

# SAP Integration Webinar

# Agenda

1. About Keytree – **2 mins**
2. Innovation in Integration Projects – **10 mins**
3. Case Study – **Alpha – 5 mins**
4. Case Study – **Gama – 3 mins**
5. Keytree – SAP Partner Engagement & Useful material for transitioning into the cloud world. – **1 min**

# Keytree Overview

Founded 2006

One of the UK's **fastest growing** tech companies

**100% Delivery**

Management, functional, technical delivery, change management and support, **no failed projects**

Global Solution

Projects delivered into

**100 countries**

**Strong partnerships** with SAP & Apple with **30+ Awards** for project quality & innovation

**Cloud Platform world leaders**

Winner of the SAP Pinnacle Award 2020 – SAP Cloud Platform Partner of the Year

**Enterprise class**  
Customer Experience & Business Operations

Spain

London HQ

Wales

India

Australia

Canada

# Our Locations for Global Delivery and SAP Excellence

Implementations in over 100+ countries, 24/7 support, across all continents

## QUALITY

SAP Pinnacle Awards  
Winner 2020

Customer Quality Awards  
Gold Winner 2018

Customer Quality Awards  
Gold Winner 2017

Customer Quality Awards  
Gold Winner 2016

Customer Quality Awards  
Gold Winner 2015

Customer Quality Awards  
Gold Winner 2014

Customer Quality Awards  
Gold Winner 2013

Customer Quality Awards  
Gold Winner 2012

SAP Quality Awards EMEA  
Silver Winner 2012

## BUSINESS

Golden European  
Transformation Project 2018

SAP Business Transformation  
for Greggs Plc 2017

EMEA Partner of the Year for  
SAP Cloud Platform 2016, 17

Amazon Web Services  
(AWS) Partner

EMEA Partner of the Year  
for Innovation 2013

Sunday Times Tech Track 100  
2012, 2013, 2014

UX & Mobile in Agile

UK & Ireland Partner Award  
for Innovation 2011, 2012

Cool Vendor in Retail

Great Little British Battlers  
2015

## COMPETITIONS

The Prince's Trust Social Challenge  
2019

Lord Mayor's Dragon Awards  
Innovation Winner 2017

EuroFM Partners for Innovation  
for Matrix Booking 2017

Winner BiFM Workplace Impact  
Award  
for Matrix Booking 2016

Global Winner 2016

Winner SAP TechEd DemoJam  
Las Vegas 2012, 2014, 2015

Winner MasterCard Masters  
of Code 2015

AR Awards: Most innovative Use  
of Augmented Reality 2012

Winner Lifestyle & Gaming  
Wearable Computing Innovation  
World Cup

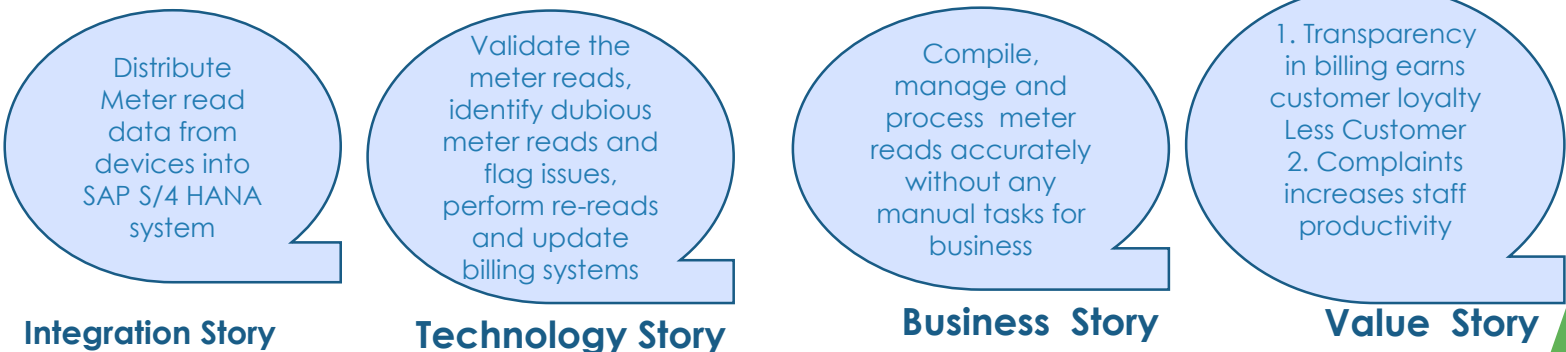

Cloud Innovation World Cup  
Winner 2015

# Innovation in Integration Projects– Moving Away from Lift & Shift Mindset

According to Gartner, The average business transaction now crosses 40+ different back-end systems, connecting new information and operationalizing it across the entire enterprise via API(S) can drive automation and process efficiency.

