

Perform Mass Data Changes in SAP SuccessFactors Virtual Event

Creating the Intelligent Enterprise

Today's Hosts:

Toros Aledjian

SAP SE | March 7, 2023

PUBLIC

SAP is pleased to invite you to this **virtual Event offered for Region on March 7th 2023**

By attending this webinar, Dynamic workforce changes, organizational restructuring, and continuous HR processes demand frequent updates in SAP SuccessFactors. Often, mass data maintenance is necessary, which can be time consuming for organizations especially when operating in multiple locations. What is more, manual data entry is fraught with the potential for errors which could, in turn, result in process interruptions across the enterprise.

Accenture HR Data Loader enables users to easily perform mass changes in SAP SuccessFactors. It is designed to manage ongoing and recurring HR processes, such as promotions, new hires or terminations. There is no need to gather, transform, populate and synchronize data in multiple different templates for different objects. You can use a single end-to-end template to gather data for a specific mass transaction, then easily load, verify and resolve issues.
