Developers

Low-Code/No-Code unleashes hidden workforce in companies

Low-Code/No-Code Unleashes Untapped Workforce in Companies

Enabling Citizen Development in Organizations to Increase Business Resilience

IT Technologists⁴

Gartner®, 2021

“In the 2021 Gartner Reimagining Technology Work Survey, respondents indicated that — on average — **business technologists** make up **41%** of their organization’s workforce.” ⁴

Gartner®, 2021

“About **80%** of these users are **citizen technologists** who create technology output as part of (or in addition to) their full-time roles (...). These non-IT personas can independently use **low-code and no-code** technologies to improve business efficiency, efficacy and agility.” ⁴

Gartner®, 2021

Citizen Technologist = Citizen Developer = Business Builder

Professional developer

- Uses tools of choice to create cloud native applications and reusable services
- Designs, develops, deploys, tests, and hands over to production
- Understands the concept of a development lifecycle, testing, and versioning
- Ensures governance and security

Citizen developer

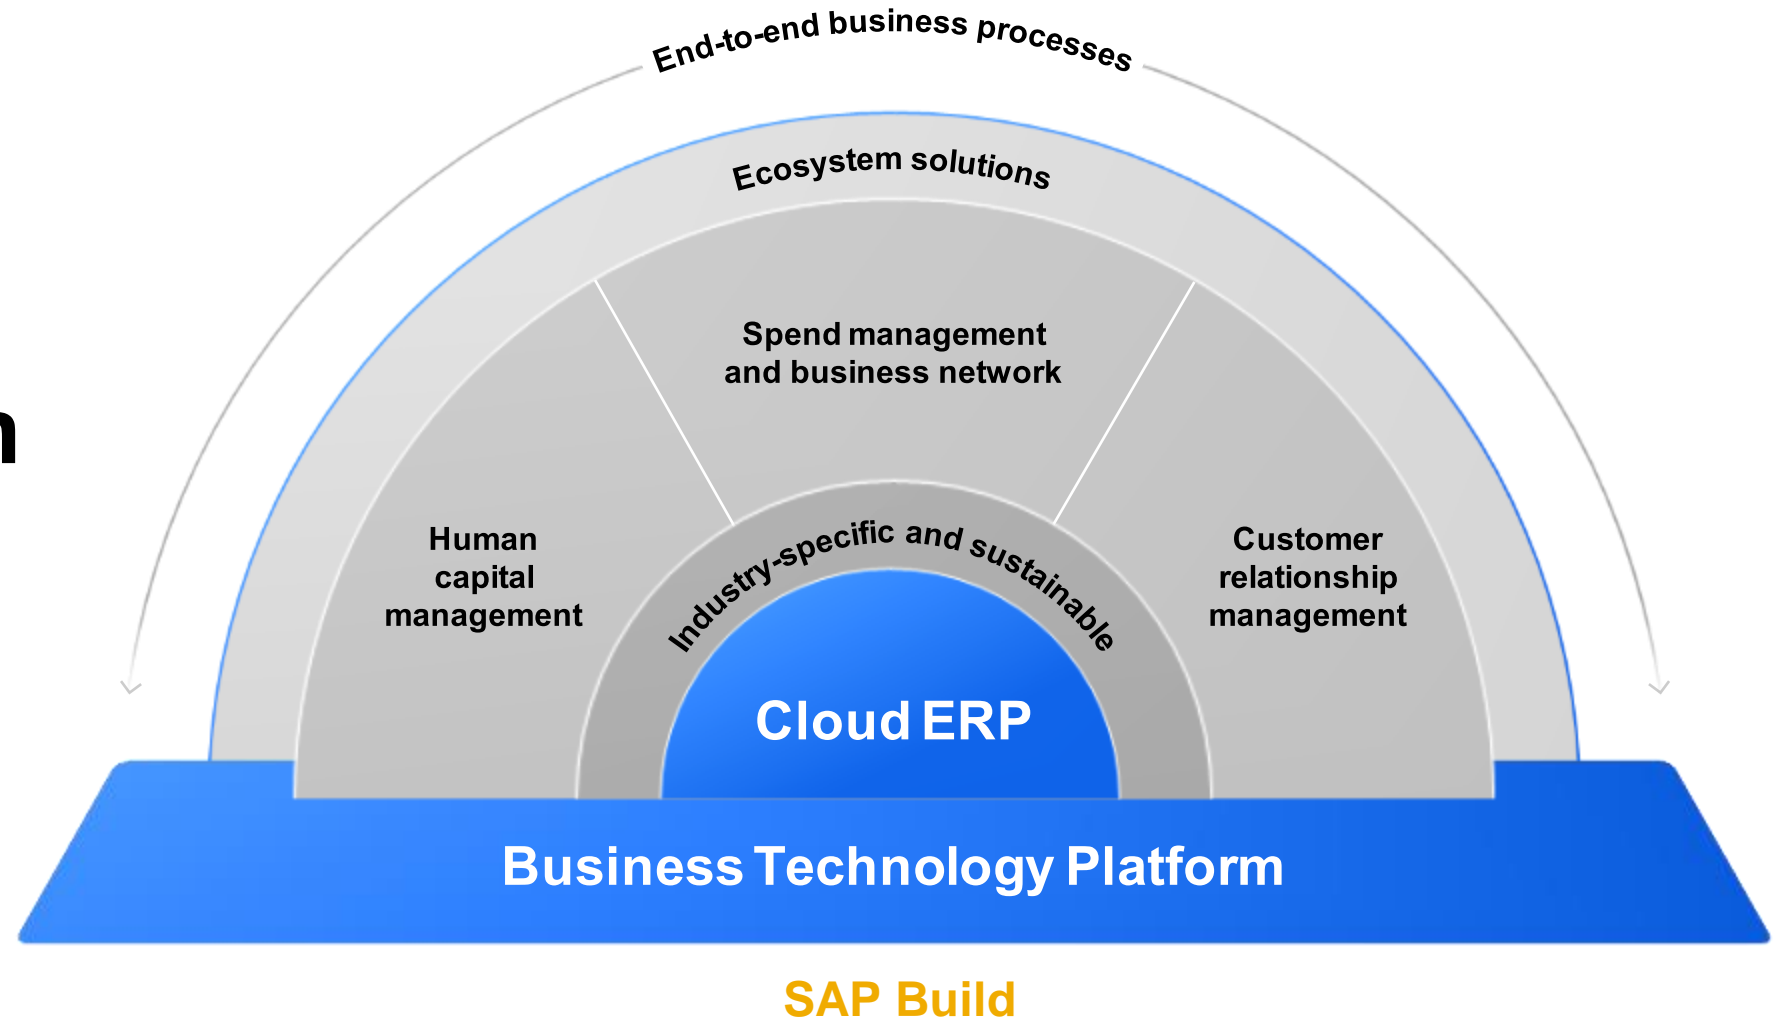

- Creates and publishes low-code/no-code apps and customizations with close links to business contexts
- Is unaware of testing, go-live, versioning, and termination but learns through citizen development education
- Ensures governance and security through IT-sanctioned tools and platform-supported processes

Demo

Extension scenario

Use SAP Build Apps to build Side-by-Side UI Extensions for SAP S/4HANA

Example scenario: a sales executives meets different business partners and needs access to the latest business partner information on the go. They need a simplified, custom UI application which can run on a mobile device or tablet.

