Agenda

Integration Strategy in context of the Intelligent Enterprise

API Strategy

SAP Graph

Pre-Packaged Integration Content

Business Scenarios

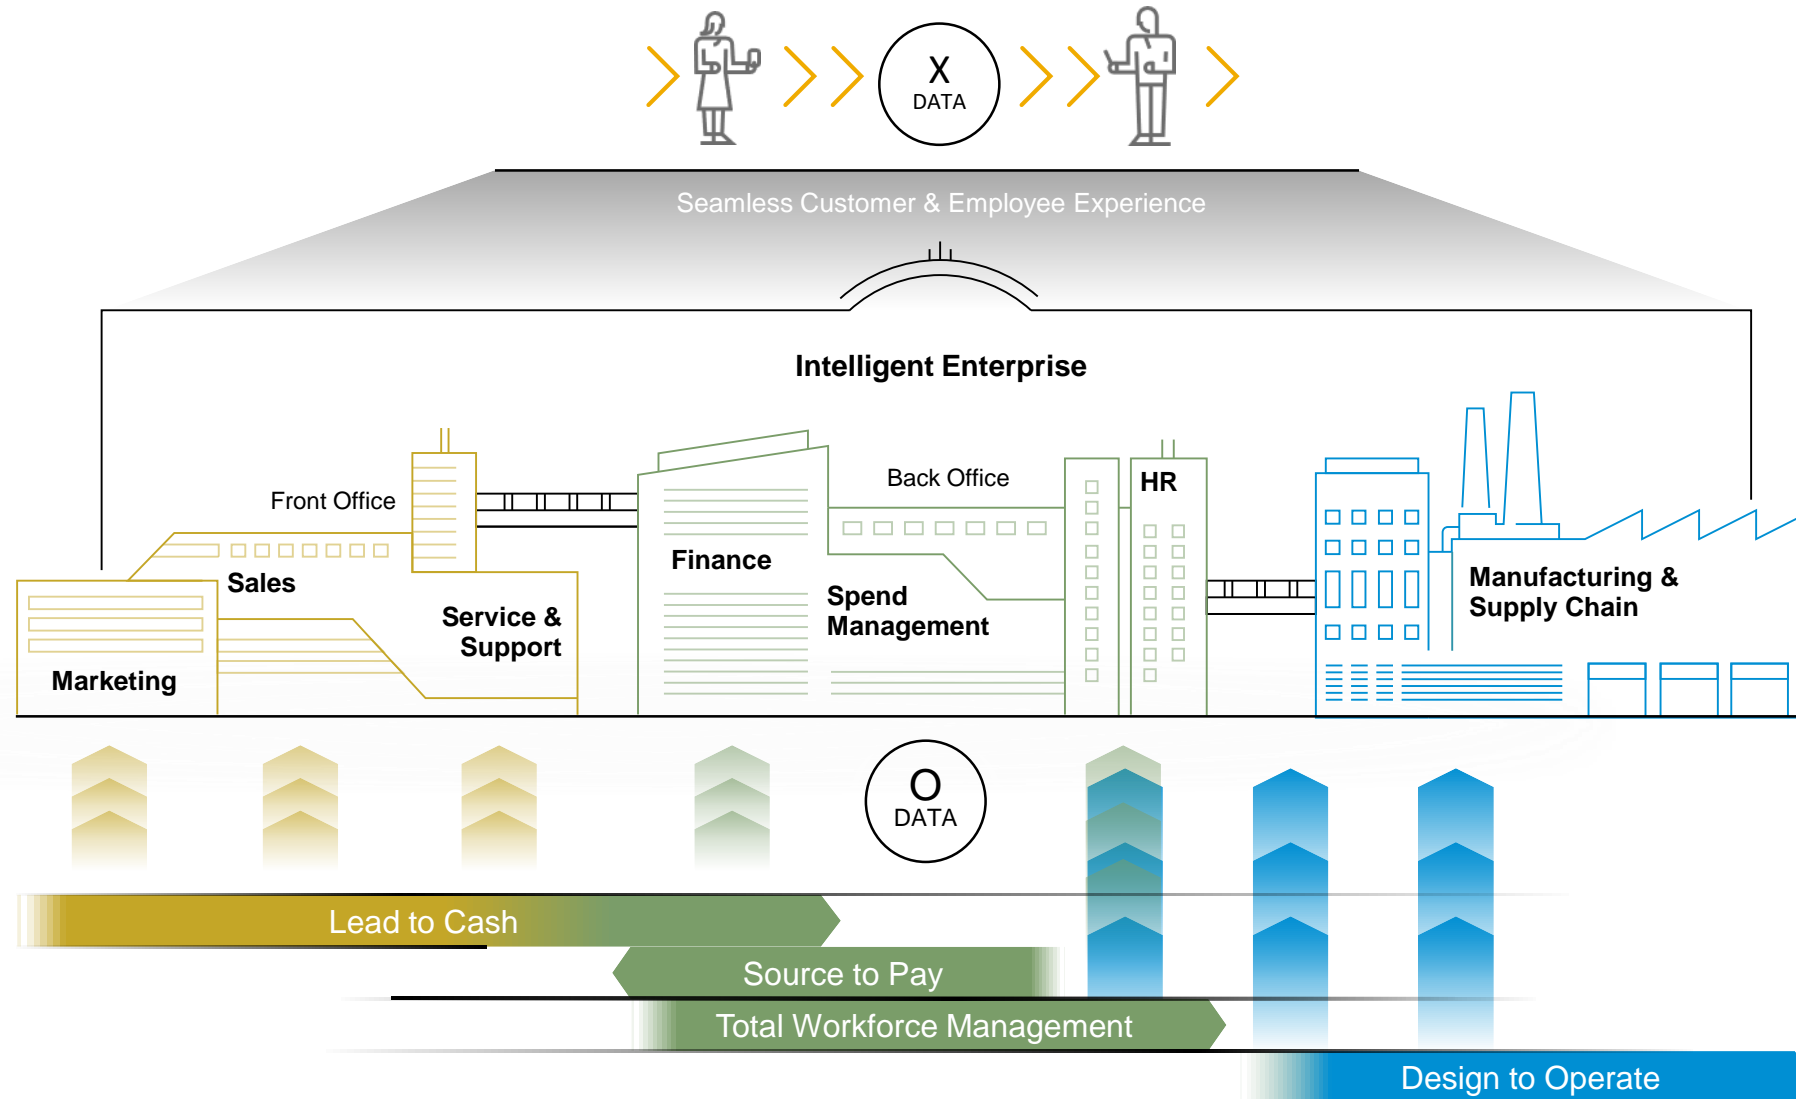

Summary

Q&A

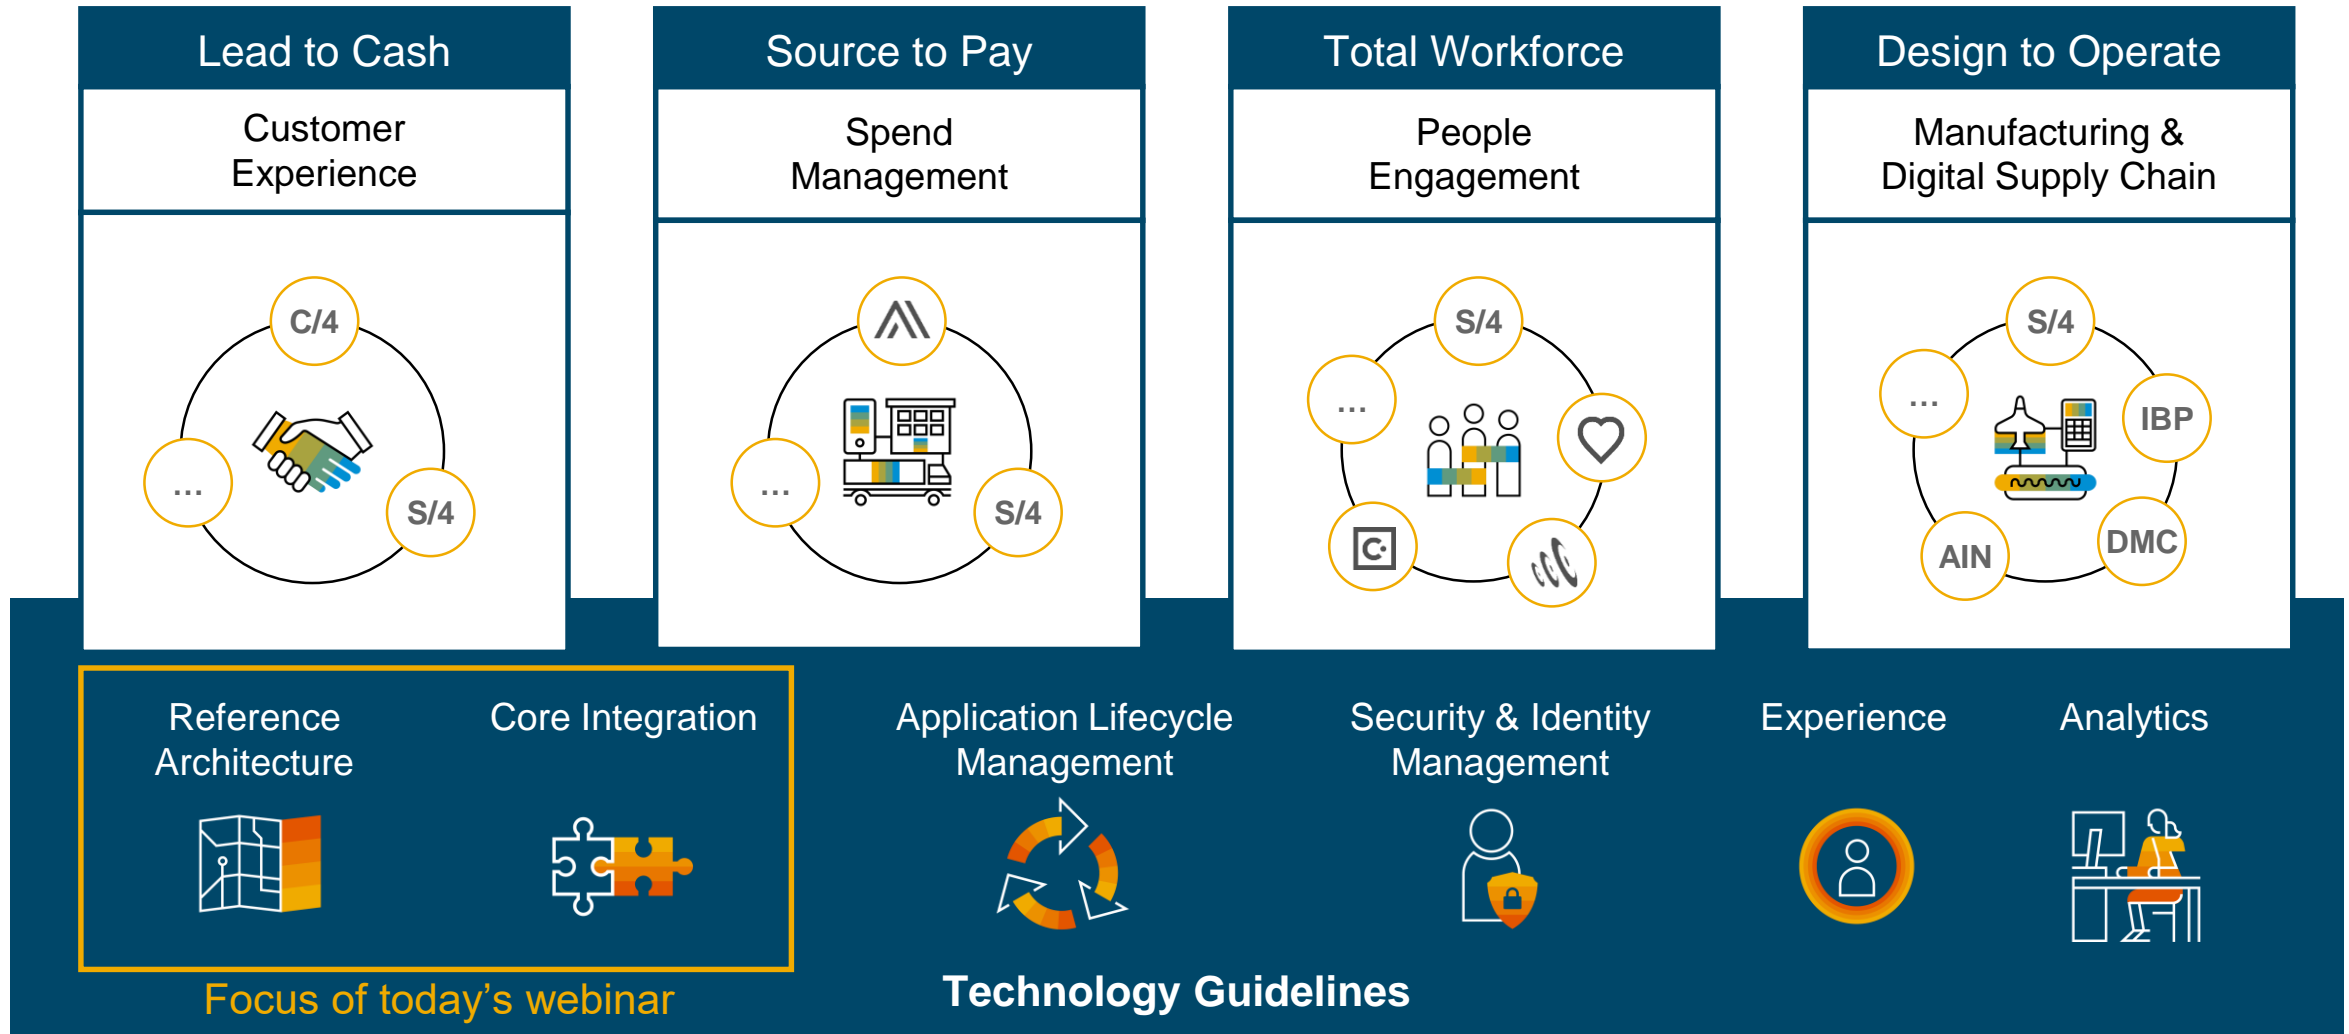

The Intelligent Enterprise

Integrated end-to-end business processes for the entire value chain

SAP integration DNA for the Intelligent Suite

Consistent adoption of technology guidelines* along key scenarios to form an Intelligent Suite

Agenda

Integration Strategy in context of the Intelligent Enterprise

API Strategy

SAP Graph

Pre-Packaged Integration Content

Business Scenarios

Summary

Q&A

APIs – What are they all about?

