INTEGRATION

Pre-built data models, integrations, workflows, app templates

DATA & ANALYTICS

Self-service data discovery, modeling, planning and analytics in a governed environment

Google
Cloud

Azure

Alibaba
Cloud

AWS

APPLICATION DEVELOPMENT

Intuitive, modern development environment for professional IT and citizen/business developers

ARTIFICIAL INTELLIGENCE

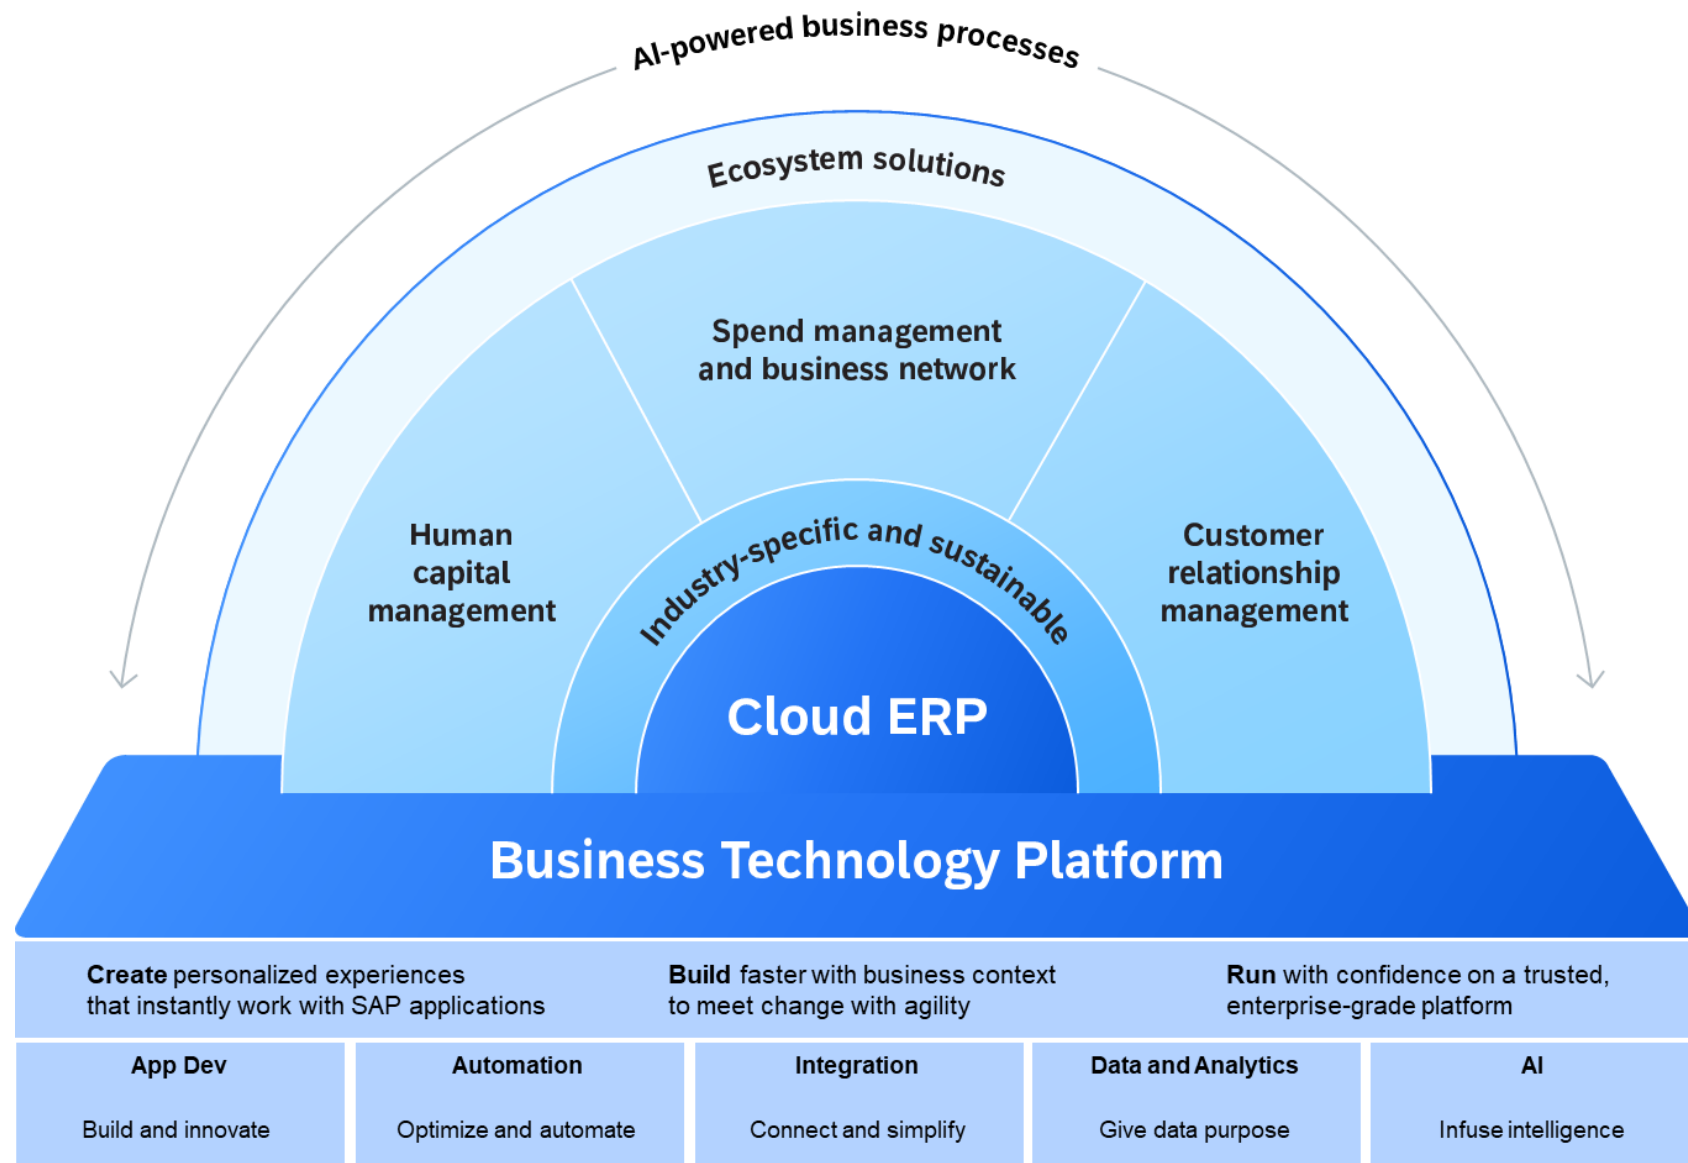

AI business services

AUTOMATION

Workflow Management, Robotic Process Automation, Process Monitoring, Automated Document Processing