Check out the SAP Discovery Mission

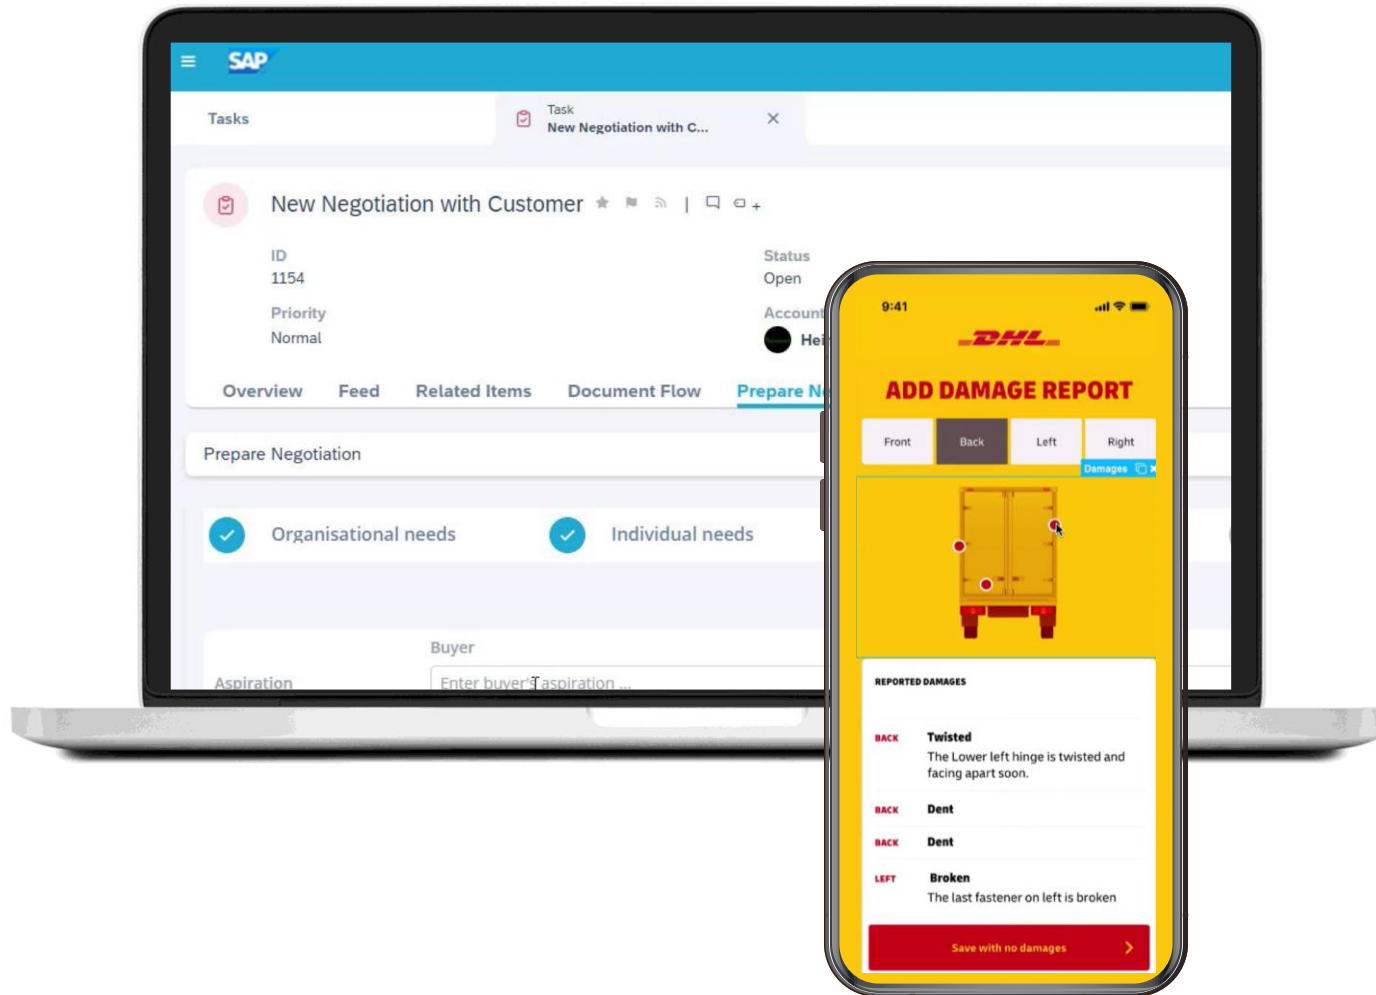

Extension scenario

Use SAP Build Apps to build Side-by-Side UI Extensions for SAP S/4HANA

1. Create a new page for the user interface
2. Add BTP Authentication
3. Connect the app to S/4 HANA Cloud system
4. Select the data set we want to use
5. Connect the data to UI via data variables
6. Decide which data we want to see listed
7. Preview the newly created web application

How to test?

