Agenda

- SAP Cloud ALM **Value**
- SAP Cloud ALM for **Implementation**
- SAP Cloud ALM for **Operations**
- SAP Cloud ALM **Onboarding & Demo**
- SAP Enterprise Support Value Map – **ALM Value Map**
- **Q & A**

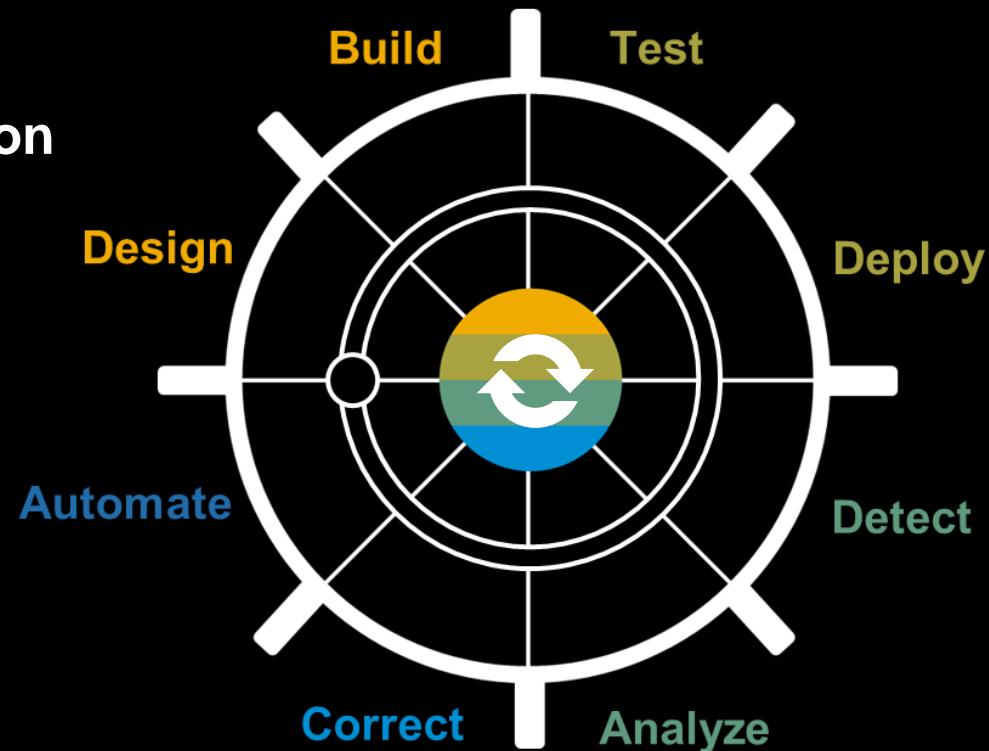

SAP Cloud ALM **Value**

Cloud Application Lifecycle Management (CALM)

Everything you need to manage the Intelligent Enterprise

from Implementation

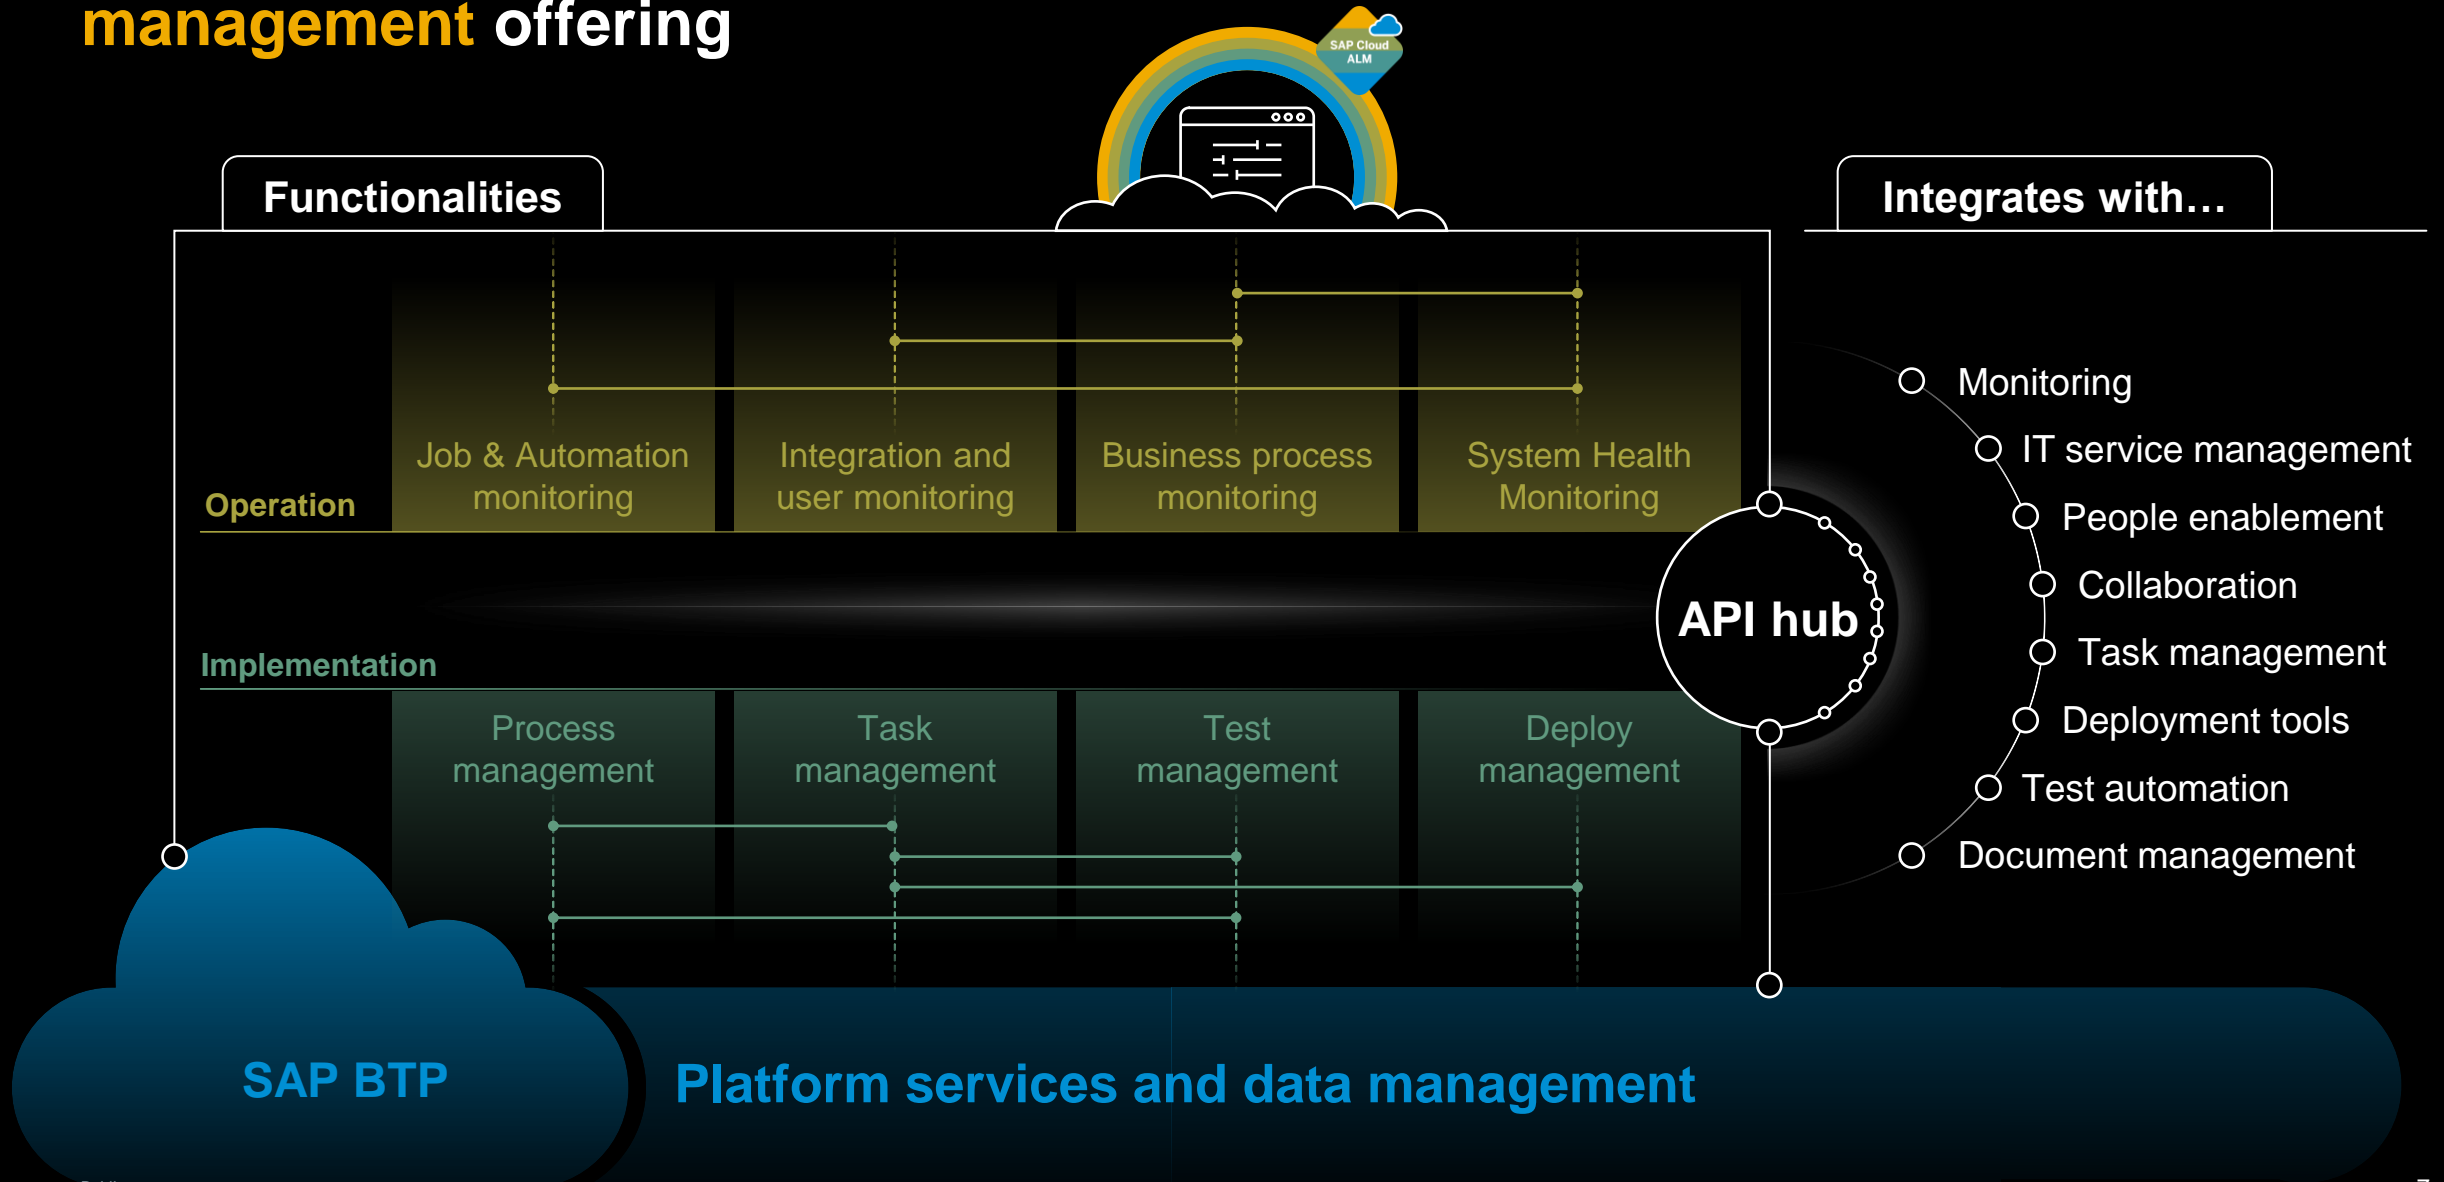

to Operations.