Application Programming Interfaces
= building blocks for digital business

Unlock your data

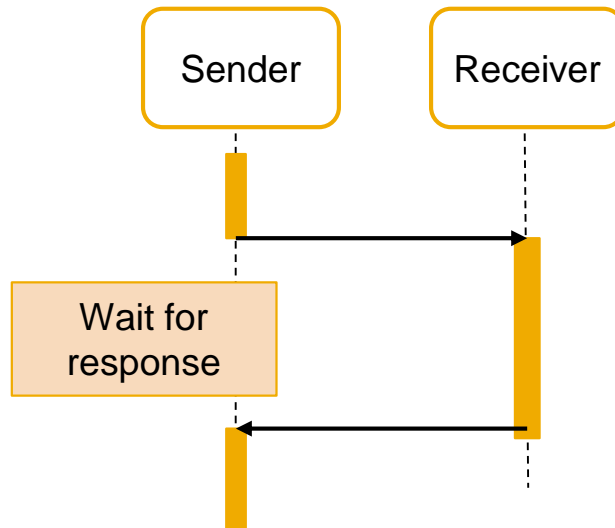

Empower users with self-services

Connect and innovate

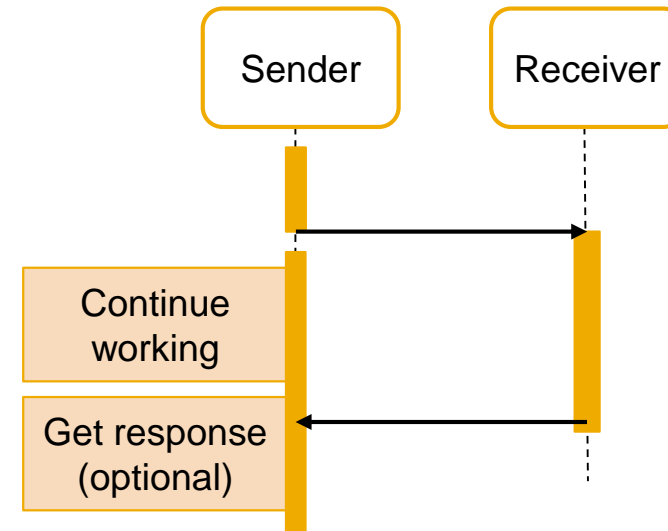

APIs used for Integration Scenarios

Communication types

Synchronous

Asynchronous

Use Cases:

User Experience
Integration

Process
Integration

Data
Integration

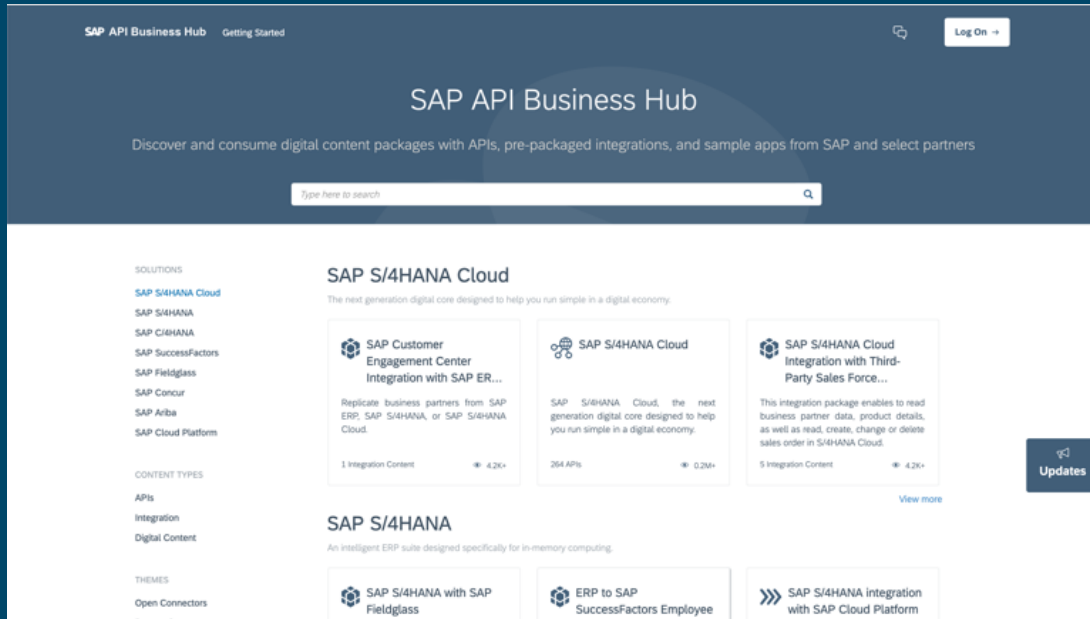

Process
Integration

Data
Integration

Business Partner
Integration

Direction: Harmonized APIs and aligned domain models

To simplify SAP-to-SAP Integration

<https://api.sap.com>

Objective

- Simplify SAP-2-SAP integrations for the Intelligent Suite by aligned domain models and common integration patterns

Approach

- Semantic alignment of domain models across SAP applications will result in aligned APIs in SAP API Business Hub
- Central master data services on SAP Cloud Platform to simplify the synchronization of master data across SAP applications
- Simplified, pre-packaged integrations based on standardized integration patterns

SAP Application Programming Interface Strategy

Focus on public web APIs

REST-based APIs

- Representational State Transfer (REST) protocol
- Designed to provide standard access via HTTP(S) through operations such as GET, POST, DELETE
- Synchronous request with response

OData APIs

- Open Data Protocol (OData) is a special family of REST-based APIs
- Preferred over REST when OData providers are already available in an application environment

Advanced API qualities on selected REST & OData APIs.

SOAP APIs

- Simple Object Access Protocol (SOAP) is a protocol for exchanging information in distributed environments
- Preferred protocol for asynchronous messaging (error handling)

Open APIs can support more use cases

Real-Time API Integrations

Enterprise Microservices

Enterprise Digital Apps

API Products/ Monetization

SAP API Business Hub

Search, discover, experience, and consume APIs

Catalog

Central place for APIs
from SAP and its
partners

API Sandbox

One click-test experience for
developers via API Sandbox

Pre-packaged accelerators

Integration packages
to integrate APIs

Easy Consumption

Integration with developer
IDE and code generations

<https://api.sap.com>

Alignment of APIs: Syntax and business semantics

Direction for the Intelligent Enterprise*

Technical harmonization of APIs across SAP apps of the Intelligent Suite with

- a well-defined signature (payload)
- a common security model
- Orchestration patterns

+ Semantical harmonization through domain model alignment across SAP applications

*Will be applied stepwise to new scenarios

Future direction: **Intelligent sharing** of master data in the cloud

© 2019 SAP SE or an SAP affiliate company. All rights reserved. | PUBLIC

Example: SAP Cloud Platform Master Data for workforce

Concept and definition

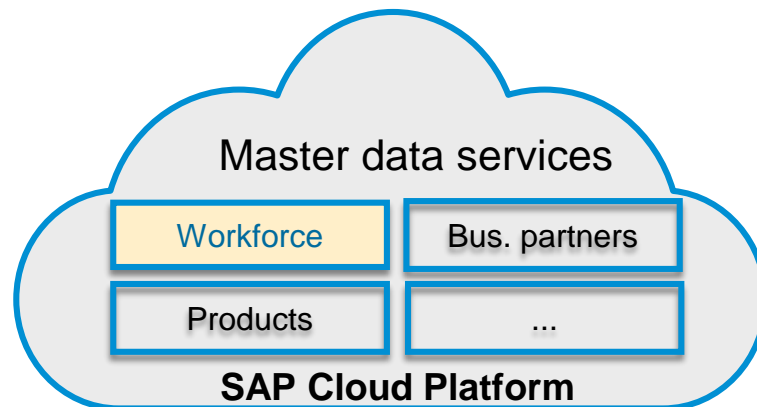

SAP S/4HANA Cloud 1911
Release (early adopter)

SAP Cloud Platform Master Data for workforce provides a subset of Employee Master Data for integration which is commonly required by (primarily non-HRIS) applications, such as SAP S/4HANA, SAP Fieldglass, SAP Concur and other (non-HRIS) future SAP Cloud Platform applications.

