Important: Registration change for this call!

To further receive e-mail invitations to future SAP Community Call for SAP Cloud ALM Experts, we need to ask you to register again.

Please go to the [landing page](#) and click on “Register Now”. On the following page, please select all calls you want to get invited to.

You will only get invitations to the selected calls!

[Re-Register now!](#)

The screenshot shows the SAP Community Call registration page. At the top, there is a navigation bar with the SAP logo, 'Home', and 'Webinar Replays'. A green arrow points to the 'Register' button in the top right corner. Below the navigation bar is a large banner with the text 'SAP Community Call for SAP Cloud ALM Experts' and a sub-headline 'Join us every month to interact with experts and your peers as they share news, lessons learned and best practices about SAP Cloud ALM for implementation and operations.' A 'Contact us' button is visible in the bottom right of the banner. Below the banner, there is a section titled 'What to expect' with a green arrow pointing to the 'Register Now' button. Below that, there is a section titled 'Upcoming webinars' with a green arrow pointing to a list of calls. The list includes:

- SAP Community Call for SAP Cloud ALM Experts July 2022
 - Description:** Focus topic of this webinar: SAP Cloud ALM for implementation
 - Start time:** 4pm CEST / 10am EST
 - Speakers:** Tonja Kehrer | SAP SE
 - Date:** July 06, 2022
- SAP Community Call for SAP Cloud ALM Experts August 2022
 - Description:** Focus topic of this webinar: SAP Cloud ALM for operations
 - Start time:** 4pm CEST / 10am EST
 - Speakers:** Tonja Kehrer | SAP SE
 - Date:** August 03, 2022
- SAP Community Call for SAP Cloud ALM Experts September 2022
 - Description:** Focus topic of this webinar: SAP Cloud ALM for implementation
 - Start time:** 4pm CEST / 10am EST
 - Speakers:** Tonja Kehrer | SAP SE
 - Date:** September 07, 2022
- SAP Community Call for SAP Cloud ALM Experts October 2022
 - Description:** Focus topic of this webinar: SAP Cloud ALM for operations
 - Start time:** 4pm CEST / 10am EST
 - Speakers:** Tonja Kehrer | SAP SE
 - Date:** October 05, 2022

