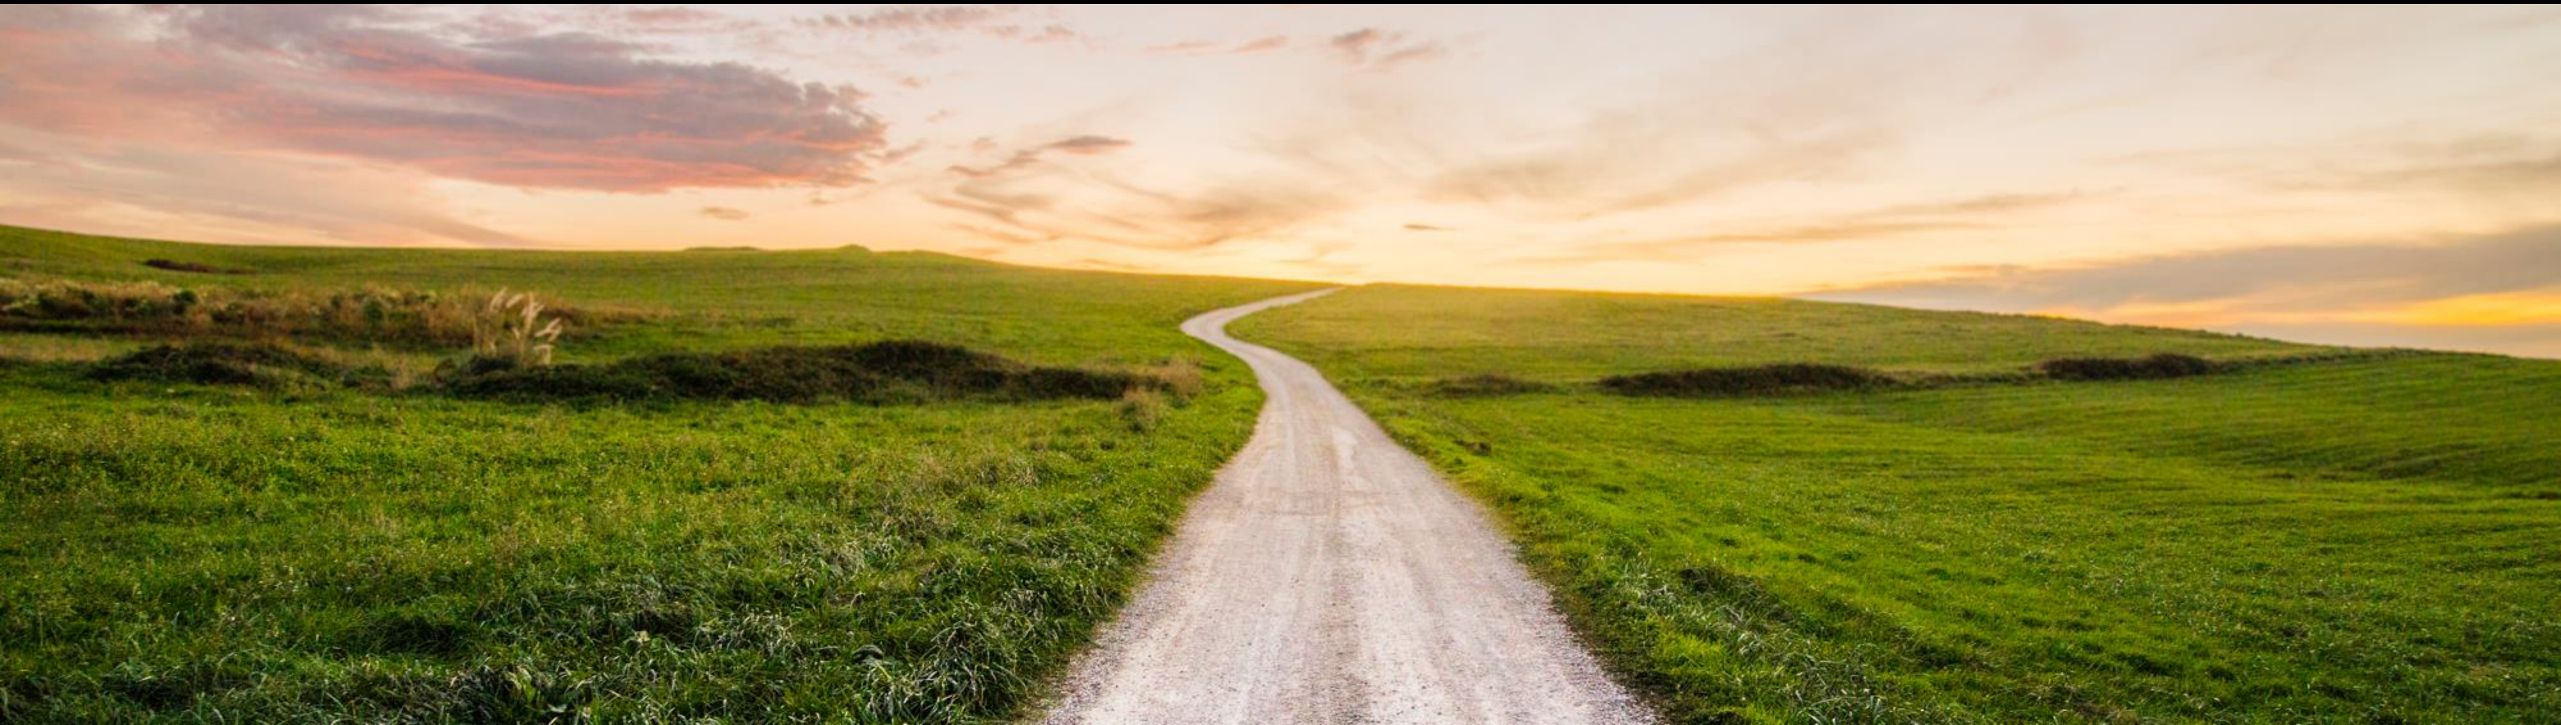
Introduction



SAP Cloud ALM – A brand-new, cloud-based application lifecycle management offering

SAP Cloud ALM

is cloud-native and open

For the intelligent enterprise

- for cloud-centric customers
- manages cloud, hybrid and on-premises solutions
- supports all components of the Intelligent Enterprise

In the public cloud

- Rethought, newly designed, and built on modern cloud technology
- Ready for immediate consumption
- Cost-efficient for customers

Supporting 3500+ Customer and Partner in Implementation and Operations*

Public

*July 2023

Introduction – SAP Cloud ALM for Implementation

SAP Cloud ALM provides the harmonized implementation experience for the intelligent enterprise, covering all relevant SAP solutions for all customers

Out-of-the-Box

SAP Standard Content

SAP Cloud ALM

Open

Integrated

Traceable

Design

- Start with Best Practice Content to run your Fit-2-Standard workshops
- Create own processes with integrated authoring capabilities
- Collect requirements as an initial backlog

Build

- Based on the SAP Activate methodology with template roadmaps for agile implementation projects
- Extended by your own tasks and user stories
- Integrated planning and reporting

