SAP Integration Suite

Leading Enterprise Integration Platform as a Service (EIPaaS) – 3rd year in a row

SAP recognized as a Leader in the 2023 Gartner® Magic Quadrant™ for the third time in a row.

SAP was positioned highest overall in Completeness of Vision among all 16 vendors evaluated.

Magic Quadrant for Integration Platform as a Service, Worldwide

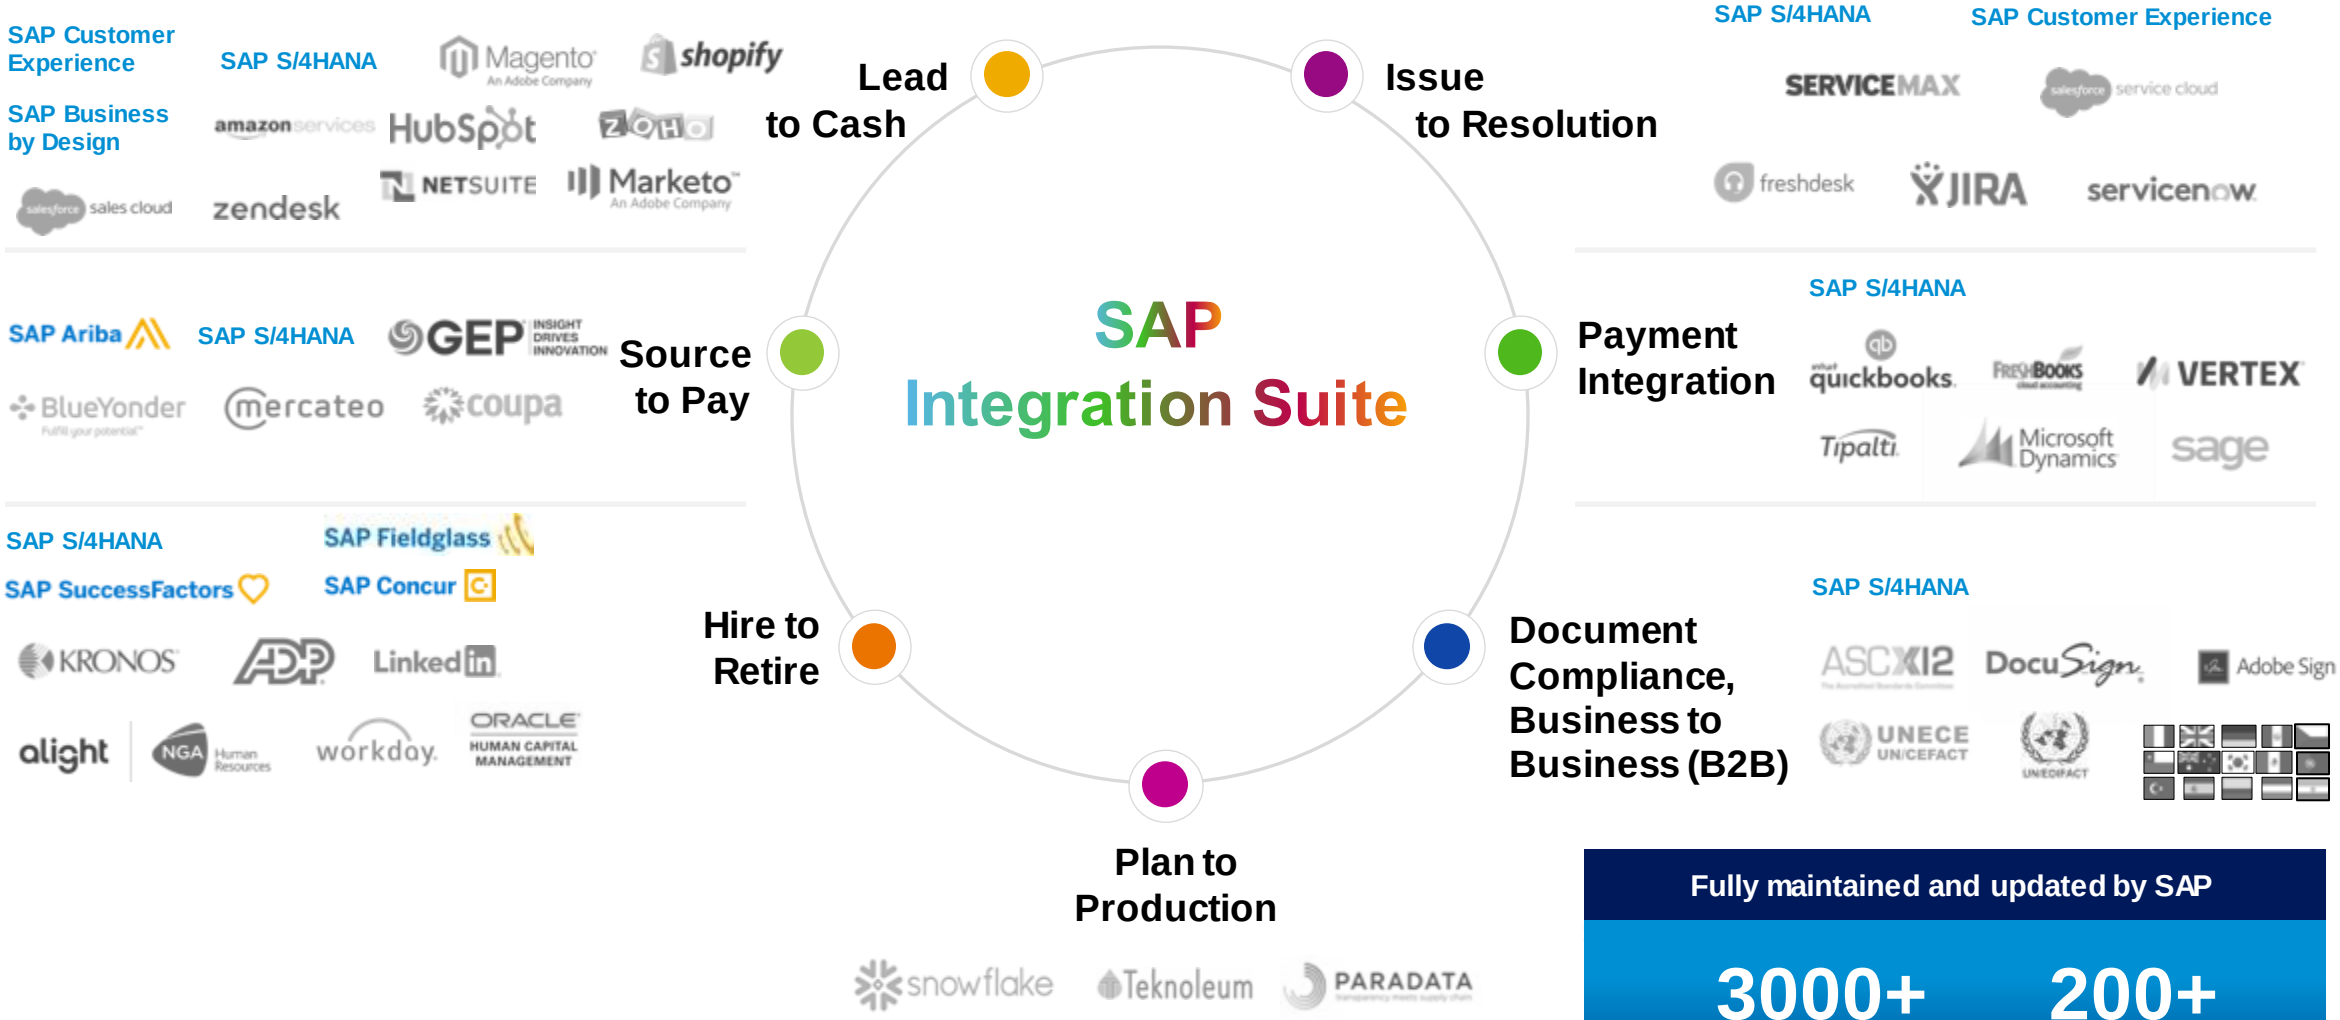
SAP Integration Suite

Accelerate your end-to-end integrations, across SAP and non-SAP systems