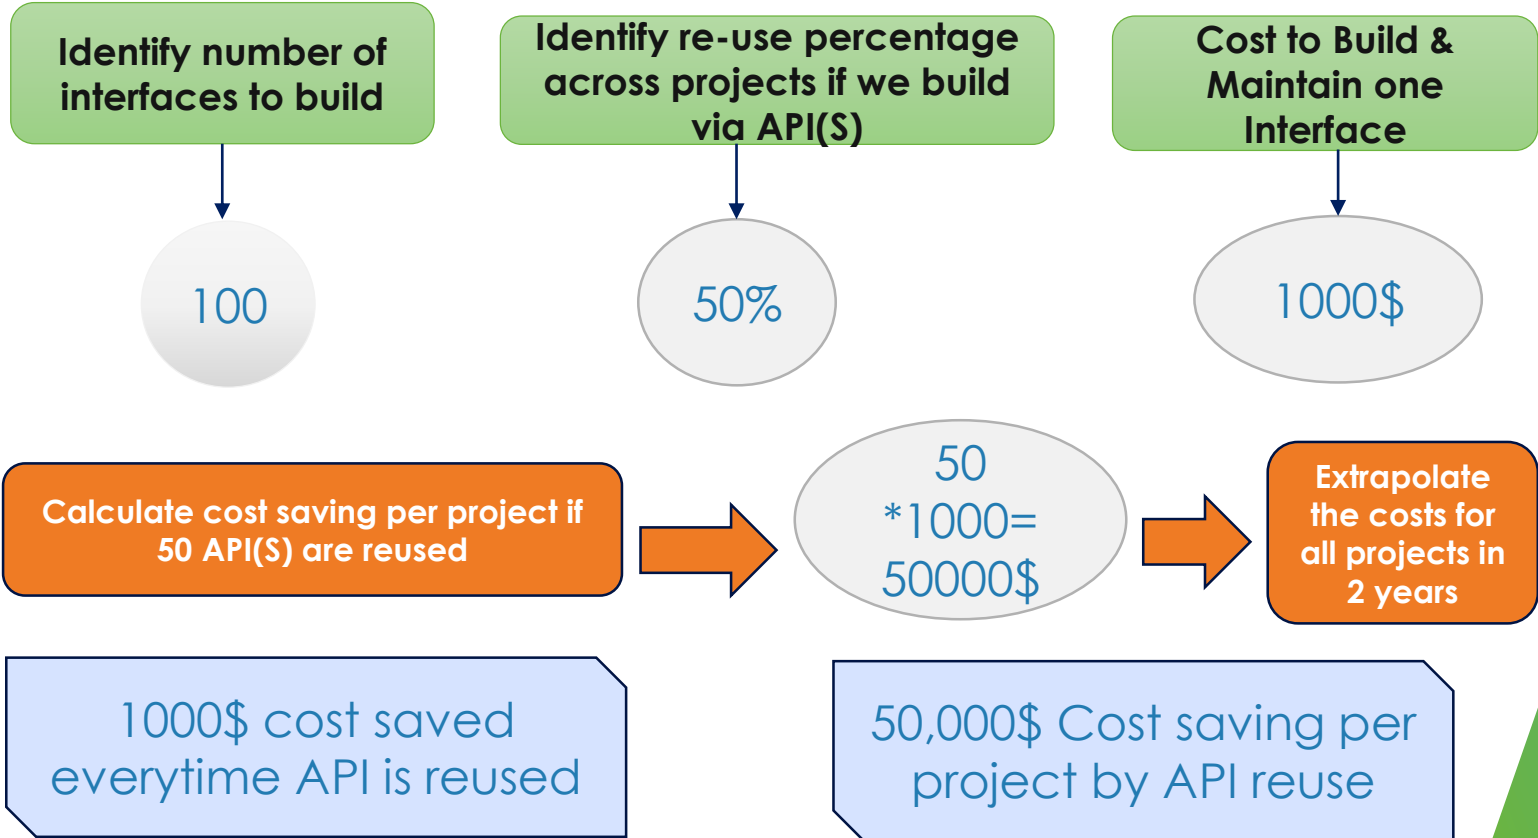

The **right integration strategy** allows organizations to cut complexity and drive tangible business value however IT teams often struggle to rally their organizations behind a new digital integration approach. A key reason for this is that we are not communicating the value story of integration projects in a clear and compelling way **that connects with the customer!**

*RPA, AI to automate validation of meter reads, auto-correction of meter readings based on previous history, auto correction of customer billing*

# Integration Project Innovation – Tangible Benefit Case for API Strategy

Operational Value Use Case: Reusable assets maintain secure, scalable integration assets instead of custom, duplicative, point-to-point code, speed to delivery

# Innovation in Integration Projects- Value Benefit Case for API Strategy

Customer Value Use Case: APIs can generate massive amounts of value, IT Consulting teams should analyse where value can be created and show the value curve in terms of revenue, customer experience, and productivity.

