00:23:51      michalkrawczyk:        SAP PRESS books on SAP CPI still work for SAP IS :)

00:31:15      Vikas Singh:      Not audible.

00:31:40      michalkrawczyk:        if you'd have any questions, fell free to ask also here

00:31:53      michalkrawczyk:        so we can answer either on chat or during the session

00:32:13      michalkrawczyk:        if you can please type Q: so we know it's a question :)

00:33:17      Vishal:   Q: Is this call having audio or only Presentation?

00:33:43      michalkrawczyk:        it has audio

00:34:00      SBhat:   I can hear it

00:34:04      Dharini Velusamy:      @Vishal Leave and join back.. this helps

00:34:06      Julie:    i can hear

00:34:10      Julio Vallejo:     Good here

00:34:10      Gustavo Dawidiuk:     Yes ca hear

00:34:10      Deon Oosthuizen:      Yes, can hear

00:34:10      Sundar Kumar:  we can hear

00:34:11      Carlos Exposito:yes i can hear

00:34:15      francisco.pereira:      I can hear

00:34:17      Andrea Kregar:  I can hear perfectly

00:34:17      Chao, Lilissa:     yes I can hear

00:34:39      michalkrawczyk:        you can enable live transaction you can see subtitles too

00:34:49      Arkesh Sharma: Q: how frequently are new releases are planned for CPI/CI and what is the best way to be up-to-date with it?

00:34:59      Vishal:  Thank you its working now :)

00:35:17      michalkrawczyk:        @Arkesh - best one is to join mostly SAP IS calls

00:35:30      Thomas Stumpp (McCormick):   Should we consider CPI a legacy term on use BTP-IS now?

00:35:31      Muhammad:     Q : When is SAP planning to release the PO to CPI Migration tool?

00:35:32      michalkrawczyk:        and mailing list so you can all details deliver to your e-mail :)

00:36:29      michalkrawczyk:        @Muhammad - SAP will deliver after 2023, but today we will be showing third party tools - Int4 IFTT who already do that (with a demo)

00:36:43        Thomas Stumpp (McCormick):    If we use SCP/CPI already, are we automatically entitled to use BTP-integration suite or do we have to buy into a RISE plan?

00:37:31        michalkrawczyk:            @Thomas - the new name is SAP IS (Integration Suite)

00:37:36        Arkesh Sharma: @MichalKrawczyk: Please share the link to subscribe for mailing list.

00:38:01        michalkrawczyk:            @Arkesh - will be there in the final slides of the session :)

00:38:23        Arkesh Sharma: Thank you, Michal! :)

00:38:27        Muhammad:      Q : Any plan for the hybrid deployment? Do we need a separate licence for that?

00:39:30        Gustavo Dawidiuk:        Hay soluciones para las conversiones de Codigos?, Para dialogar con soluciones  propias de SAP o de terceros?

00:39:49        Arkesh Sharma: Q: is there a way to re-visit this recording later or share it with the colleagues?

00:40:08        michalkrawczyk:            @Arkesh - yes, Toros will send the link to the video

00:40:39        Arkesh Sharma: Thank you, Michal.

00:42:47        Toros Aledjian:  Please join us in our upcoming events

October 6, 2021          SAP BTP Customer Value Network - Create an Open & Agile Enterprise With Unified Data & Real-Time Analytics
Episode 4 in the Deloitte Series
https://webinars.sap.com/eur/2021-09-22-sap-ie-btp-dwc-deloitte-webinar/en/home
Asia Pacific & Japan 16:00 AEST (07:00 CET - 10:30 IST - 14:00 JST - 13:00 SGT)
Europe & The Americas 11:00 ET (08:00 PT - 17:00 CET)

October 12-14, 2021      SAP BTP Customer Value Network Innovation Webinar Series For North America

https://webinars.sap.com/noam/2021-10-121314-sap-ie-btp-cvn-innovation-webinar-us/en/home

11:00am - 1pm ET (08:00am - 10:00am PT)

00:43:06        Toros Aledjian:  If you are also interested in joining our SAP Garage Series please use this link:

https://webinars.sap.com/eur/2021-05-05-sap-ie-btp-garage-webinar-part2/en/registration.aspx

00:43:24        Toros Aledjian:  All presentation material and the recording for todays session will be uploaded tohe following link

https://webinars.sap.com/2021-12-31-sap-btp-customer-value-network-global/en/upcoming

00:48:21     Anil Potluri (He/Him/His):     Does SAP IS provide industry specific API/Adapters/connectors.  example : for Pharma , automotive industries etc.

00:53:15     abanerj8:     when will SAP Retire SAP PO/PI

00:54:01     michalkrawczyk:     @Anil - for B2B you can use this for AS2 adapter - https://blogs.sap.com/2018/01/14/b2b-capabilities-in-sap-cloud-platform-integration-part-1/

00:54:10     abanerj8:     Q: When will SAP Retire SAP PO/SAP PI

00:54:40     michalkrawczyk:     @abanej8 - 2027 (2030 extended maint.)