Fully maintained and updated by SAP

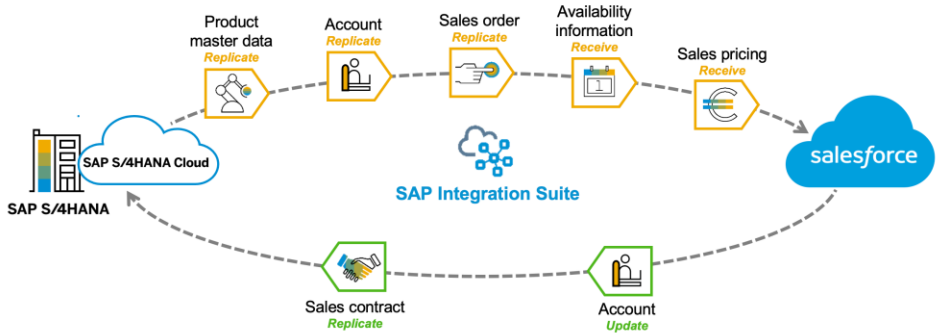
3000+ Prebuilt Integrations

200+ Adapters

SAP S/4HANA to Non-SAP Integration Packs

SAP S/4HANA Cloud Integration with Salesforce

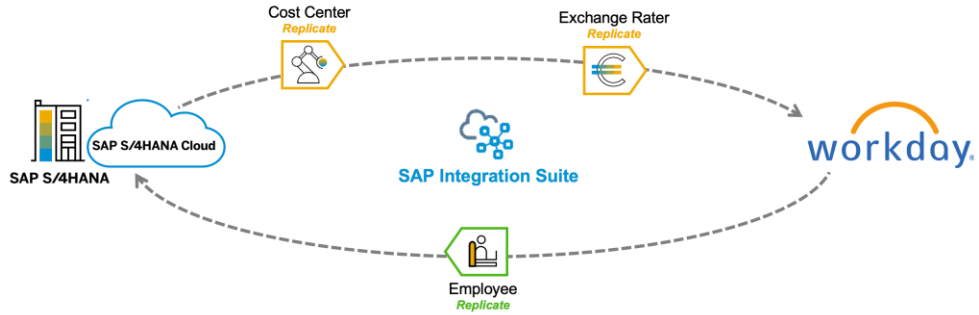
- This integration content enables you to connect SAP S/4HANA (Cloud) with Salesforce seamlessly.
- It supports automatically transfer of data between SAP S/4HANA (Cloud) and salesforce.
- Reduce your TCO and TCI with pre-defined integration content.



