SAP Enterprise Support Guides

Program Overview

Timo Bauer, SAP

PUBLIC

Agenda

How can SAP Enterprise Support Guides support you?

- Program introduction
- New program assets
- Delivery methodology

Details on new deliverables

- Onboarding
- Journey Checks
- Engagement Plan
- Engagement Points

Summary and Questions & Answers

Welcome to the Age of Intelligence:

Accelerate your Move to SAP S/4HANA powered by SAP Enterprise Support Guides

The program offers:

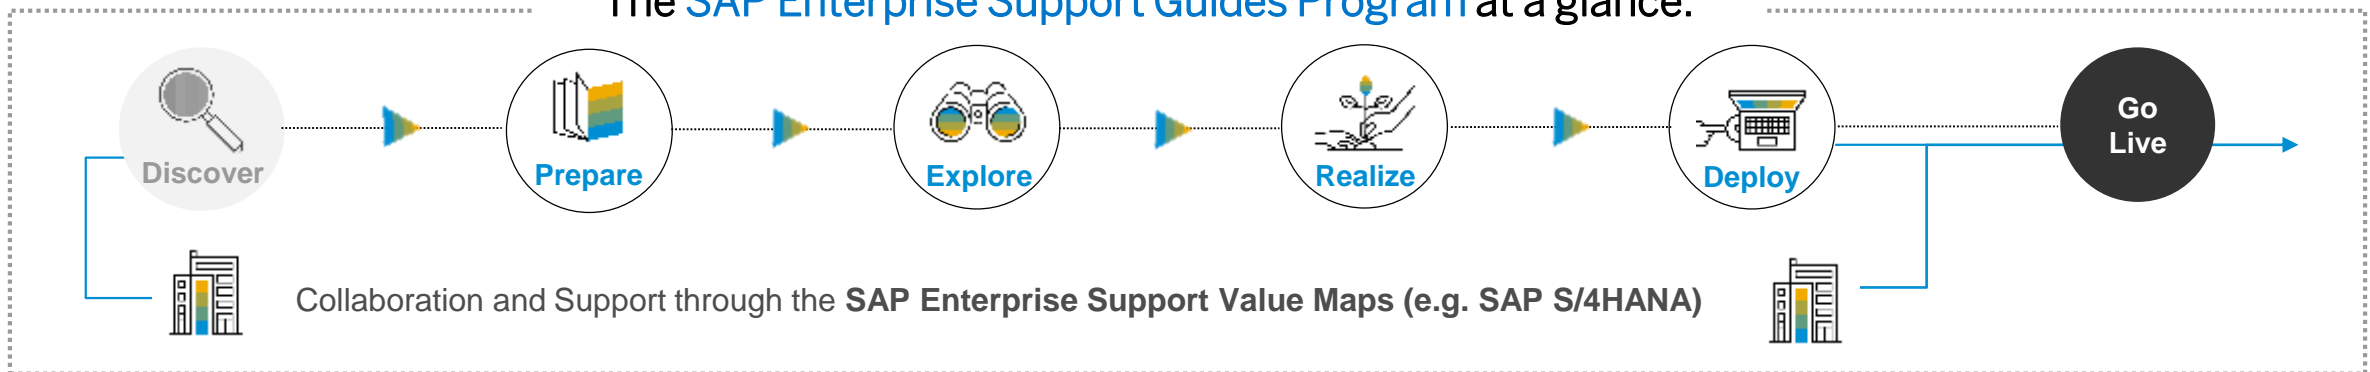

- A proposed goals-based **Engagement Plan** tailored to support your SAP S/4HANA project
- Planned **Engagement Points** during your project life cycle
- **Journey Checks** to guide you in the right direction at each stage of your SAP S/4HANA project
- The program is available to SAP Enterprise Support Direct customers at no additional cost

Join the SAP S/4HANA Movement to unlock the value of the Age of Intelligence

With **SAP Enterprise Support Guides** the Move to SAP S/4HANA will be simplified for Enterprise Support Direct customers.