00:54:59     Craig Stasila:     SAP Process Orchestration 7.5 will be fully supported through the end of 2027 and will be available through extended maintenance through 2030.

00:55:02     Menaga:     Do you have SAP TM (Transportation package) available in discover which is in PO7.5?

00:55:16     Avinash Rajan:  Q) Would the kubernates environment that Craig mentioned (roadmap) be a SAAS offering that deploys for on-prem/hybrid integrations ?

00:57:28     SBhat:  Q: What's the best way to migrate ABAP proxy interfaces created in SAP PO 7.5 to CPI? DO we have any SAP official documentation on this migration?

00:58:14     Udo Paltzer:     Yes, the hybrid deployment option of SAP Integration Suite, i. e. the integration cell, will run on top of a Kubernetes cluster.

00:58:32     after the crash 600019:  are there as many odata api's as bapi's

00:58:50     michalkrawczyk:     SBhat - we talk about proxy migration in our lessons learned - https://int4.com/sap-po-to-sap-cpi-migration-lessons-learned-video

01:00:00     Udo Paltzer:     @SBhat, and yes, additionally to what Michal mentioned, you can use the XI adapter in SAP Cloud Integration to connect to ABAP proxies.

01:00:02     after the crash 600019:  S4 on-premise, is gateway or proxy the way to go?

01:01:13     SBhat:  Thanks Michal.

01:01:17     Muhammad:     Q : Any plan to add EOIO in CPI like PO?

01:01:31     Udo Paltzer:     You can use either way .. both is supported , gateway and proxy

01:01:43     michalkrawczyk:     with S4 - still proxy - or IDOCs….

01:02:18     Udo Paltzer:     @Mohammad: We support now EO with SAP Cloud Integration, and EOI is planned for 2022 …

01:03:32     Muhammad:     Q: I guess S4 on Cloud does not have any ABAP proxy and SOAP/ODATA are the only options?

01:04:34     after the crash 600019:  what framework will last the longest, proxy/gateway or idocs

01:05:46	michalkrawczyk:	Which framework is used for 99% of important business scenarios with SAP?

01:05:54	Muhammad:	Q: Any plan to include the copy/paste of the CPI channels as well as the block of steps into the same or different flows?

01:05:56	michalkrawczyk:	IDOCs :)

01:07:34	Udo Paltzer:	@Mohammad: The integration flow designer already support the copy of adapter configuration .. at least into the same integration flows …

01:08:02	Menaga:	is there SAP TM 9.3 content package available in IS as a pre built to integrate with S4 and TM?

01:08:11	Udo Paltzer:	@Mohammad: And now we also support the copy of integration flow steps across Integration Packages …

01:09:59	Muhammad:	Good to know but sadly it is not available in our tenant yet so I will wait and try as I know we can now copy/paste the individual step but not the connectivity either for the same or flow the local flows

01:10:34	michalkrawczyk:	@Avinash - this one - https://www.sapinsideronline.com/future-proof-your-integration-strategy-with-sap-cloud-platform-integration-suite/

01:10:35	michalkrawczyk:	?

01:10:36	abanerj8:	Q :  can we know more about deploying PO to Hybrid Integartion Platform

01:12:23	Muhammad:	Q: Tried the copy/paste in the trial account as well and it is definitely not working for the adapter config but you can copy/paste the different steps.

Hope SAP will add such features in future as it will really help and save time

01:14:15	Muhammad:	Q: Why SAP has removed the trace in the CF CPI whereas it is still available in the Neo?

01:16:08	Rasmus Holm:	Q: Any plans for tool to migrate nwa bpms to the cloud

01:18:58	Udo Paltzer:	@Mohammad, yes, no worries, the update of all customer tenants is distributed over multiple weekends, so hopefully on the next weekend your tenants will be upgraded, so that you can consume the new capabilities.

01:19:48	Srini:	Do we have any out of the box iflow, to fetch the system logs/error logs and send to monitoring tools like splunk or SAP Focused Run (on-prem). if not how can we send my error logs to ALM tools.

01:20:21	Srini:	also Did SIS (CF) has option to check system logs like in Neo

01:21:34	abanerj8:	voice is breaking

01:21:44      Srini:    Did SIS have option of reprocess messages directly like in SAP PO.

01:21:48      Udo Paltzer:      @Mohammad: The traces in Cloud Foundry are available as well … for now customers have to create a ticket in order to receive the system logs, and in the near future we plan to provide direct access to the system logs also on the Cloud Foundry environment.

01:22:24      abanerj8:      Q: Does the prebuild configuration is only for S4 or with ECC too

01:22:50      Giuseppe Agnello:      Q: does this wizard to import mappings from SAP PI/PO consider also lookups and UDF? thank you

01:24:16      Craig Stasila:    The pre-built content is for S/4 as well as ECC

01:25:28      lynton:  Q: For existing custom Java modules on channels in SAP PO ...any world where they get "migrated" to iflow scenarios?