**SAP BTP is
the platform for
customers and
partners to
innovate and
transform.**

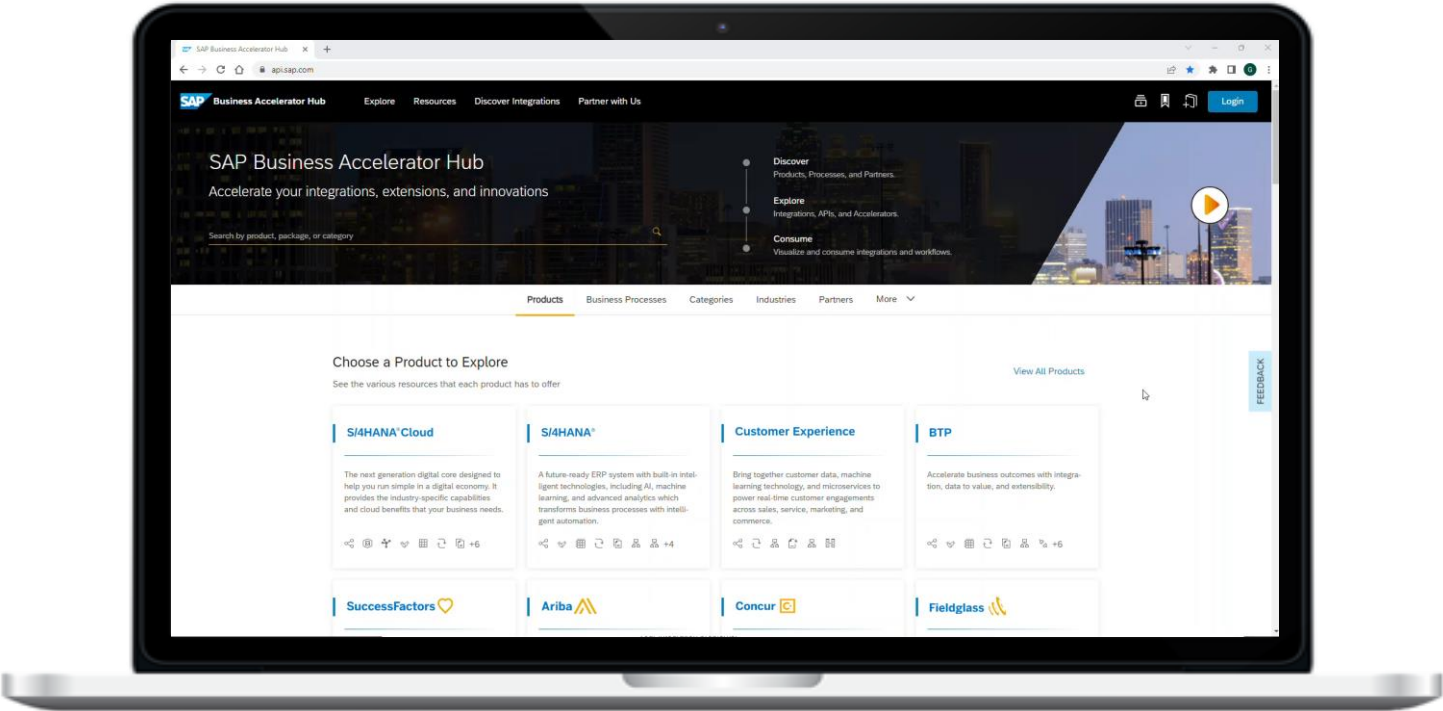

SAP BTP road map – Highlights

SAP BTP road map – Integration

Accelerator Marketplace

Discover different types of business centric content through an easy to use marketplace to accelerate the customer’s journey to value.

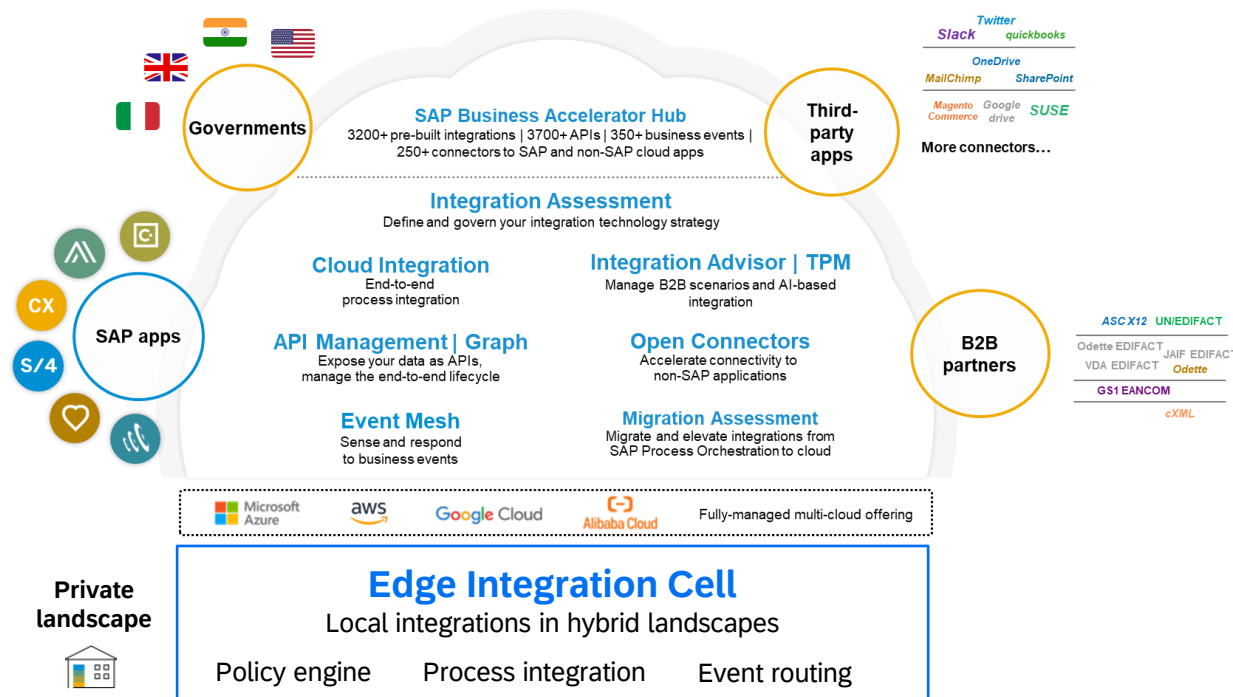

SAP Business Accelerator Hub
(formerly SAP API Business Hub)