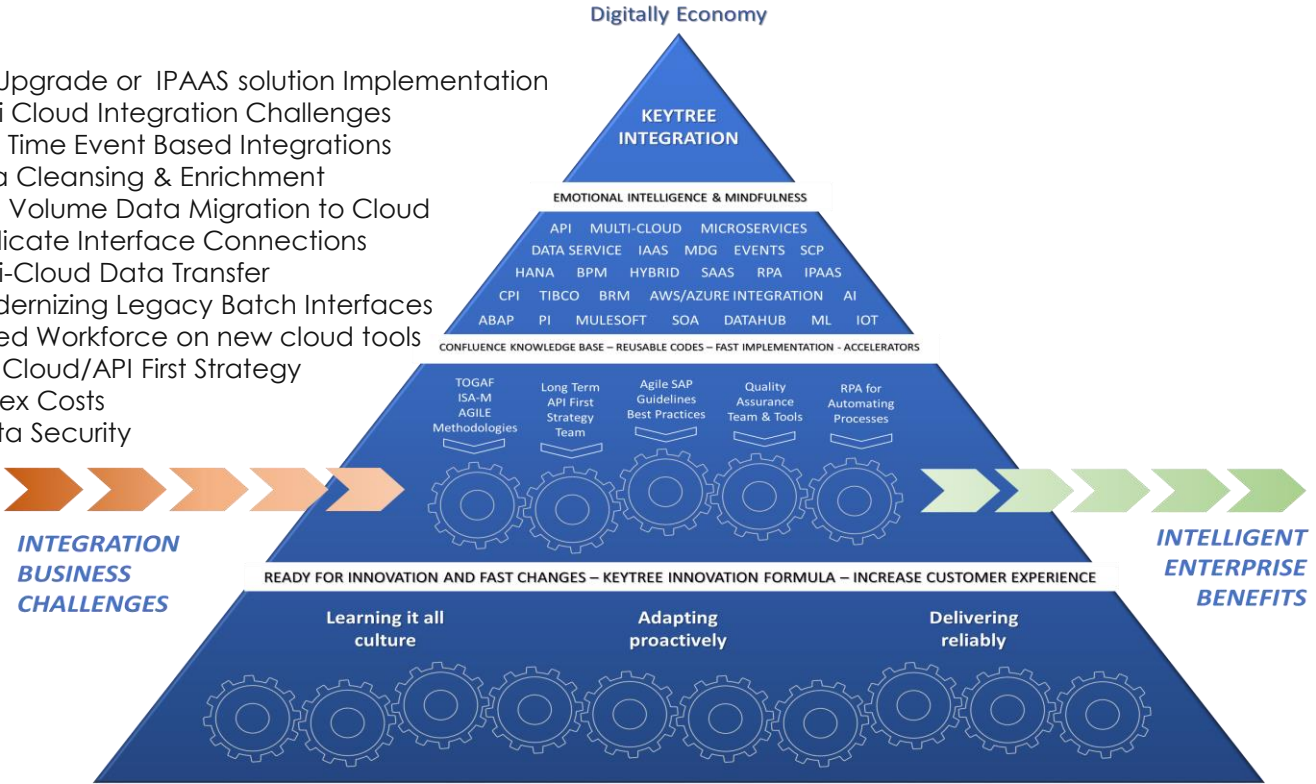

## Identify and Prioritize Business Value Metrics for Integration Projects for getting enough traction for API(S)

# Transforming Integration Challenges into Connected Enterprise Assets

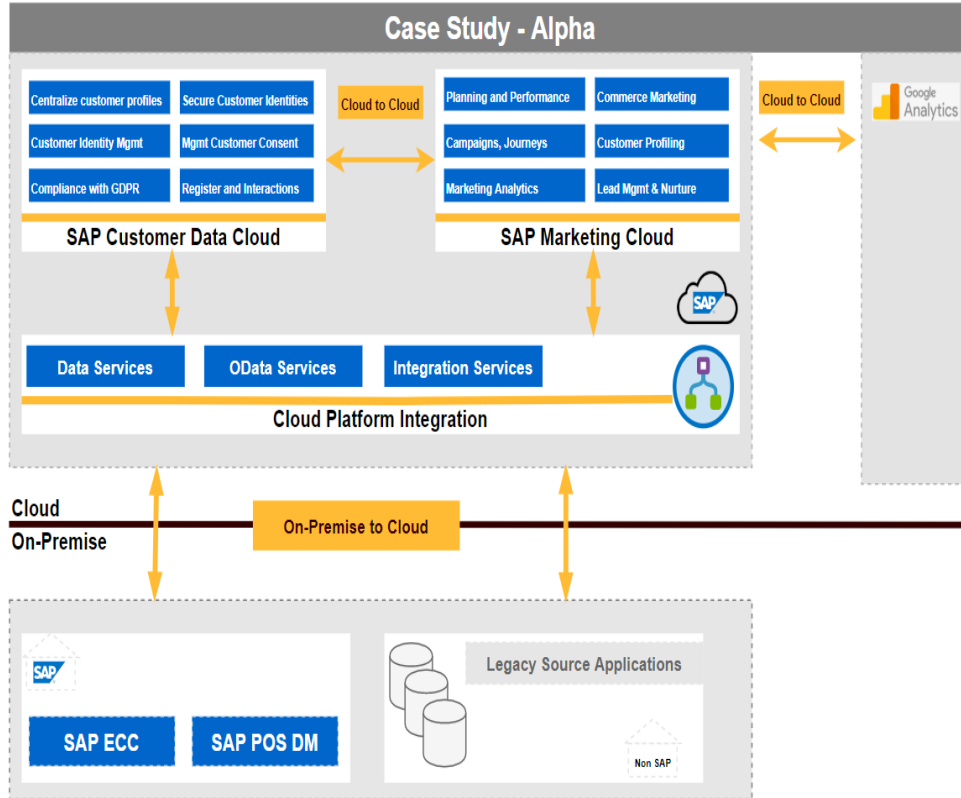

1. ESB Upgrade or IPAAS solution Implementation
2. Multi Cloud Integration Challenges
3. Real Time Event Based Integrations
4. Data Cleansing & Enrichment
5. High Volume Data Migration to Cloud
6. Duplicate Interface Connections
7. Multi-Cloud Data Transfer
8. Modernizing Legacy Batch Interfaces
9. Skilled Workforce on new cloud tools
10. No Cloud/API First Strategy
11. Opex Costs
12. Data Security

Innovation

Customer Satisfaction

# Case Study – Alpha

High Level architecture

**Industry** – RETAIL  
**LoB** – Sales, Marketing and Retail

## Project Objectives

- Transform their CRM suite using SAP C/4 HANA across geographies **US, CANADA, EUROPE, AUSTRALIA AND MEXICO**
- Decommission old legacy CRM applications to enhance and personalize their customers' journeys while respecting their preferences and privacy and
- Turn customer data into actionable data for audience segmentation, targeted marketing campaigns