01:25:34      Srini:    can I monitor only iFlow status in SAP Focused run or also error logs and payload as well in focused run

01:26:04      Srini:    i mean CPI monitor in Focused run

01:27:35      Udo Paltzer:      Message makings from SAP Process Orchestration into SAP Cloud Integration is supported, now also including the user defined functions…Look-up functions will still come along the roadmap …

01:29:48      Udo Paltzer:      Messages can be monitored also via SAP Cloud Application Lifecycle Management, SAP Solution Manager etc. … the integration is achieved via OData APIs,i. e. Also the payload can be monitored from external monitoring tools.

01:30:18      Giuseppe Agnello:      thank you Udo for the information

01:30:35      Muhammad:      Q: Any plan to add the Trading Partners and other EDI related stuff in the Integration Adviser?

Can we use the custom function/formulas there as well instead of 1:1 mapping?

01:30:45      Julio Vallejo:      Regarding Hybrid Integration -> Cloud Integration Runtime:

      • Is it currently available?

      • Is it like a "Local Integration Engine" to be installed in the on-premise NetWeaver systems?

      • Would coexist with the "Local Integration Engine"?

      • Can we redirect our current proxies to the new hybrid integration on-premise runtime?

      • Available for which NetWeaver on-premise versions?

      • ESR Migration (Great) - What about Migration tools for the Integration Scenarios in the Integration Builder (~From 7.4 to 7.5)

      • Would the traffic be billed as SAP Cloud Traffic?

01:31:39        Rasmus Holm:   Q: asking on NWA bpm workflows any plans on making it possible to migrate them?

01:32:43        Udo Paltzer:    @Mohammad: Regarding the copy of adapter configuration: In the integration designer there is an icon next to the adapter, from which you can copy the adapter configuration. I hope you can see the icon, otherwise let me know …

01:32:43        Chao, Lilissa:    Can SAP Focused run be used to monitor these integrations?

01:33:53        Chao, Lilissa:    I mean these CPI interfaces

01:35:04        Julio Vallejo:    Our current context is PI on NetWeaver 7.4, and we would like to embrace pragmatically the SAP Cloud Integration, but keeping the on-premise message flow using on-premise internal traffic - Please advice! - Thanks

01:39:30        monica:based on (PIT) Process Integration test tool?

01:40:53        michalkrawczyk:        @Julio - upgrade to SAP 7.5 and you can use SAP IS on SAP PO runtime - is that what you need?

01:43:36        Muhammad:    Q: Michal @ Does your tool support 3rd party to 3rd party testing as well?

Does this tool also support S4 Hana on Cloud?

01:45:34        Muhammad:    Q : Can we also migrate the PI Classical scenarios to CPI as well? Would you automatically take care of the NFS Sender and REST Receiver Adapter?

01:46:02        michalkrawczyk:        @Muhammad - all flows on SAP PO and SAP IS (also 3prd party) and yes S4 private cloud is also supported

01:46:25        michalkrawczyk:        @Julio - SAP PO 7.4 is not longer supported - so you should :)

01:47:39        michalkrawczyk:        @Muhammad - Classical scenarios also work and if any of the adapters cannot be migrated it's left empty so you can populate it with details

01:47:42        Toros Aledjian:  We will be giving a free copy of the eBook "Introducing SAP Cloud Platform Workflow" to the first 15 participants who have completed our Webinar Survey on September 29, 2021.
https://qtrial2019q3az1.az1.qualtrics.com/jfe/form/SV_7UGNB4XOLR4Ra50

01:50:30        Avinash Rajan:  Please can you share the link to microsite once again (here)) ?

01:50:52        Toros Aledjian:  All presentation material and the recording for todays session will be uploaded tohe following link

https://webinars.sap.com/2021-12-31-sap-btp-customer-value-network-global/en/upcoming

01:54:10        Menaga:         My question was not answered

01:54:23        Rasmus Holm:   Q:how to migrate nwa bpms

01:54:57        michalkrawczyk:        @Rasmus - manually but you can automate testing of that completely

01:55:08        Rasmus Holm:   thx I feared that

01:55:46        Muhammad:    You can only download the Mappings and nothing else from the ESR

01:55:52        michalkrawczyk:        @Julio - yes try checking lessons learned blogs from those migrations at Int4.com blog section

01:56:11        Muhammad:    you have to have the Discovery to check the TM but as per my understanding it is not available from SAP yet same like LBN

01:56:15        michalkrawczyk:        @Muhammad - with Int4 IFTT you can do a lot more

01:57:01        Giuseppe Agnello:     thank you very much

01:57:02        Arkesh Sharma: thank you

01:57:11        Muhammad:    Thanks Michal will have at the videos on youtube