SAP S/4HANA Cloud integration with Salesforce

SAP S/4HANA Cloud Integration with Workday

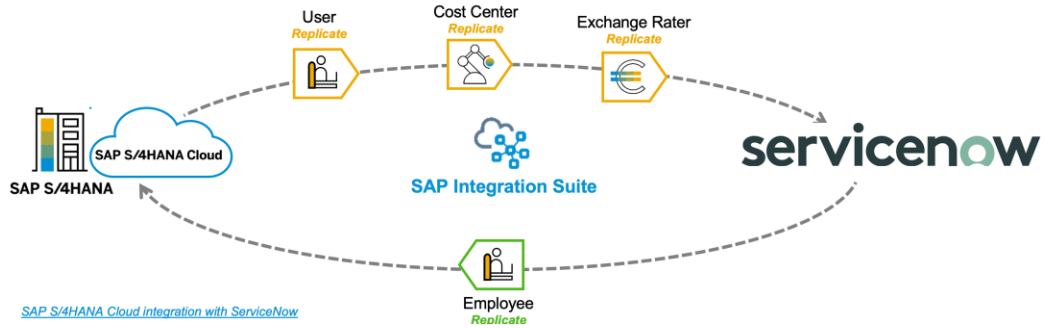
- This integration content gives the security of direct connectivity between SAP S/4HANA (Cloud) and Workday.
- It supports automatically transfer of data between SAP S/4HANA (Cloud) and Workday.
- Reduce your TCO and TCI with pre-defined integration content.



SAP S/4HANA Cloud integration with Workday

SAP S/4HANA Cloud Integration with ServiceNow

- This integration content supports end to end integration between SAP S/4HANA (Cloud) and Service Now.
- It ensures master data consistency between the integrated systems.
- Reduce manual process steps and save the cost and implementation efforts.



SAP S/4HANA Cloud integration with ServiceNow

Integration architecture guide for cloud and hybrid landscapes

Overview

Context

- Deep dive into integration patterns for heterogenous landscapes
- Scope: Existing product portfolio, technology focus

Target group

- Enterprise architects and integration architects

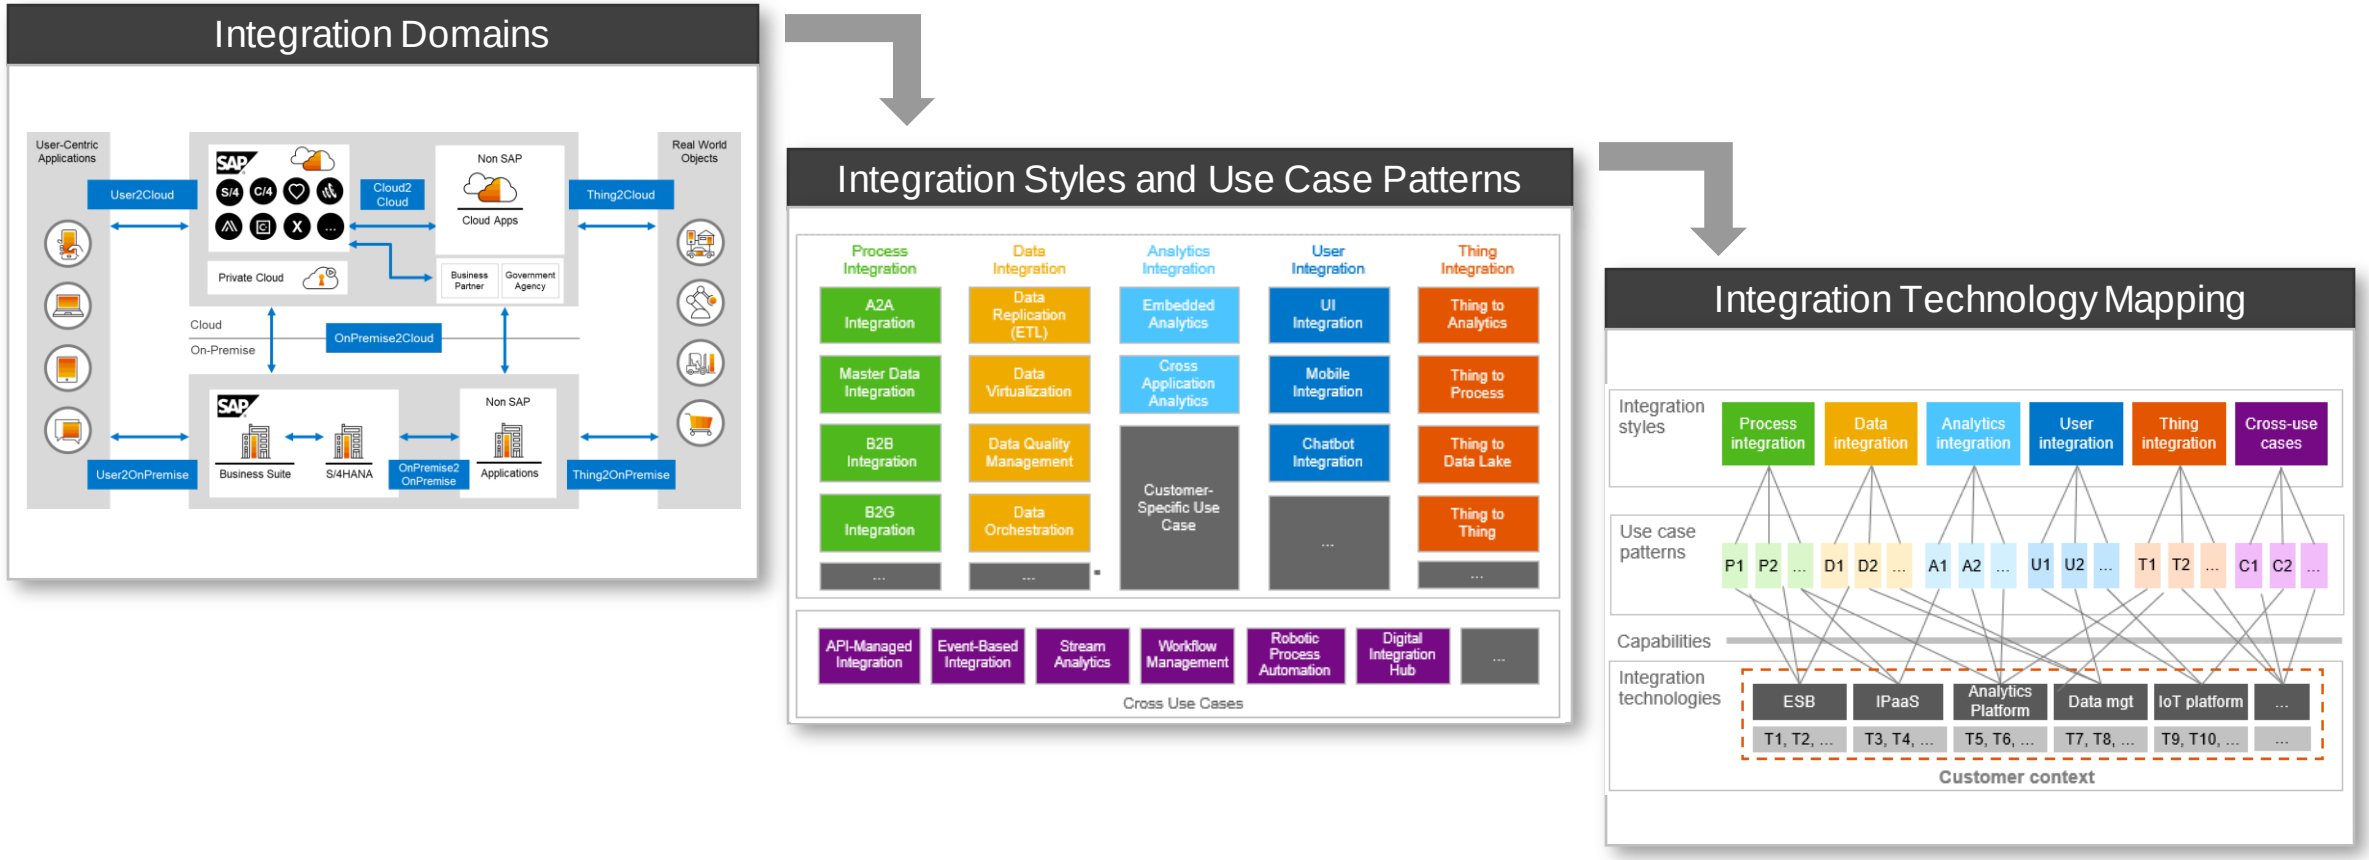
Table of content (overview)