About this Call

WHY Build up expert knowledge, share experiences, ask questions

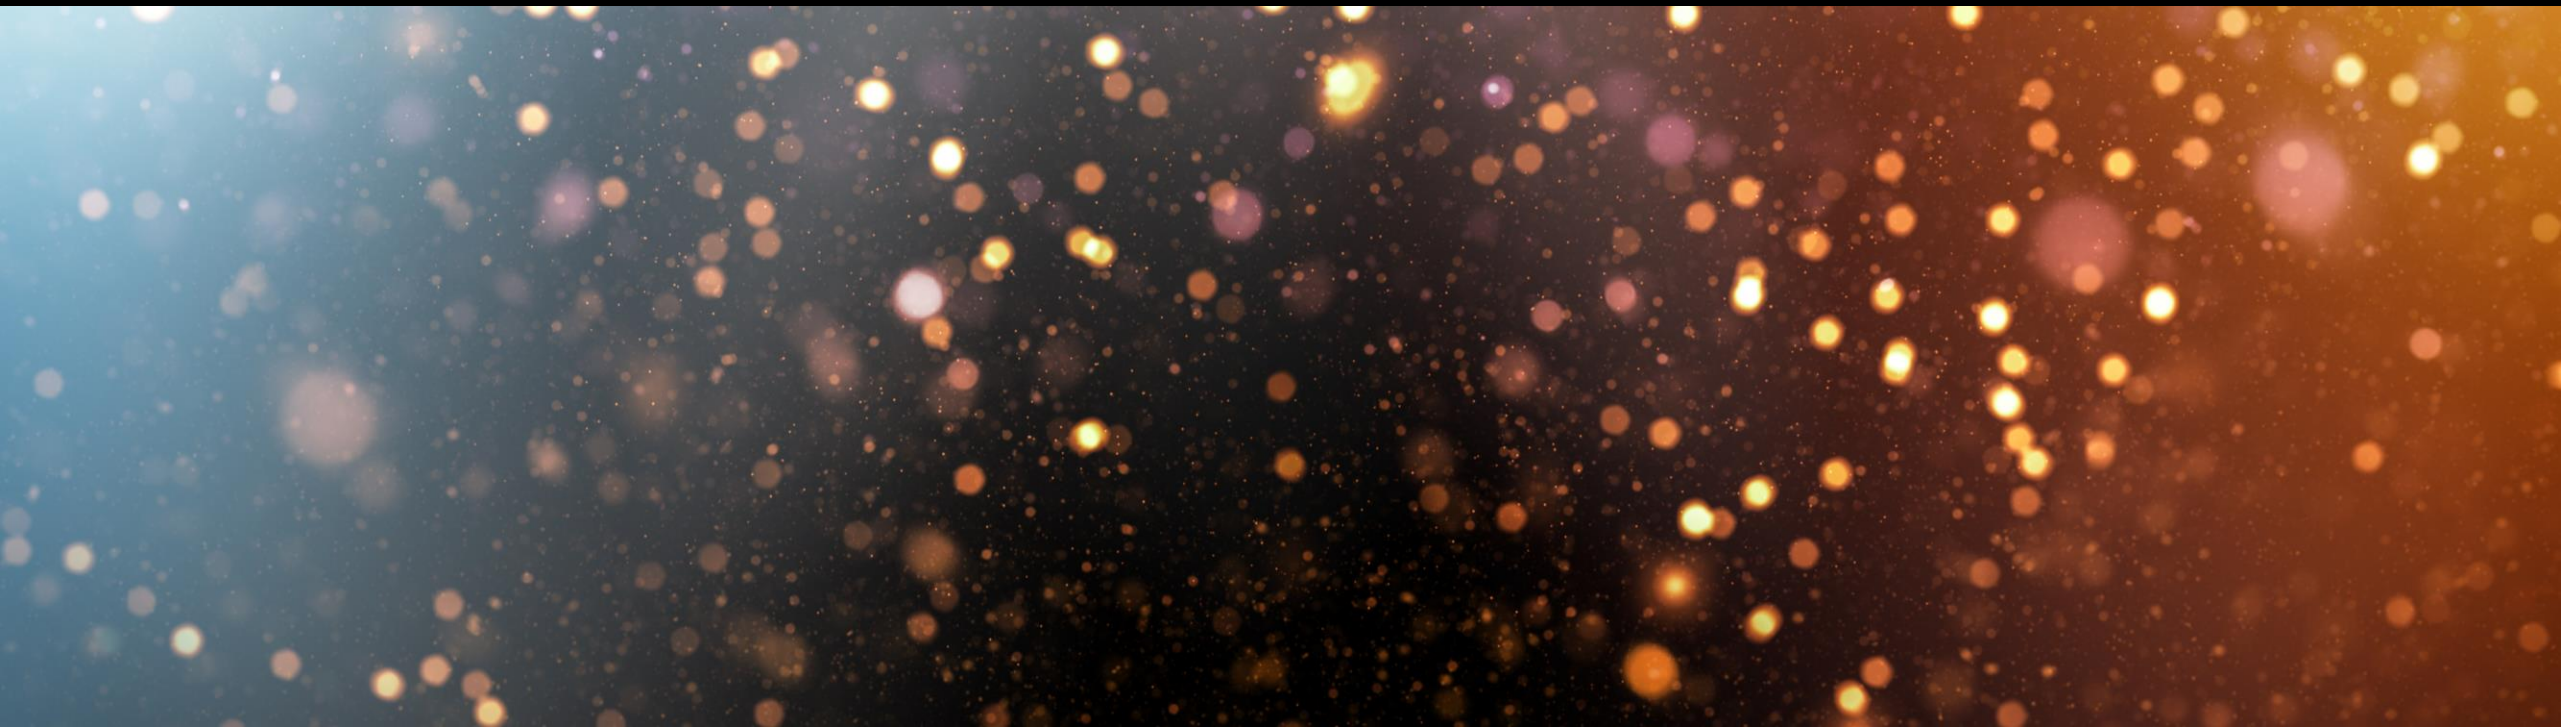

WHEN Monthly webinar series about SAP Cloud ALM

WHAT Concepts, live demos, alternating focus on implementation and operations

WHO Beginners, Experts and anyone interested in SAP Cloud ALM

Release Management

What is a Release?

A collection of timelines that can be assigned to multiple Projects. Each timeline in a Release is called Release version. SAP Cloud ALM supports deployment on demand but you can have a planned deployment event at the end of each Release version.

