

00:26:27 sougata dutta: thanks Gordon for joining.

00:27:32 Jitin Khanna: I am interested to attend all future webinars. please send me the invite to register for these Webinars

00:35:54 Samba: Where does SAP Data Intelligence fall in this category?

00:37:40 sougata dutta: SAP Data Intelligence Cloud is a comprehensive data management solution. As the data orchestration layer of SAP Business Technology Platform.

00:39:22 Lynton Grice: For customers moving to BW/4 HANA --- is their any concern it will be "dis continued" in years to come or will it be positioned as the "on prem" long term option on the SAP Data Warehouse roadmap?

00:40:54 Toros Aledjian: Our Upcoming Events

#### Episodes in our Series

June 28 How to integrate SAP Process Automation with Procurement  
<https://webinars.sap.com/eur/2022-06-22-sap-ie-btp-hyper-automate-webinar/en/home>

July 12 Learn how to integrate SAP Process Automation with Finance  
<https://webinars.sap.com/eur/2022-06-22-sap-ie-btp-hyper-automate-webinar/en/home>

July 26 How to integrate SAP Process Automation with HXM  
<https://webinars.sap.com/eur/2022-06-22-sap-ie-btp-hyper-automate-webinar/en/home>

August 9 How to integrate SAP Process Automation with CX (Customer Experience)  
<https://webinars.sap.com/eur/2022-06-22-sap-ie-btp-hyper-automate-webinar/en/home>

#### Other Events

June 22 Streamline your Transformation w/ Custom Code Migration & Analysis Tools on SAP BTP w/ RISE  
<https://webinars.sap.com/eur/2022-06-22-sap-ie-btp-ccm-webinar/en/home>

00:42:11 bala: On our current on-premise BW systems are using AO and BOBJ and SAC.... What happens to the reports via AO and BOBJ... Is there a conversion process? Right now SAC does not have all the features in BOBJ

00:44:45 Srinivas Jonnavittula: what is the roadmap for BPC embedded in BW? Will BW bridge consider this?

00:45:38 Jitin Khanna: SAP should provide integration capabilities to move on prem reporting solutions to BW Datawarehouse cloud.

00:47:43 Kesava M: We have BOBJ 4.2. Can we still use BOBJ on BW Bridge?

00:47:56 Gordon Witzel, SAP: SAP BW/4HANA is positioned as our long-term DW on-prem product. We have a roadmap with a lot of innovations and a commitment until at least 2040.

00:49:01 Gordon Witzel, SAP: Here is the BW/4HANA Roadmap. We plan a lot of innovation for the upcoming years.  
<https://roadmaps.sap.com/board?PRODUCT=73554900100800000681&range=FIRST-LAST#Q2%202022>

00:49:54 Bibek Kumar Patro: how to replicate BEx Queries in Bw bridge?

00:50:45 Gordon Witzel, SAP: @Srinivas: BPC is not part of the BW Bridge offering. SAP Analytics Cloud Planning is the target solution in the public cloud with SAP Data Warehouse Cloud as the data planning foundation.

00:51:50 Gordon Witzel, SAP: @Bibek: BW Queries to BW Bridge is planned for Q3/2022.  
<https://roadmaps.sap.com/board?PRODUCT=73555000100800002141&BC=000D3ABE772D1EECA5C288670AE7A46E&range=2022Q1-2022Q4#;INNO=000D3ABE772D1EDCA2EEED9570B52137>

00:52:12 Saurabh: @Gordon Witzel----- then can we safely assume that DWC is the cloud version for SAP BW 4HANA?

00:53:32 Gordon Witzel, SAP: No SAP DWC is our public cloud offering for a Data Warehouse based on modern UI's and features. We are providing different features and it is build to support different personas in your company.

00:54:55 Floris.Padt: Does DWC support non-cumulative reporting?

00:55:18 Rey Ruiz: Wat is the difference between using SAP BW Bridge and Just connecting SAP DWC to SAP BW thru RFC?

00:55:40 David.Chung, Florida Crystals Corp.: Does BW data physically move to DWC?