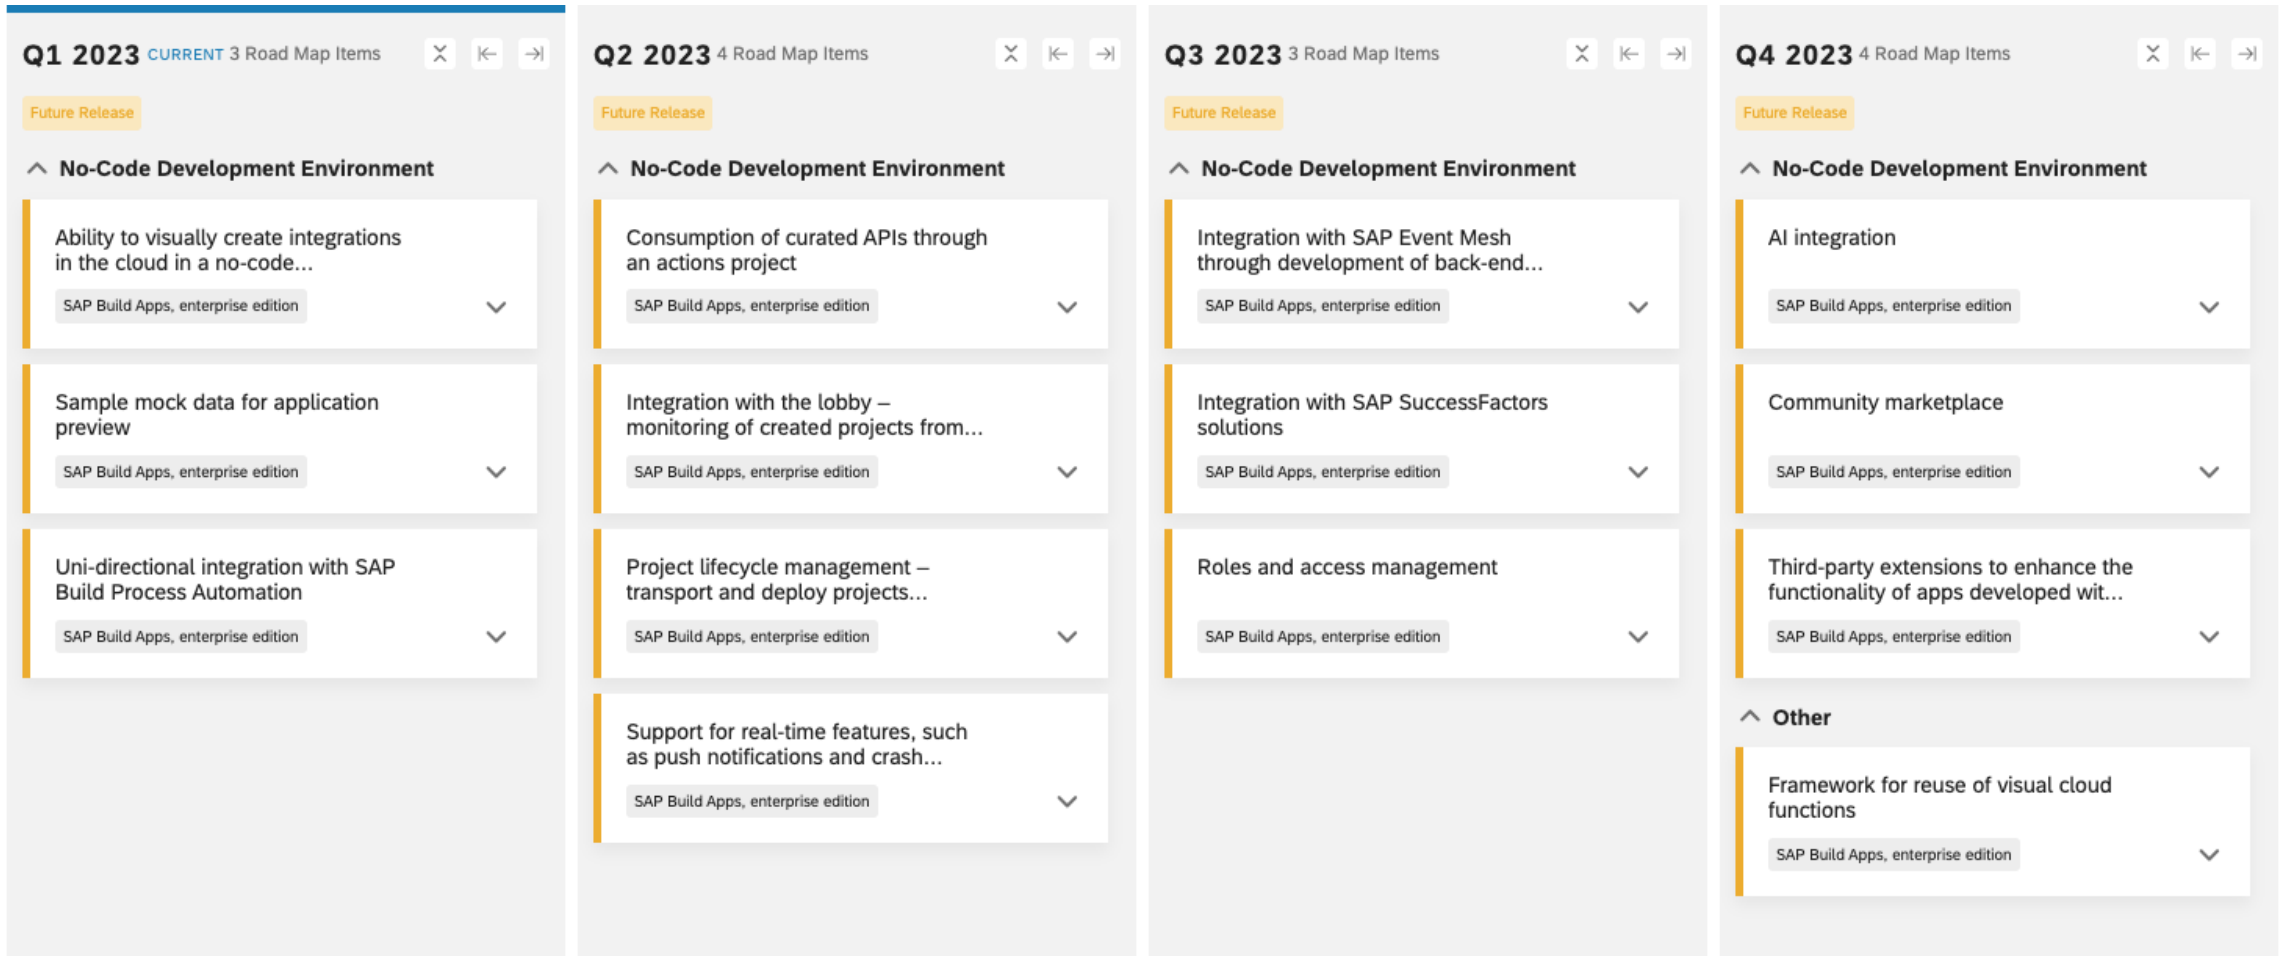

SAP Build Apps Sandbox		SAP BTP Free Tier Model
Costs	0 EUR	0 EUR
Test duration	30 Days	No limitation
Usage limitation	<ul style="list-style-type: none"> • Only for test purposes • BTP integration features can't be tested as no access to SAP BTP is available • No integration to SAP Build Workzone or SAP Build Process Automation • Sharing of Projects isn't possible • No Deployment of Apps only Preview possible 	<ul style="list-style-type: none"> • Only for test purposes • Limited to one instance per global account. • 2 Successful standalone builds per platform (Android, iOS) for each of your apps. Errored builds do not count against the quota. • Cloud functions instance will be stopped at regular intervals and when inactivity is identified. • Storage 64 MB per instance
Switch to productive model	You can't switch from the same SAP BTP Global account to a paid plan – you have to re-configure everything on a new SAP BTP account	You can switch from the same SAP BTP Global account to a paid plan
Availability	SAP BTP EU10 only	SAP BTP EU10 and US10
Access requirements	Email address	<ul style="list-style-type: none"> • Email address, mailing address and phone number • Credit card number is necessary
Blog or link to access SAP BTP	<ul style="list-style-type: none"> • Link to the sandbox • Announcing the SAP Build Apps Sandbox - SAP Community Groups 	https://blogs.sap.com/2022/11/25/sap-build-apps-free-tier-individual-access/

Roadmap

SAP Build Apps | External Roadmap

[Link to Roadmap Explorer](#)

SAP Build Roadmap 2023: How the low-code superpower will evolve

