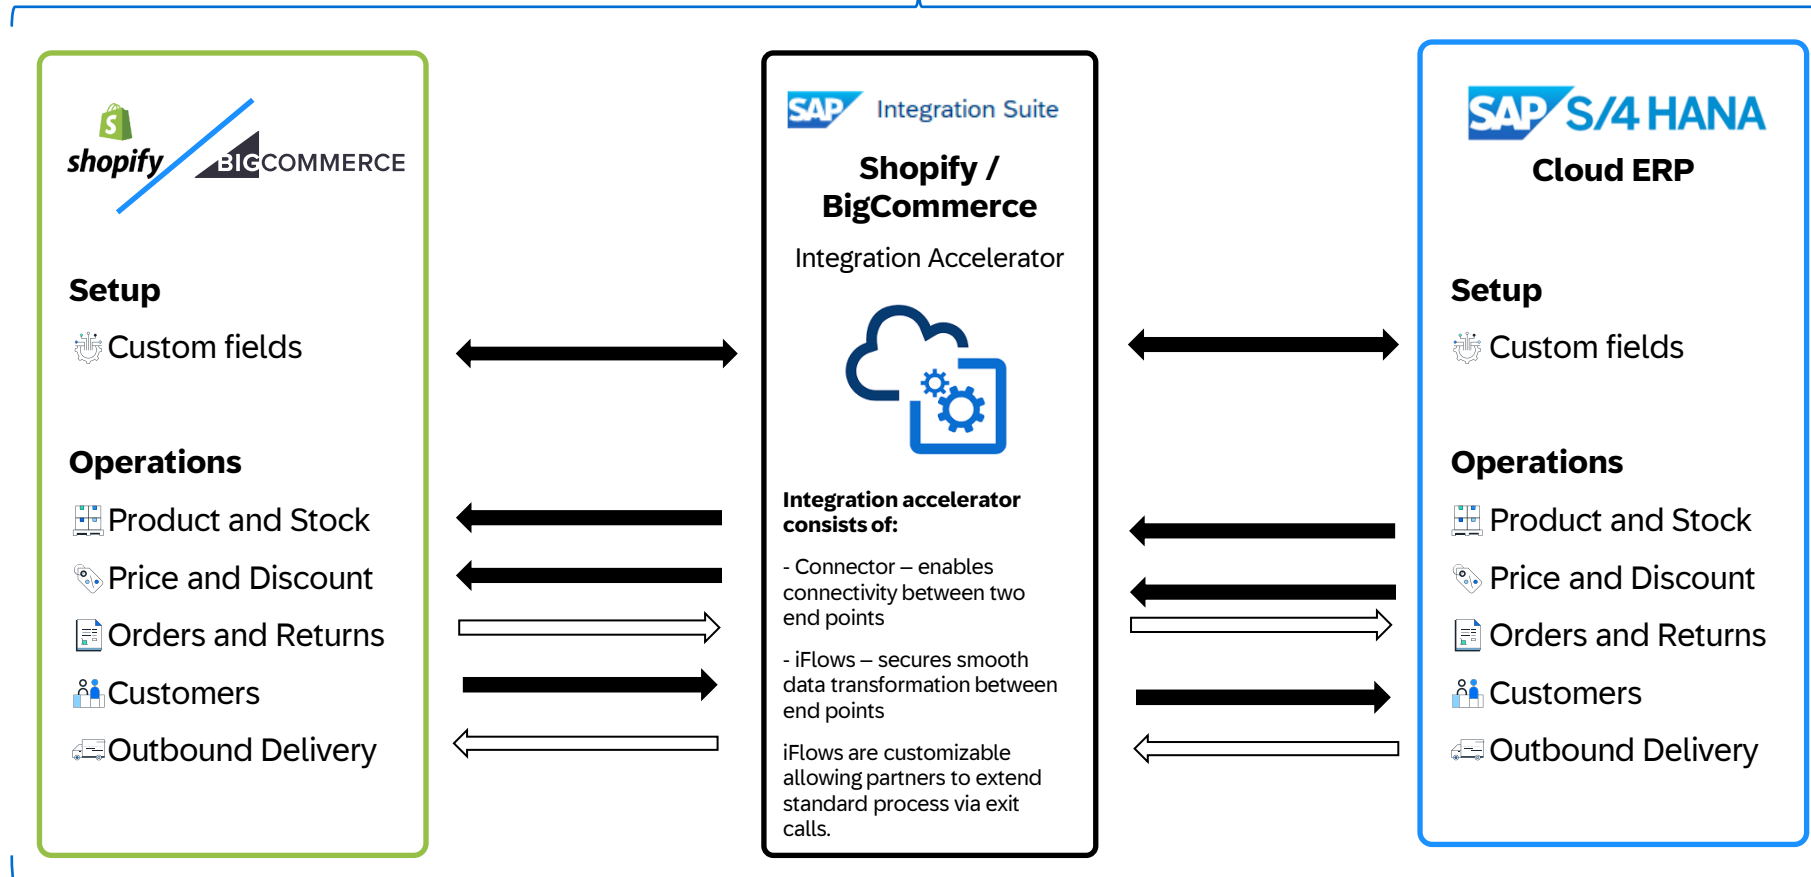

SAP Business Suite

The future of enterprise management

Scope of Integration between two prominent e-commerce platforms and SAP S/4HANA Cloud Public Edition

End-to-end process for “Order fulfillment” between
SAP S/4HANA Cloud Public Edition and **Shopify or BigCommerce**