Master data owner

Modular service repository

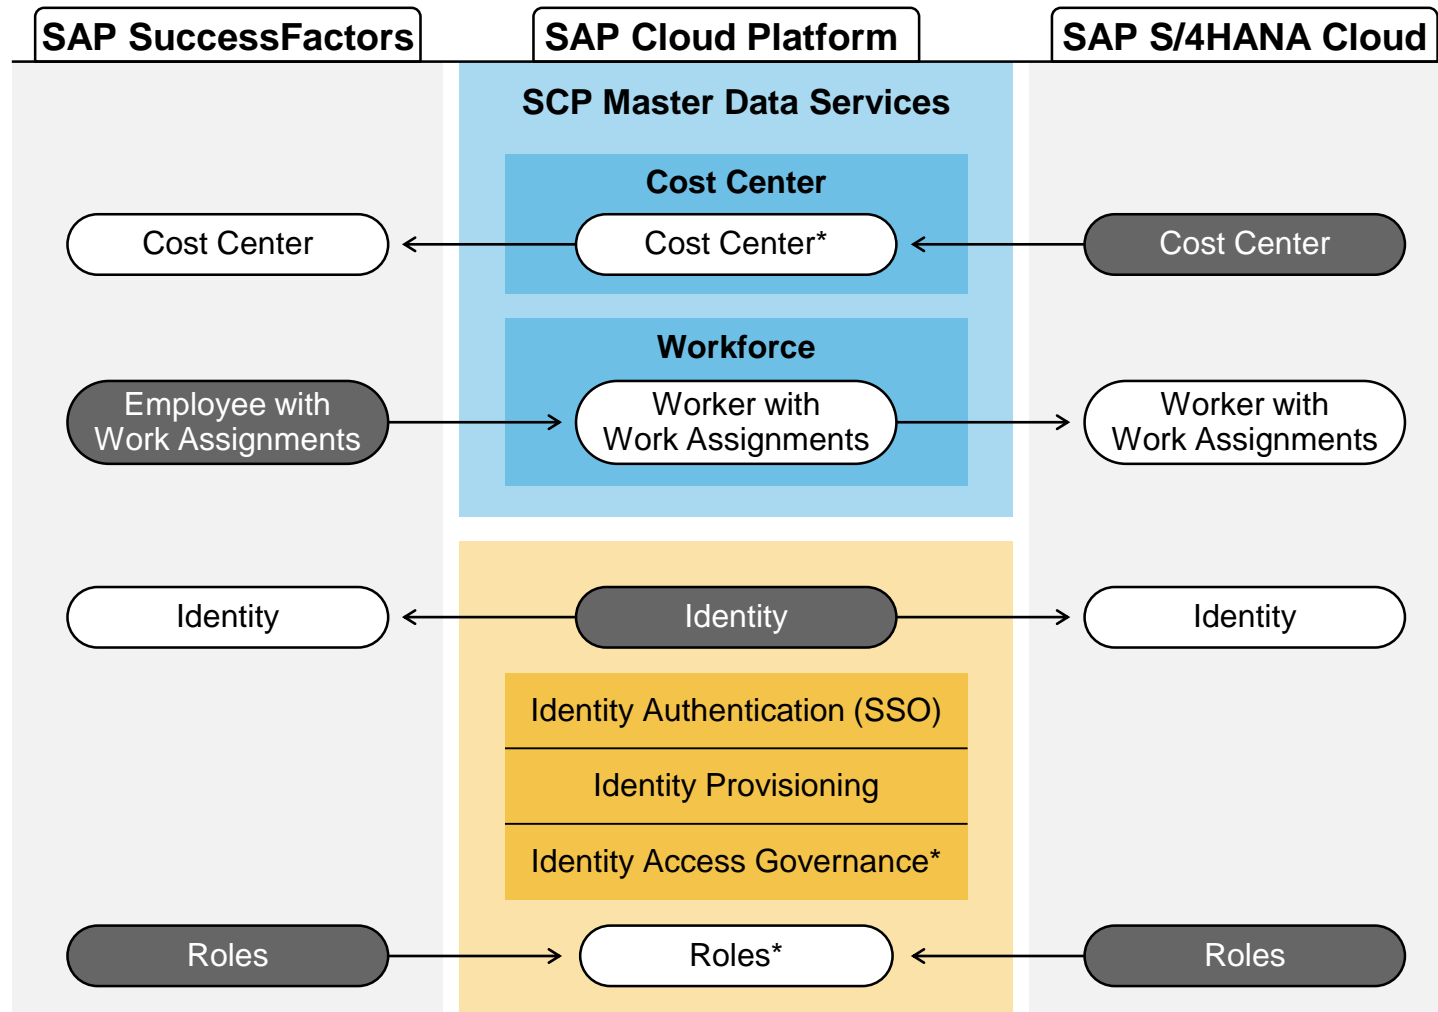

Master data consumer

1. Other core HR systems (SAP or 3rd party) are possible.

Executing the strategy

Hire-to-Retire: Key Master Data Integration with ONE SAP Data Model

Agenda

Integration Strategy in context of the Intelligent Enterprise

API Strategy

SAP Graph

Pre-Packaged Integration Content

Business Scenarios

Summary

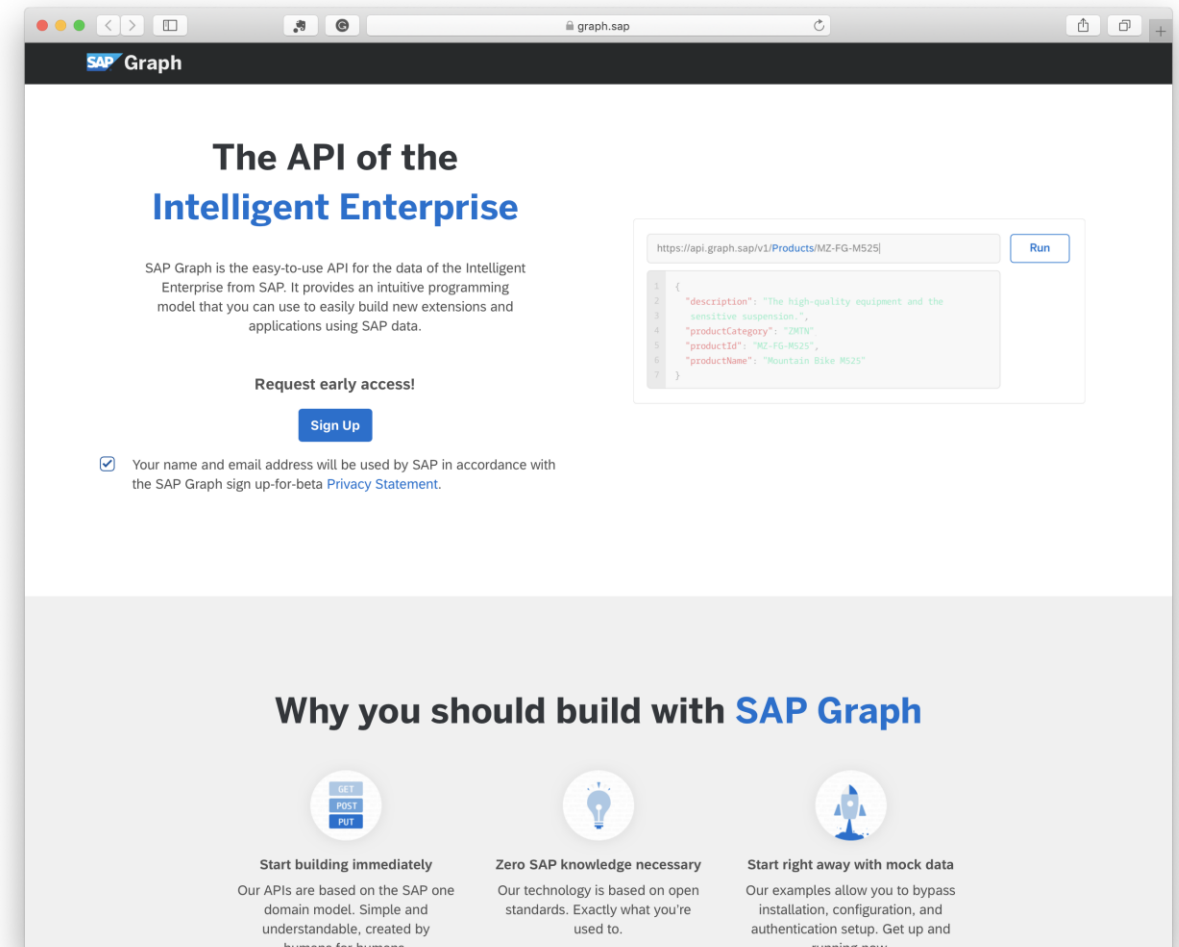

Q&A

SAP Graph

- SAP Graph is a unified and simplified API layer across the SAP portfolio
- No prior SAP expertise is needed to get started with SAP Graph
- Provides a central hub to get instant access to all relevant data