Continued investment in best-in-class low code app development and automation features

Automate your business

Continuous process flow, orchestration and automation enhancements with managed complexity for SAP and non-SAP and market-leading simplicity

Embedded AI and Process Intelligence such as intelligent approval recommendations, content recommendations, AI decision design

Build apps faster

Continuous No-Code developer experience to visually create and build beautiful consumer grade and secure Apps both frontend and biz logic with Visual Cloud functions

Data capabilities enhancements and Integration expansion to easily build data driven and intelligent Apps

Design business sites with ease

Run a central entry point and enhance the SAP user digital experience with a common foundation between SAP Start and SAP Build Work Zone

Increase business agility with improved business user administration capabilities to easily manage multiple personalized business sites

Deeper SAP Application Integration

Seed Low-Code extension tools for SAP Business Apps CX, HXM, S/4HANA and Intelligent Spend Mgt, support Buying360 and SFSF Guided Experiences

Enhanced Action Builder with semantic discovery and configuration of APIs and library of Action content for simple integration with SAP Graph & SAP API Business Hub

Business Accelerators & Content Packages

Industry-specific and LoB content for HXM, CX and Procurement packages and templates to accelerate adoption

Amplify collaboration with a Unified Store and Marketplace for SAP, partners and customers to discover, purchase and consume content and templates