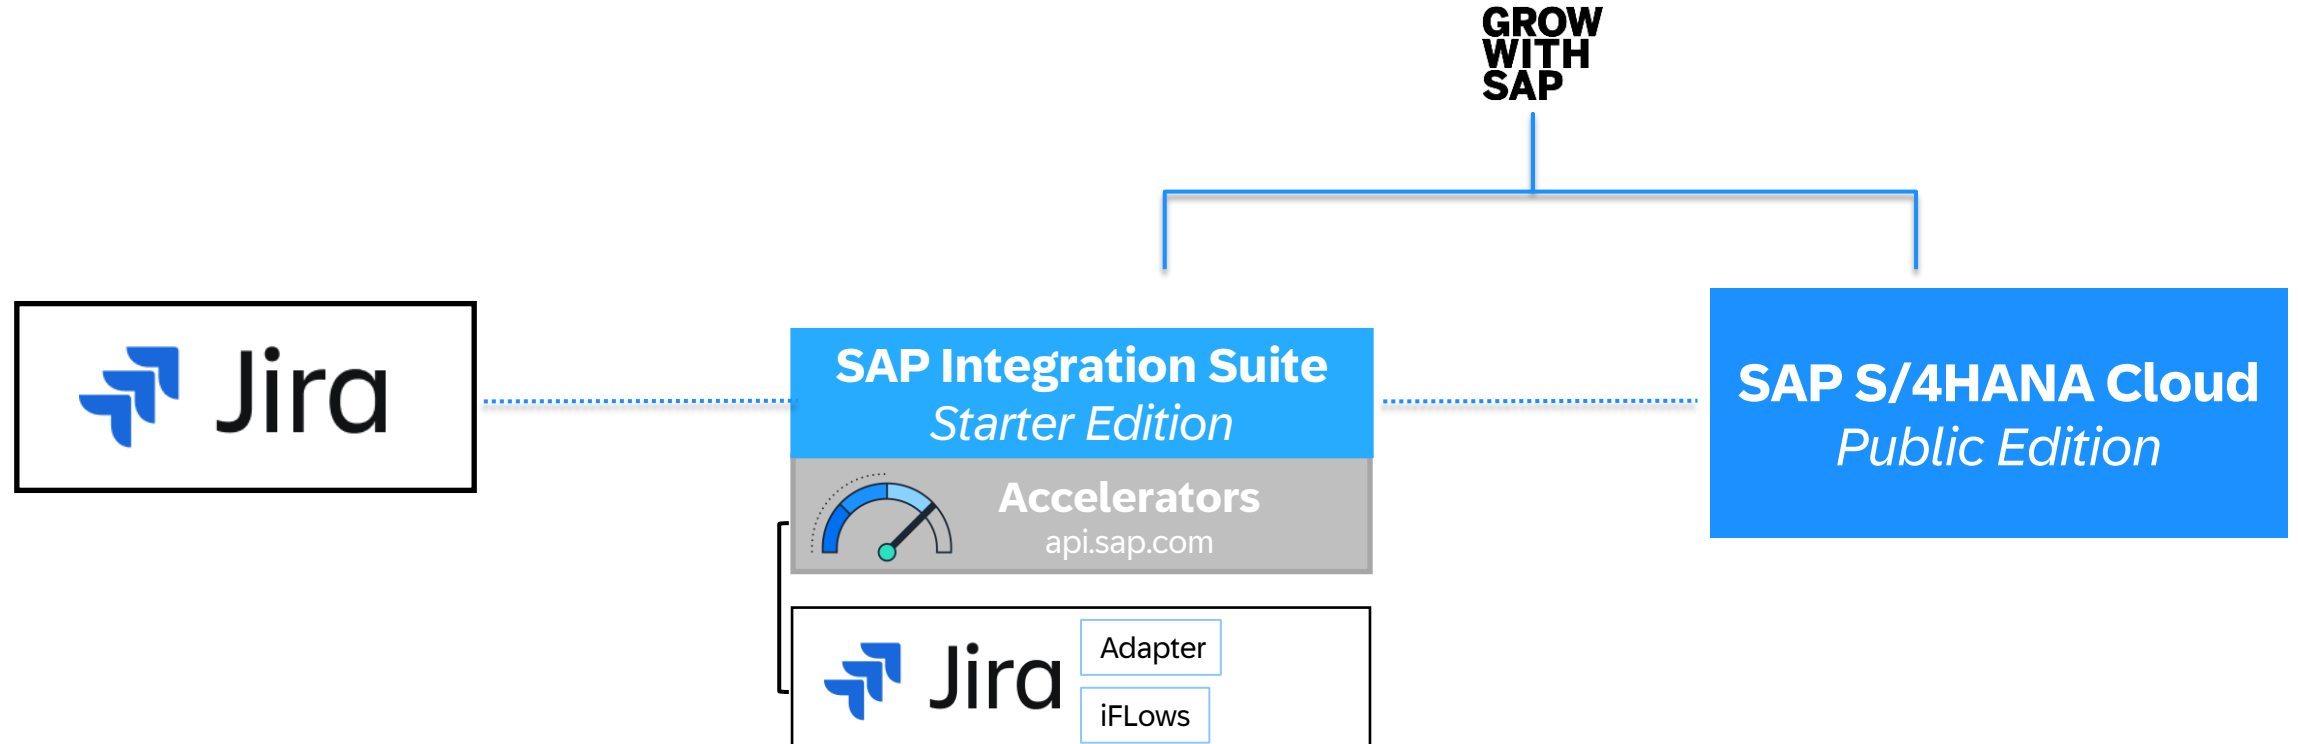

Scope:

- Replicate **Products** from SAP S/4HANA Cloud Public Edition to Shopify or BigCommerce
- Replicate **Product Stock** from SAP S/4HANA Cloud Public Edition to Shopify or BigCommerce
- Replicate **Product Prices & Discounts** from SAP S/4HANA Cloud Public Edition to Shopify or BigCommerce
- Replicate B2C **Customers** from Shopify or BigCommerce to SAP S/4HANA Cloud Public Edition
- Replicate **Orders** from Shopify or BigCommerce to SAP S/4HANA Cloud Public Edition
- Replicate **Order Cancellation** from Shopify or BigCommerce to SAP S/4HANA Cloud Public Edition
- Replicate **Order Returns** from Shopify or BigCommerce to SAP S/4HANA Cloud Public Edition
- Replicate **Delivery** Details from SAP S/4HANA Cloud Public Edition to Shopify or BigCommerce