<https://graph.sap>

Harmonization

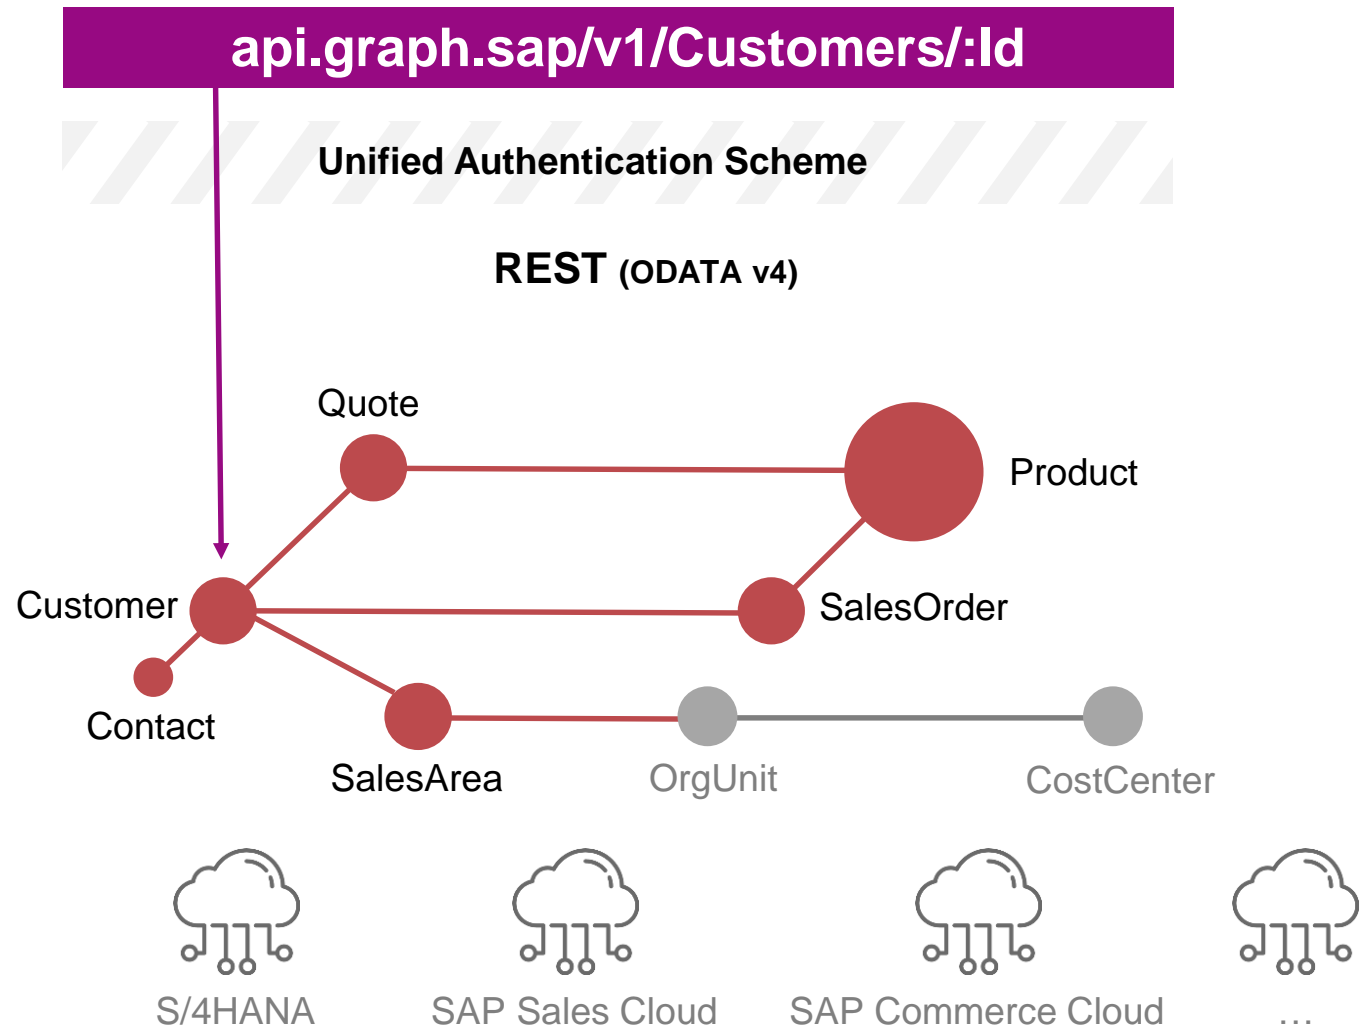

One API Schema

One AuthN

One Protocol

Stable Model

Underlying system APIs

Reach All Developers

SAP API Business Hub

A public repository of **all available APIs** for each SAP product to build extensions and integrations.

SAP API Management

Allow partners and customers to register and **orchestrate APIs** into a harmonized enterprise API layer.

SAP Graph

Allow every developer to build **extensions within minutes** for SAP's Intelligent Enterprise.