SAP Cloud ALM – A brand-new, **cloud-based application lifecycle management** offering

Fair Usage rights included with SAP Enterprise Support, cloud editions

SAP Cloud ALM – A brand-new, **cloud-based application lifecycle management** offering

SAP Cloud ALM for **Implementation**

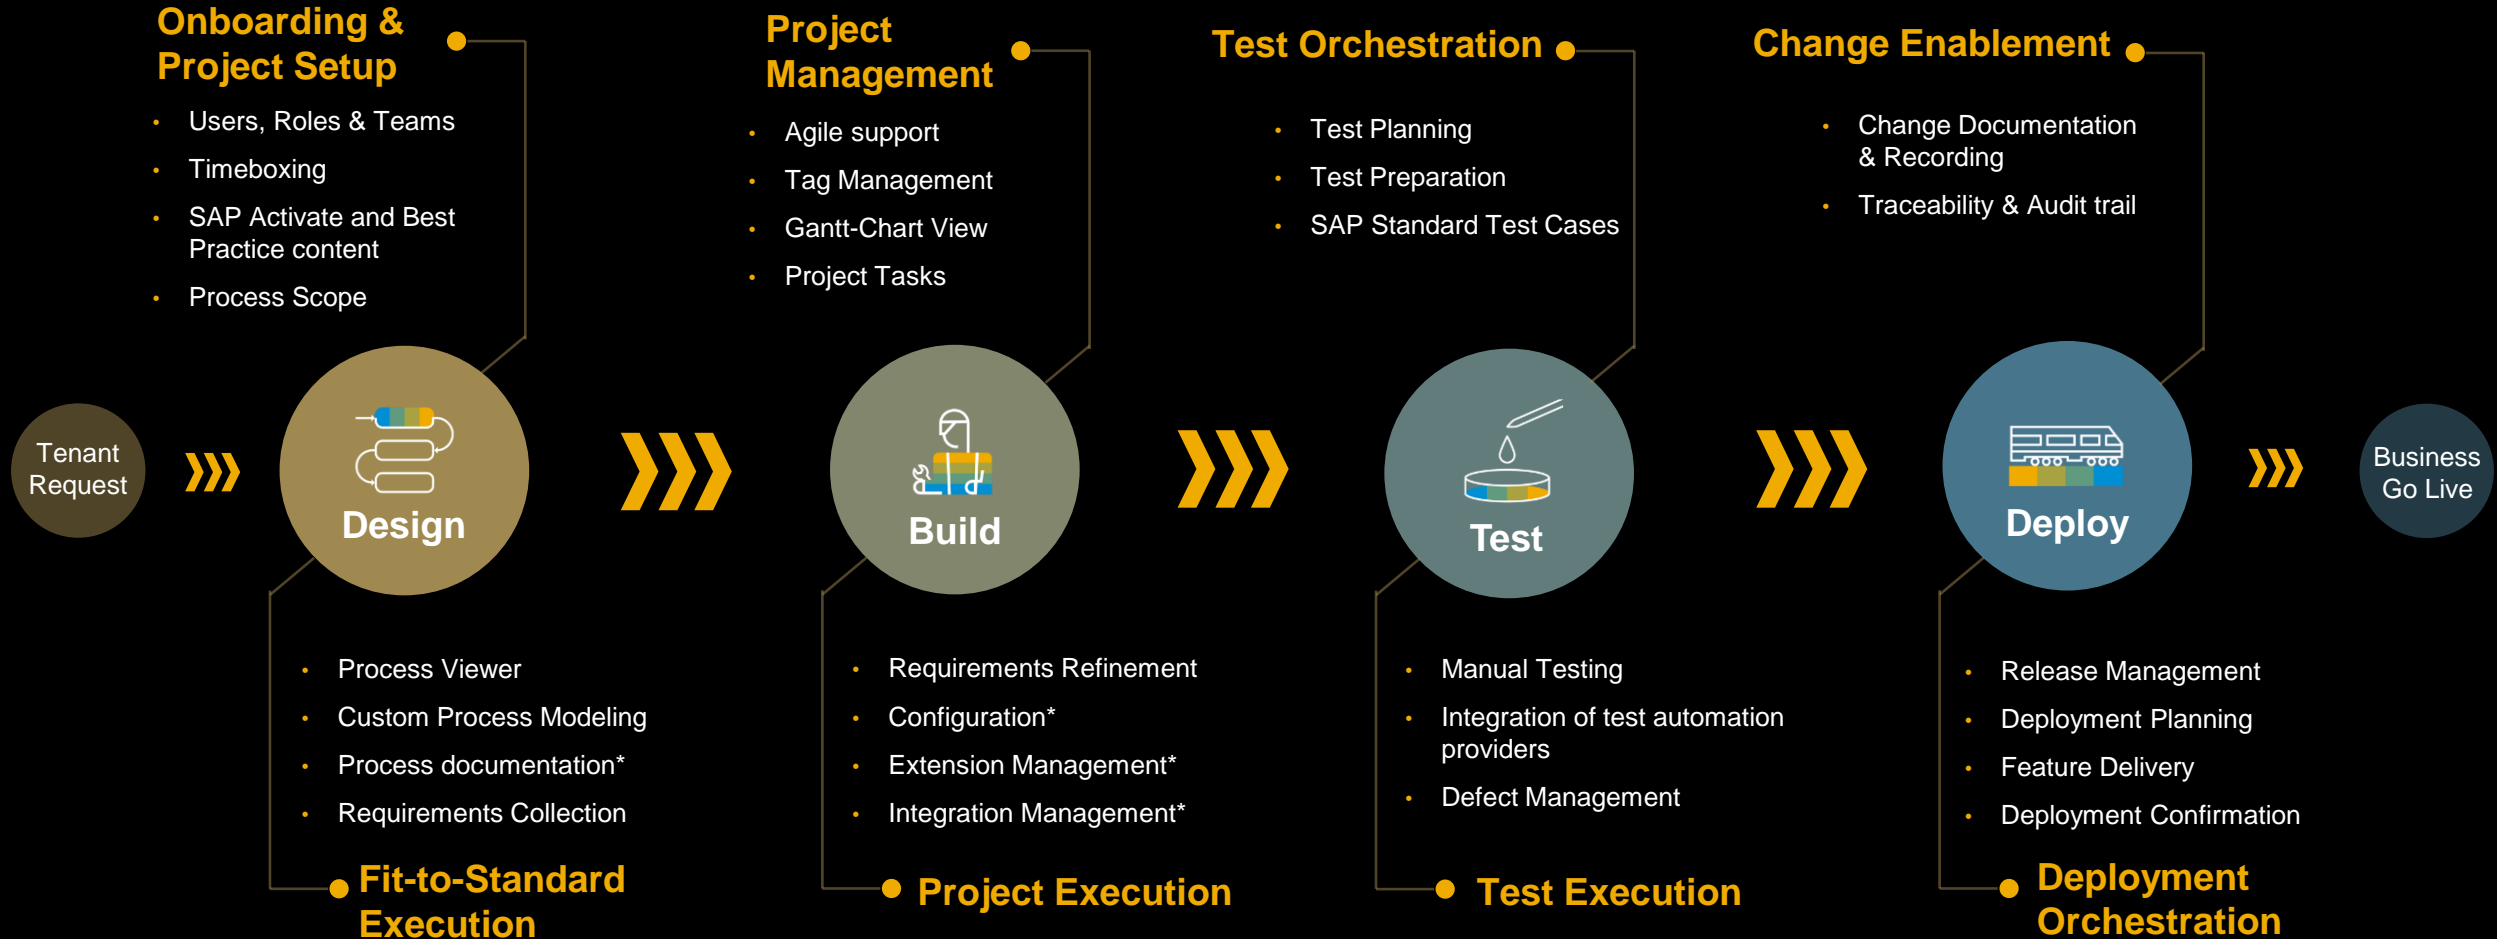

SAP Cloud ALM for Implementation – Product Description

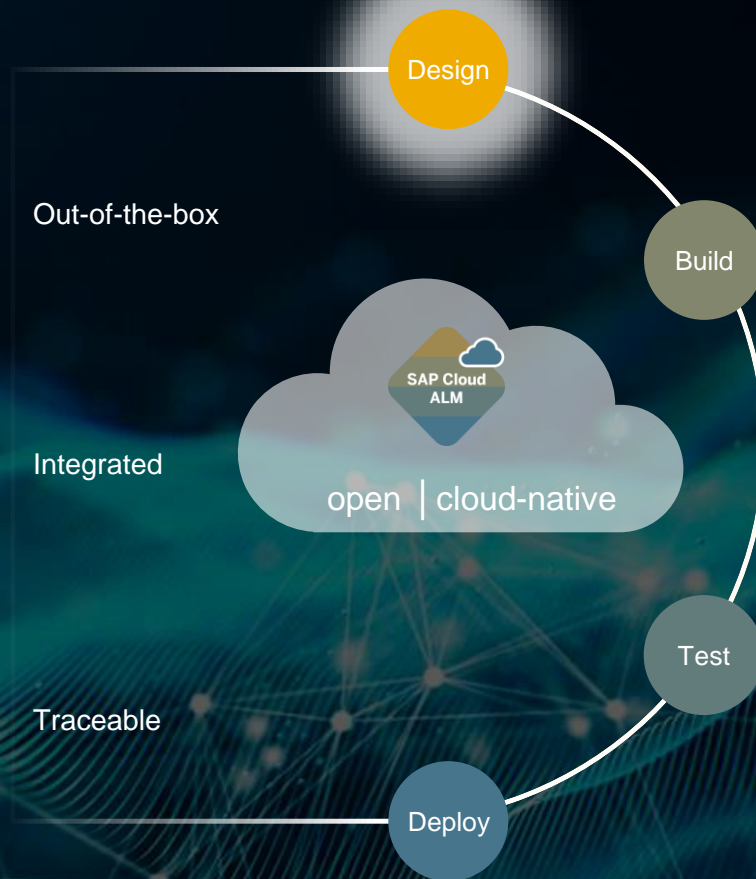

SAP Cloud ALM for Implementation offers:

- Support for customers in the implementation of cloud centric solution landscapes with a **preconfigured, out-of-the-box, cloud native solution**
- **Features, functions and processes** are provided for the running of Fit-to-standard workshops and management of all implementation, testing and deployment activities. They adhere to SAP Activate methodology, content and tools.
- Ease of **initial onboarding** is followed by the availability of preconfigured process with **open interfaces**, that are **extendable and adoptable** to a customer's individual needs
- Backed by these powerful capabilities, Cloud ALM for Implementation is a **key companion in your transition to the cloud**.