00:56:13 Gordon Witzel, SAP: @Floris: Not yet, but planned and part of the BW query transfer roadmap. Currently snapshot models to support inventory keyfigures are supported in DWC.

00:57:20 Gordon Witzel, SAP: @Rey: The benefit of BW Bridge is that you are able to decommission your BW on prem once the dataflows and data are transfered to the Bridge.

00:59:00 Deepak: what is the best and least resistant approach to move from BW/hana to BWC (full transition, not hybrid option)

00:59:01 Rey Ruiz: Is the BW bridge like CI-DS

00:59:58 Bibek Kumar Patro: Does BW Bridge support non-odp datasources?

01:00:16 Gordon Witzel, SAP: @Rey: Connection from SAP BW bridge to source systems is ODP based

01:01:01 Gordon Witzel, SAP: @bibek: This is not part of the concept. All other datasources can be connected to SAP DWC natively without the need to use the Bridge in between.

01:03:12 Rey Ruiz: So when SAP BW is migrated to BW bridge then data will stored in SAP DWC and SAP BW can be commisioned?

01:03:21 Rey Ruiz: decommissioned

01:03:34 Toros Aledjian: Our SAP Contacts

Dan Yu dan.yu@sap.com

Naji, Ammar a.naji@sap.com

Sougata Dutta sougata.dutta@sap.com

Justin Lynch justin.lynch@sap.com

01:05:42 Bibek Kumar Patro: Connecting non ODP datasource to SAP DWC natively will not make use of existing logic in SAP BW. In this case, we need to continue SAP BW as well Bridge for Non ODP and ODP datasources..Am I correct?

01:07:15 Gordon Witzel, SAP: @Bibek: Yes, this is correct so far. Therefore we plan to enable DWC tables to SAP BW Bridge to reuse existing abap based logic in SAP BW bridge. Here is the roadmap item:

<https://roadmaps.sap.com/board?PRODUCT=73555000100800002141&BC=000D3ABE772D1EECA5C288670AE7A46E&range=2022Q1-2022Q4#;INNO=000D3AAADBCE1EEC8FC7403F8FE56994>

01:07:49 Rey Ruiz: How is SAP charge License Fee for SAP BTP and SAP BW bridge ? I know SAP DWC is by the size of the tenant.

01:08:55 Ammar Naji: hi Rey, customers can choose a size of BW bridge and add it to their subscription. BW bridge will be resource base as well

01:10:06 Jitin Khanna: Are we going to have a BW Bridge modelling separate tool in eclipse for BW Bridge development in future..?

01:10:09 Ammar Naji: here is a link to the DWC calculator and the add on options:  
<https://dwc-pricing-calculator-sac-saceu10.cfapps.eu10.hana.ondemand.com/index.html>

01:11:12 I049516: is the BW Bridge SPACE in DWC virtual or Physical tables with data ?

01:11:23 Gordon Witzel, SAP: @Jitin: As you can see on the current slide Eclipse based Modeling Tools will be used for BW Bridge modelling combined with the SAP BW Bridge web cockpit

01:12:42 Rey Ruiz: Will SAP BW Bridge store data or just objects and codes and all data will be stored in SAP DWC?

01:12:47 Gordon Witzel, SAP: @I049516: in the BW bridge the data is persisted in physical tables. In DWC and the BW Bridge space we are using Remote Tables to connect to SAP BW Bridge.

01:19:51 Gordon Witzel, SAP: @Rey: SAP BW bridge stores the data in physical tables based on the BW persistency artefacts (InfoObjects, DataStoreObjects).

01:21:09 JOakley: is SAP BW bridge used by SAP Analytics Cloud?

01:22:30 Gordon Witzel, SAP: @Joakley: Not direct - we are using SAC on top of DWC. BW bridge acts as the persistency layer for SAP on-prem abap based sources. Analytics is part of DWC and therefore SAC is connected to DWC.

01:23:44 Rey Ruiz: when SAP BW is migrated to SAP BW Bridge and SAP DWC, how are changes managed in SAP BW Bridge and SAP DWC

01:25:22 Rey Ruiz: as compared to SAP BW transports

01:25:37 Jasper.Visser: Once BW queries are available in DWC, can SAC use these as we currently do with a live connection to BW? Therefore re-using existing SAC stories that are currently build on BW.