Purpose of Release

- Indicates multiple Release versions
- Indicates Landscape which will be used*
- Assignment of Release to a Project will bring Landscape information to the Project*

Purpose of Release Version

- Assigned to Requirements by Business users indicating expected availability
- Assigned to Features for Deployment planning and execution

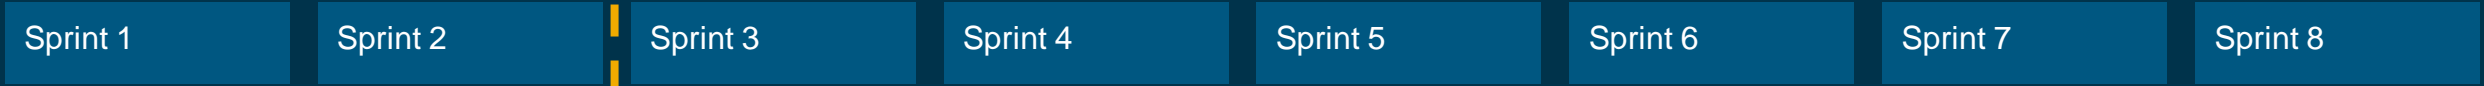

**Planned capability*

Lab Preview

Release

Project 1

Project 2

Release

Project

Release Management

- Create a Release in the Projects application
- Define your Release Versions to divide the release into timeboxes to frame your production go-live
- Assign the Release to a project in order to use the release versions for deployment planning

The screenshot shows the SAP Project Manager interface. On the left, the 'Manage Projects' sidebar has a 'Releases' tab highlighted with a red box. The main area displays the configuration for 'Release H1 / 2022'. The 'Title' field contains 'Release H1 / 2022' and the 'Description' field contains 'Release Plan for 1st half of 2022'. Below, the 'Release Versions' section lists six versions (RV 01/22 to RV 06/22) with their respective date ranges: Jan 1, 2022 - Jan 31, 2022; Feb 1, 2022 - Feb 28, 2022; Mar 1, 2022 - Mar 31, 2022; Apr 1, 2022 - Apr 30, 2022; May 1, 2022 - May 31, 2022; and Jun 1, 2022 - Jun 30, 2022.

The screenshot shows the configuration for a project named 'CDM 05.11.2020 updated'. The status is 'On Track', the task template is '(Not Selected)', and the current phase is 'Explore'. The 'General Information' tab is active. The 'Context' section shows the project name and task template. The 'Status and Planning' section shows the status as 'On Track' and the current phase as 'Explore'. The 'Integration Scenario' section shows the scenario as '(Not Selected)'. The 'Release' field is highlighted with a red box and contains 'Release H1 / 2022'. The 'Object' section shows the project leads as 'Reinhold Konnerth'.

Release Management

- Release Version can be assigned to a requirement to indicate a planned release to production
- The feature related to the requirement holds the actual deployment date by the assigned Release Version
 - The end date of the Release Version can be seen as the go-live date

The screenshot shows the 'Additional Information' tab of a requirement. The 'Status and Planning' section is highlighted with a red box, showing the 'Release Version' as 'RV 06/22' with a date range of 'Jun 1, 2022 - Jun 30, 2022'. Other fields include 'Requirement Status: In Refinement', 'Priority: Medium', 'ID: 3-7700', and 'Type: Requirement'.

Context	Status and Planning	Object
Project: CDM 05.11.2020 updated	Requirement Status: In Refinement	ID: 3-7700
Scope: -	Priority: Medium	Type: Requirement
Workstream: -	Release Version: RV 06/22 Jun 1, 2022 - Jun 30, 2022	Source: Manually Created
	Start: (Not Assigned)	Tags: -
	Due: (Not Assigned)	

The screenshot shows the 'Relations' tab of a feature. The 'Release Version' is highlighted with a red box, showing 'RV 06/22' with a date range of 'Jun 1, 2022 - Jun 30, 2022'. The feature status is 'In Specification'. Below, a table shows the relationship between the feature and a requirement.