- SAP Integration Solution Advisory Methodology
- Process Integration, Data Integration, Analytics Integration, Thing Integration, UX Integration, Identity Integration
- Integration Configuration with Cloud Integration Automation Service
- End-to-End Integration Monitoring
- Integration of SAP S/4HANA

© 2023 SAP SE or an SAP affiliate company.

SAP Integration Solution Advisory Methodology

Simplify Integration by a Systematic Integration Approach



Explanation

Integration domains describe typical areas in a hybrid landscape where integration is needed. Integration styles and use case patterns comprise a set of typical, technology-agnostic integration use cases. Finally, integration styles and use cases can be mapped to integration technologies/services (SAP and/or third party) based on a given customer context.

SAP Integration Suite

Recent Innovations

SAP Run Simple

SAP Integration Suite – Recent Innovations

1

Next generation hybrid integration runtime (currently in beta)

- On-premise process orchestration runtime for ground-to-ground integrations
- On-premise API Gateway, execution of API policies & mediations on-premise
- On-premise event bridge from SAP “legacy” to SAP Event Mesh and / or non-SAP event brokers

2

Transition from SAP Process Orchestration to SAP Integration Suite

- Ease the transition from SAP Process Orchestration to SAP Integration Suite
- Assessment, migration, regression test service to accelerate transition from SAP Process Orchestration to SAP Integration Suite

3

Cloud Based B2B

- Trading partner management to centrally manage B2B scenarios incl. individual aspects & requirements of trading partners based on AI / ML and crowd-sourced proposal service
- B2B monitoring to monitor B2B transactions at runtime in corporation with trading partner agreement data

4

Event-driven Integration, API-led Integration

- Advanced Event Mesh available for high-volume event use cases, distributed deployment of event brokers in federated setup, event portal for event design, catalogue, insights etc.
- New experience for API Business Hub Enterprise (customer´s developer portal) with brand & theme customization capabilities
- Business Data Graph (currently in beta)
- Additional APIs and integration content for SAP and non-SAP integration, community content on API Business Hub

5

Integration Governance, Low code / no code

- Integration Assessment Capability to define, document and govern an integration technology strategy based on SAP Integration Solution Advisory Methodology (SAP ISA-M)
- Unified developer experience, bringing different capabilities of SAP Integration Suite closer together and offer unified developer experience to manage cloud and hybrid scenarios