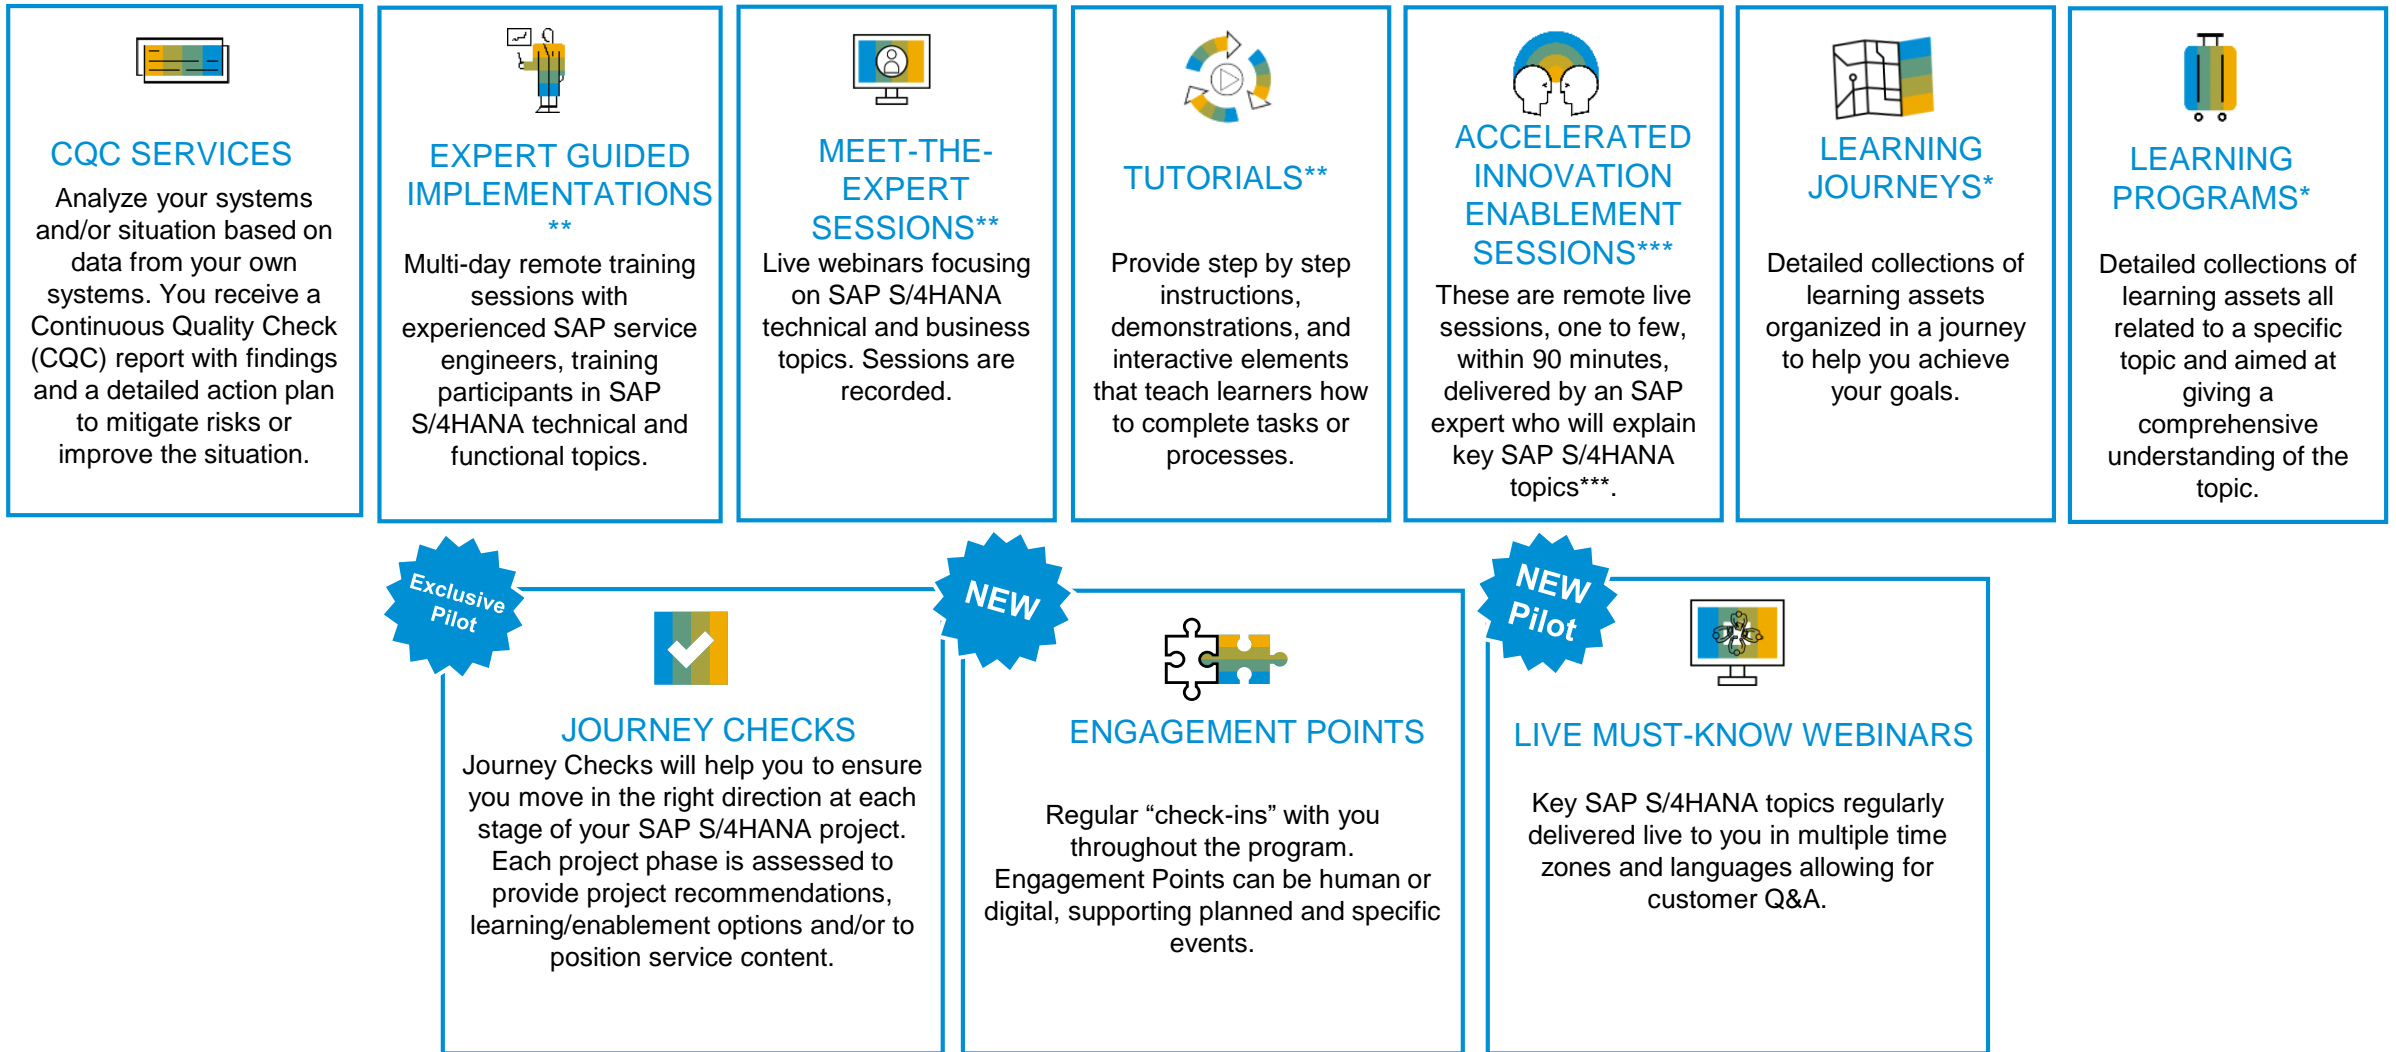

SAP Enterprise Support Guides will support you from **Prepare Phase** to Go-Live in your SAP S/4HANA project.