## Challenges

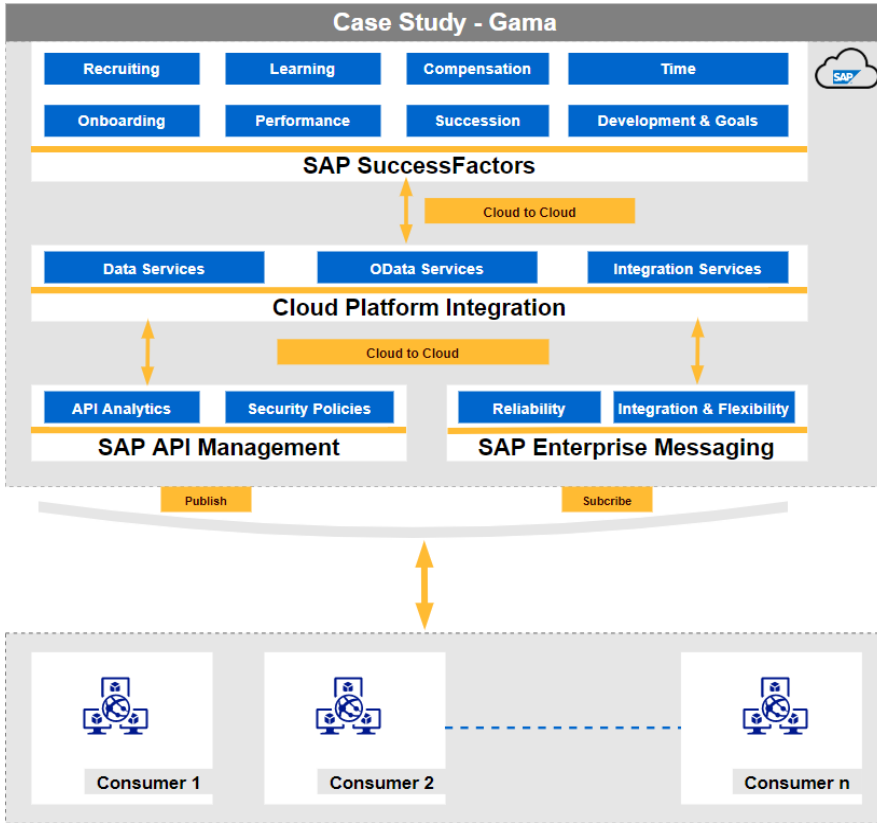

- High Volume Integration of new breed SAP and non-SAP cloud technologies with client's legacy applications
- Global Roll-out in short span with a phased approach (NA, Europe, APAC) and environmental challenges
- Migrations of Millions of Customer and Interactions with Compliance to General Data Protection Regulations

# Achievements - Case Study Alpha

1. One of the world's **largest** SAP C/4 HANA and SAP CPI roll-out in terms of Volume
2. Migration of **30+** Million Customers, **50+** Million Vouchers, **50+** Million Orders & **80+** Million Marketing Interactions
3. Million API Calls per hour processed successfully on CPI during DATA Migration with 3 CPI Nodes
4. Real-time segmentation/targeting to communicate with customers with personalised messages and offers based on customers previous activity (including purchases - both in store and on-line)
5. Discovery, Design, Build, Deploy & Test in **6** Months
6. Data Migration Reconciliation Success Rate **99.8%** with full audit and error logging of each failed ODATA API packet for each file

Records in File	No. of Files processed per hour	File Size
100,000 Records	10 to 15k files	5MB

# Case Study – GAMA

High Level architecture

Industry – TELECOM  
LoB – HR

## Project Objectives

- Client has acquired new SAP SuccessFactors applications and wants a transition from their legacy HR applications to SAP Cloud
- **Lower Cost of Ownership:** Reduce HR landscape maintenance cost, higher ROI, faster development and deployment across multiple countries
- **Simplified Integration Architecture:** Expose HR master data consistently and securely across all countries using global integration platform

## Challenges

- API provider model is bleeding edge for the client
- Deployment of API First model into multiple countries and hence buy-in of API first model was challenging due to the volume of the consumers
- Transition of CoE Service Operation model from Shared Service Model to LoB Provider/Consumer Model

# Achievements - Case Study **GAMA**

1. The Integration Architecture **Simplified** by decommissioning existing P2P integration between consumers and provider and adapting to Consumer driven pull approach
2. API First development approach where the consumers would be accessing HR data for relevant data points using **SAP API Management**
3. Reduced **TCO** for client in distributing the HR Master data
4. Transition of Client's Integration Service from **Shared Service CoE to LOB Model**