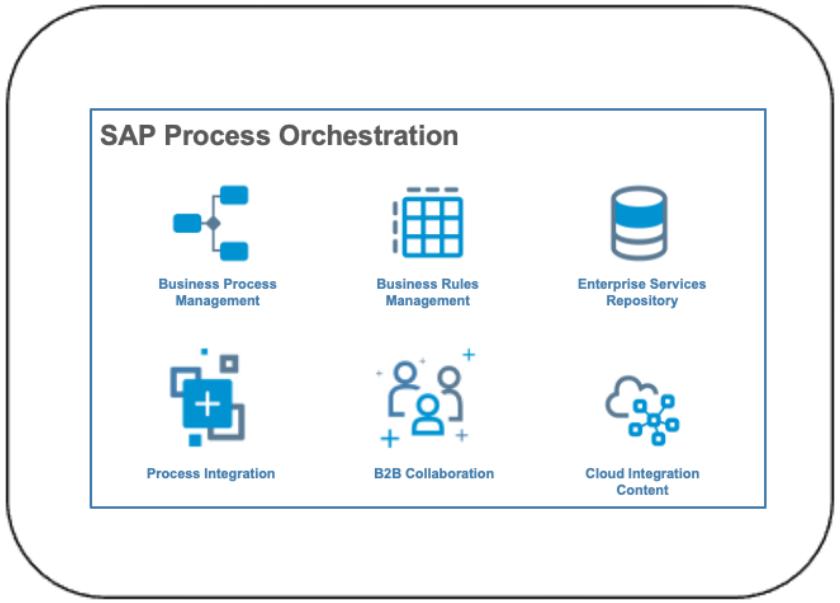
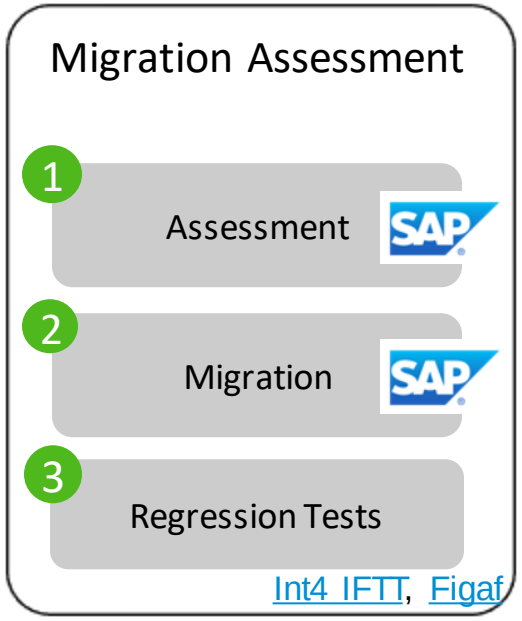
Transition from SAP Process Orchestration to SAP Integration Suite

