Enable breakthrough innovations without disrupting business systems

For Business
Competitive advantages with customized business processes innovations

Differentiate with agile extensions to business processes and benefit from custom/partner IP

Deliver agility by decoupling extensions from standard

For IT
Massive simplification with decoupling of extensions and integrations

Turn real-time insights into action: Contextual insights at the point of decision

SAP S/4HANA

+

SAP BUSINES TECHNOLOGY PLATFORM

Increase development productivity

Go beyond automation to predictive suggestions

Renovate existing custom and partner apps

The S/4HANA Journey

Prepare

Validate readiness
Analyze your environment and Identify any potential technical considerations that impact the migration

Analyze business processes
Gather insight into existing business processes and identify process inefficiencies and gaps

Assess data quality
Identify data quality issues, standardize and cleanse data, consolidate duplicate master data, evaluate personally identifiable data

Optimize data footprint
Reduce the data footprint in your existing landscape to make the S/4HANA migration simpler and cleaner, evaluate retention policies and unstructured content management

Get to standard
Decouple complex customizations from core ERP and redeploy in the cloud for greater agility

Move

Simplify & size the landscape
Plan your S/4HANA and supporting application landscape, move to cloud, modernize where possible

Migrate
Orchestrate, track, validate, and report on end-to-end project activities, execute conversion steps, move data

Modernize integrations
Deploy out-of-the-box integrations wherever possible, move to newer integration technologies

Test
Reduce go-live risk, accelerate testing, improve quality and reduce costs through AI-driven impact assessments and reusable test automation

Automate processes
Innovate, simplify and automate business processes using cloud native AI, ML and RPA

Revise data & analytics strategy
Review embedded analytics capabilities and out-of-the-box analytics and data models, empower users with a cohesive self-service data strategy for SAP and non-SAP data

Run

Monitor
Ensure continuity with system monitoring, integration monitoring, user monitoring. and business process monitoring across the landscape

Optimize IT processes
Simplify, automate, and centralize the management and operations of your SAP landscape

Streamline business processes
Conduct in-depth process analysis for actionable improvement, simulate process changes, understand your customer journey

Innovate
Use ML to solve complex business problems, incorporate IoT and AI bots to improve operational efficiency, support new business models

The S/4HANA Journey – BTP Capability Mapping

Prepare

Validate readiness
- Readiness report*
- Maintenance Planner*

Analyze business processes
- Discovery reports*
- Business Process Intelligence

Assess data quality
- Data Services/Info Steward
- Master Data Governance
- Privacy Management by BigID

Optimize data footprint
- Archiving*
- Information Lifecycle Mgmt
- OpenText solutions
- Document services

Get to standard
- Custom Code Analyzer*
- Extension Suite

Move

Simplify and size the landscape
- S/4HANA,
- Integration Suite
- Extension Suite
- PCE options for BTP

Migrate
- S/4HANA Migration Cockpit*
- Data Services/Info Steward
- Adv Data Migration by Syniti

Modernize integrations
- Integration Suite
- Process Orchestration
- App Integration Framework
- Data Intelligence

Test
- Solution Manger*
- ALM Cloud
- Tricentis

Automate processes
- Extension Suite
- Robotic Process Automation
- Conversational AI

Revise data & analytics strategy
- S/4HANA embedded analytics*
- SAP Analytics Cloud
- Data Warehouse Cloud
- BW/4HANA
- HANA Cloud
- HANA Enterprise
- Active-Active
- System Landscape Transformation
- Data Intelligence

Run

Monitor
- Solution Manager*
- ALM Cloud

Optimize IT processes
- Landscape Management
- Information Lifecycle Mgmt
- Solution Manager

Streamline business processes
- Extension Suite
- Business Process Intelligence

Innovate
- Extension Suite
- Conversational AI
- Robotic Process Automation
- Data Intelligence
- Work Zones

* Standard tools, no license fee