SAP BTP road map – Integration

Hybrid integration runtime

Design, configure and monitor integrations in the Cloud with option for execution on-premise; migration path for on-premise SAP PI/PO customers to SAP Integration Suite.

→ Edge Integration Cell

- Enables local integrations without going out of customer landscape
- Realizes data regulation and enterprise architecture requirements
- Customer managed and operated (installation, system monitoring, and software updates)
- Design and monitoring in the Cloud
- Integration flows modeled in Cloud Integration can be executed on-premise

→ Support for migration from older releases of SAP Process Orchestration to SAP Integration Suite, mass migration

SAP BTP road map – Integration

Planned
Q2 2023 – Q1 2024

API-led and event-driven integration

SAP Integration Suite with pre-built integration packages, APIs, and events with enhanced functionality for event-driven Integration, API Management and B2B scenarios.

- Event Mesh as new capability within SAP Integration Suite
- Graph as capability within SAP Integration Suite

Business accelerators

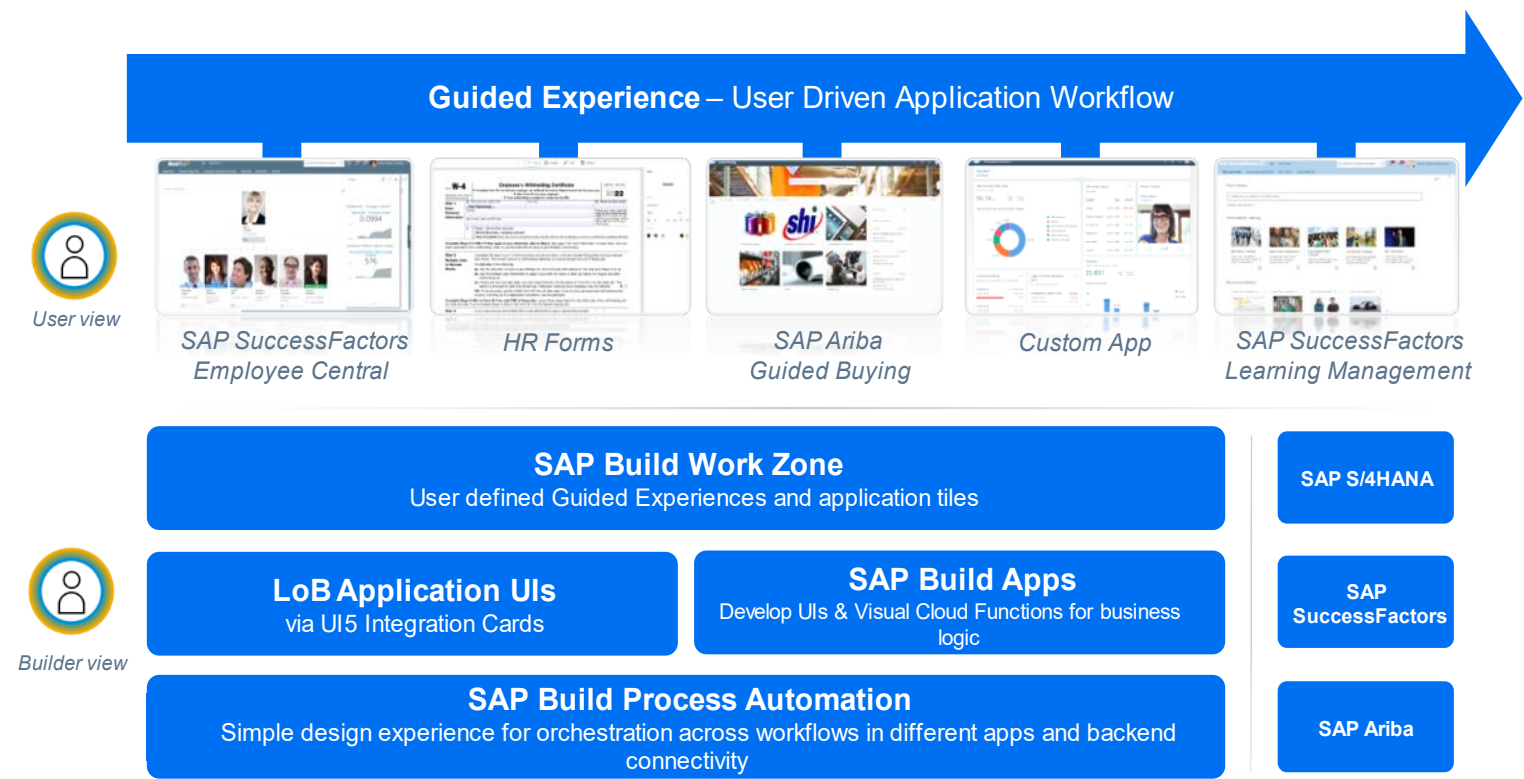

Content packages across all products and harnessing new capabilities to accelerate time to value of integration efforts. Investments in SAP and third-party LoB pre-packaged integration content and connectors.

- SAP and third-party LoB pre-packaged integration content and connectors – Microsoft 365 – SharePoint and One Note, Google Workspace (2024)

SAP BTP road map – Application Development and Automation

Deep Integration to SAP Applications

Tighter integration with SAP applications for seamless, easy and secure development on SAP BTP; simple configuration for entity discovery and consumption.