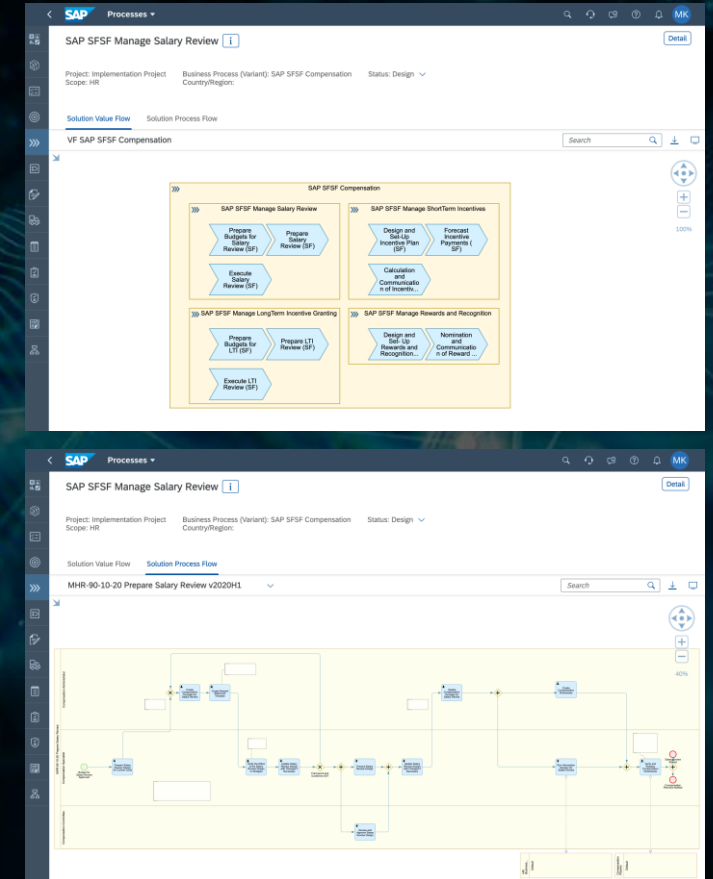

Designing the to-be solution

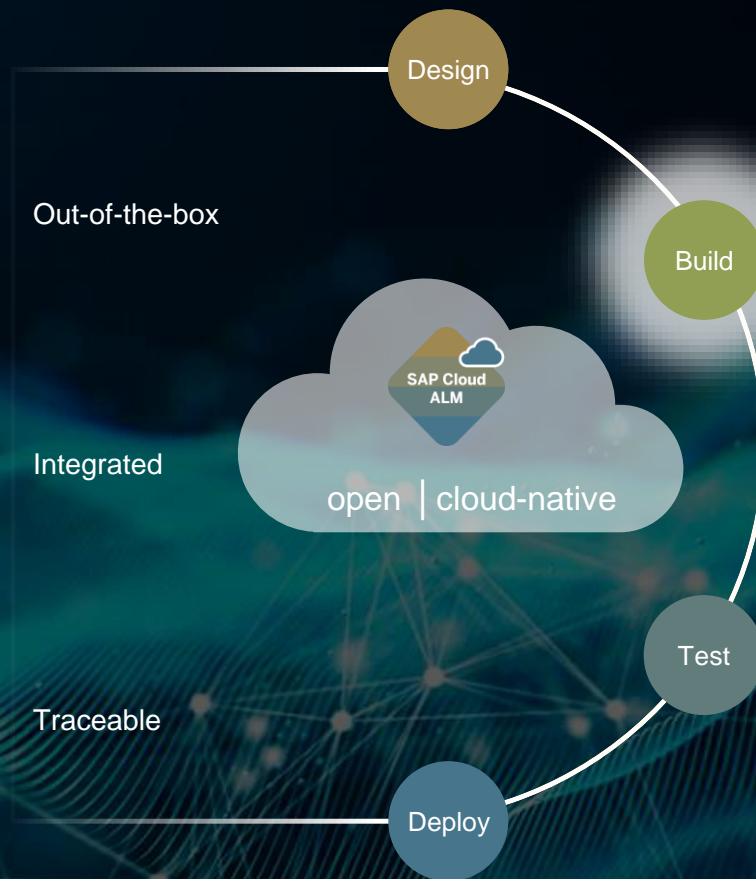

- Start with SAP Standard Content (Best Practices & Intelligent Enterprise scenarios)
- Following the SAP EA model
- Model custom solution processes
 - Value flows
 - BPMN diagrams*
- Manage to Fit-to-Standard Workshops
- Capture and manage requirements along solution processes

Manage all build activities

This is the current state of future vision and may be changed by SAP at any time.

- Start with the SAP Activate Methodology roadmaps
- Define phases, sprints and milestones for agile projects
- Break down requirements into user stories and tasks
- Provides a Gantt to analyze dependencies
- Integrated analytics showing always up-to-date information project
- Upload results of SAP Readiness Check to manage follow-up in a conversion project

SAP Tasks

Standard

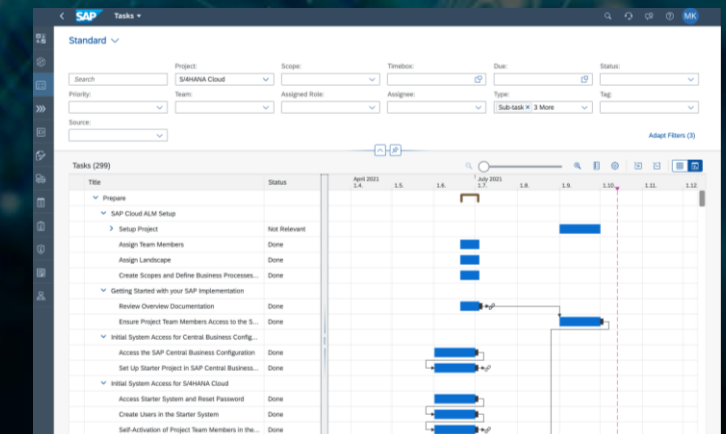

Search: Project: Scope: Timeline: Due: Status: Priority: Team:

Assigned Role: Type: Tag:

Tasks (311)

Title	Type	Status	Timeline	Due	Team	Assignee
Deliverable: SAP Cloud ALM Setup						
Setup Project	Template Task	Not Relevant	Sprint 01	Sep 30, 2023	Not Assigned	Not Assigned
Assign Team Members	Template Task	Done	Prepares	Jul 9, 2023	Not Assigned	Not Assigned
Assign Landscape	Template Task	Done	Prepares	Jul 9, 2023	Not Assigned	Not Assigned
Create Scopes and Define Business Processes	Template Task	Done	Prepares	Jul 9, 2023	Not Assigned	Not Assigned
Test	Sub-task	Open	Sprint 02	Sep 30, 2023	Not Assigned	Not Assigned
Deliverable: Starting Started with your SAP Implementation						
Review Overview Documentation	Template Task	Done	Prepares	Jul 9, 2023	Not Assigned	Not Assigned
Ensure Project Team Members Access to the SAP Support Portal, SAP Best Practices Explorer, and SAP Customer Communities	Template Task	Done	Sprint 01	Sep 30, 2023	Not Assigned	Not Assigned
Deliverable: Initial System Access for Central Business Configuration						
Access the SAP Central Business Configuration	Template Task	Done	Sprint 01	Jun 30, 2023	Not Assigned	Michael Krieger
Set Up Starter Project in SAP Central Business Configuration	Template Task	Done	Sprint 01	Jun 30, 2023	Not Assigned	Maria Bertoldi
Deliverable: Initial System Access for SAP HANA Cloud						
Access Starter System and Reset Password	Template Task	Done	Sprint 01	Jun 30, 2023	Not Assigned	Not Assigned
Create Users in the Starter System	Template Task	Done	Sprint 01	Jun 30, 2023	Not Assigned	Gerold Wickman
Self-Activation of Project Team Members in the Identity Authentication Service	Template Task	Done	Sprint 01	Jun 30, 2023	Not Assigned	Not Assigned