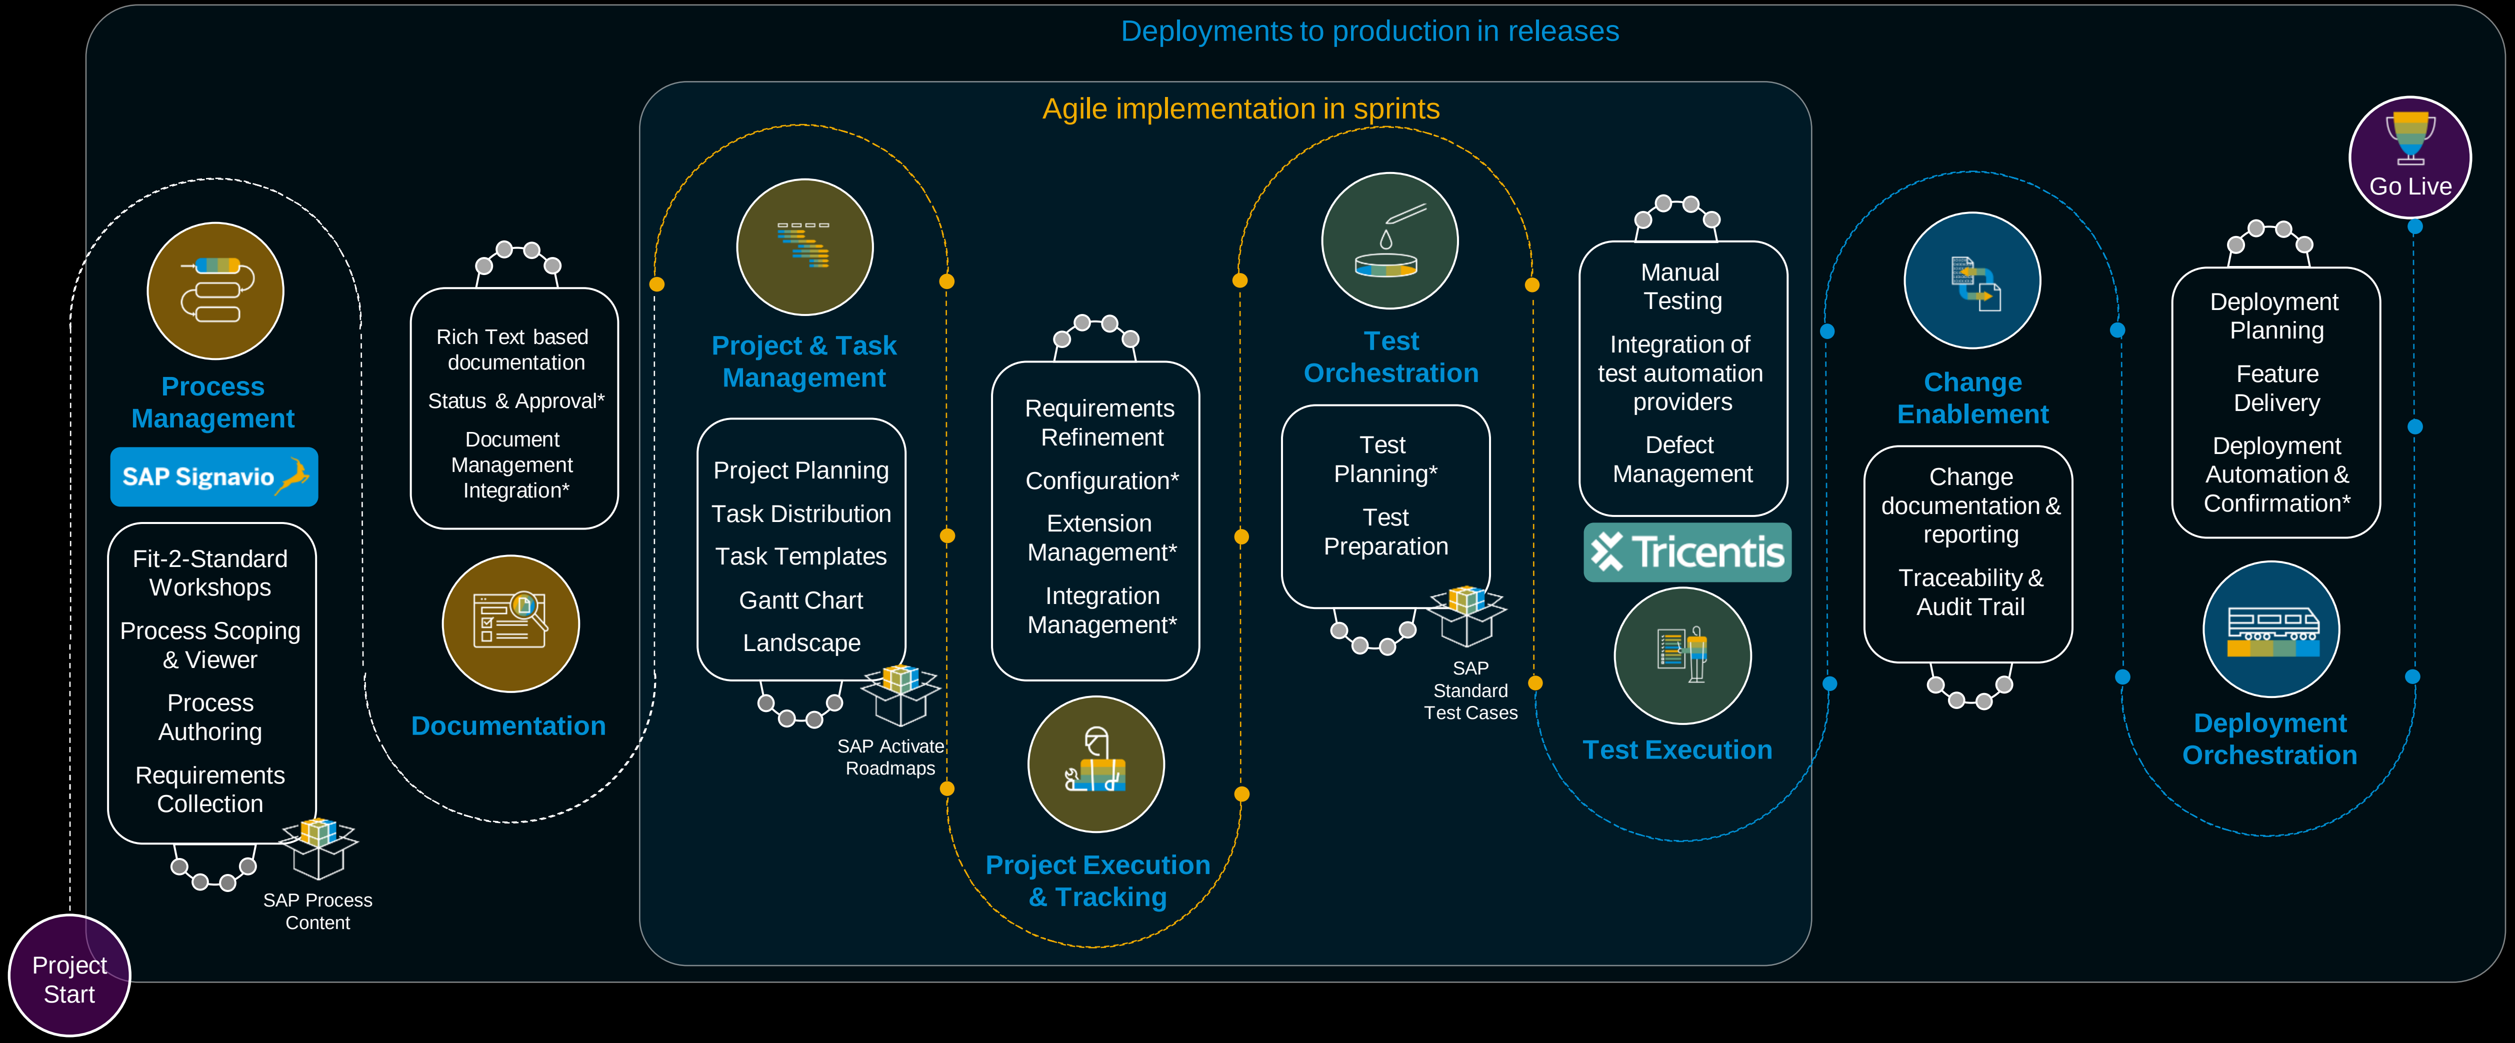
Test

- Manage all test from user acceptance to regression
- Manual testing with test step based approach
- Integration of automatic execution engines

Deploy

- Plan your releases and orchestrate consistent deployment to production
- Enable change and provide traceability and audit trails

Capabilities in detail



Deployments to production in releases

Agile implementation in sprints

Project Start

Process Management

SAP Signavio

- Fit-2-Standard Workshops
- Process Scoping & Viewer
- Process Authoring
- Requirements Collection

SAP Process Content

- Rich Text based documentation
- Status & Approval*
- Document Management Integration*

Documentation

Project & Task Management

- Project Planning
- Task Distribution
- Task Templates
- Gantt Chart
- Landscape

SAP Activate Roadmaps

- Requirements Refinement
- Configuration*
- Extension Management*
- Integration Management*

Project Execution & Tracking

Test Orchestration

- Test Planning*
- Test Preparation

SAP Standard Test Cases

- Manual Testing
- Integration of test automation providers
- Defect Management

Tricentis

Test Execution

Change Enablement

- Change documentation & reporting
- Traceability & Audit Trail