01:26:12 Gordon Witzel, SAP: @Rey: It is possible to setup 2 DWC systems (one for Dev and one for prod) including a BW bridge

01:26:57 Rey Ruiz: What about transport migration in SAP BW bridge and SAP DWC

01:27:07 Chris: Is BW bridge both a transfer tool (move BW artifacts and data to DWC) and a federation capability where you only virtually provision data from BW ( similar to SAC live connection) ?

01:27:43 Gordon Witzel, SAP: @Rey: there is no need to "transport" from BW Bridge to DWC - the connection from BW Bridge to DWC is via Remote tables.

01:29:32 Rey Ruiz: I'm asking about transports from dev to qa to Prod fo SAP BW bridge and SAp DWC

01:30:57 Gordon Witzel, SAP: @Jasper: BW Bridge acts as the persistency layer it is not designed for analytics use cases (incl. Queries). Therefore we plan to convert the queries to DWC (Q3/2022). There is no connection between BW Bridge and SAC available sind analytics should be part of DWC.

01:31:35 Sean Ditny: So BW Bridge is strictly to bring data from other systems into DWC so it can be consumed by Analytics?

01:33:03 I049516: Does the BW Bridge support the use of Cloud Connector ?

01:34:47 Prasad Bandi: Where is the target BW bridge parameters for the migration provided in BW 7.5?

01:35:52 Gordon Witzel, SAP: @Sean: Yes, BW bridge acts as the integration piece for SAP on-prem abap systems. Analytics is part of DWC and BW Bridge data is connected via Remote tables to DWC and this information can be consumed in DWC.

01:36:52 Gordon Witzel, SAP: @Prasad: Please find your answer in detail here: <https://launchpad.support.sap.com/#/notes/3141688>

01:39:28 Jasper.Visser: So what we say is that the 'migration' of BW to DWC using Bridge is 'lift and shift' of data models and a complete greenfield for any reporting and analysis. Is this correct? Therefore the timeframe may be much longer than just the migration.

01:39:57 Toros Aledjian: The Qualtrics Survey is now open

[https://qtrial2019q3az1.az1.qualtrics.com/jfe/form/SV\\_eEilQy20M5fL15k](https://qtrial2019q3az1.az1.qualtrics.com/jfe/form/SV_eEilQy20M5fL15k)

01:40:21 Toros Aledjian: I have 10 ebooks to give away to the first 10 customers who complete the survey. Thanks

01:41:27 Gordon Witzel, SAP: @Jasper: Fair to say but please bear in mind that we plan to enable the Query transfer from BW systems to DWC which speeds up the reporting and analytics development.

01:42:32 Gordon Witzel, SAP: @Rey: or SAP Data Warehouse Cloud artifacts we recommend to use ACN for transports and for the SAP BW bridge objects you can use ABAP gCTS (works similar to ABAP transports in the on-prem world). Both transport mechanisms work independently, we recommend to (1) transport the SAP BW bridge objects first, expose the data and objects in the SAP BW bridge space and then (2) transport the SAP Data Warehouse Cloud objects on top.

01:42:50 Jasper.Visser: Correct but you mentioned that these queries cannot be consumed in SAC directly so how will they be of any benefit?

01:43:33 Gordon Witzel, SAP: but we will enable a feature to move this queries to DWC artefacts -

<https://roadmaps.sap.com/board?PRODUCT=73555000100800002141&BC=000D3ABE772D1EECA5C288670AE7A46E&range=2022Q1-2022Q4#;INNO=000D3ABE772D1EDCA2EEED9570B52137>

01:44:34 bala: will the ppt & recording be shared?

01:48:59 Rey Ruiz: I found the un-mute

01:53:38 I049516: Great session, thanks

01:54:49 Toros Aledjian: Witzel, Gordon [gordon.witzel@sap.com](mailto:gordon.witzel@sap.com)

01:58:55 Rey Ruiz: thanks!