Agenda

Integration Strategy in context of the Intelligent Enterprise

API Strategy

SAP Graph

Pre-Packaged Integration Content

Business Scenarios

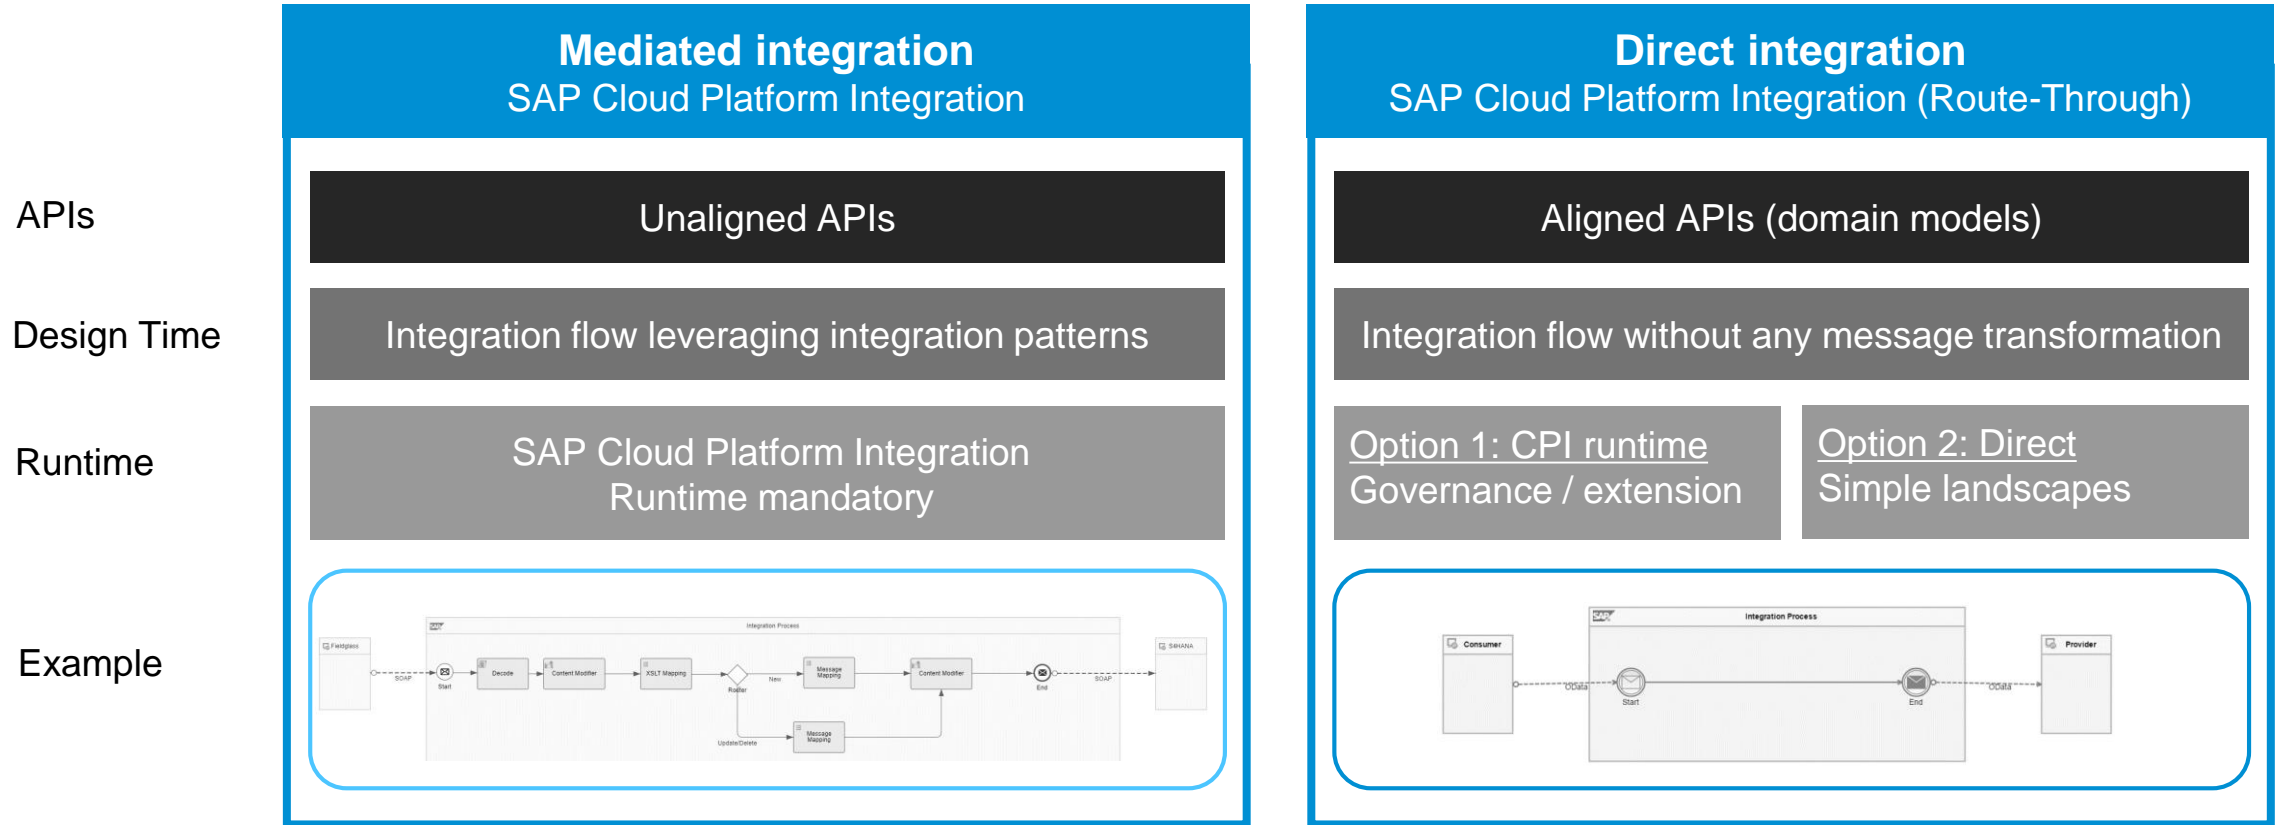

Summary

Q&A

Process integration for the Intelligent Suite

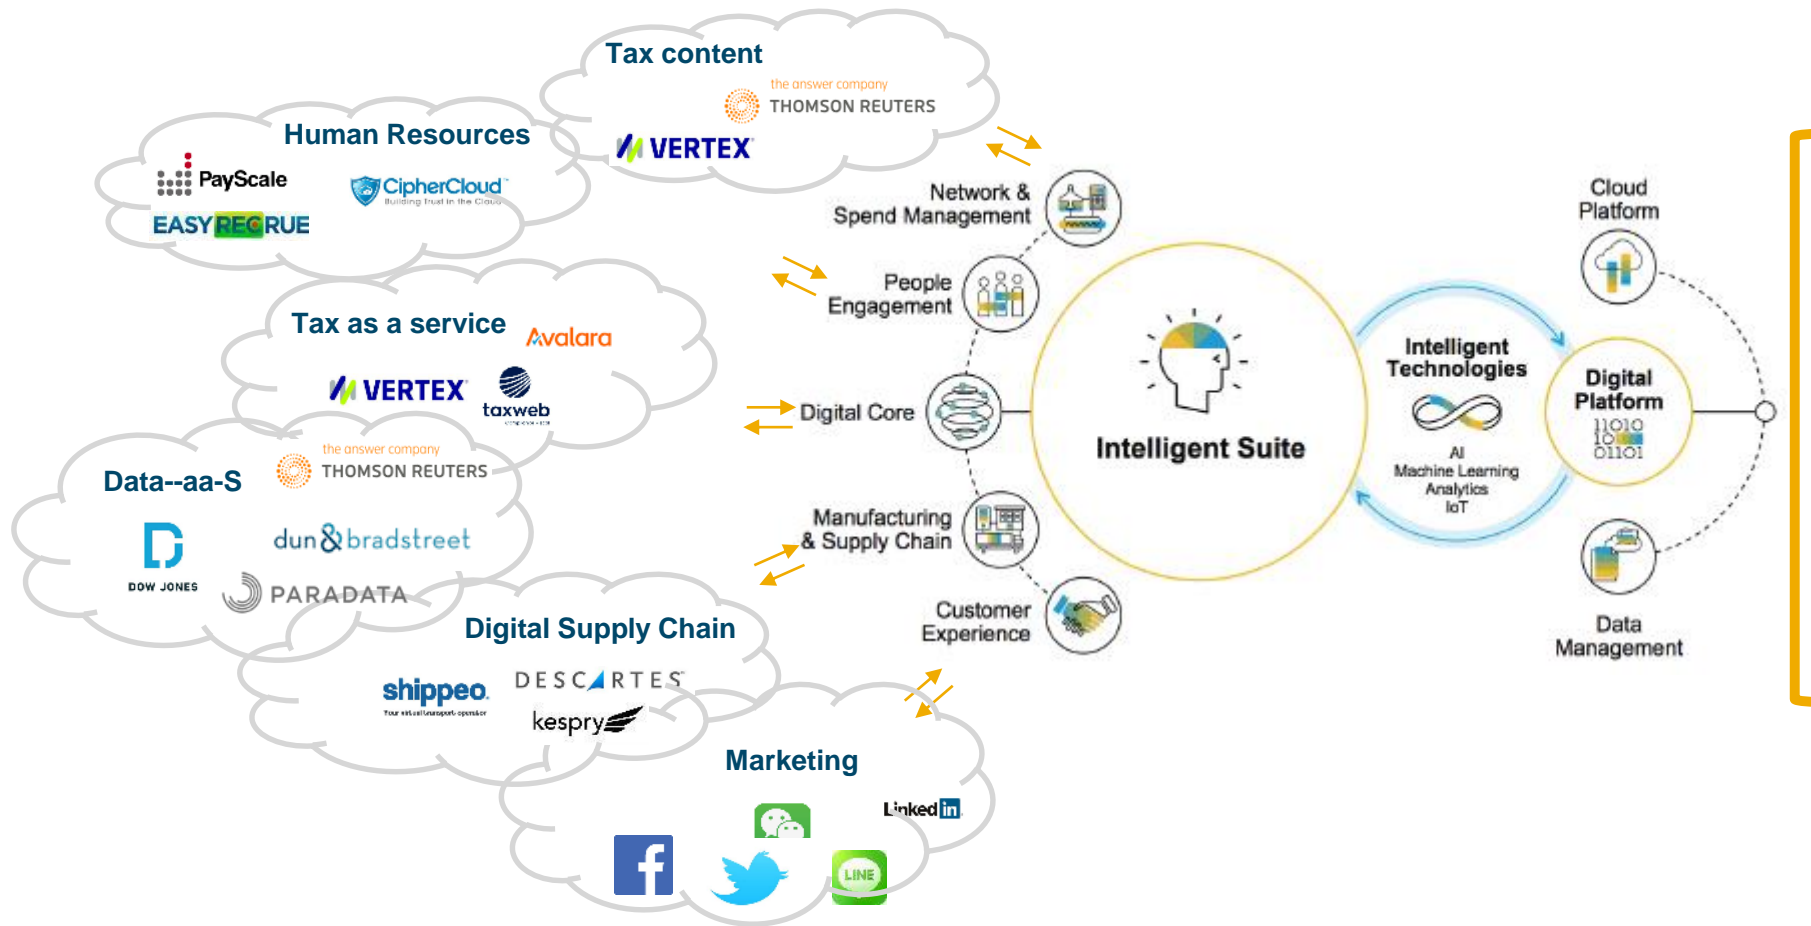

SAP Cloud Platform Integration for cloud and hybrid integration

Simplification of integration scenarios

SAP API Business Hub

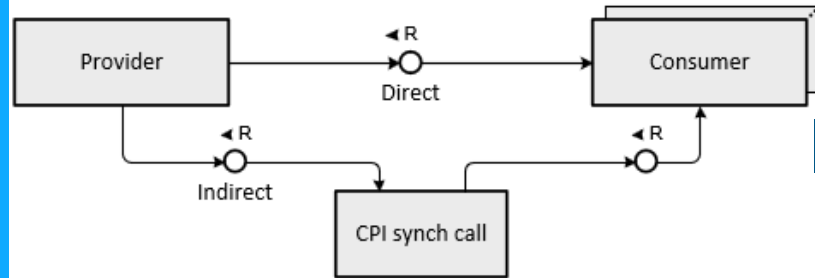

725+ prepackaged integration flows – from SAP and ecosystem

- Ecosystem partners simplify integration to SAP with ready-to-use prepackaged integrations in SAP API Business Hub
- 2000+ partners by 2020 integrated out-of-the-box

Process integration for the Intelligent Suite

Three Base Patterns

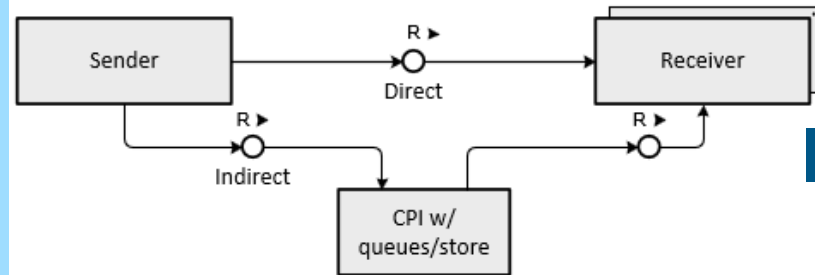

PULL PATTERN