SAP BTP road map – Application Development and Automation

Integrated User Experience & Functionality

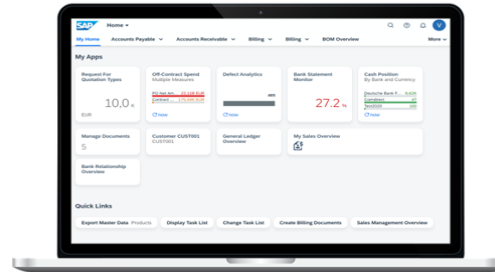

Reimagine a business process or experience end-to-end through building apps, business sites, integration and automations with connected platform tools integrated to SAP applications for faster and secure development.

SAP Start

Pre-packaged entry point

- Search, to do's and interest cards
- Content from SAP S/4HANA and SAP SuccessFactors
- Zero configuration costs, out-of-the-box

**SAP Build Work Zone,
standard edition**

Role-based workpages

- Central access to SAP cloud, on-prem, custom and third-party applications
- Multiple pages, business data visualization cards and drag/drop editor
- Custom branding and extensions

**SAP Build Work Zone,
advanced edition**

Business sites

- Optimize business processes
- Pre-packaged line-of-business workspaces and guided experiences
- Content management, knowledge base, Q&A, Microsoft integration, etc.

SAP BTP road map – Application Development and Automation

Planned
Q3 – Q4 2023

Enterprise Trust & Governance

Resiliency and performance measures, security enhancements, and new governance features to support business experts and central IT working together to optimize, integrate and extend their solutions.

- **Deployment Isolation**
- **Interoperability of Application Development, Automation and Integration portfolio on SAP BTP, including joint IT Governance and API/Graph access capabilities**

Accelerated Outcomes

Content packages across all products, simplification with visual composition, improved UX, and harnessing new capabilities.