The SAP Enterprise Support Guides Program at a glance:

How can SAP Enterprise Support Guides support you?

What delivery methods and asset types can be included in your Engagement Plan?

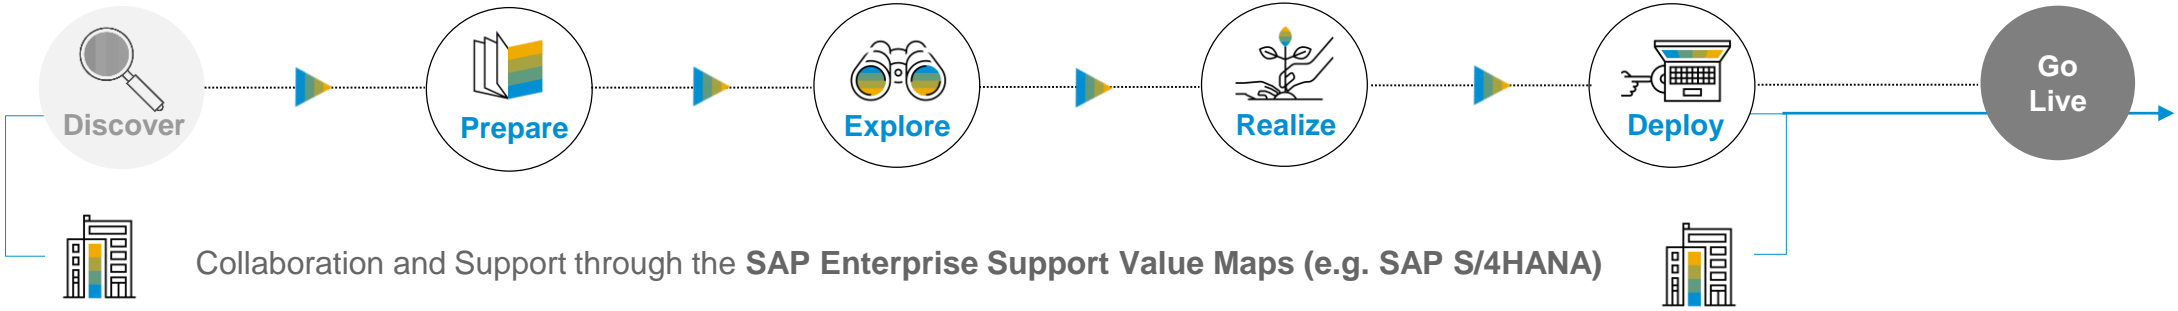

*The learning journeys and the learning programs are part of the [SAP Enterprise Support value maps](#).