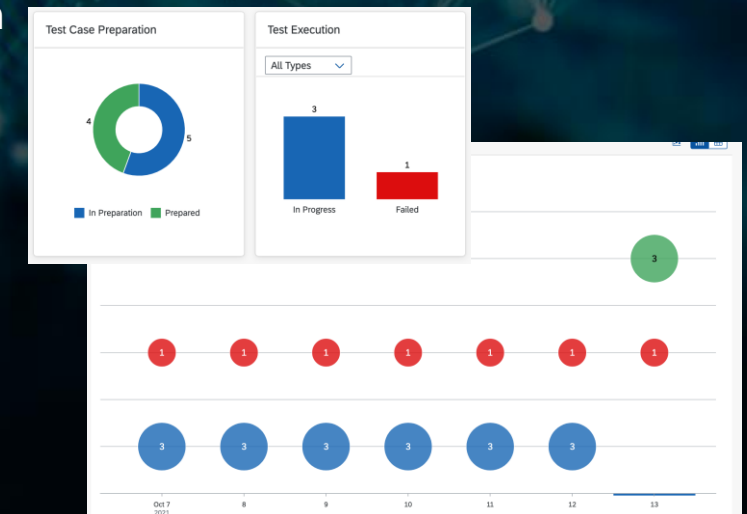

Manage all tests in one central place

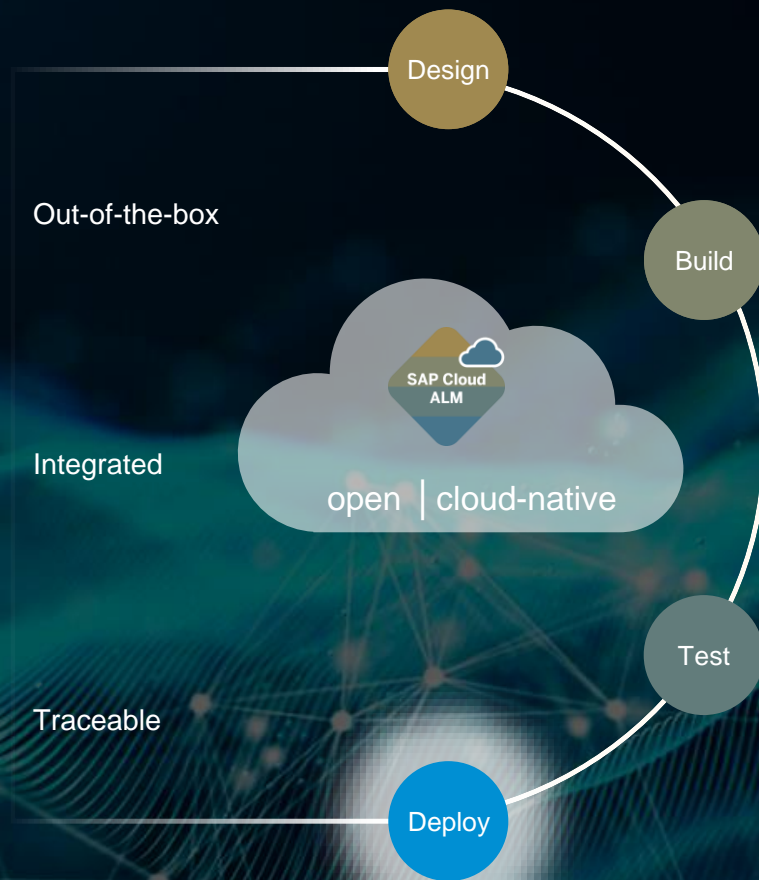

- Manage all tests from user acceptance to integration tests
- Prepare test cases for manual testing
- Integration of automatic test execution engines for SAP S/4HANA test automation tool
- Planned integration of test automation tool by Tricentis via open interface
- Test preparation and execution analytics
- Up-/Download of test cases

The screenshot shows the SAP Test Execution interface for a test run titled 'BD9 - 01 - Sell from Stock'. The overall status is 'Fail'. The interface displays a table of test cases with columns for Status, Title, Instructions, Expected Result, and Application. The test cases are grouped into three sections: 1. Logon, 2. Create Sales Order, and 3. Check Sales Order. The status of each test case is indicated by a colored icon (green for Pass, red for Fail, and blue for Set to Pass).

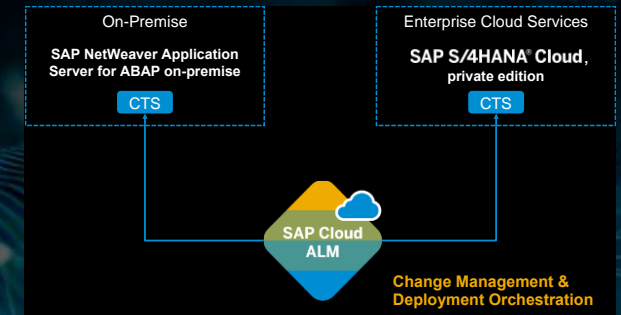

Status	Title	Instructions	Expected Result	Application
Pass	1. Logon	Logon to the system	You should see the necessary tiles in the launchpad	Pass
Fail	2. Create Sales Order	Create a new sales order	An empty sales order should be created	Pass
Fail	2.1 Logon and start application	Add a line item to the sales order	You can see the line item added to the list of line items	Fail - Application Issue
Set to Pass	3. Check Sales Order	Check the created and posted sales order	The sales order should be created successfully	Set to Pass

Deploy consistently to production

- Ensure consistent deployment of software to production
- Integration of ABAP transport management for SAP S/4HANA on-premise and private cloud editions
- Orchestration of deployments across multiple deployment providers
- Traceability supporting
 - Process based
 - Requirements based

Baseline Configuration for S/4HANA Cloud

Project: SAP @ Acron Heating Inc. Status: In Realization

Scope: Plant India

Workstream: Application Design and Configuration

Priority: Medium

Description Transports

Configuring the baseline for S/4HANA Cloud wrt the Activate Roadmap.

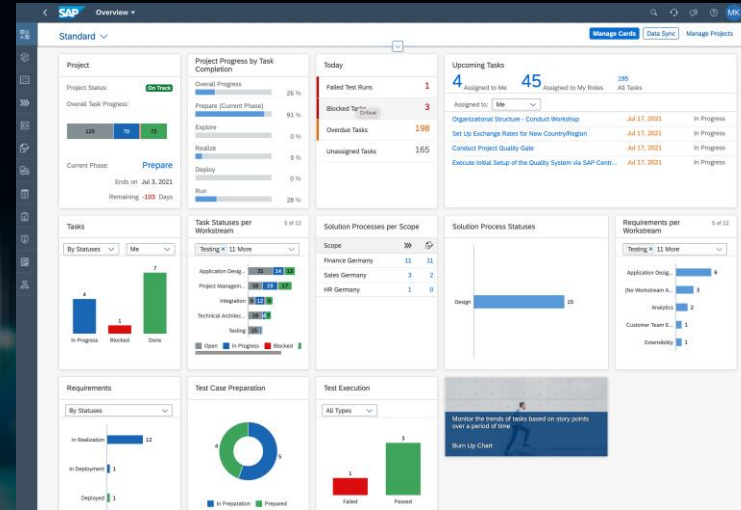

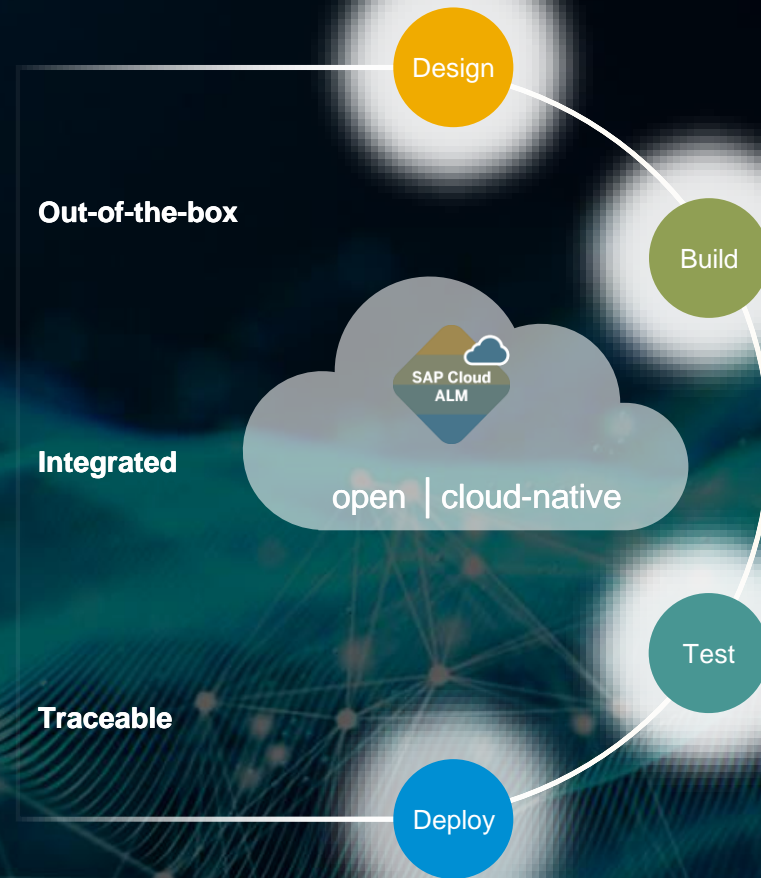

Transports

Assigned Transports (4)

ID	Title	Status	Target Tenant	Deploy	Assign	Refresh
J9HK300169	note for SPRU	Failed in ATR				×
J9HK300448	Test for Language change	Failed in J9H-400	J9H-900			×
J9HK300500	Configuration change for currency settings	Deployed in ATR-000	ZMLJ-000			×
J9HK300502	New sales org	Deployed in J9H-400	J9H-900			×

Integrated Analytics, end-to-end traceability

This is the current state of future vision and may be changed by SAP at any time.