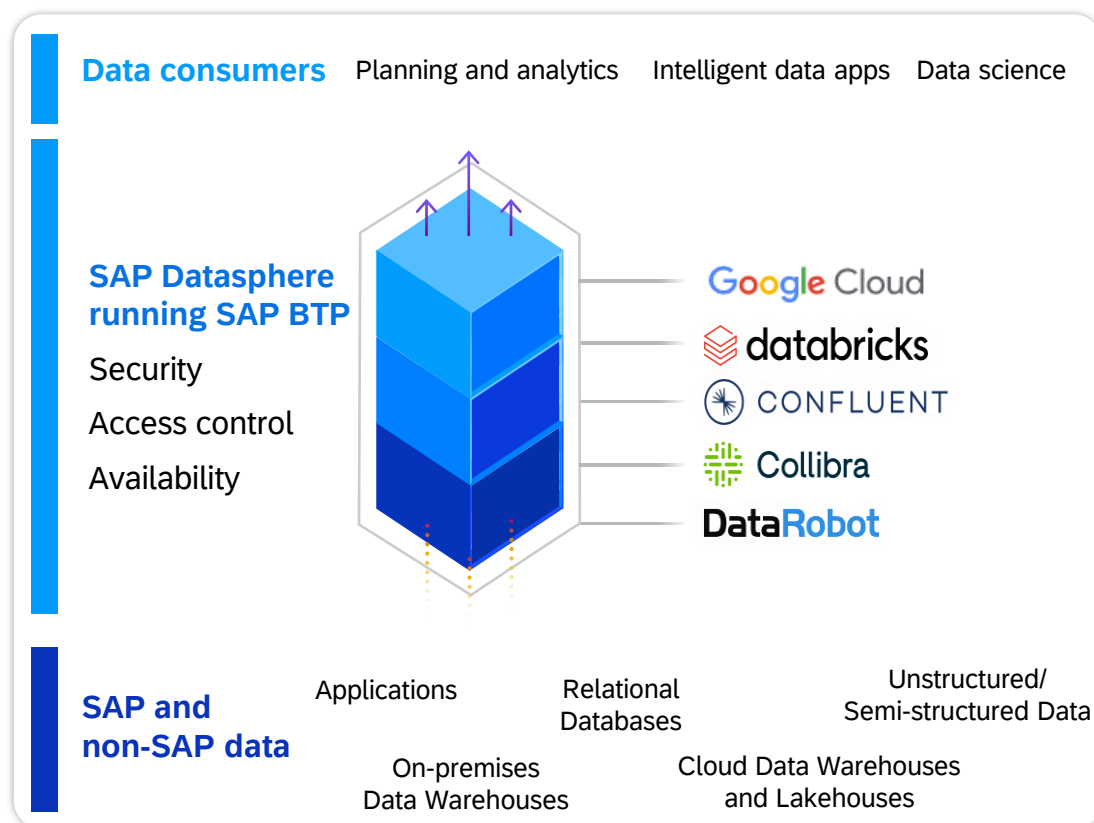

- **Community marketplace for SAP Build Apps**
- enable customers to publish and consume content and artifacts into Lobby store and One Marketplace
- **Provide industry and LoB content to accelerate adoption**

SAP BTP road map – Data and Analytics

SAP and Google Cloud Partnership

Partnerships in SAP Datasphere: SAP and Google Cloud – coming together to close the data value gap; together with open data partners.

- SAP Datasphere on Google Cloud in North America (Iowa) – Q2 2023
- SAP Analytics Cloud and SAP Datasphere on Google Cloud: APJ (Mumbai), EMEA (Frankfurt) – Q4 2023
- Outbound data replication connector to directly write into Google Cloud Storage – Q3 2023
- Outbound data replication connector to directly write into Google BigQuery – Q4 2023

SAP BTP road map – Data and Analytics

Planned
Q2 2023 – Q1 2024

E2E data access and consumption

Provide an optimized and vertically integrated data consumption layer for all data professionals.

- **SAP Datasphere: One Data Catalog Metadata re-use**
- **Natural language processing and enhanced planning automation for SAP Analytics Cloud**

Simplified data landscape

Simplify and harmonize heterogeneous data into a business semantic model of diverse data landscape across the whole enterprise and the ability to feed external data.

- **Extended modeling capabilities in the new semantic Analytic Model: SAP Datasphere: Multi-fact modeling, external hierarchies, fiscal year and more**

Accelerated Outcomes

Derive insights from your most valuable data assets and accelerate deployments with pre-packaged best practices.