- Deployment Planning
- Feature Delivery
- Deployment Automation & Confirmation*

Feature Highlights

New Documents App

Process Management

- Document Assignment to Solution Processes
- Copy Solution Process Flows

Project and Task Management

- Enhanced SAP Central Business Configuration integration
- Create Items from Templates
- Link item start date or end date
- Effort in hours for Tasks, User Stories, Requirements and Defects
- Enhanced Enterprise Search

Test Management

- Copy of manual test cases
- Multiple Test Automation Provider Support
- Tricentis Test Automation for SAP integrated in SAP Cloud ALM

Change and Deployment Management

- Create Transports from a Feature
- Management of external transports as references in features

Analytics and Reporting

- Indirect Assignments in Solution Process Traceability
- Documents included in Solution Process Traceability
- New table view and download functionality for Burn Up Chart

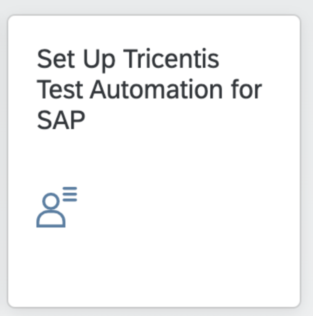
- An OEM offering from SAP to enterprise support customers
- This will be a subset of SAP Test Automation by Tricentis in terms of functionalities
- Capability in the first iteration: Test automation support of all browser-based SAP products and applications