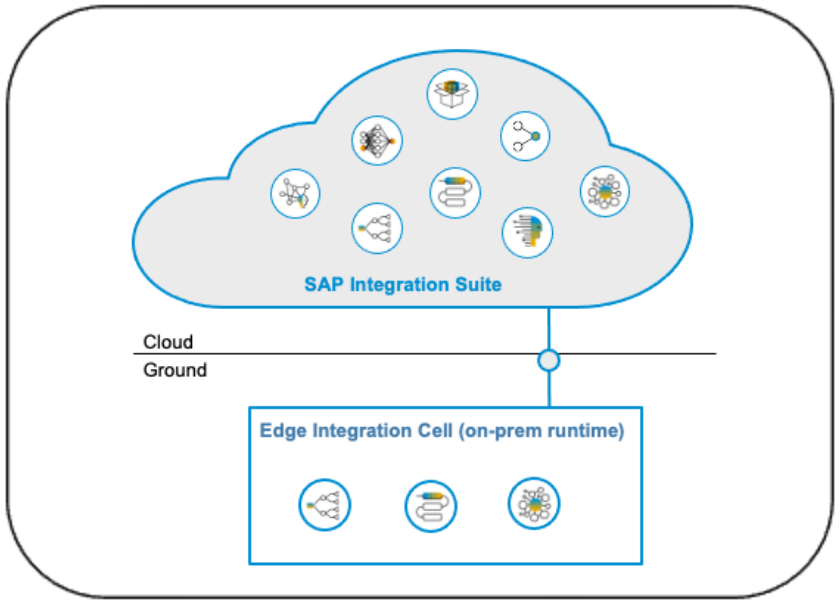
SAP Process Orchestration

SAP PROCESS INTEGRATION





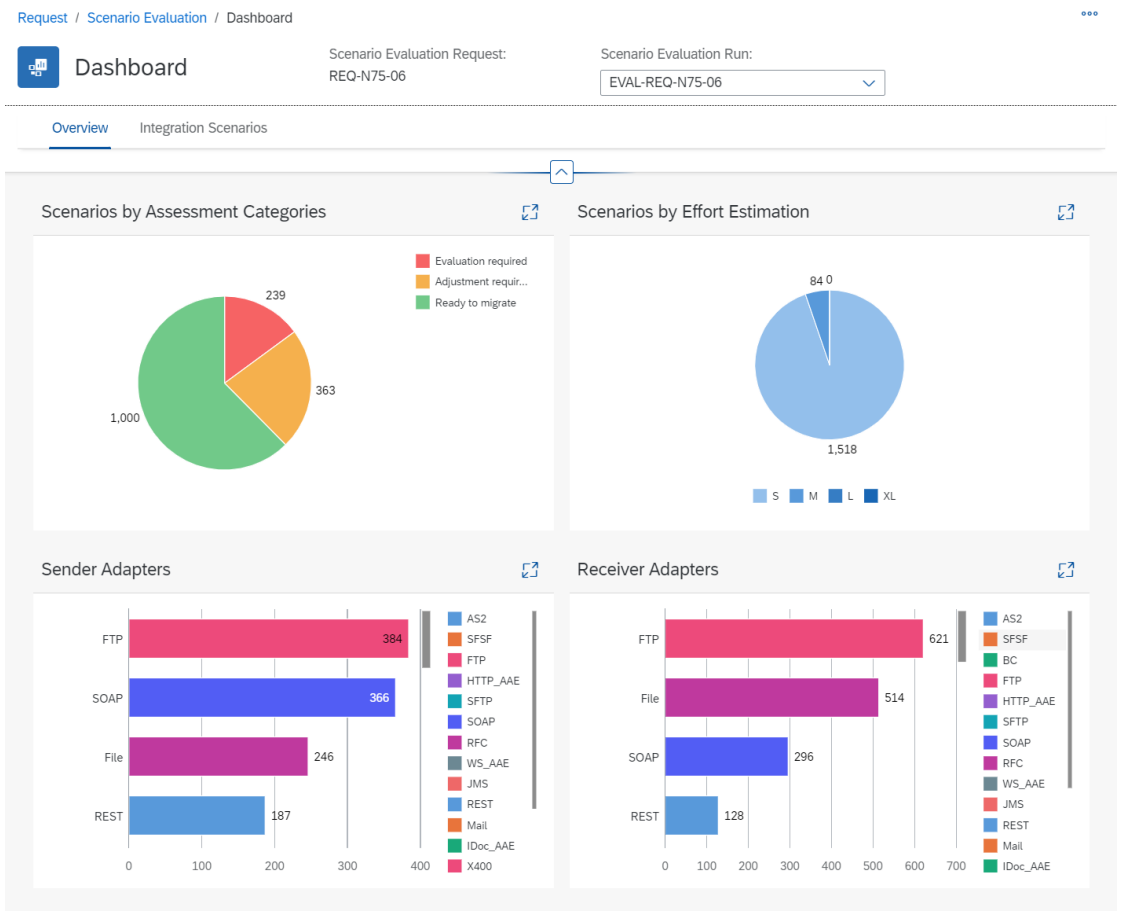
SAP Integration Suite

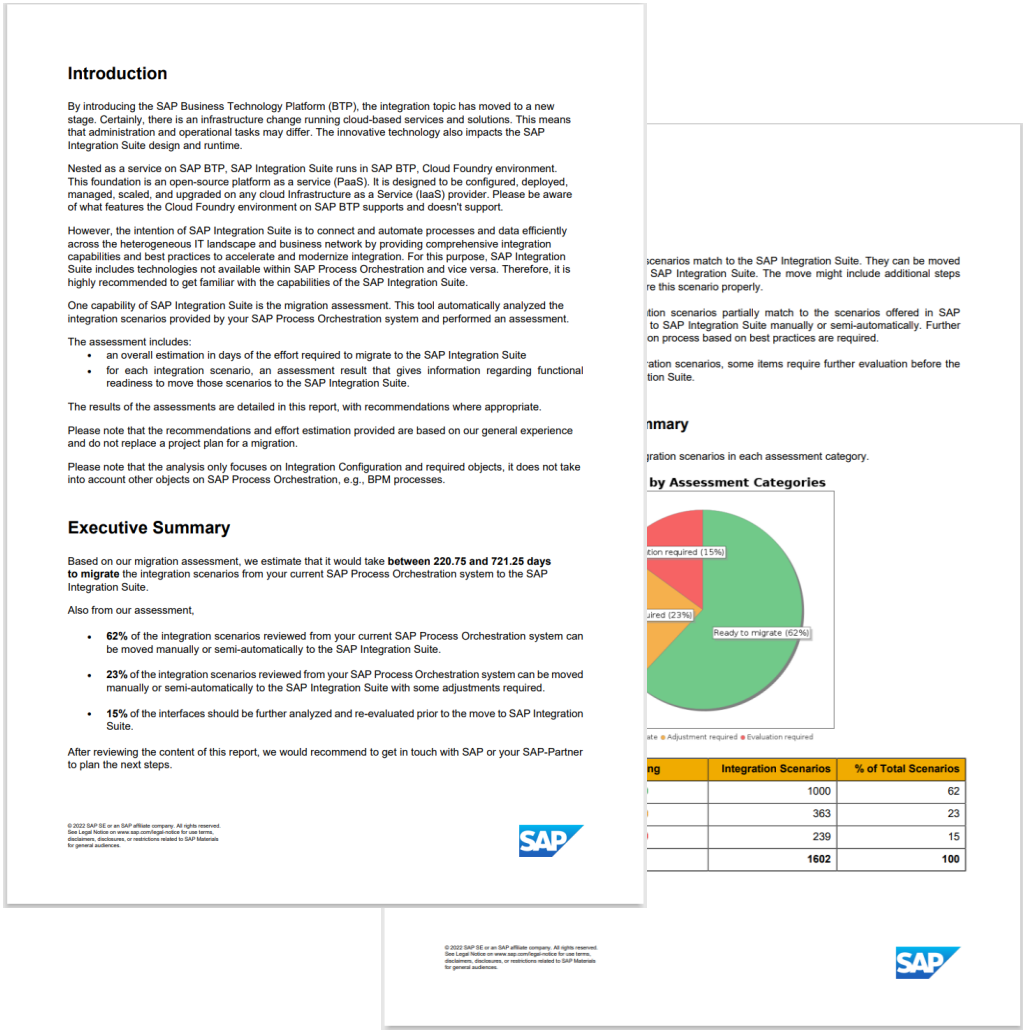


© 2023 SAP SE or an SAP affiliate company.