Governance for IT Admins

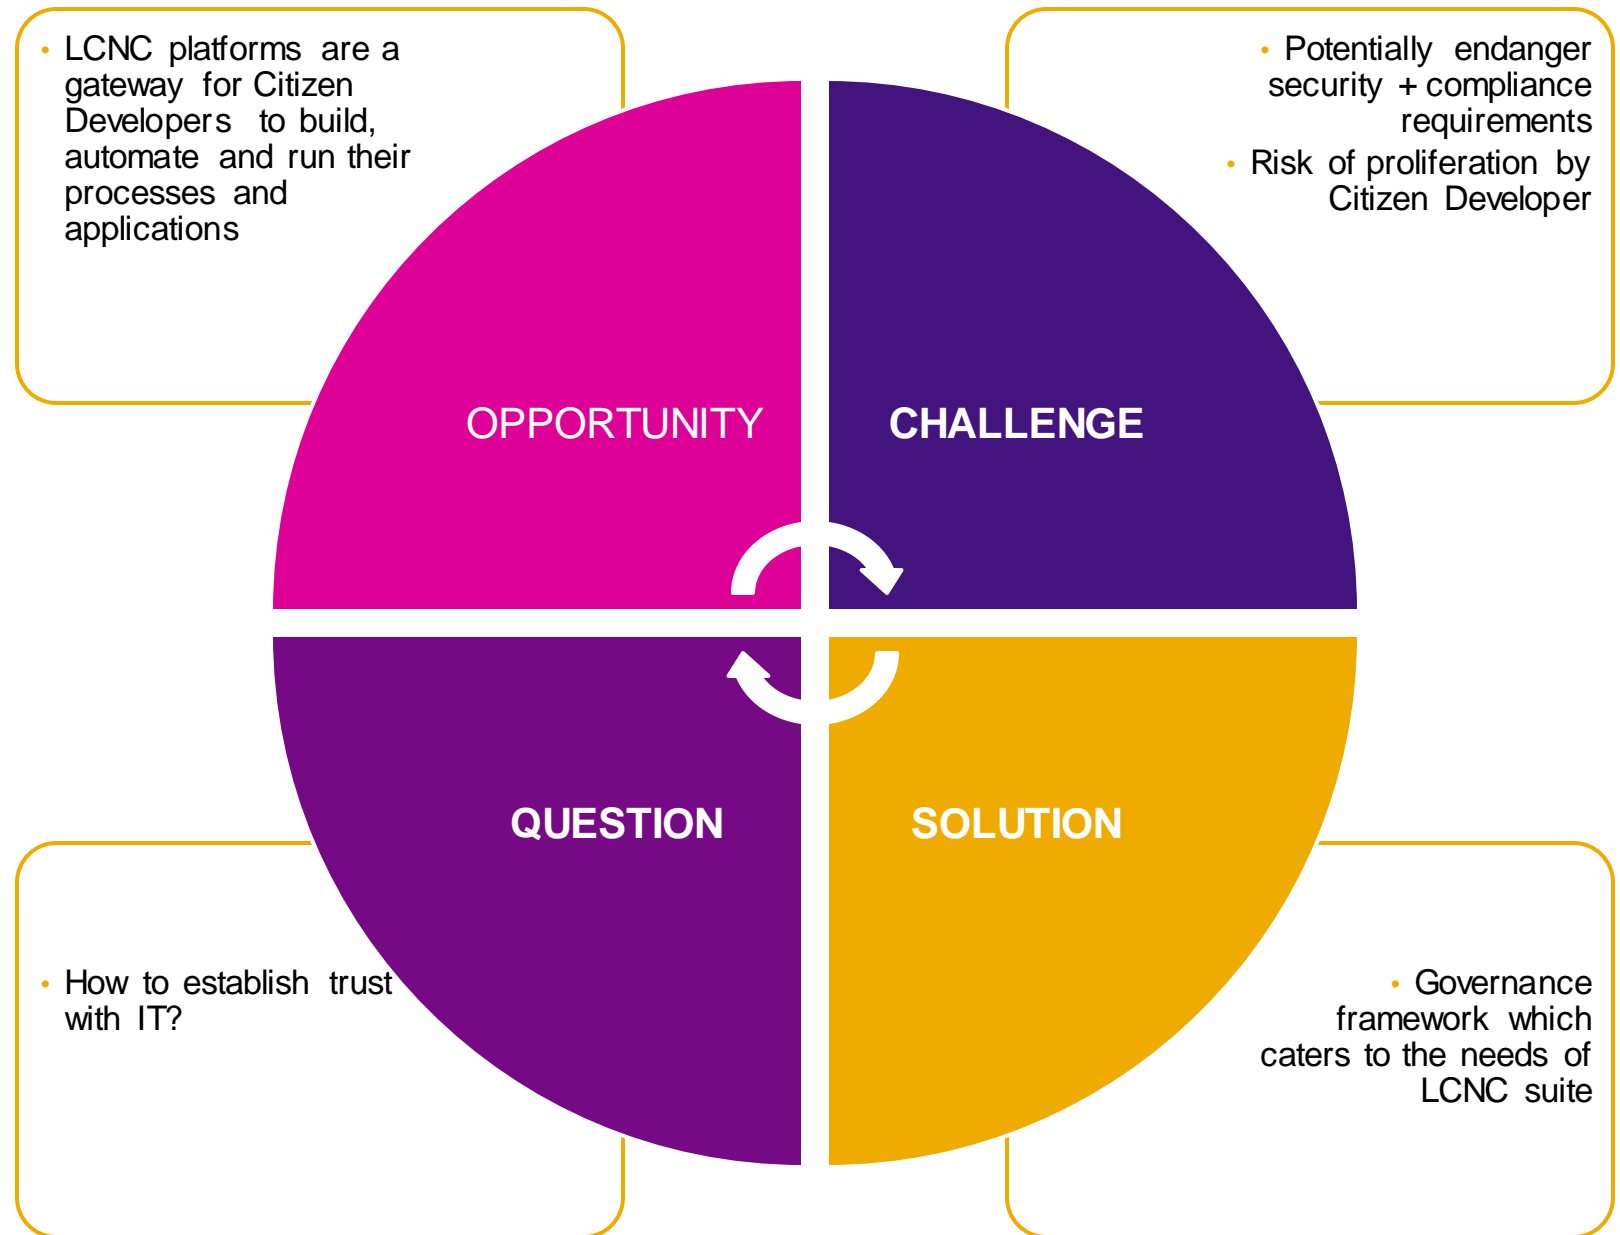

Empower citizen developers to build applications that are safe, secure while being compliant with IT