Set Up Tricentis Test Automation for SAP

Tricentis Test Automation for SAP integrated with SAP Cloud ALM

What's in it for you

- Out of the box
- Easy to use
- Native integration
- Managed by SAP

Plan, prepare and execute automated test cases

Automated Testing for all
- Browser based UIs
- APIs & Integrations*
- SAP GUIs*

Usage rights

Included in SAP Enterprise Support and subscription

Automated testing of SAP solutions

- 5 named Users
- 2.5 GB Storage
- 500 Tests / month

Provisioning

Request directly in SAP Cloud ALM

Automated provisioning in 5 minutes

Automatically connected with SAP Cloud ALM

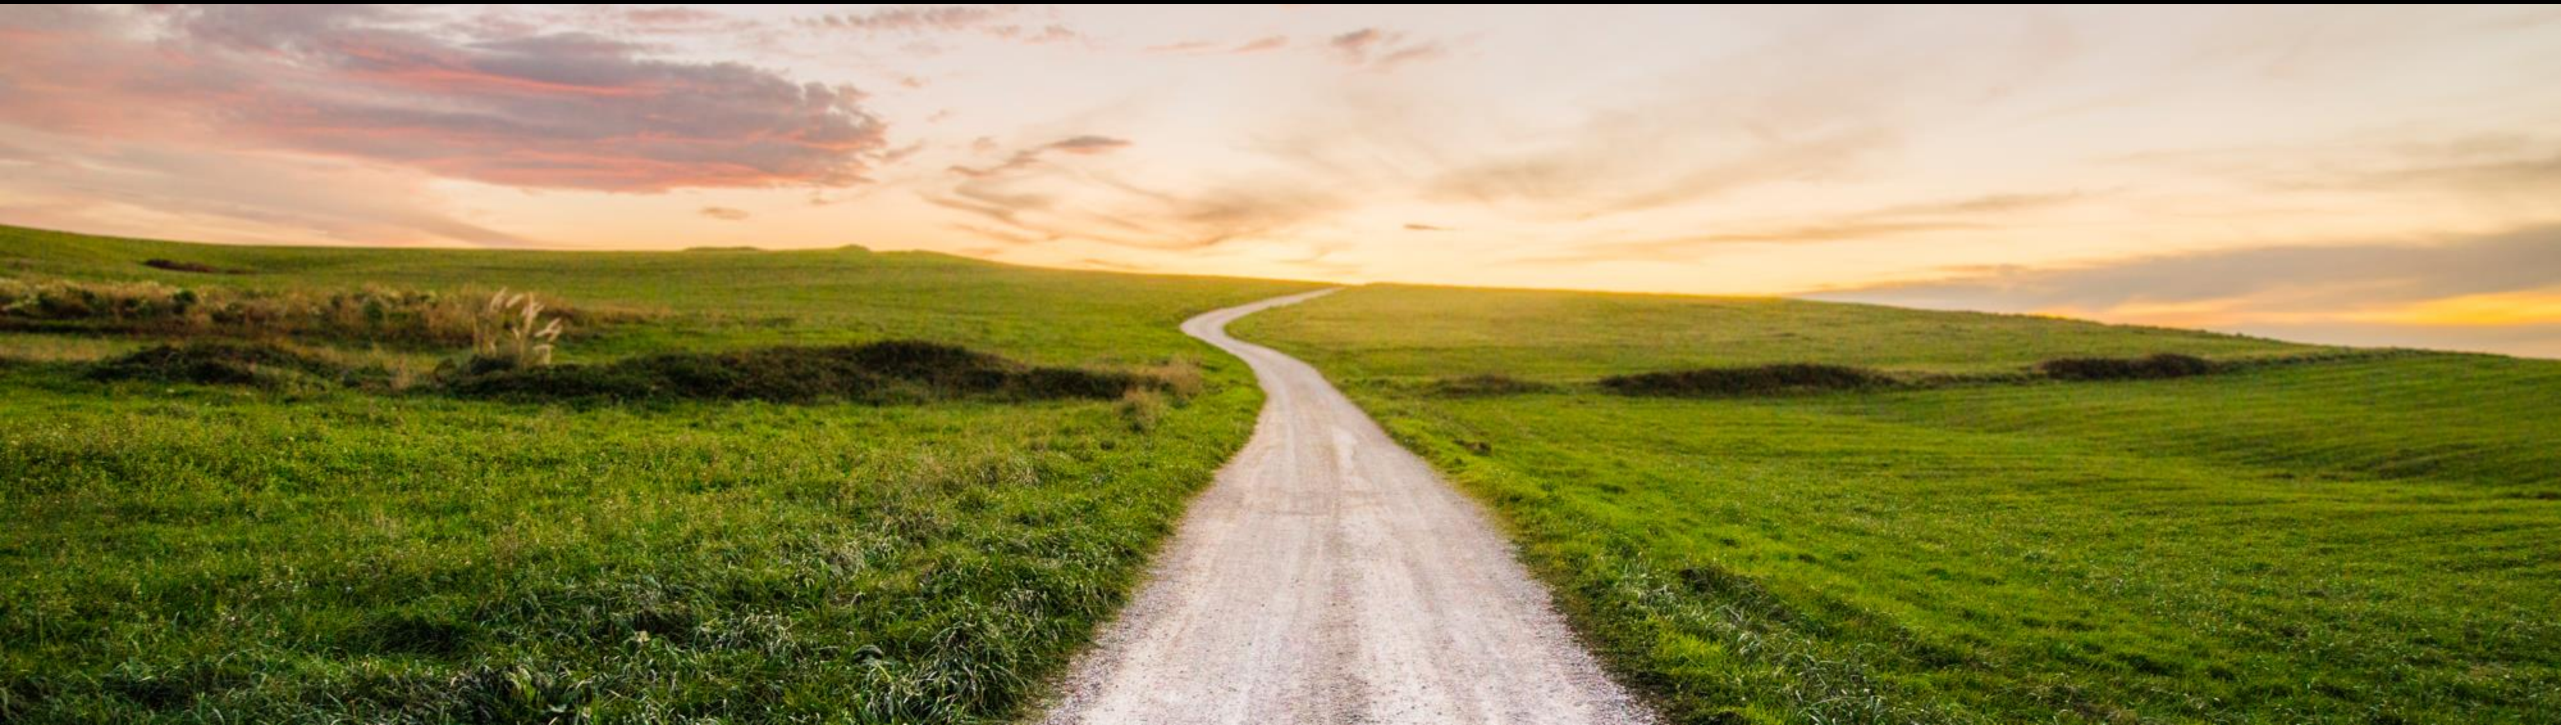
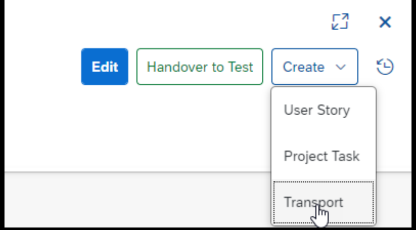
What’s new in Deploy?