SAP Cloud ALM for implementation – Customer Benefits

Fast time-to-value through guidance and task-driven implementation

Harmonized implementation experience across SAP Cloud solutions

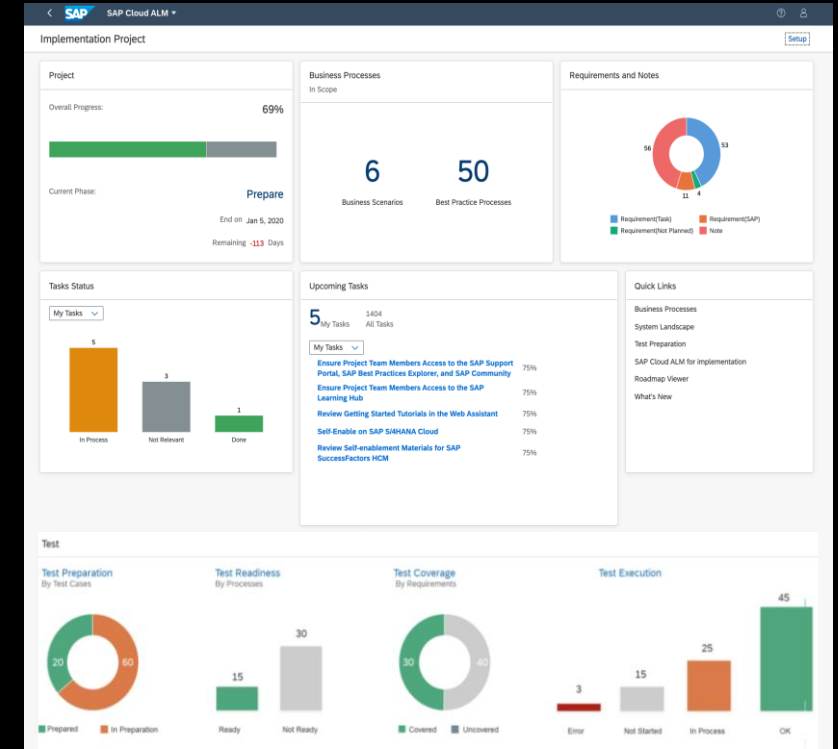

Instantaneously available, no deployment or configuration activities

Fast onboarding of your project team

Automated collection and assignment of tasks to the project team

Comprehensive workspace for fit-to-standard workshops

Built-in transparency about implementation progress

SAP Cloud ALM for Operations

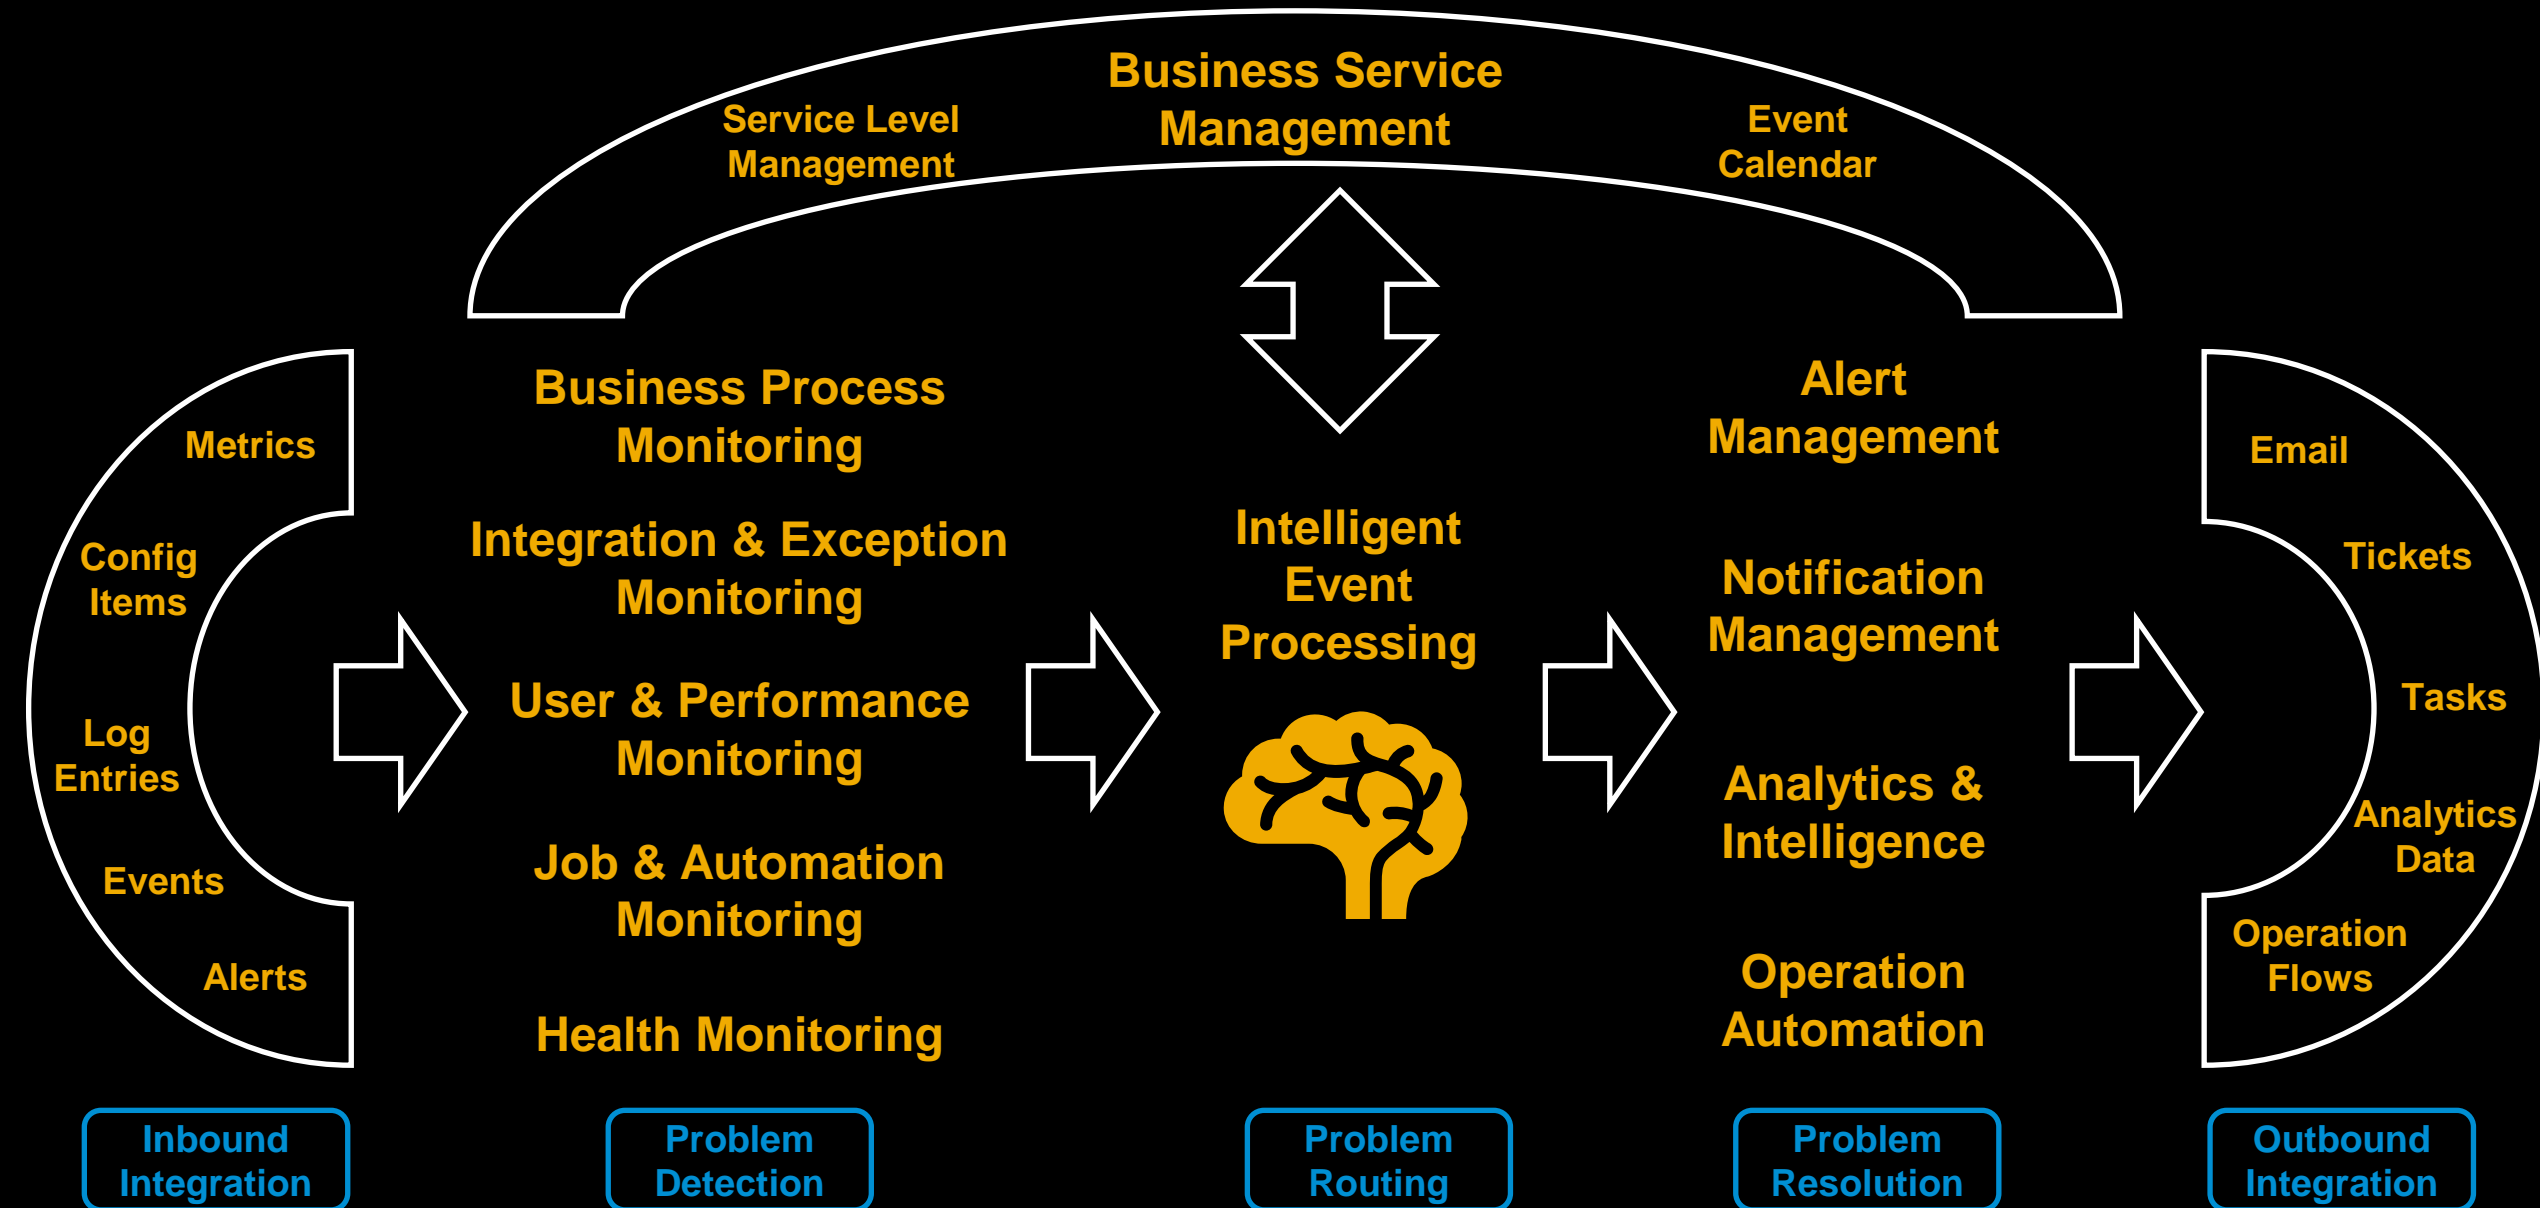

SAP Cloud ALM for Operations – Value Proposition

Ensure business continuity in SAP centric landscape by monitoring and alerting - Increase operation efficiency by automating operational tasks - Avoid anomalies by proactive problem prediction

- SAP Cloud ALM empowers customers to **understand healthiness of SAP business solutions**:
 - Provides **full stack monitoring and alerting** covering business processes, integration, users, applications, and healthiness of cloud services and systems
 - Allows to conduct **root cause analysis** on different levels
 - Acts as **collaboration platform between LOB and IT**
- SAP Cloud ALM enables customer to increase operation efficiency by **automating corrective actions as well as regular operation tasks**
- SAP Cloud ALM helps to **predict anomalies in business process and application operation** by event correlation and learning out of the collected data (AIOPs)
- SAP Cloud ALM provides **transparency regarding availability of business services** including business downtimes, business events and business SLA's