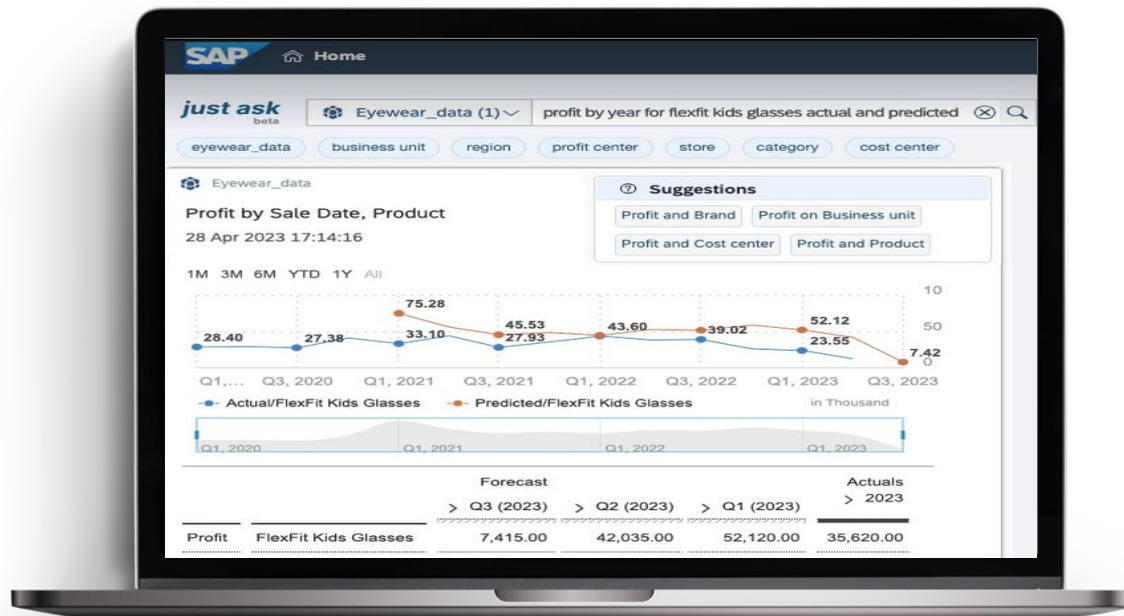

- **SAP Datasphere: Over 40 Pre-built Business Content packages from SAP and Partners**
- **SAP Analytics Cloud business content packages (finance, sales, workforce planning, consumer products, public sector)**

SAP BTP road map – Artificial Intelligence

Embedded Business AI

SAP focused on business AI: Enterprise-ready, context specific to processes, and embedded into SAP applications, power your most critical business processes, available on day 1.

- Understand user queries and deliver data in user-friendly way
- Make data-driven decisions
- Retrieve and present data stored in SAP Analytics Cloud data models via natural language queries
- Search and chat with any data live, independent of its source system

AI-powered queries for analytics in natural language

SAP BTP road map – Artificial Intelligence

Embedded Business AI

SAP focused on business AI: Enterprise-ready, context specific to processes, and embedded into SAP applications, power your most critical business processes, available on day 1.

```
> capGPT "  
Develop a business app for a ticketing system  
that enables customers to submit tickets and  
agents to handle and resolve them efficiently.  
  
The server should be capable of receiving ticket  
submissions from various channels, such as email,  
phone, or web portal, and storing the necessary  
customer information and ticket details in a database.  
  
It should also include functionalities for  
assigning tickets to agents based on availability,  
expertise, and workload.  
  
The goal is to provide a robust and reliable  
server-side solution for effective ticket  
management, enhancing customer satisfaction  
and streamlining internal processes for the business.  
"  
[GPT] generating model  
∴ Thinking
```

- Integrated in SAP BTP Business Application Studio and Cloud Application Programming
- Create all necessary CDS files which define the entities, relations and service projections according to your prompt
- Generation of business logic in services, generate sample data
- Existing models can be changed
- Generate unit tests for business in services