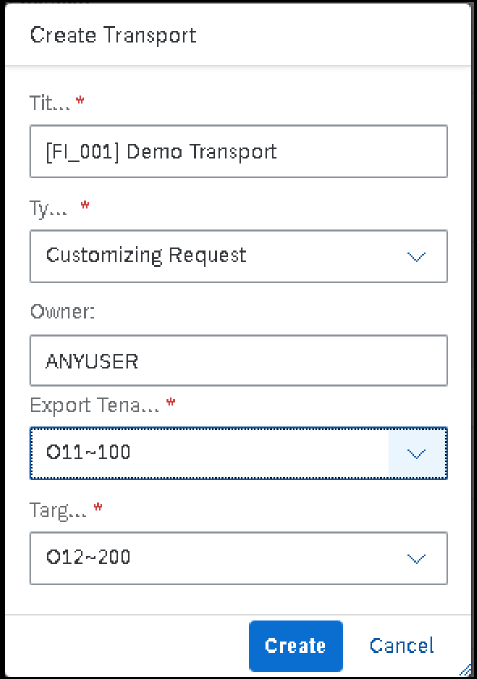


Create Transports from a Feature

- Creation of transport requests from a feature is possible for
  - SAP S/4HANA on-premise,
  - SAP S/4HANA Cloud, private edition,
  - SAP NetWeaver Application Server for ABAP on-premise

- As a prerequisite the source tenant (development client) must be assigned to a system group and the system groups must be assigned to your project via the corresponding deployment plan
  - Find more information in following blog post: https://blogs.sap.com/2023/04/06/create-transport-requests-from-features-in-sap-cloud-alm/