Sync Request/Response

Consumer driven

Strengths: Authorization, Simplicity

Weaknesses: Polling, Provider Performance

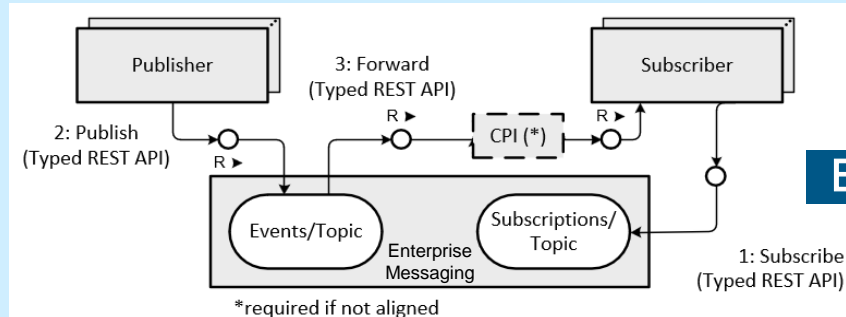

PUSH PATTERN

Async Messaging with QualityOfService

Sender driven

Strengths: Control, Decoupling

Weaknesses: Queues/Retry, Static Routing

EVENT PATTERN

Push Pattern with Publish&Subscribe

Publisher&Subscriber driven

Strengths: Flexibility, Decoupling

Weaknesses: Authorization, Audit Logging

Agenda

Integration Strategy in context of the Intelligent Enterprise

API Strategy

SAP Graph

Pre-Packaged Integration Content

Business Scenarios

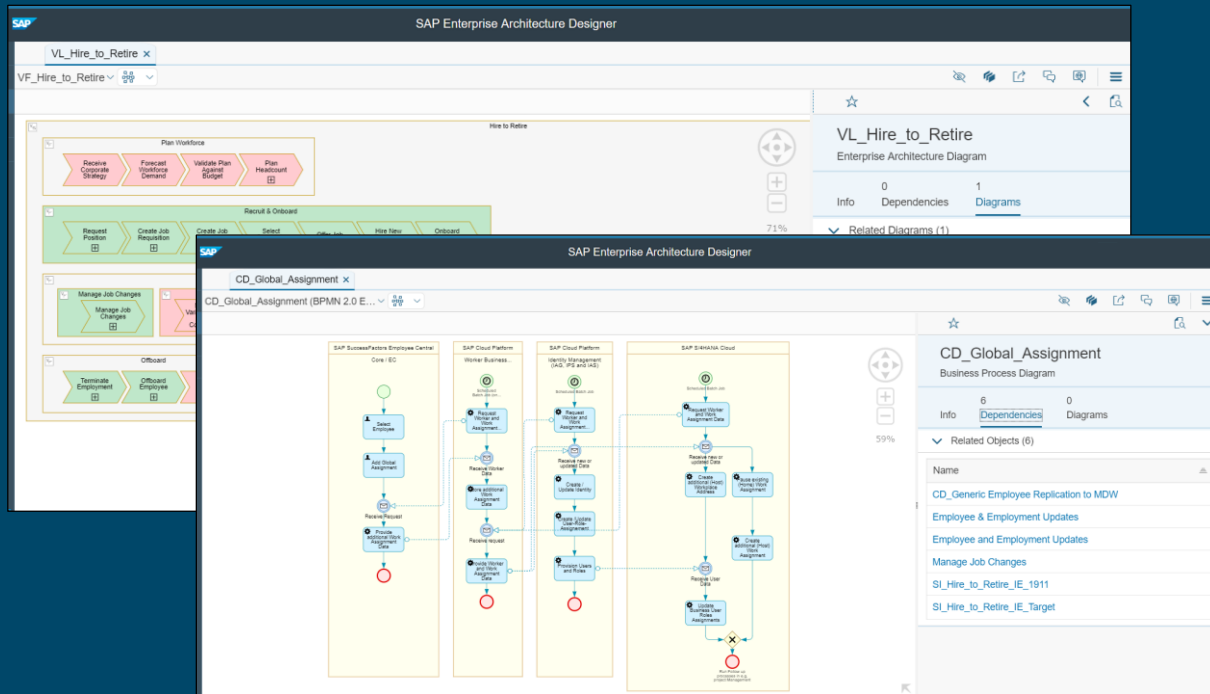

Summary

Q&A

Reference architecture

End-to-end process models – **descriptive & linked to runtime artifacts**

Example: Total Workforce Management (Hire to Retire)