Migration Assessment Capability of SAP Integration Suite

Sample evaluation results





Introduction

By introducing the SAP Business Technology Platform (BTP), the integration topic has moved to a new stage. Certainly, there is an infrastructure change running cloud-based services and solutions. This means that administration and operational tasks may differ. The innovative technology also impacts the SAP Integration Suite design and runtime.

Nested as a service on SAP BTP, SAP Integration Suite runs in SAP BTP, Cloud Foundry environment. This foundation is an open-source platform as a service (PaaS). It is designed to be configured, deployed, managed, scaled, and upgraded on any cloud Infrastructure as a Service (IaaS) provider. Please be aware of what features the Cloud Foundry environment on SAP BTP supports and doesn't support.

However, the intention of SAP Integration Suite is to connect and automate processes and data efficiently across the heterogeneous IT landscape and business network by providing comprehensive integration capabilities and best practices to accelerate and modernize integration. For this purpose, SAP Integration Suite includes technologies not available within SAP Process Orchestration and vice versa. Therefore, it is highly recommended to get familiar with the capabilities of the SAP Integration Suite.

One capability of SAP Integration Suite is the migration assessment. This tool automatically analyzed the integration scenarios provided by your SAP Process Orchestration system and performed an assessment.

The assessment includes:

- an overall estimation in days of the effort required to migrate to the SAP Integration Suite
- for each integration scenario, an assessment result that gives information regarding functional readiness to move those scenarios to the SAP Integration Suite.

The results of the assessments are detailed in this report, with recommendations where appropriate.

Please note that the recommendations and effort estimation provided are based on our general experience and do not replace a project plan for a migration.

Please note that the analysis only focuses on Integration Configuration and required objects, it does not take into account other objects on SAP Process Orchestration, e.g., BPM processes.

Executive Summary

Based on our migration assessment, we estimate that it would take **between 220.75 and 721.25 days to migrate** the integration scenarios from your current SAP Process Orchestration system to the SAP Integration Suite.

Also from our assessment,

- **62%** of the integration scenarios reviewed from your current SAP Process Orchestration system can be moved manually or semi-automatically to the SAP Integration Suite.
- **23%** of the integration scenarios reviewed from your SAP Process Orchestration system can be moved manually or semi-automatically to the SAP Integration Suite with some adjustments required.
- **15%** of the interfaces should be further analyzed and re-evaluated prior to the move to SAP Integration Suite.

After reviewing the content of this report, we would recommend to get in touch with SAP or your SAP-Partner to plan the next steps.

SAP Integration Suite

Road Map

SAP Run Simple

SAP Integration Suite: Customer collaborations to help drive product decisions

Customer Influence Program

End-to-end request to road map process

~1000 customers, partners engaged

- Requesting features for SAP Integration Suite
- SAP reviews within planning process

90% of the eligible feature requests considered for roadmap

Customer Engagement Initiative

Program gives customers and select partners the unique opportunity to get a sneak peak into SAP's product visions, ideas, and prototypes and to share early feedback.

100+ active participants

Focus Topics: **Hybrid Deployment**, Developer Productivity, Tenant Health and B2B monitoring, Trading Partner Management, etc.

SAP Integration Suite – Road Map

1

Next generation hybrid integration runtime: Integration Cell – Further enhancements

- General availability of Edge Integration Cell for ground-to-ground integrations including on-prem API Management
- Cloud Integration Cell beta with runtime based on “Edge Integration Cell”

2

Enhanced transition support from SAP Process Orchestration to SAP Integration Suite

- Improve use case parity (incl. ESR, B2B) of SAP Process Orchestration in SAP Integration Suite (message mapping with function libraries and imported archives, RFC sender adapter, QoS EOIO, …)
- Enhance migration assessment maturity (mass migration, reusable artifacts, support of SAP Process Orchestration 7.4, 7.31)

3

API-Led Integration, event-driven integration

- API-led integrations in common designer
- Enhanced API analytics, operations, proactive API security leveraging AI / ML: Detection of API usage patterns, API anomalies
- API Composition & Business Data Graph
- Direct consumption of events in Advanced Event Mesh, event payload enrichment and mediation

4

Additional Integration Content and Adapters

- Strong collaboration and ecosystem engagement for partner/community content, B2B libraries, …
- Additional adapters for integration with non-SAP systems, such as AWS Redshift, Google Workspace, GoToWebinar, Microsoft 365, OFTP2, ON24, RabbitMQ, RFC Sender, Dataspace Integration, …