Create Transport

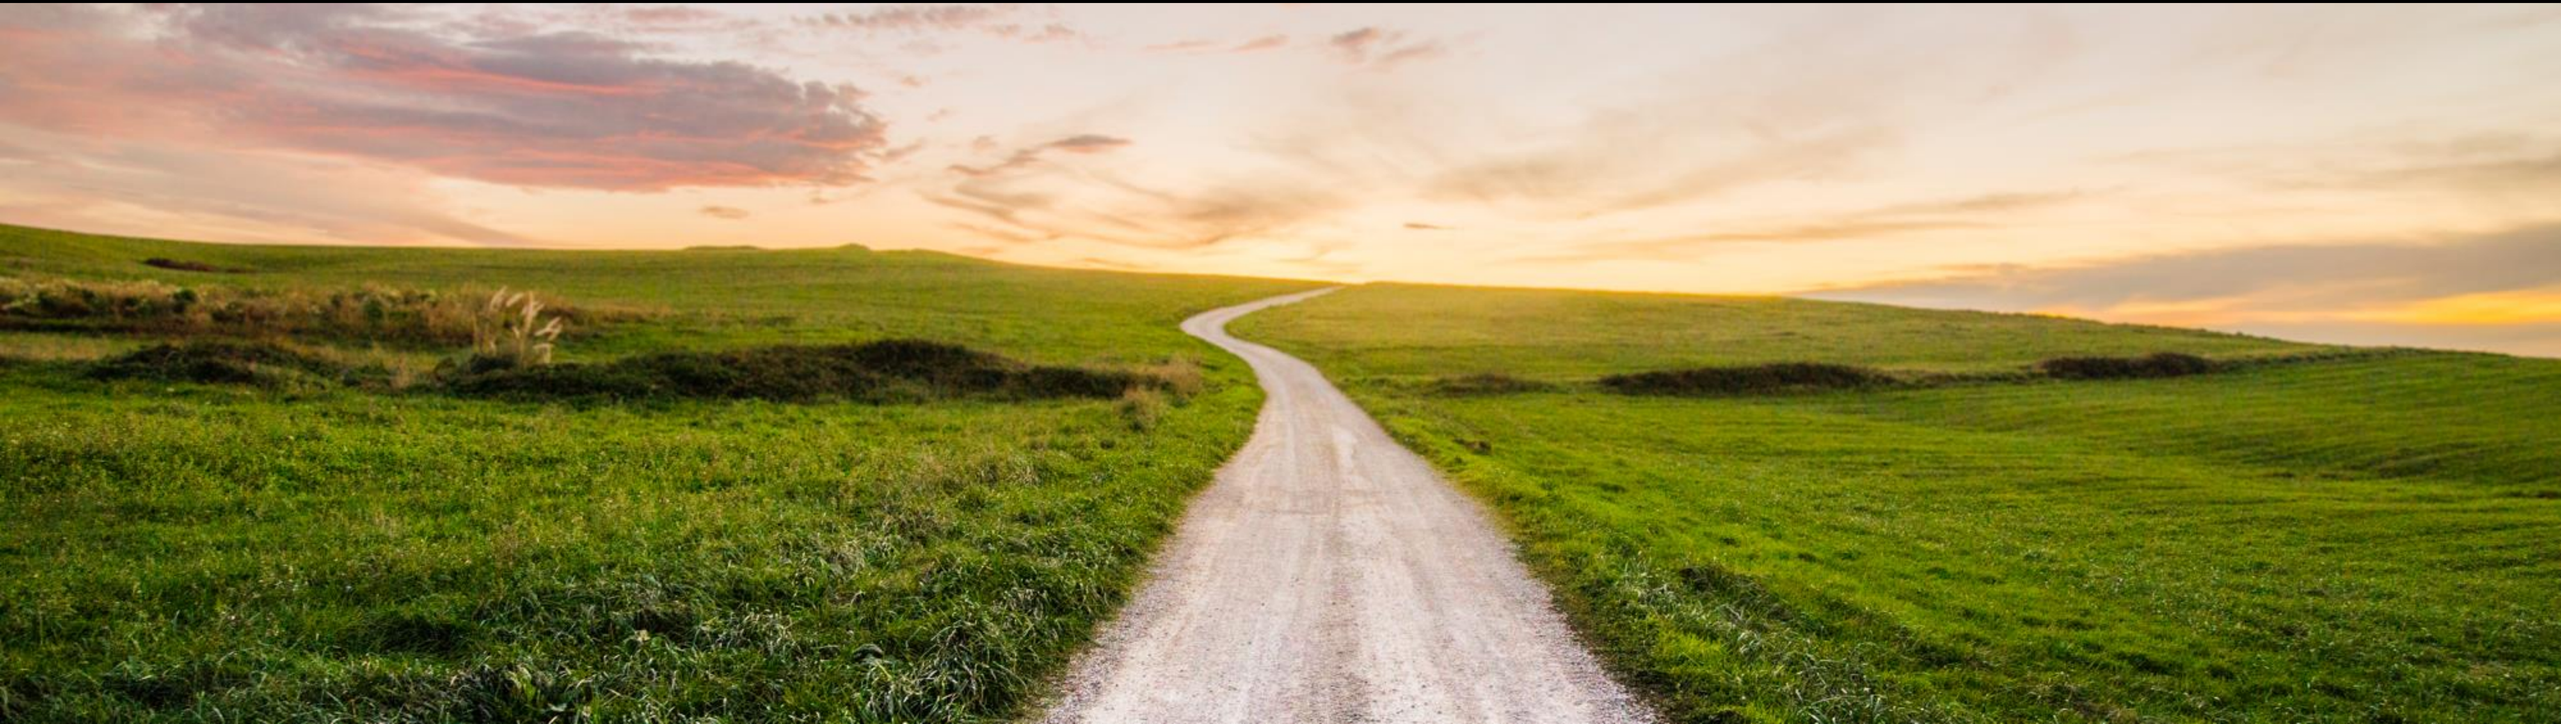
What’s new in Analytics?



Traceability Enhancements : Indirect Assignments for Solution Process Traceability

Traceability apps now offer next level of transparency by including ‘Indirect Assignments’

Indirect Assignments are indirectly related objects that are not assigned to the parent object, but contribute in assessment of overall readiness of the main object.

Solution Process Traceability: By switching on the Defect in indirect assignment button, Defects that are not assigned to the parent solution process but assigned to a child Test case are also counted and included under Test Execution and Test Preparation columns.

