

## Next in the SAP Garage – Create a Modern User Experience Using SAPUI5 and the SAP Fiori Launchpad

The SAP Garage is open again on August 4<sup>th</sup>! In our next call, we will dive into the benefits of creating launchpad sites. We will walk through how you can create your own as well as build and deploy SAP Fiori apps using SAP Business Application Studio. Our topic expert, [Sibylle Brehm](#) will present and follow SAP Discovery Center Mission: [Create a Modern User Experience using SAPUI5 and the SAP Fiori launchpad](#).

### Meet the Expert

[Sibylle Brehm](#) is a product management expert for SAP Business Technology Platform focusing on user experience and the SAP Fiori launchpad. Sibylle drives various rollout activities to enable customers and partners to successfully implement and run the SAP Launchpad service. At the same time, she enjoys working in close contact with the development teams on the feedback she collects. Sibylle is an active blogger in SAP Community and speaker at SAP conferences.

## Missed our last call?

In the last SAP Garage call, [Elijah Martinez](#) and [Raghavendra Kulkarni](#) (Raghu) discussed SAP Integration Suite and the power of API Management. We followed SAP Discovery Center Mission: [Get Started with Integration Suite – API Management](#) and touched on the heap of excellent tutorials and exercises made available via the mission project board. If you missed the call, no problem! You can find all the recordings, chat transcripts, and upcoming episodes on our [SAP Garage website](#).

## Join us!

The SAP Garage occurs every first Wednesday of every month. [Subscribe](#), bring your questions, and enjoy learning about key SAP Business Technology Platform topics and use cases!