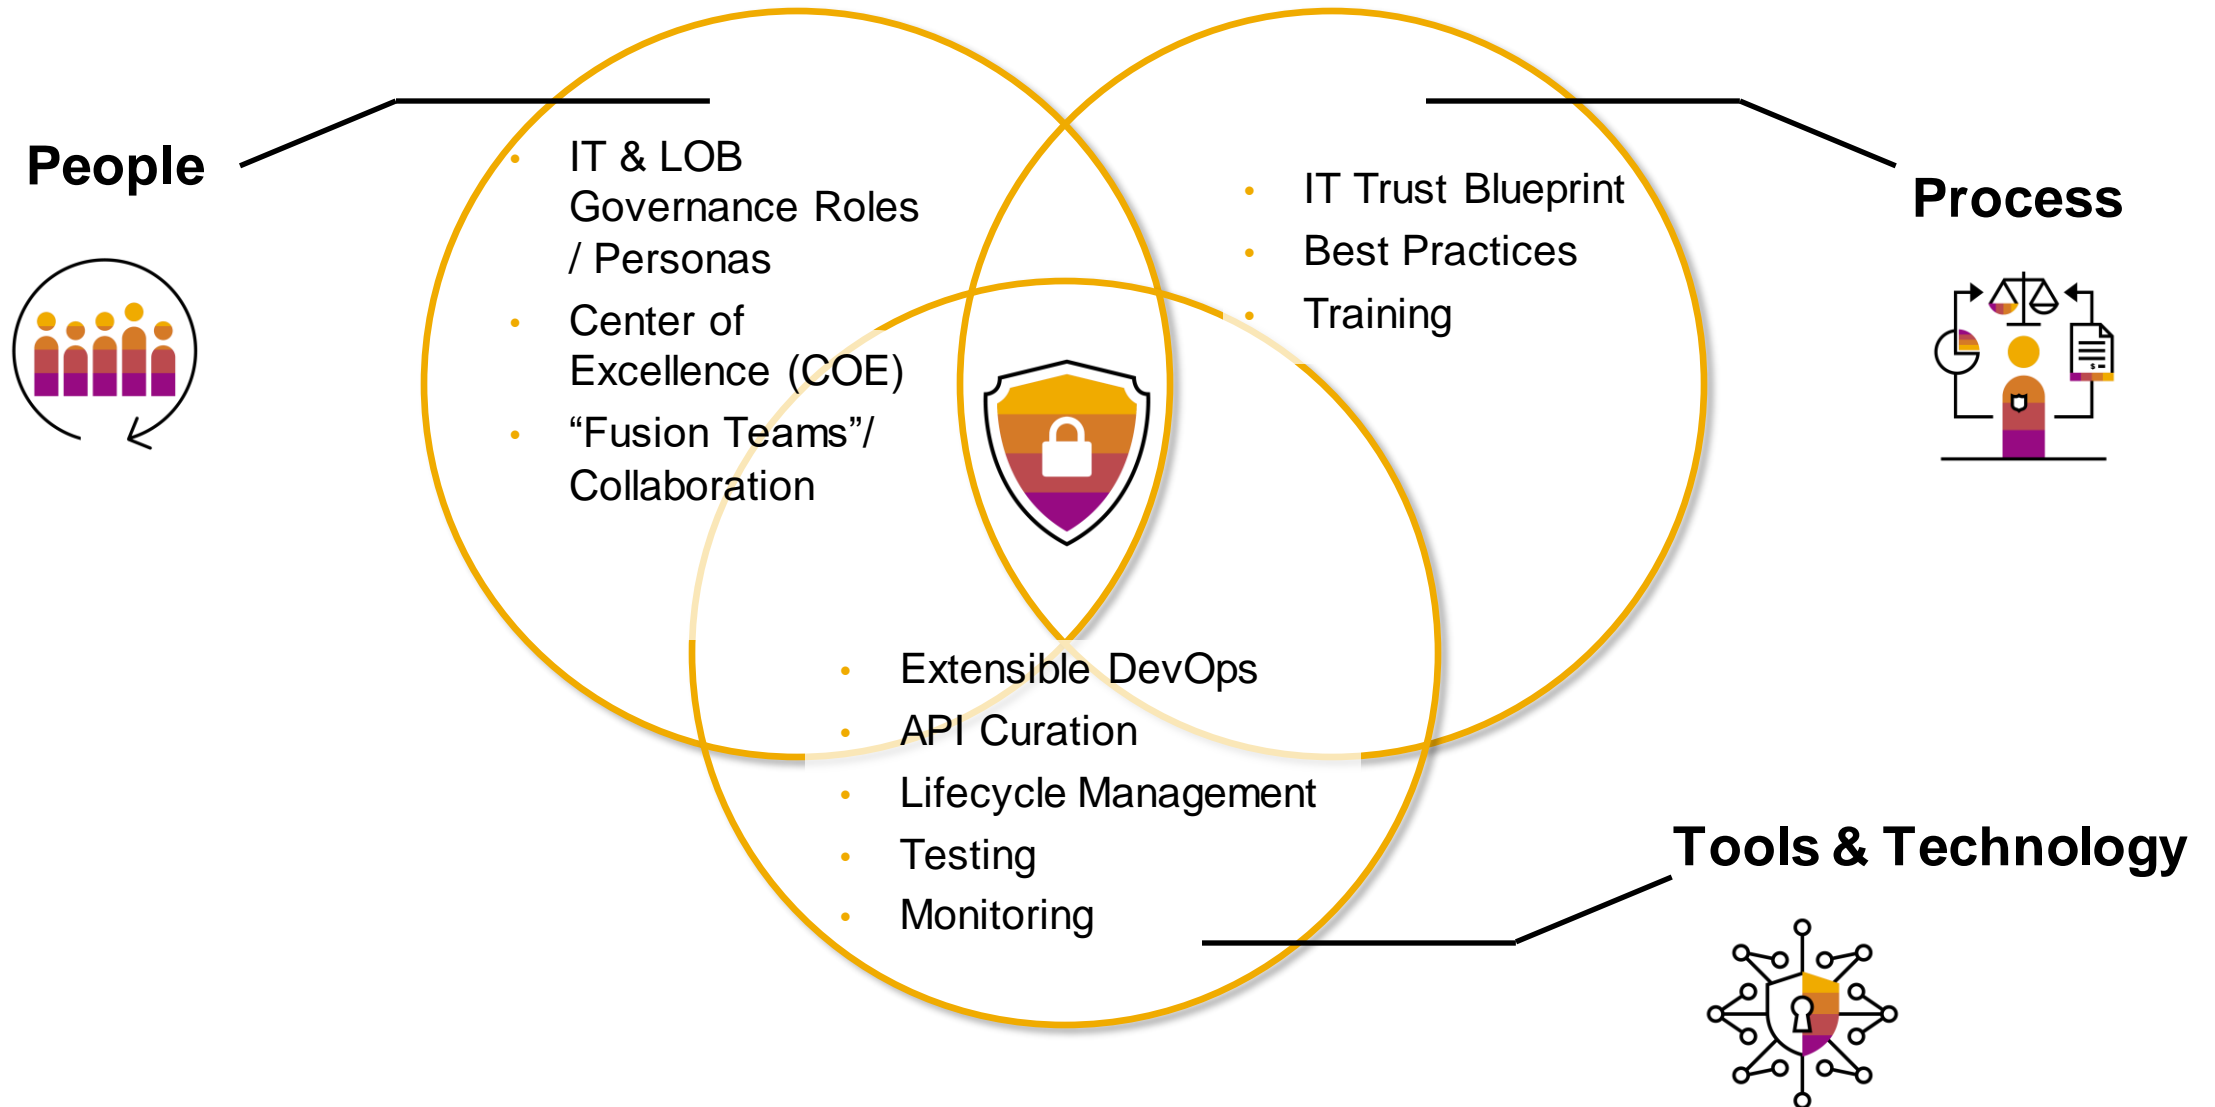

Govern key stages of the project lifecycle, strengthen collaboration in fusion teams, enable consistent life cycle management and monitoring

“With great power comes great responsibility”

- Low-code tooling is revolutionizing the application and process development experience
- Critical need to need to counter shadow-IT with good governance
- SAP enables every enterprise to be a robust, extensible, secure and compliant enterprise