Objective

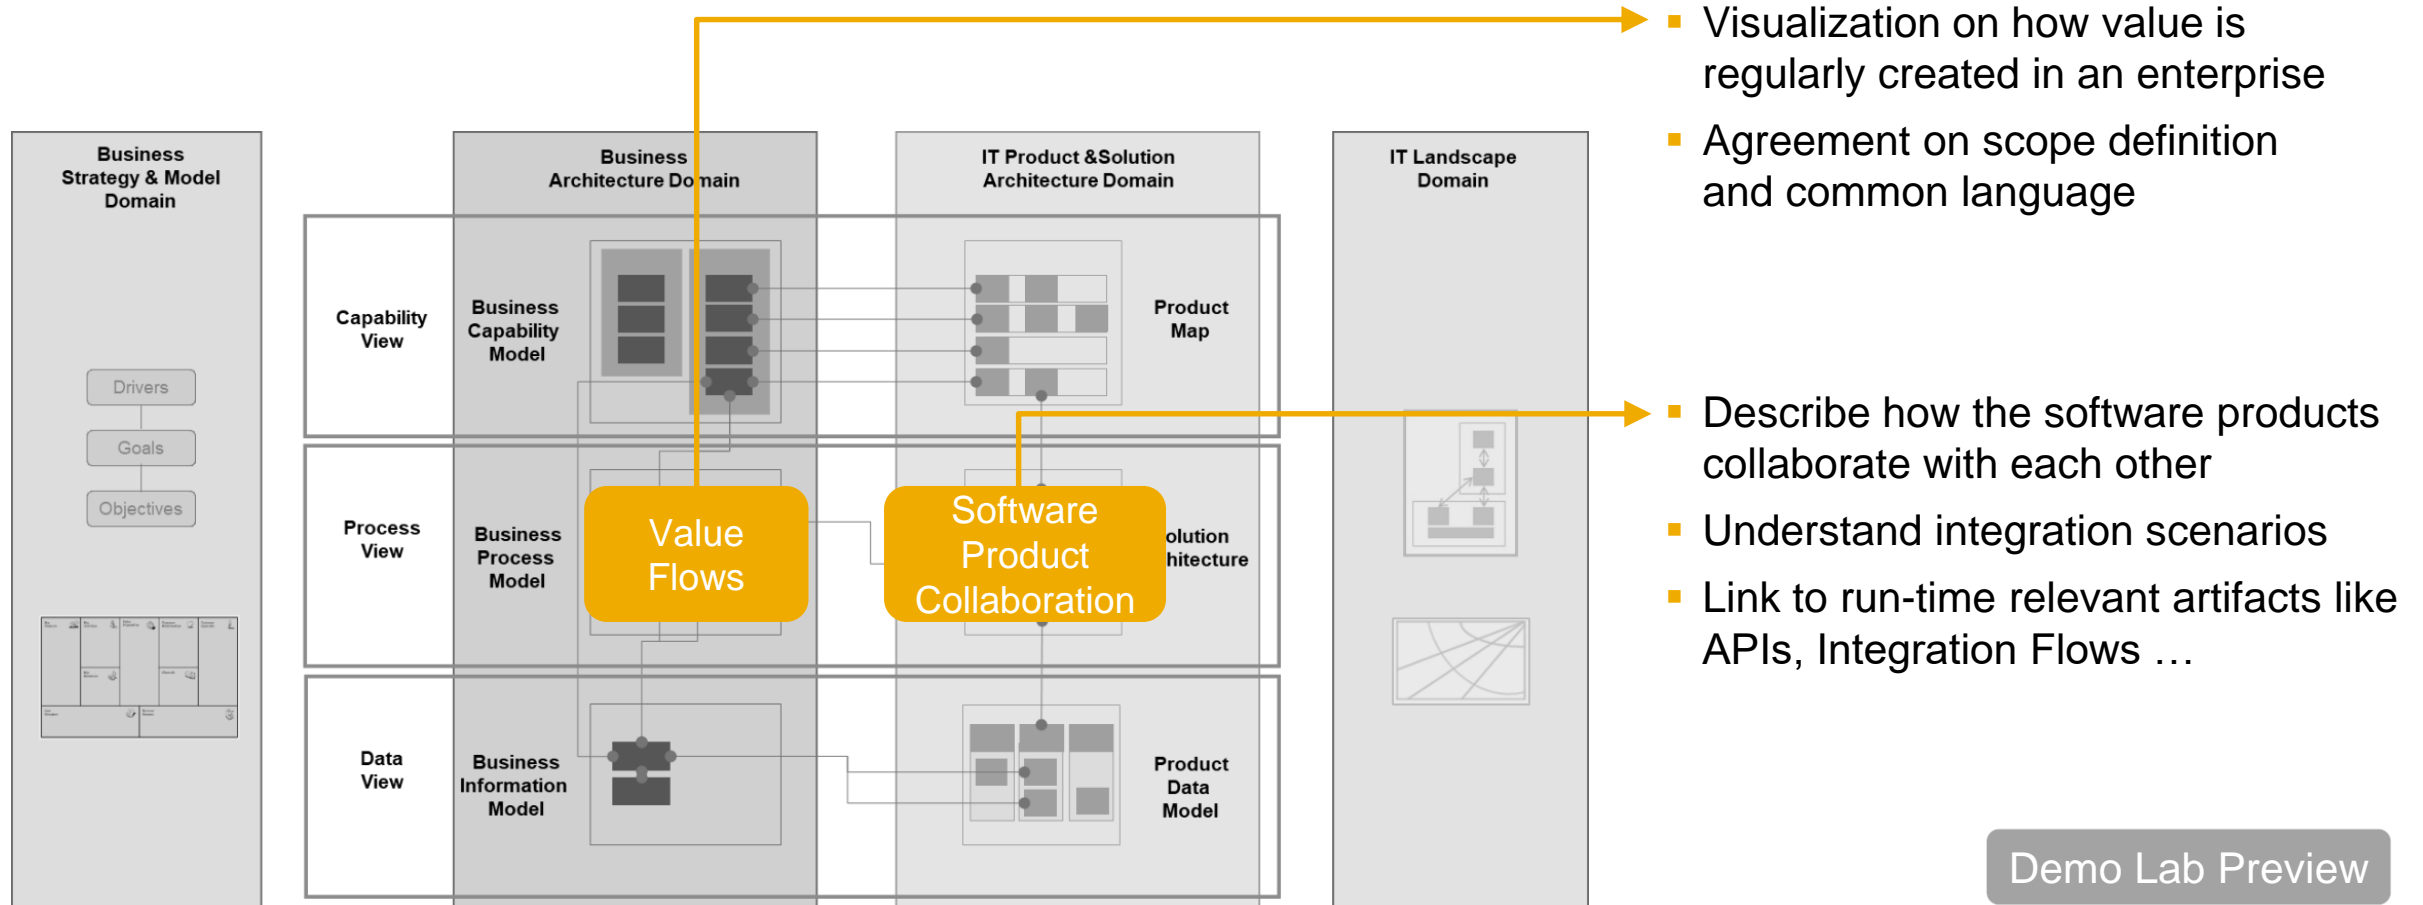

- Provide a consistent overview on E2E processes supported by the Intelligent Suite

Use Cases for Enterprise Architects

- Explore how E2E scenarios decompose into applications, modules, business services, technologies and integrations
- Map out the roadmap to adopt the solution and transition from current solution landscape to target
- Implement E2E scenarios which are connected with runtime artifacts

Reference architecture

Outlook: SAP delivered models in SAP API Business Hub

Agenda

Integration Strategy in context of the Intelligent Enterprise

API Strategy

Pre-Packaged Integration Content

Business Scenarios

Summary

Q&A

APIs, Prepackaged Integration Content and more

1 ALIGNED APIS

Simplify SAP-2-SAP integrations for the Intelligent Suite by aligned domain models and APIs.

2 PREPACKAGED INTEGRATION

Simplified, pre-packaged integrations based on standardized integration patterns.

3 BUSINESS SCENARIOS

Delivering end-to-end process models – descriptive & linked to runtime artifacts