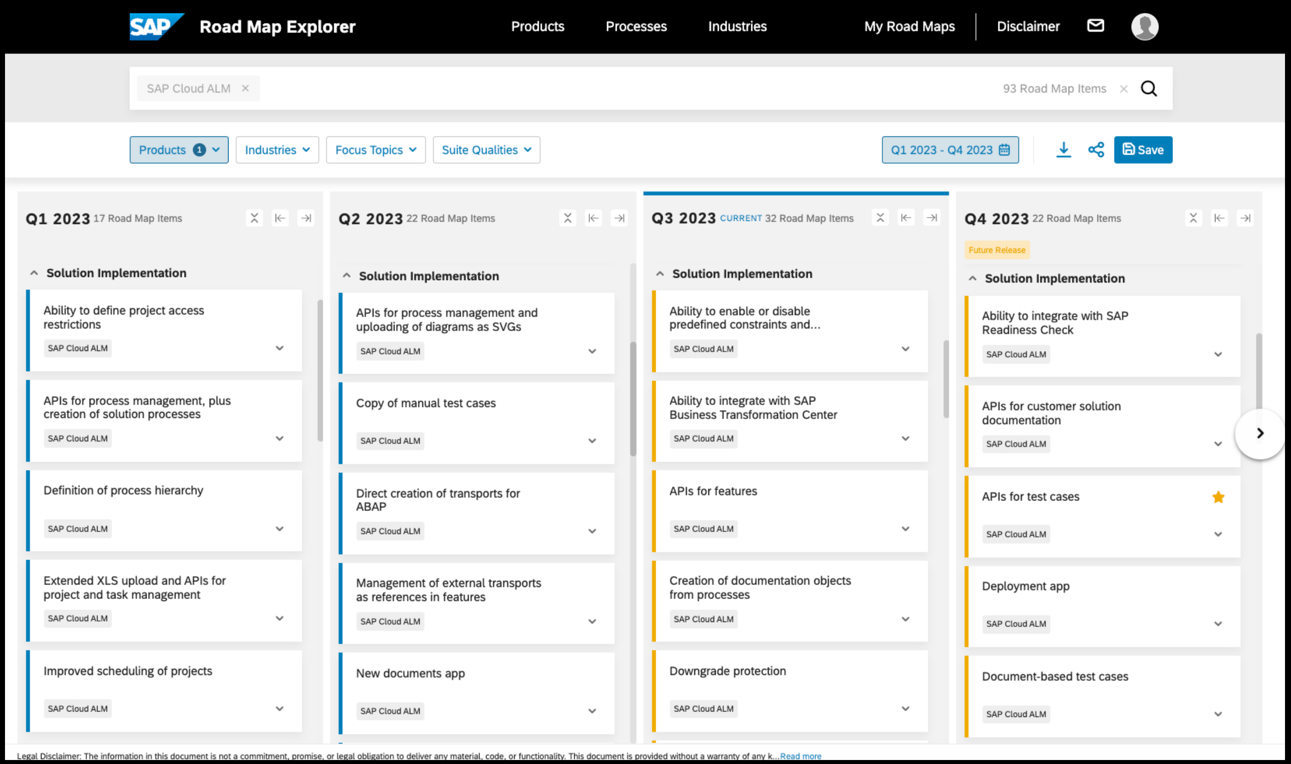
SAP Cloud ALM for Implementation - Roadmap

SAP Roadmap Explorer

Go to https://roadmaps.sap.com/ and search for SAP Cloud ALM to get the always up-to-date roadmap with links to more information and demos



Q1 2023 17 Road Map Items

Solution Implementation

- Ability to define project access restrictions – SAP Cloud ALM
- APIs for process management, plus creation of solution processes – SAP Cloud ALM
- Definition of process hierarchy – SAP Cloud ALM
- Extended XLS upload and APIs for project and task management – SAP Cloud ALM
- Improved scheduling of projects – SAP Cloud ALM

Q2 2023 22 Road Map Items

Solution Implementation

- APIs for process management and uploading of diagrams as SVGs – SAP Cloud ALM
- Copy of manual test cases – SAP Cloud ALM
- Direct creation of transports for ABAP – SAP Cloud ALM
- Management of external transports as references in features – SAP Cloud ALM
- New documents app – SAP Cloud ALM

Q3 2023 CURRENT 32 Road Map Items

Solution Implementation

- Ability to enable or disable predefined constraints and... – SAP Cloud ALM
- Ability to integrate with SAP Business Transformation Center – SAP Cloud ALM
- APIs for features – SAP Cloud ALM
- Creation of documentation objects from processes – SAP Cloud ALM
- Downgrade protection – SAP Cloud ALM

Q4 2023 22 Road Map Items

Future Release

Solution Implementation

- Ability to integrate with SAP Readiness Check – SAP Cloud ALM
- APIs for customer solution documentation – SAP Cloud ALM
- APIs for test cases ★ – SAP Cloud ALM
- Deployment app – SAP Cloud ALM
- Document-based test cases – SAP Cloud ALM