GPT-based CAP model & data generation

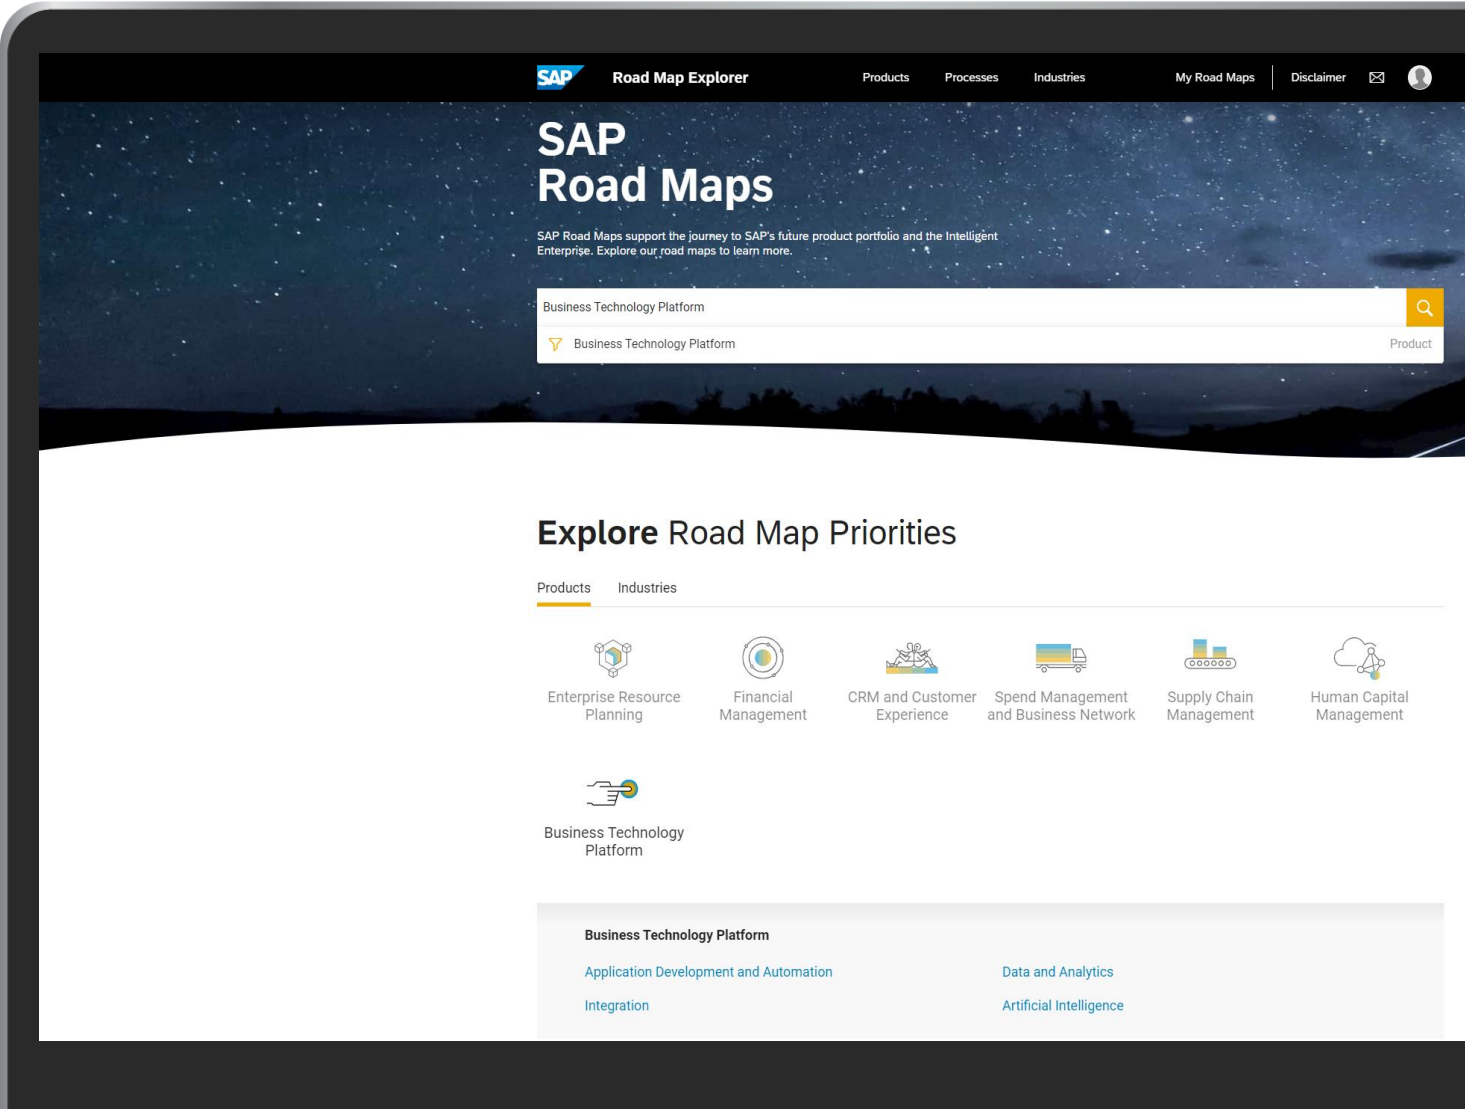

The background is a solid blue color with several large, semi-transparent geometric shapes. On the right side, there is a prominent 3D rectangular prism or cube that appears to be floating or tilted. Other similar but less defined shapes are visible on the left and top, creating a sense of depth and modern design.