Title	Type
New procurement application experience	Requirement

Release Management

- Based on the status and the release version the features to be deployed to production can be figured out easily
- As soon as all features related to a requirement are deployed to production you can confirm the requirement

Change Management

SAP Cloud ALM - **Deployment** integration

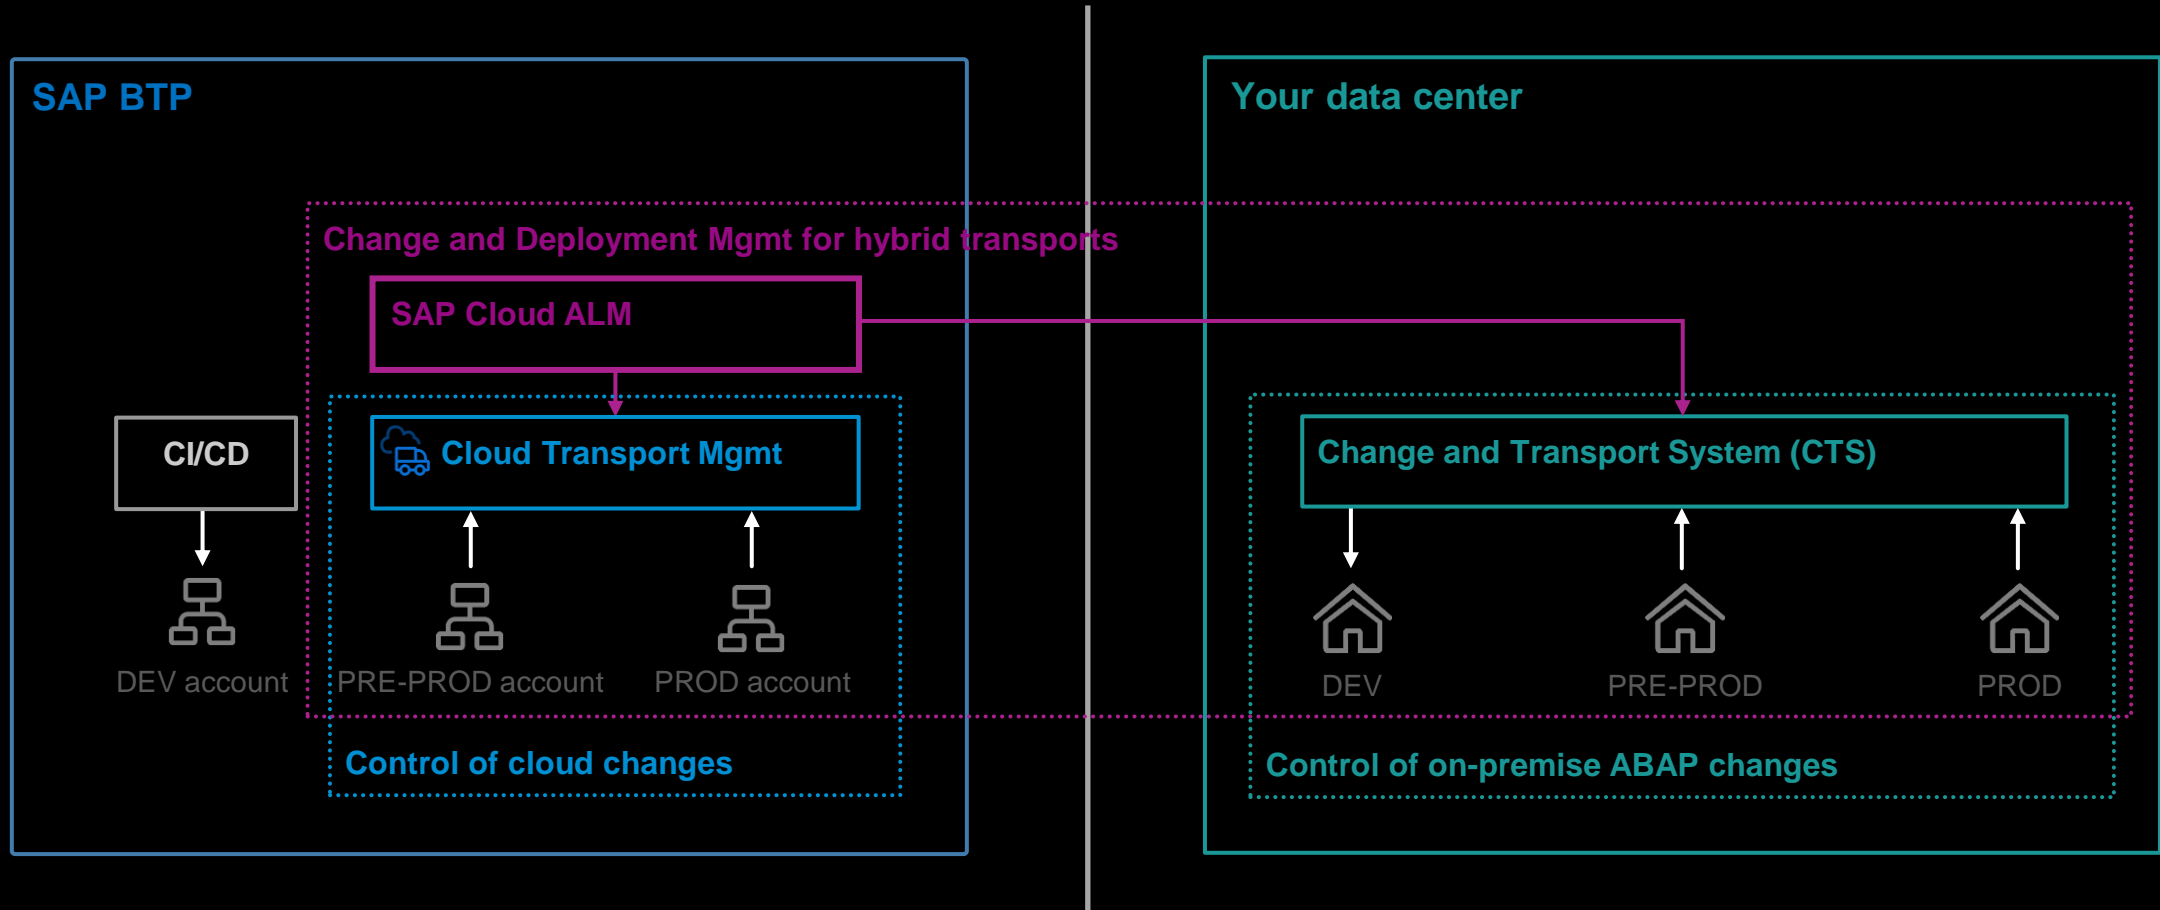

This is the current state of planning and may be changed by SAP at any time.

Deliver your changes toward production

Holistic picture of delivery approaches – with SAP Cloud ALM

Hybrid change mgmt

Feature to serve hybrid use cases

- Transports of Cloud Transport Management and Change and Transport System assigned to one feature
- Deployment to production for different SAP solutions can be synchronized