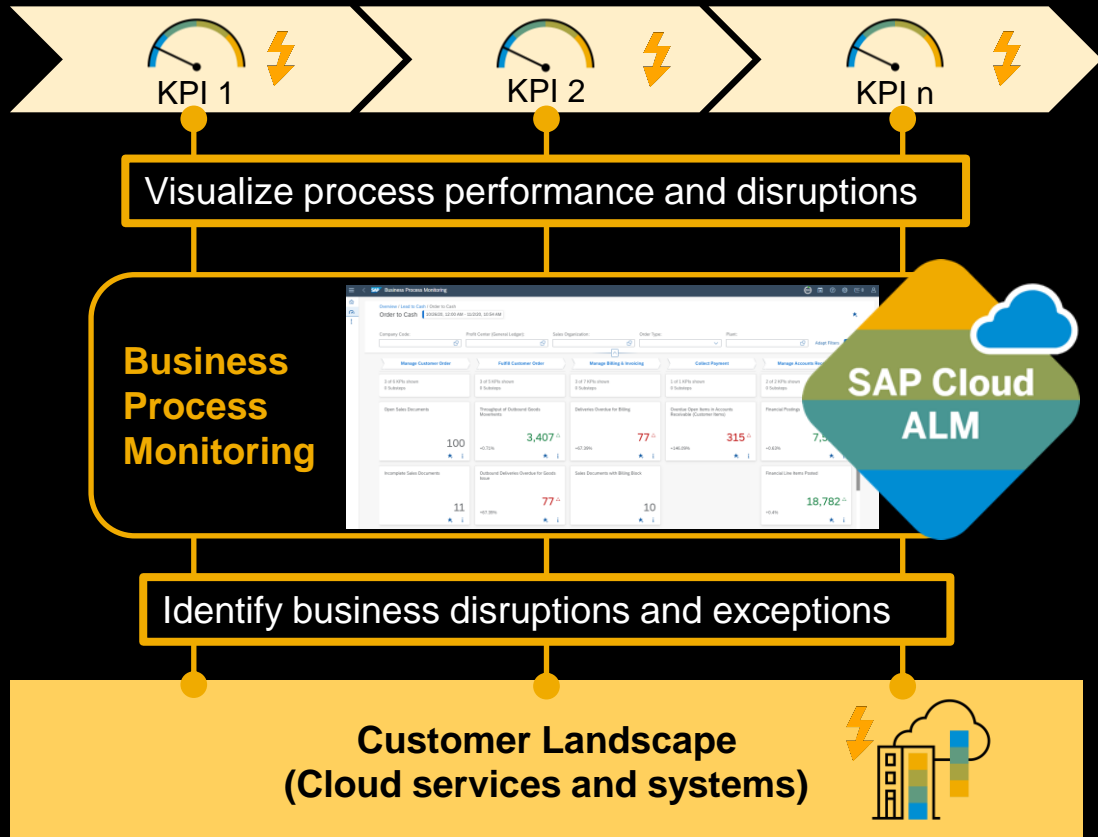

SAP Cloud ALM for Operations – Functional Overview

Business Process Monitoring

Detects operational issues in business process execution and reacts to it

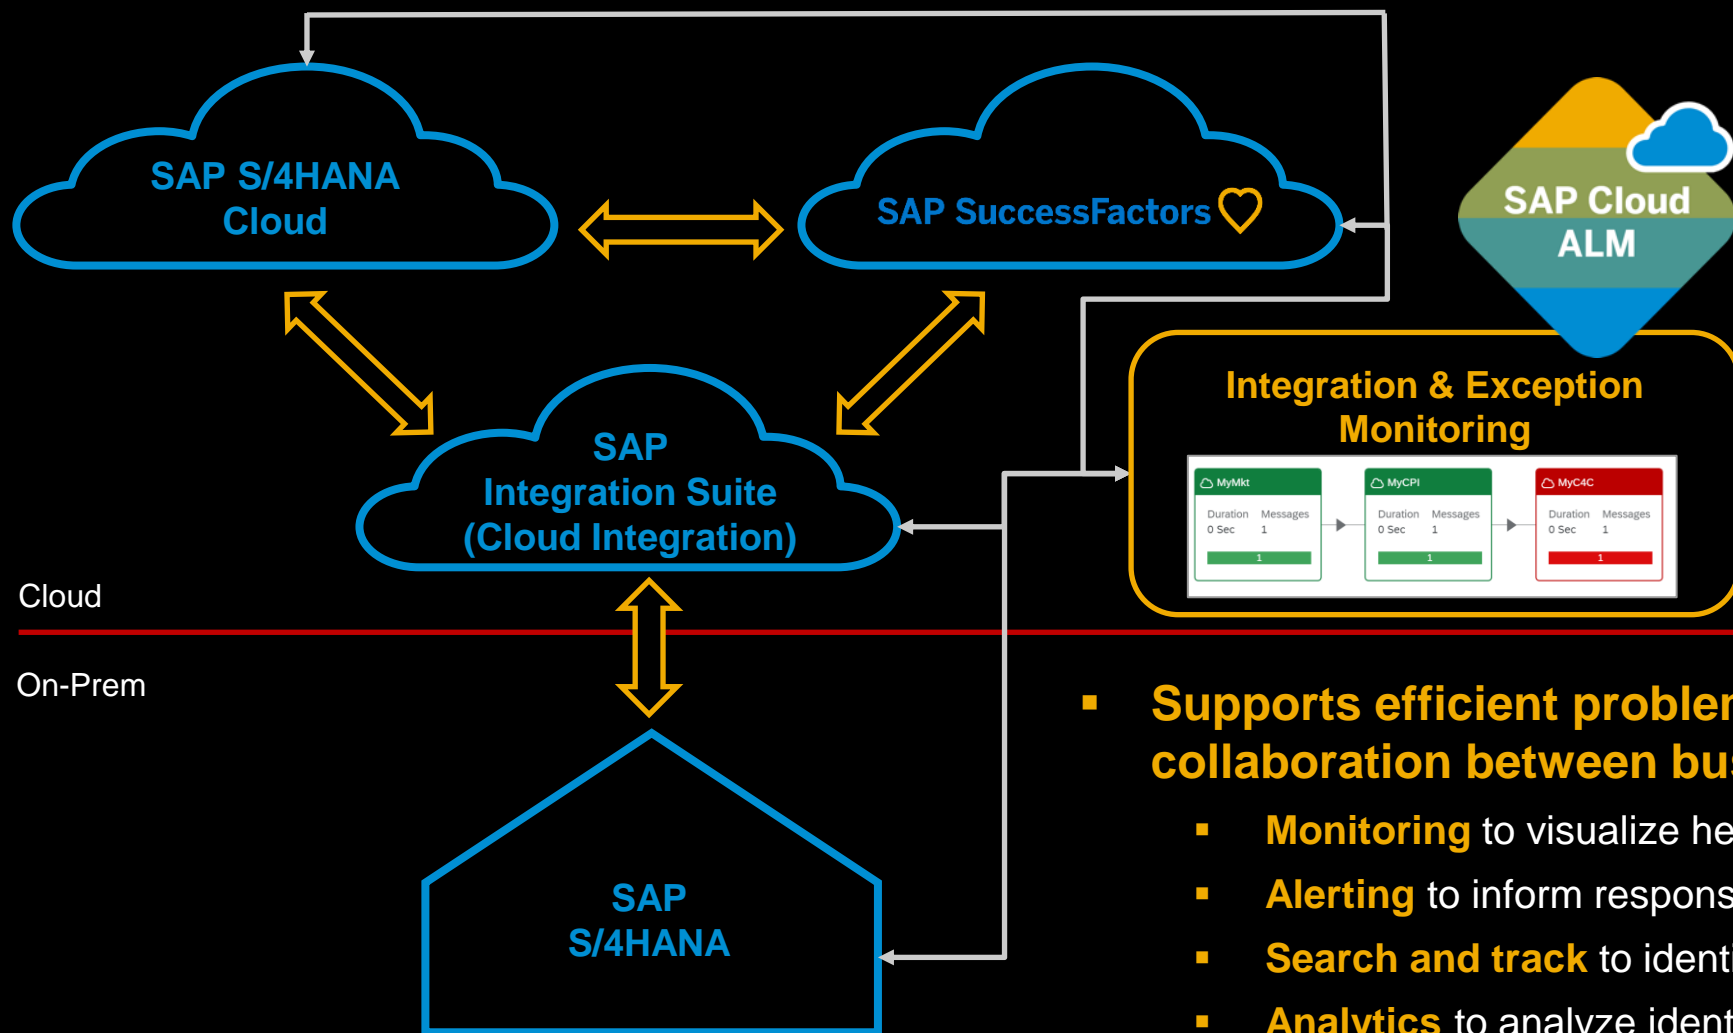

Business Processes of the Intelligent Suite

- Provides **transparency on end-to-end business processes** within a distributed solution landscape
- Ensures **business continuity** to increase business process execution quality and performance
- **Monitors processes' health and detect anomalies** during process execution including **drill down into business documents**
- **Alerts users directly on process disruptions** including **automated problem resolution**
- Delivers **pre-defined process content** including **auto-discovery of relevant business process KPI's** to be switched on

