Additional Information

SAP Cloud ALM is part of SAP Enterprise Support. The usage rights are included in the SAP Cloud Service subscription and in SAP Enterprise Support. You can learn more about the usage rights of SAP Cloud ALM here.

Further Information on Business Process Monitoring can be found on our SAP Cloud ALM for Operations Expert Portal.

Business process monitoring aims to provide transparency about the end-to-end process health based on predefined key performance indicators (KPIs).

4. Explore further information which are specifically related to the corresponding adoption uses cases through help portal, expert portal best practices and so on.

Library Management in SAP Cloud ALM

Library Management in SAP Cloud ALM Concept

- New service planned for Library Management

- Usage of library types (e.g. Application Library) to organize unique library elements (e.g. Fiori Application)

- SAP Cloud ALM plans to provide SAP standard libraries types with standard attributes

- SAP Cloud ALM plan to provide option for custom libraries types with custom attributes

- A library elements can be be-directional referenced in SAP Cloud ALM, e.g.

  - Business Activity -> Solution Flow;
  - Application -> Solution Activity, Task or Test Case;
  - Document -> Solution Activity

- Libraries do not allow differences between original and reference (e.g. assign application only to solution activity reference)

SAP Cloud ALM

Library Management

SAP Libraries
- Application Library
- Business Activity Library
- Solution Activity Library
- Configuration Library
- Interface Library
- Development Library

Custom Libraries
- Business Roles Library
