

00:45:00 Sourabh.Gupta: Hi

00:45:08 Sourabh.Gupta: I have a question

00:47:53 Toros Aledjian: Sourabh please either type your question here in the chat or raise you hand in the Zoom toom and I will call upon you to unmute yourself and ask your question

00:48:02 Sourabh.Gupta: The whole process can be configured in SAP also, what is the advantage of having this automation.

00:52:19 Shuvadeep.Ghosh: Is it only me who is having difficulty in getting the audio loud?

00:53:17 Sourabh Sharma: My question is - if the client has existing workflow for PR approval and they want to introduce BTP workflow management (from scalability and low code-no code perspective), can the existing workflows be migrated to BTP workflow management?

00:54:13 Suvendu: Hi Nidhideep, your voice is very faint. Can't hear

00:56:46 Sourabh Sharma: I can hear you very clearly

01:03:10 Swapnil Shewale: HI Nidhideep, how the RPA is Compatible with SAP Business One?

01:06:14 Naved Rashid: Hi Swapnil, SAP process automation can easily automate uses cases related to SAP Business One

01:06:36 Bhagya Venkatesha: The current version of SPA decision determination does not support complex approver determination logic, which is supported in ECC workflow(like approver is employee's manager or work center manager). Is there any plan to support such decision determination logic rather than hardcoding the approver in the decision table?

01:09:36 Cezary: how much Dev work is it going to take to make it compatible with S4HANA? are the CDs views covering the compatibility issue?

01:11:00 Rakesh Shah: 1) For RPA to work with SAP B1, what additional component in B1 required? Will it work with Service Layer? Do we also need BTP platform to implement RPA?

01:20:23 Naved Rashid: @rakesh - customers require SPA license as usual which also means BTP. SPA/IRPA license is not included in B1

01:21:54 Naved Rashid: Free Tier

01:25:30 Mohammad Zakir Siddiqui: HI Ajay,

01:25:45 Mohammad Zakir Siddiqui: Can we add material group in addition to \$ amount?

01:27:59 Angeline Wong: If a company has multiple line of business, and each has different logic of business rule, how could we separate different business rule, and assign the maintenance of respective business rule to certain authorized personnel?

01:29:37 Bhagya Venkatesha: Is there any how-to document on creating an action project(to call API/SAP oDATA) in SPA?

01:31:27 Bhagya Venkatesha: Is it possible to add custom UI5 app(in Form editor) in SPA?

01:32:12 Mohammad Zakir Siddiqui: Thank you Ajay,

01:36:10 Cezary: awesome. thanks