Integration & Exception Monitoring

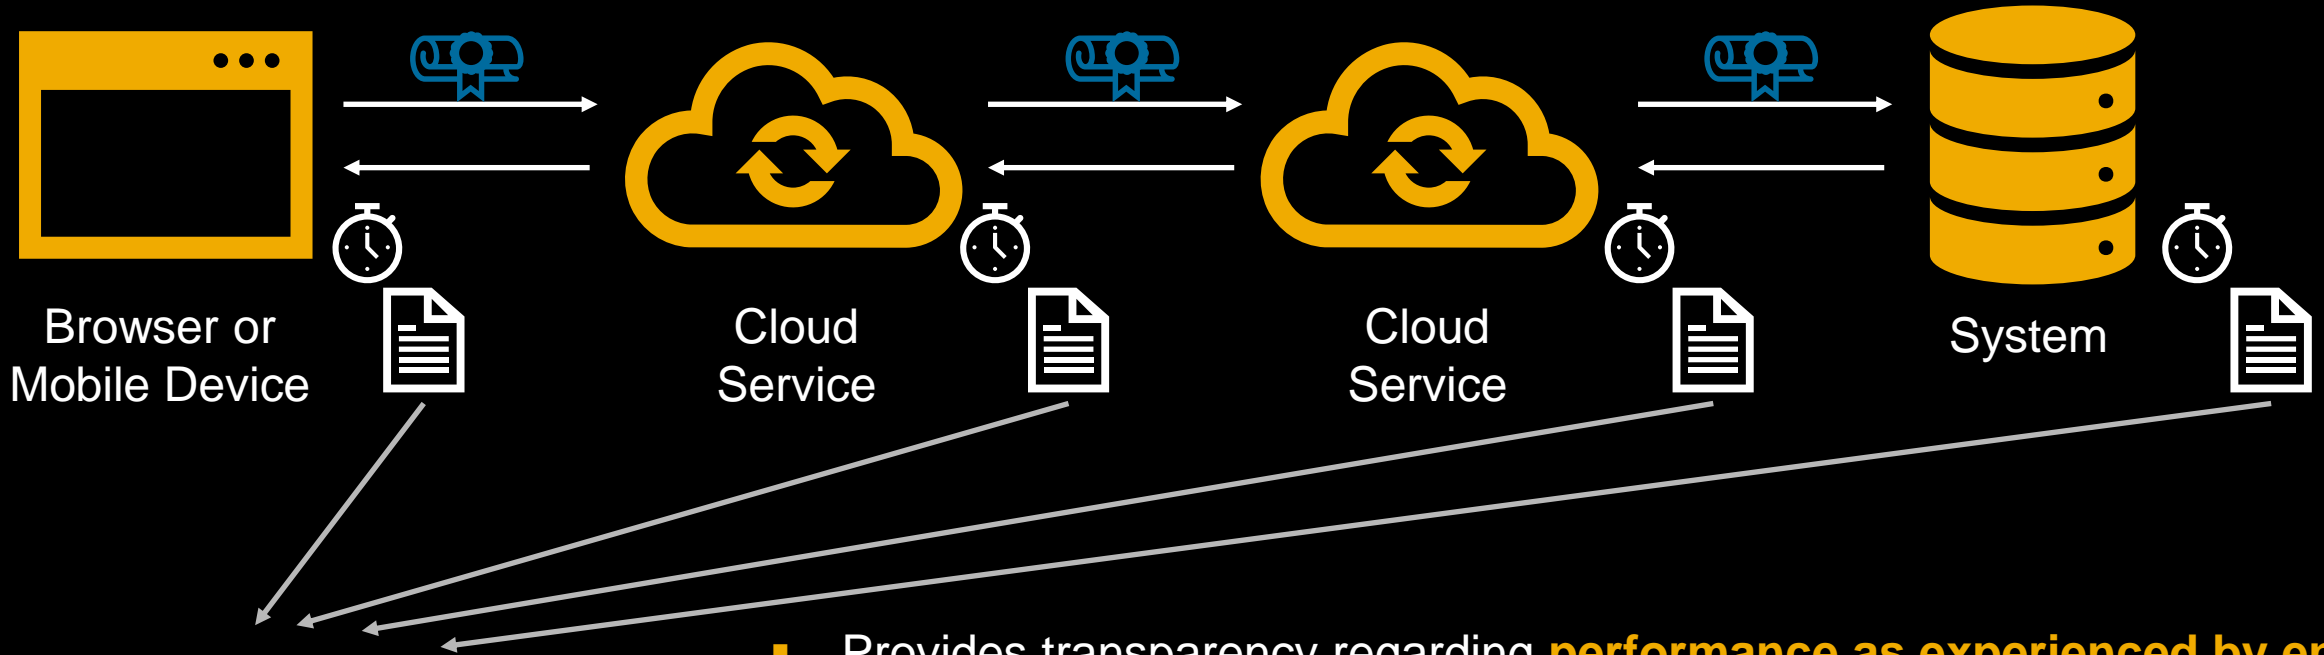

Ensures reliable data exchange between cloud services and systems

- **End-to-End monitoring** by correlating single messages to **end-to-end message flows** across cloud services and systems
- Monitoring of **integration related exceptions**
- Support of **peer-to-peer interfaces** as well as **orchestrated integration**
- **Supports efficient problem resolution process** and **collaboration between business and IT**:
 - **Monitoring** to visualize healthiness of integration aspects
 - **Alerting** to inform responsible persons in business and IT
 - **Search and track** to identify business driven problems
 - **Analytics** to analyze identified critical issues
 - **Operation automation** to trigger corrective activities

Real User & Performance Monitoring

Allows to understand performance and utilization from end user perspective

Real User & Performance Monitoring

SAP Cloud
ALM

- Provides transparency regarding **performance as experienced by end users** as well as the **utilization of business functionality**
- Measurement at frontend and server side to **identify actual root cause of performance problems** (frontend, network, cloud services and/or systems)
- Utilization of SAP Passport technology allows to **correlate performance data** measured at frontend, cloud service and/or system side

Job & Automation Monitoring

Provides transparency regarding job executions & automated activities

- Ensures **efficient job and automated task execution to increase operation quality**:
 - by monitoring **job/task executions health** and **detection of anomalies**
 - by directly **alerting both business and IT users** on disruptions and exceptions
 - by providing **details at job/task execution level** to enable root cause analysis
 - by **reducing configuration effort** by making use of historical execution information
- Job & Automation Monitoring is planned to be enhanced with **operation flows** to trigger corrective actions e.g. job restarts and **job & automation analytics** to enable trend analysis based on historical data

Health Monitoring

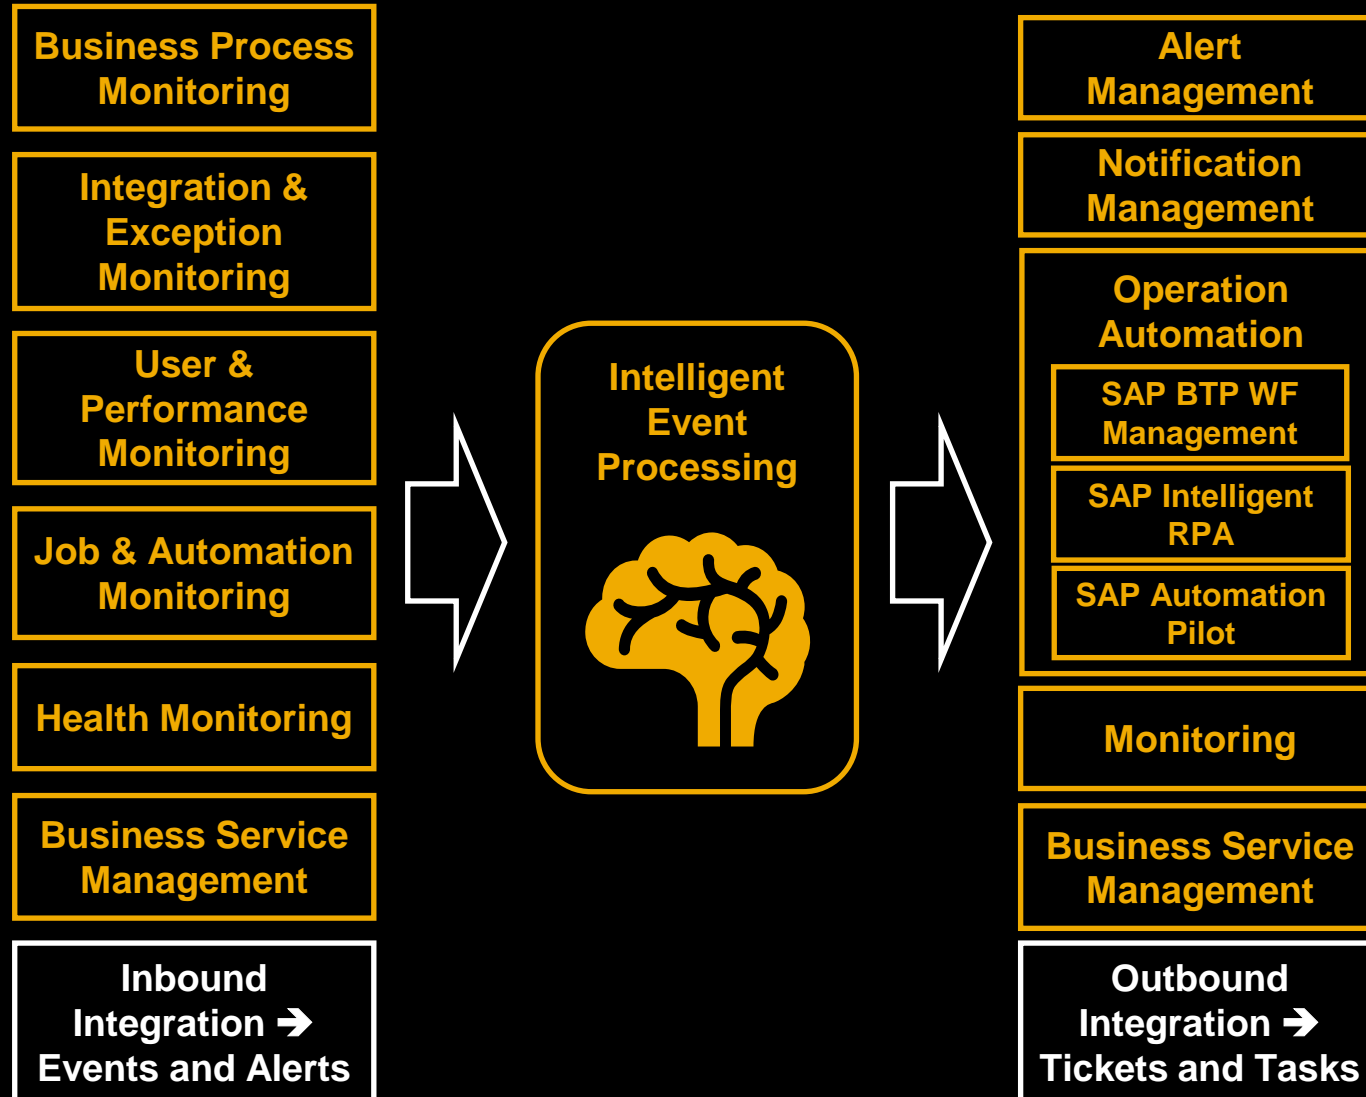

Check Application Health of Cloud Services and Systems

- **Monitoring of technical metrics and events** for cloud services and systems:
 - By executing **application health checks for SAP built cloud services**
 - By delivering **technical metrics and events for customer applications** built at SAP Business Technology Platform
 - By providing metrics for **light-weight system monitoring for SAP ABAP** based systems
- Provides **embedded alerting** including the capability to **trigger notifications and corrective actions**
- Allows **embedded analytics** to analyze **trends and root causes** for discovered problems