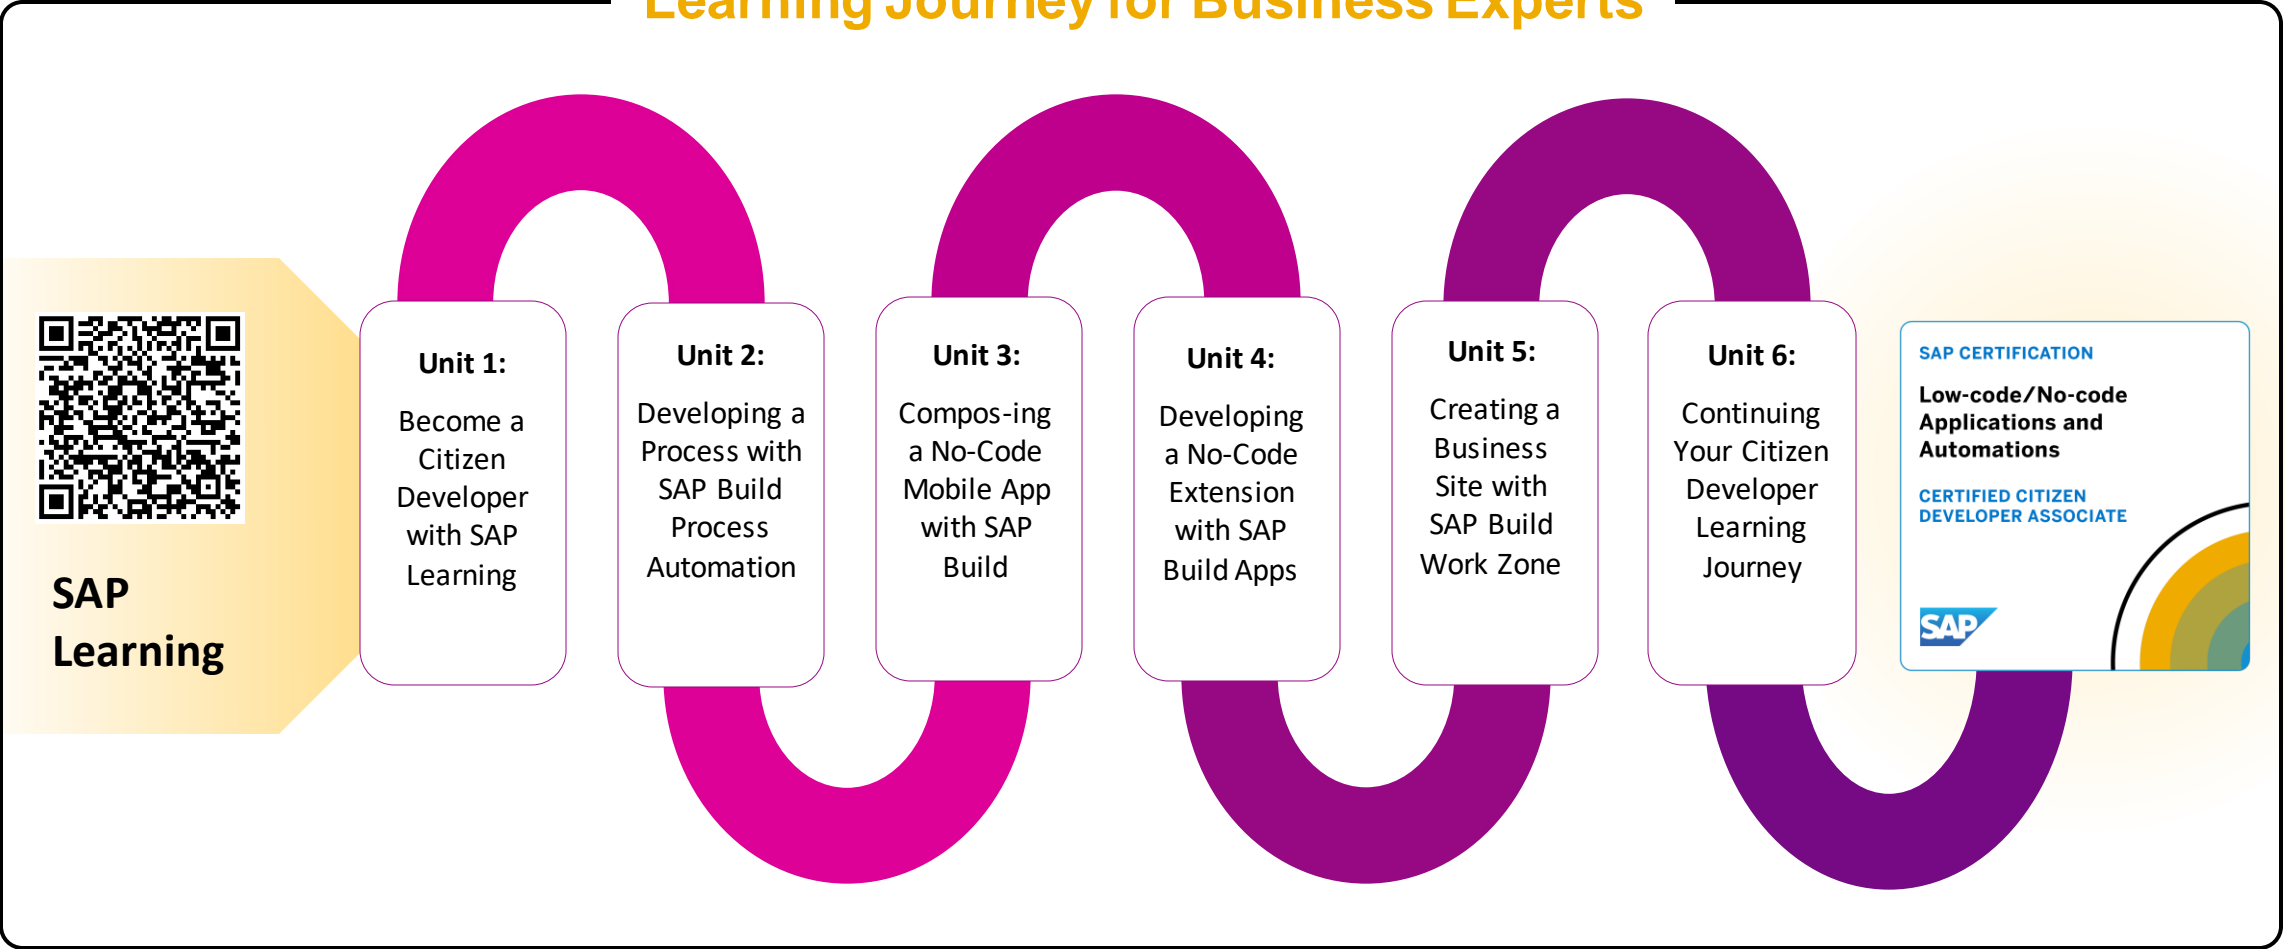

IT Trust | Governance Triad

Become an SAP Builder

Utilize SAP Build for Low-Code / No-Code Applications & Automations for Citizen Developers

Learning Journey for Business Experts

Why SAP Build

Bringing business & IT together to deliver new innovations

Enhanced ROI by optimizing existing investments using simplified integrations from SAP

Increased adoption of new processes and applications

Accelerated time to value, using support for best practices with industry- and LoB-specific prebuilt content

Maximized speed and agility through accelerated delivery

Greater collaboration through co-development between business and IT

Reduced total cost of development
