Enabling Efficient Test Management with Test Suite and Business Process Change Analyzer Functionality in SAP® Solution Manager

Before: Challenges and Opportunities
- Streamline and accelerate regression testing processes following support pack and enhancement package upgrades or after major landscape changes such as implementation projects or migrations
- Support efficient planning and management of testing activities, with a structured testing approach
- Comply with internal and external auditing requirements for tests

Why SAP and Vostura GmbH

- Automated analysis and scoping of testing requirements using business process change analyzer (BPCA) capabilities in SAP® Solution Manager
- Support for the planning and management of tests using test suite capabilities in SAP Solution Manager
- Comprehensive reporting on testing activities
- Deployment support provided by SAP Services and Support and SAP partner Vostura

After: Value-Driven Results

- Significant reduction in the testing scope as a result of automated analysis of testing needs
- Time freed up for IT and line-of-business staff to spend on more-strategic tasks
- Full traceability of testing procedures, fulfilling auditing requirements
- Ability for the IT team to monitor progress and gain insights into recurring issues
- Establishment of a new testing approach that helps speed up the deployment of new capabilities

"Test suite and business process change analyzer capabilities within SAP Solution Manager **substantially enhanced our testing approaches** by optimizing regression test scopes, improving test status reporting, and helping meet requirements for internal and external audits."

Konstantinos Jantouris, Vice President OS and IT ▌ Finance and Transaction Services (IT), DVB Bank SE

80%

Reduction in test scope through automated scoping analysis using BPCA functionality