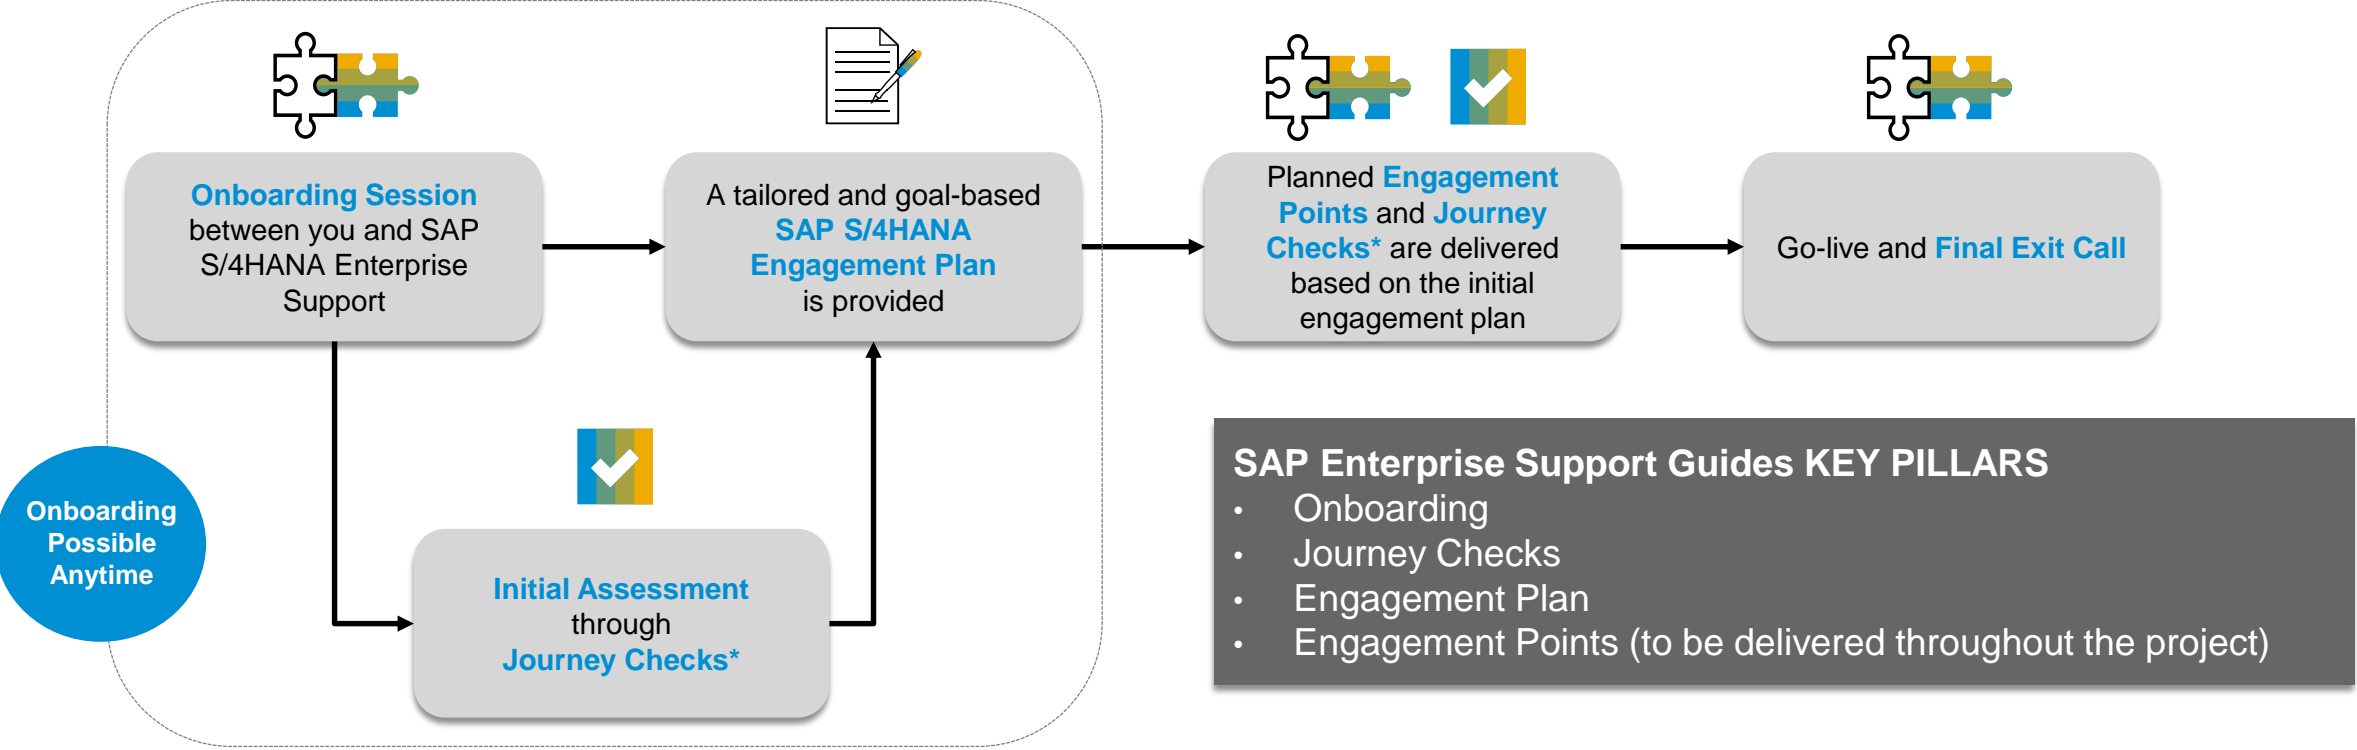

**These enablement assets are available in [SAP Enterprise Support Academy](#) and/or available through the [SAP S/4HANA value map](#) learning journeys.

