# About Sabic

- SABIC (Saudi Basic Industries Corporation) is one of the largest petrochemicals manufacturers based in Saudi Arabia.
- The company was founded in 1976 to produce chemicals, polymers, and fertilizers from oil by-products.
- SABIC is the second largest company in the Middle East and Saudi Arabia and the fourth largest petrochemical producer in the world.

# About Sabic

- 70% of SABIC shares are owned by Saudi Aramco.
- SABIC has four main business units: Chemicals, Polymers, Fertilizers, Metals and Specialties
- The company employs 55,000 people in 37 countries.
- An OpenText customer since 2011.

# Single ECM platform strategy

## Main issues

- Uncontrollable flow of documents
- Complex IT infrastructure
- Fragmented information (IBM FileNet, SharePoint, file systems)
- Difficult for users to retrieve information from multiple storages

## Benefits

- Transparent processes
- Speedier processes
- Reduced TCO
- Easiness of developing additional apps
- Long-term storage with record management
- Users working in familiar interfaces

SAP Extended ECM by OpenText: 55,000 users.

In 2020: 300 TB of documents, data volume increase by 200 GB per day.

# Single ECM platform strategy

## Main issues

- Decreased system productivity
- Costs increase
- Difficult to access documents in different SAP modules
- Difficult to manage the flow of paper documents

## Benefits

- A single point of access to all documents
- Reliable, long-term storage of SAP data and documents
- Sped up migration to S4/HANA (planned for 2021)
- Converting all types of physical documents (financial, HR) to digital format

SAP Archiving and Document Access by OpenText: 20,000 users + increase to 55,000 (2020/21).  
SAP Information Capture by OpenText: 5 mln pages per year.

# Invoice processing

## Main issues

- A long cycle to process an invoice
- Processing paper documents
- No transparency of the current status in invoice processing
- Different invoice processes in different business units

## Benefits

- Controlling cash flows
- Higher productivity thanks to automated invoice posting
- Better relationships with vendors
- Access to data on all invoices and documents
- Reports in line with the regulatory bodies' requirements

SAP Invoice Management by OpenText: 1 mln invoices per year.

# HR documents

## Main issues

- Difficult to find paper documents
- Increasing expenses related to paper documents management
- Employees' files stored in different business units
- No single solution for HR

## Benefits

- Quick access to important documents
- Reduced costs related to legal counselling, audit and administrative support
- Higher accuracy when processing HR documents
- HR documents fully controlled by RM
- Migration to SuccessFactors (+SAP SuccessFactors Extended ECM by OpenText) is planned.

SAP Employee File Management: 55,000 users

# Managing media content

## Main issues

- No control over the existing assets
- No integration with other apps
- Re-creating assets
- Slow approval processes
- Outdated copyright management system

## Benefits

- Single point of access and management for all media content
- Consistency of brand throughout all communication channels
- Reduced costs
- Managing copyright
- Sharing with agencies

SAP Digital Asset Management by OpenText: 500 users

# Implemented solutions and next steps