Intelligent Event Processing

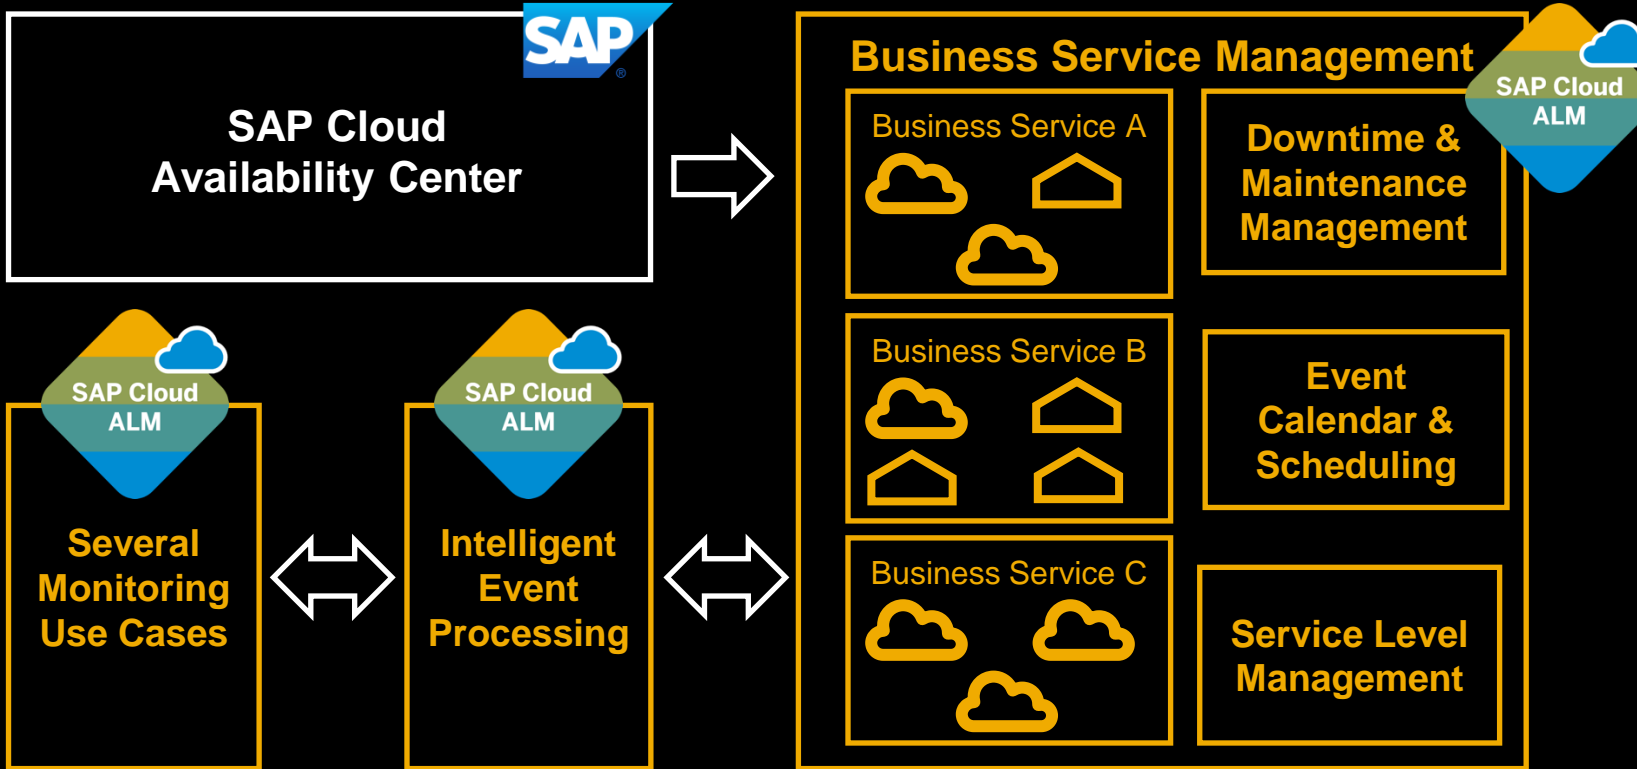

Process Events from Different Sources in An Unified and Efficient Way

- **Central intelligence** to enable **efficient communication** between internal as well as external senders and receivers
- **Unified event processing** based on rules for **automatically as well as manually triggered events**
- Supports **centralized configuration** as well as **decentral configuration** of event handling rules
- **Foundation for intelligent correlation of events** e.g. correlation of manually generated notifications with automatically generated alerts

Business Service Management

Expose IT Related Information to Be Understood by Business Users

- **Service Level Management:**

- **Automatic and continuous calculation** of service level for services or systems and **consolidation** to business services level
- Embedded **service level reporting dashboard**
- Definition of **service level objectives** at business service level

- Business service as **collection of cloud services and systems**
- Import of **events triggered by SAP** (maintenance, disruptions, degradation, communication events) including **outbound API**
- **Automatic triggering of:**
 - **Alerts, notifications, operation flows, tickets, tasks, ...**
 - **Disruption/degradation events FROM monitoring TO BSM (*)**
 - **Maintenance events FROM BSM TO monitoring (*)**
- Maintenance and execution of **customer specific events** (single and reoccurring events)

SAP Cloud ALM for Operations – Functional roadmap

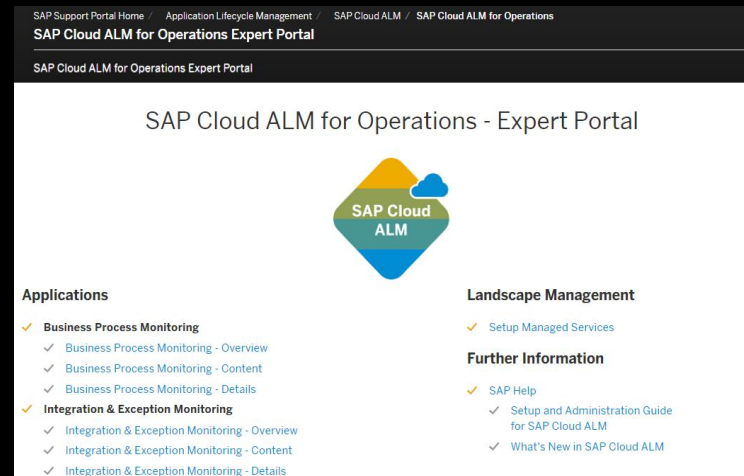

SAP Cloud ALM – Onboarding & Usage

Step 1: Try it out and onboard yourself

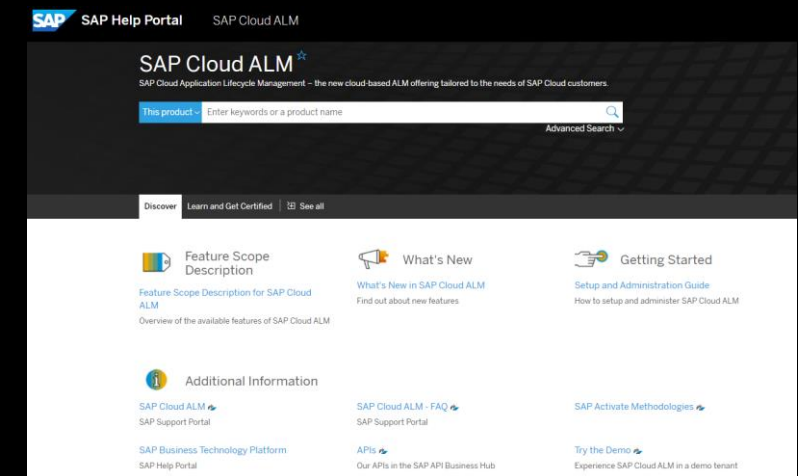

All information related to demo environments and onboarding can be found at the [SAP Cloud ALM Home Page](#) and [SAP Help Portal](#)

Step 2: Setup technical prerequisites and connectivity

All information related to the technical setup can be found at the [SAP Cloud ALM for Operation Expert Portal](#)

Step 3: Configure and use the applications

All information related to application configuration and usage can be found in built-in SAP Web Assistant, [SAP Cloud ALM for Operation Expert Portal](#) and [SAP Help Portal](#)

SAP Enterprise Support **Value Map**

SAP Enterprise Support – Next-Generation Value Maps

SAP Enterprise Support Value Maps – an empowerment and support program, which provides direct access to SAP experts, interactive social collaboration forums, acceleration of learning and prescriptive guidance, designed to help you in adopting intelligent technologies, manage hybrid landscapes and gain agility to focus your resources on innovation. Value maps guide you through the knowledge, skills, and services needed to address your business challenges, enabling your company to lead in the experience economy.

Prescriptive Approach

Structured content enables guidance, simplification, and acceleration of support offerings consumption across the whole lifecycle.

Empowerment

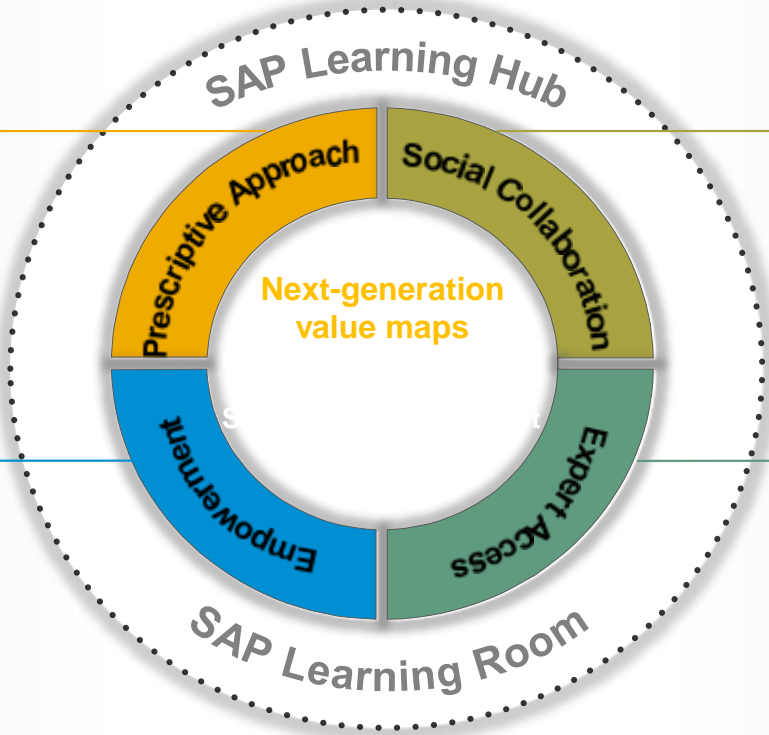

New interactive learning formats and integrated tools – including gamification, social media-based interactions, and progress tracking provide fast and engaging empowerment.

Social Collaboration

Social learning forums allows users to get guidance and exchange ideas, skills, and best practices with SAP Experts and their peers.

Expert Access

Expert-led sessions and collaboration give users a direct channel to proven and relevant advice, best practices, business insight, and technology know-how.

Benefits of Utilizing SAP Learning Hub

All value maps, one platform

Embrace innovation adoption and digital transformation

Individualized, prescriptive learning journeys

Record of learning accomplishments

Learning new skills 24x7

E2E value maps support and functional experts

Interactive social support

Gamification*

SAP Enterprise Support Value Maps

Application Lifecycle Management Value Map

How you can use multiple ALM offerings from SAP to manage your application lifecycle?

SAP Cloud ALM

- Introduction and Roadmap of SAP Cloud ALM
- Introduction to the implementation portal for SAP S/4HANA Cloud

Setup, Installation, and Configuration of SAP Solution Manager

- Discover the features and functionalities of SAP Solution Manager 7.2
- Get information on the planning steps and prerequisites for the installation or an upgrade to 7.2
- Explore the prerequisites and execute the basic configuration
- Learn how to set up EarlyWatch Alert and enable service delivery readiness
- Integrate cloud systems in SAP Solution Manager 7.2
- Embed SAP HANA and SAP S/4HANA systems in SAP Solution Manager 7.2
- Secure SAP Solution Manager and keep track on alerts and security notes

Process Management and Test Management

- New modeling capabilities to document your business processes
- Transfer of existing process documentation to SAP Solution Manager 7.2 with the content activation procedure
- Activation of Usage and Procedure Logging
- Reduced costs and less errors in a production system while improving the test coverage
- Systematic testing approach to detect, prevent, and control application performance risks
- Replacement of costly, time-consuming manual testing processes with automated tools