***Only limited SAP S/4HANA topics are covered by the asset type Accelerated Innovation Enablement.

How can SAP Enterprise Support Guides support you?

We strongly recommend you to join SAP Enterprise Support Guides before the project start

SAP Enterprise Support Guides Demonstration

The onboarding session

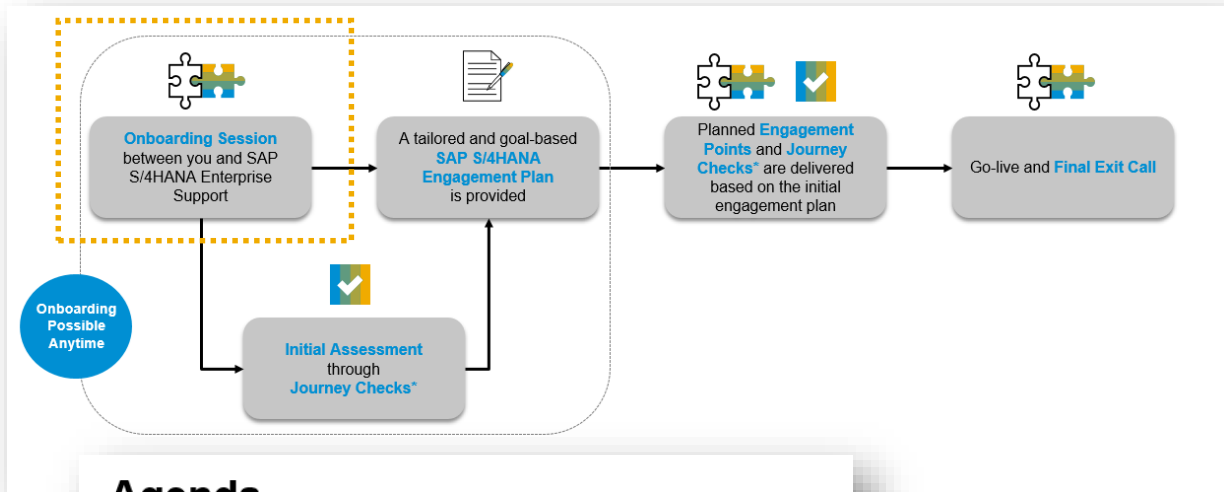

- John (SAP advisor) receives the information that ABC is going to start their SAP S/4HANA project in 6 months. This is the best moment for ABC to join the program.
- John invites the ABC team to the onboarding call
- ABC project team joins the call and explains the current project situation, planning and main pain points
- John explains how the SAP Enterprise Support Guides program can help ABC
- ABC and John discuss and agree on governance and cadence
- The next steps are clearly defined
- ABC must complete the SAP Enterprise Support Guides [registration process](#) after the onboarding call

Outcomes of the onboarding call:

- ✓ John has a clear overview of ABC's project
- ✓ ABC understands the key concepts and deliverables of SAP Enterprise Support Guides
- ✓ John is able to select the relevant SAP Journey Check questionnaires

Deliverables:

- ✓ The SAP Enterprise Support Guides Onboarding deck presentation
- ✓ The meeting minutes of the session including the proposed next steps
- ✓ The Journey Check questionnaires to fill out

Agenda

Introduction

- Roundtable
- Your Project Description
- Session Objectives
- Key Deliverables

Enterprise Support Overview (optional)

How Can SAP Enterprise Support Guides Support You?