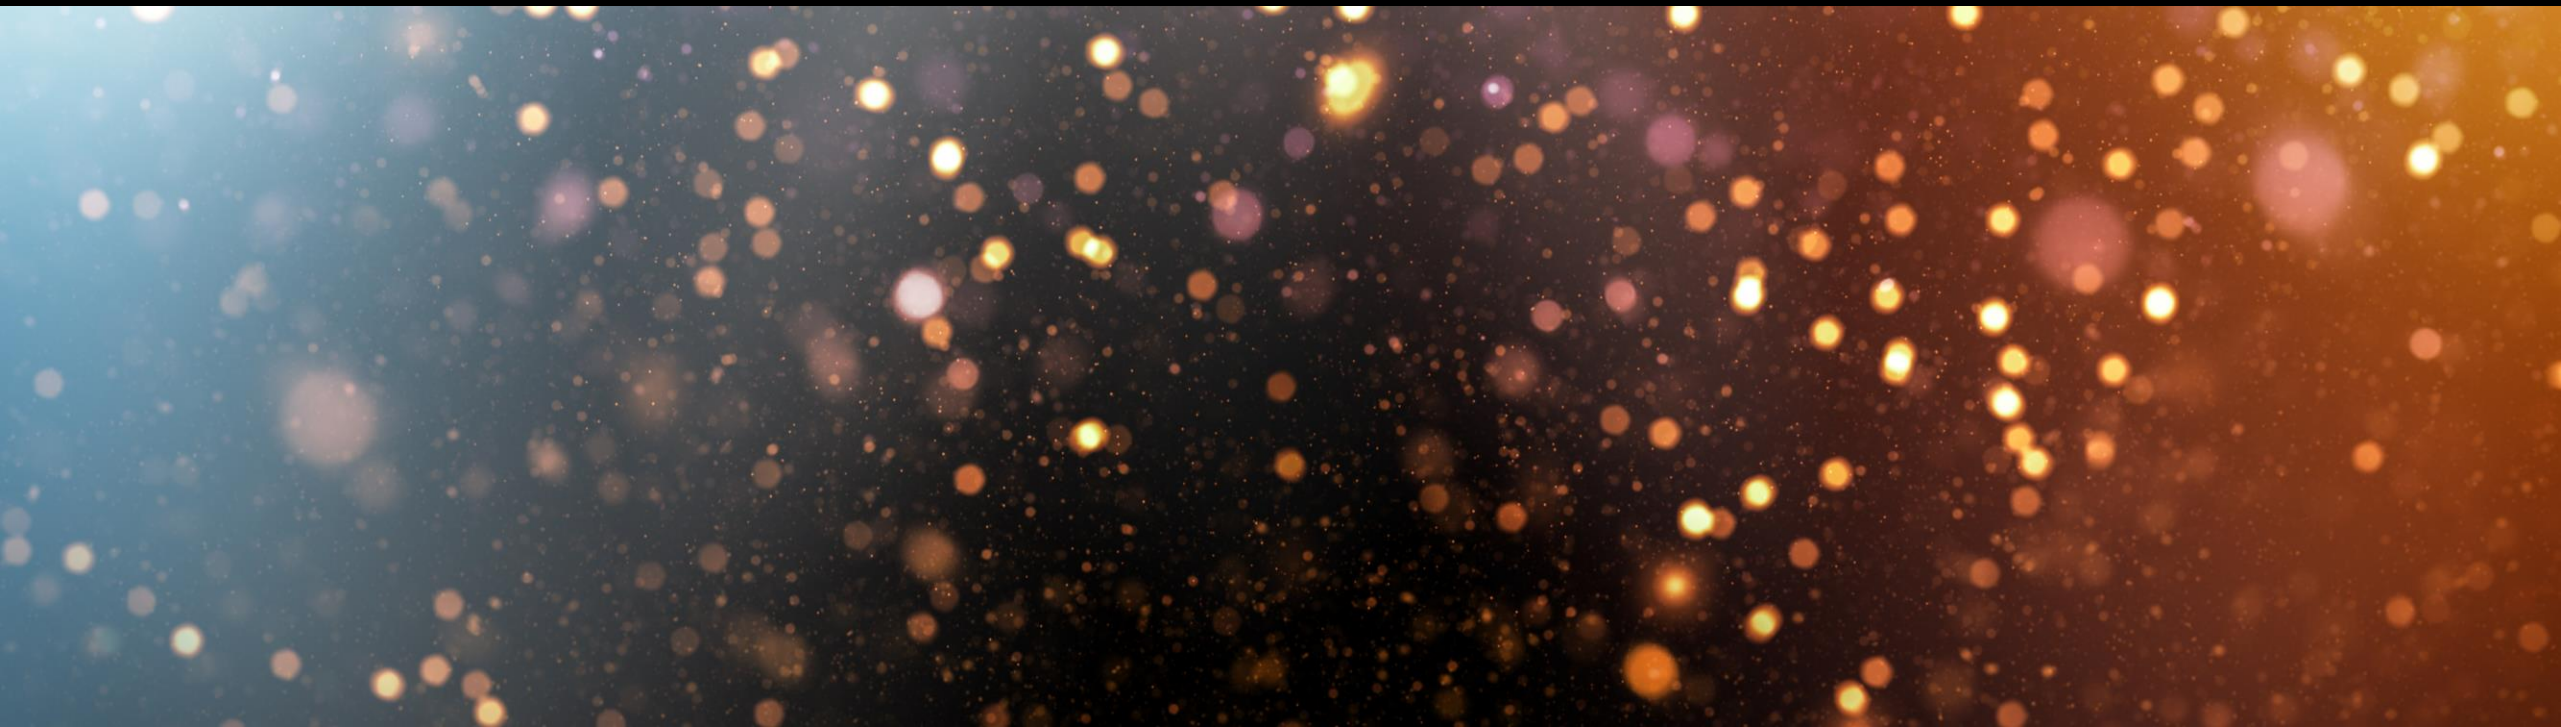

The screenshot displays the SAP Cloud Transport Management (CTM) interface for a project titled "CPI and on-prem demo". The project details include:

- Project: CDM Test Project
- Scope: -
- Workstream: Integration
- Priority: High
- Release Version: Deployment 07 / 22
- Release Period: Jul 1, 2022 - Jul 31, 2022
- Status: Deployed

The interface shows two transport objects under the "Transports (2)" tab:

ID	Title	Status	Target Tenant
Export Tenant: CPI_CF_DEV			
540	ODataAPIforSalesOrder - Test	Deployed in CPI_CF_PRD	
Export Tenant: O11~000			
O11K903278	Import Demo	Deployed in O13~000