5

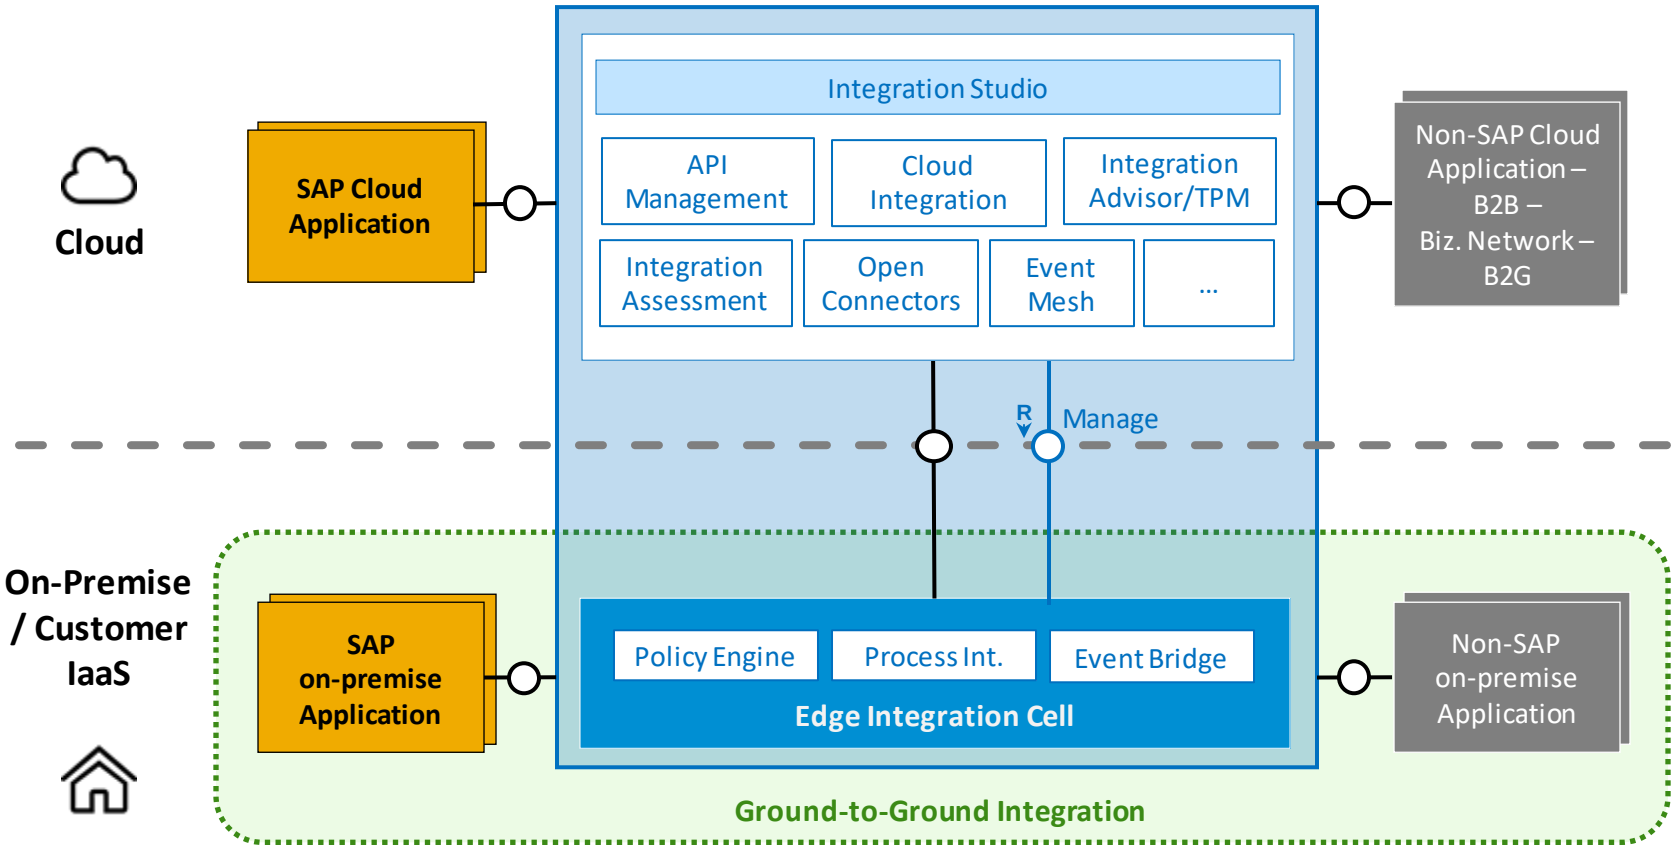
Increased Developer Productivity and Monitoring

- Data and message type editor in message mapping, where used functionality for security material and additional artifacts (e. g. scripts, mappings), message history download, fine-granular access policies on package level, …
- Monitoring of critical resources (JDBC, JMS, memory, CPU usage), B2B archiving

© 2023 SAP SE or an SAP affiliate company.

Edge Integration Cell – Currently available in beta

Extend SAP Integration Suite into Customer Environments



Integration Studio for design and monitoring **in the Cloud**

Flexible deployment in customer environments via Edge Integration Cell

Enables **ground-to-ground integration** without going through Cloud

Integration Flows modeled in Cloud Integration can be executed on-premise in Edge Integration Cell

Migration path **for on-premise PI/PO customers**

Beta in **Q4/2022** and GA planned for **Q3/2023**

PAM for beta - Azure AKS & AWS EKS and for GA - Azure AKS, AWS EKS & Suse Ranger, later Red Hat OpenShift

SAP Integration Suite

Key Take-Aways, Questions and Answers

SAP Run Simple

SAP is a leader in integration!

Leading Vision

- **Comprehensive and enterprise-grade integration platform** covering all integration styles and landscapes
- **3000+ out-of-box integration flows, mappings** to accelerate integration projects
- **Fully vendor managed multi-cloud service**

Execution for customer success

- **20+ years of experience** in providing ubiquitous, enterprise-grade integration platform
- **Customers** leverage SAP Integration Suite in creating connected experiences (A2A, B2B, B2G, API, events, …) driving their digital transformation across industries globally
- **SAP Integration Suite** is **central to SAP BTP** and the enabler of **end-to-end business processes** across SAP LoB, partners and third-party applications
- Recognized as **Leader** in Gartner´s Magic Quadrant 2021 for Enterprise Integration Platform as a Service