- SAP Enterprise Support Guides Overview
- SAP S/4HANA Best Practices and Lessons Learned

Engagement Governance and Cadence

Engagement Plan Approach

Customer Success Story

SAP Enterprise Support Guides – Registration Process

Next Steps

SAP Enterprise Support Guides Demonstration

The first Journey Checks

- The ABC project lead fills out the SAP JC questionnaires and reaches out to the Finance and Technical leads to address specific questions
- The ABC project lead sends the filled questionnaires back to SAP
- SAP generates the report based on the information provided in the questionnaire
- The ABC project lead receives the corresponding reports and can decide which recommendations they want to implement

Outcomes of the SAP JC reports

- ✓ ABC learn that:
 - ✓ they need to empower themselves on ABAP Test Cockpit
 - ✓ maximum business downtime should be discussed with the business at the start of project
 - ✓ the Simplification Item check must be run in client 000.
 - ✓ Fiori is a key element to unlock the value of SAP S/4HANA, and is not yet part of the project scope
- ✓ ABC receives prescriptive learning recommendations on areas of improvements

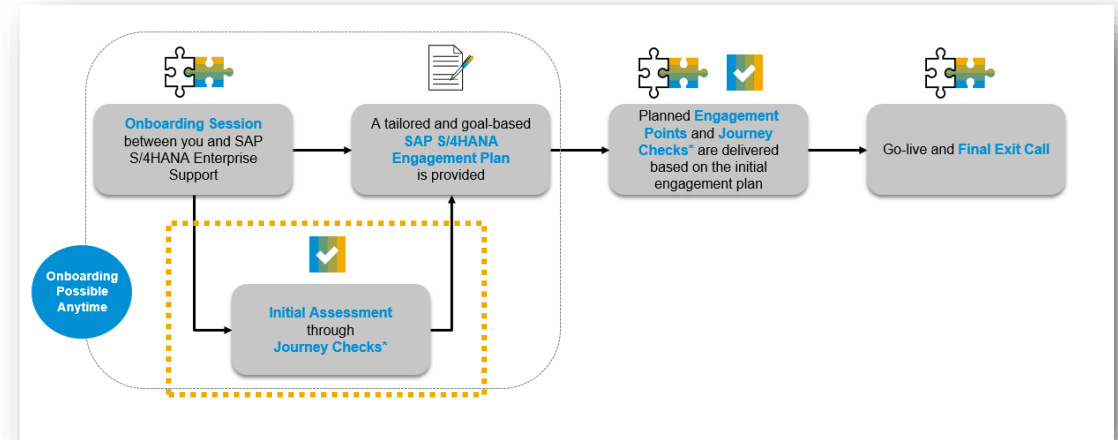

Table of Contents

1	Introduction, session scope and action plan	4
1.1	The Journey Check concept, in and out of scope	4
	Short Introduction to the SAP Activate methodology	5
1.2	Scope of this journey check	5
1.3	Executive Summary	6
1.4	Action Plan	7
2	Your project: Key information and milestones	8
3	Understanding your project timelines	
3.1	Timeline checks: Introduction	
3.2	D1 From now to go-live	
3.3	D2 Remaining time to complete 1st sandbox conversion	
3.4	D4 From project start to go-live	
3.1	D5 From DEV start to QA	
3.2	D6 From QA to go-live (including dress rehearsal)	
3.3	Is the development system the first system to be used?	
3.4	Is a dress-rehearsal planned for the project?	
4	Understanding your project: SAP ERP system to be replaced	
4.1	SAP ERP release and EhP of the system to be replaced	
5	Understanding your project: The target	
5.1	Understanding your project: Chosen deployment	
5.2	What is the target SAP S/4HANA release?	
5.3	Is SAP Fiori part of the scope of your project?	
6	SAP Readiness Check and Simplification	
6.1	SAP Readiness Check for SAP S/4HANA used	
6.2	SAP Readiness Check ran for the target release	
6.3	SAP Readiness Check results understanding	
6.4	Have you run the Simplification Item Check on	
6.5	Which sentence below best defines what a simplification item is?	
6.6	Is the add-on tab in the SAP Readiness Check	
7	Sandbox conversion	
7.1	How many sandbox conversion(s) are already planned?	
7.2	How many sandboxes have already been converted?	
7.3	Is sandbox based on a copy of production?	
7.4	Is/was sandbox run on similar hardware as production?	
7.5	Time planned for first sandbox conversion	
8	Technical Downtime vs allowed Business Downtime	
8.1	Reminder of terminology	
8.2	What you need to achieve an accurate measurement	
8.3	What is the total business downtime allowed by the business?	
8.4	What is the total business downtime allowed by SAP?	
9	Miscellaneous Questions	22
9.1	Do you need help to demonstrate/discuss the value of SAP S/4HANA with the business users?	22
9.2	Do you need to demonstrate or experience SAP S/4HANA in a short interval or with a small budget?	23
9.3	Do you need help to select the product(s) which will complement SAP S/4HANA in your future landscape?	24
9.4	Do you know what a compatibility pack is, and when it should be used?	24