Jira Accelerator

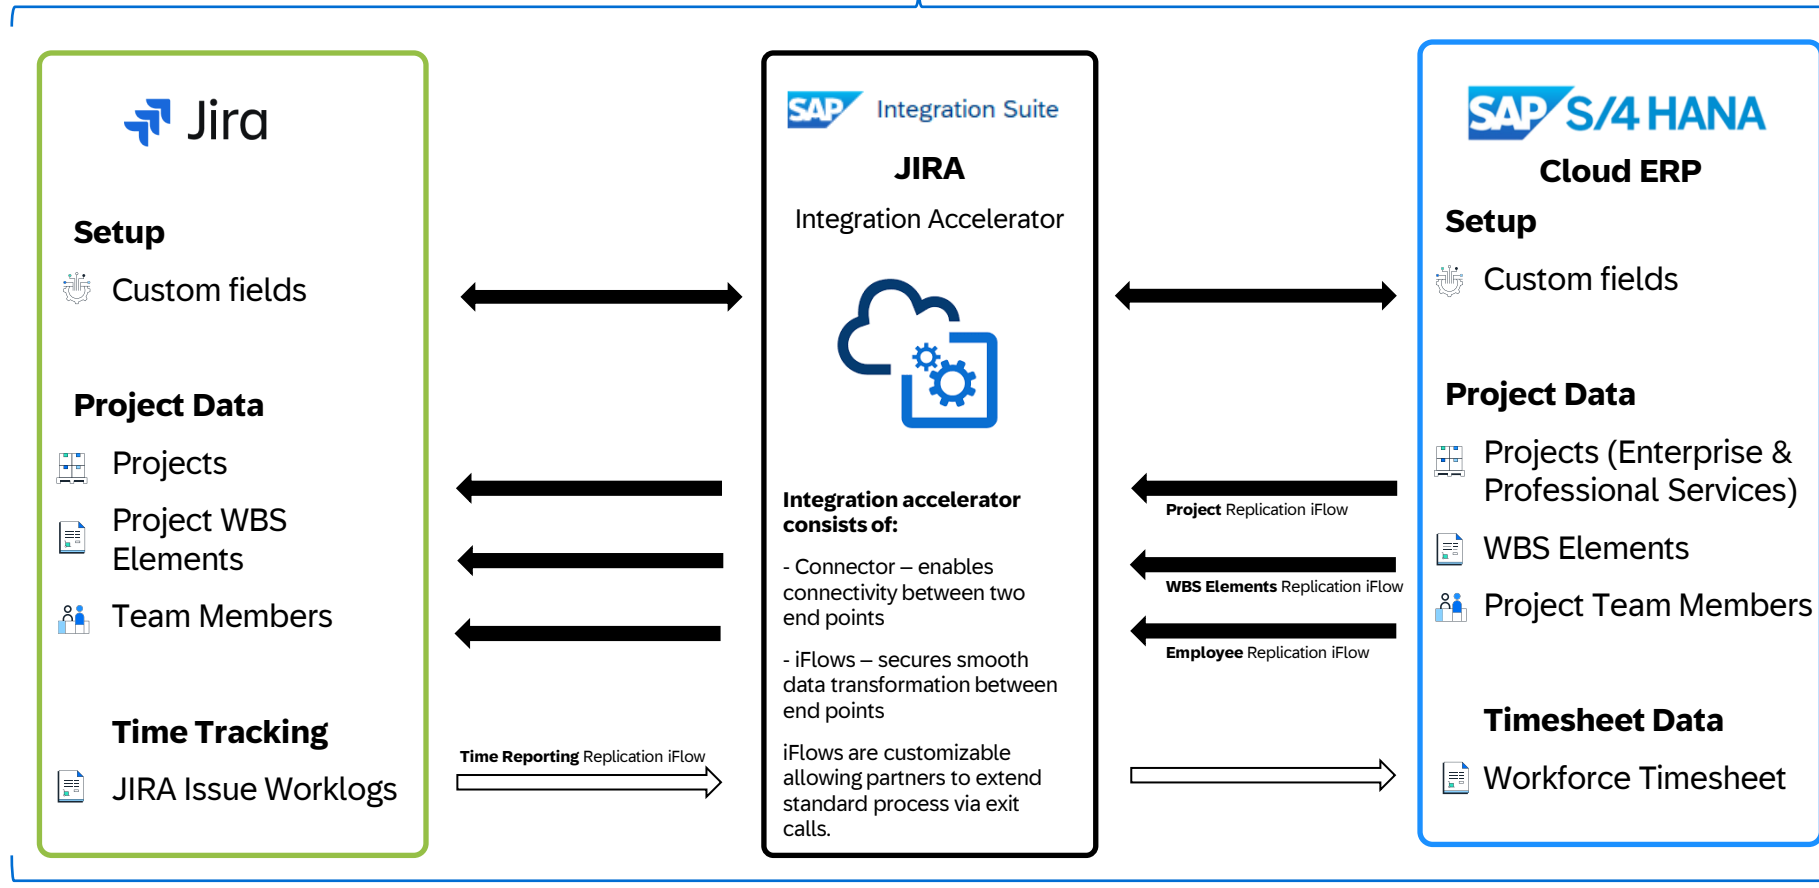

Integration Accelerator is “content” that is downloaded from SAP and deployed by S/4HANA Cloud implementation partner

- Customer benefits from simplified application connectivity (Jira connector, S/4HANA Cloud connector)
- Customer benefits from predefined, ready-to-configure integration logics (data synchronization, transactions)
- Customer and implementation partners can adapt and extend the accelerator content, leveraging SIS tooling

Scope of Integration between JIRA and SAP S/4HANA Cloud Public Edition

End-to-end process for “Project Management & Time Tracking” between
SAP S/4HANA Cloud Public Edition and **Atlassian JIRA**

Scope:

- Replicate **Projects** from SAP S/4HANA Cloud Public Edition to JIRA
- Replicate **Project Team Members** from SAP S/4HANA Cloud Public Edition to Shopify or BigCommerce
- Replicate **WBS Elements** from SAP S/4HANA Cloud Public Edition to Shopify or BigCommerce
- Replicate **Time Recordings** from JIRA to SAP S/4HANA Cloud Public Edition

Business Benefits:

- Out-of-the-box Integration Flow's for unidirectional master data & transactional data synchronization with easy customization
- Streamlined and automated Project Management processes over numerous touch points