1.3 Executive Summary

- Many elements of a successful SAP S/4HANA conversion project are present:
- Overall duration for the project is in the average of most of the SAP S/4HANA projects
 - Important tasks are already anticipated or ongoing (SAP Readiness Check...)
 - Maximum business downtime of 48 hours is in the average of the expectations of the customers, and usually reachable for the size of your system (although each system behaves very differently)

However a few elements require your attention, which is why the rating of this report is Yellow:

- **Remaining time before your first environment conversion is likely too short:** You may want to extend the planning for this part
- **There is no dress-rehearsal planned.** Although dress-rehearsal is an additional conversion, on a production-like hardware, and such is a significant cost in the project, it is a strong best practice to include a dress-rehearsal, and particularly in your case for which the architecture of the production is significantly different from the other environment.
- **Add-ons situation is not totally clarified,** and first conversion is planned in less than 1 month. Based on experience, incompatible Add-ons can generate significant delays in project planning. A specific attention should be considered on this activity.
- It was reported in the questionnaire that the **SAP Readiness Check results** were not yet totally understood/clarified
- **SAP Fiori** is not planned to be in the scope of the project. Since S Fiori is a key enabler of the value of SAP S/4HANA, it is strongly recommended to start with a minimum of key SAP Fiori apps, as a showcase of the future value for your business counterparts

Reminder: This report is delivered independently from the Technical Aspects and Functional Aspects. Some elements from these reports may still change the overall rating of the project.

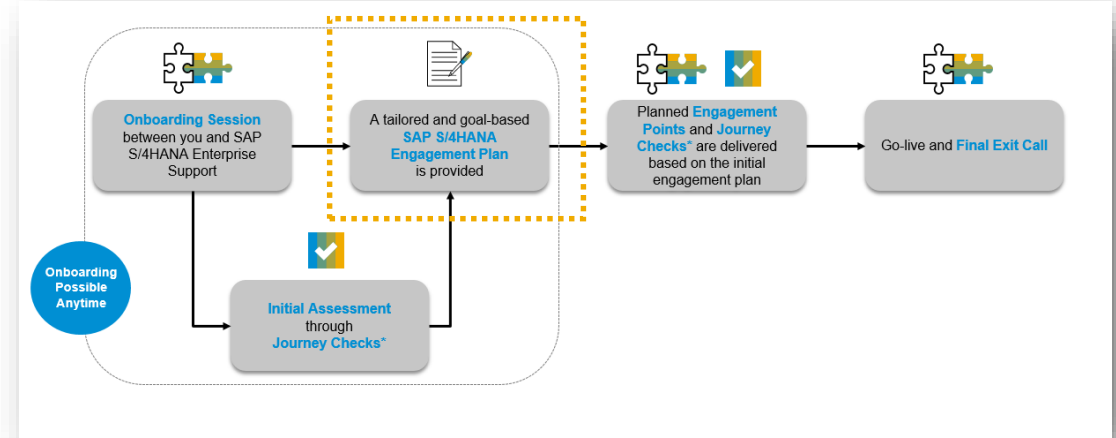

SAP Enterprise Support Guides Demonstration

The tailored and goal-based Engagement Plan

- Based on the Journey Check results and what was discussed during the onboarding call, John creates the prescriptive engagement plan. This captures the relevant empowerment assets and services for ABC.
- John schedules a call with ABC, where the high-level engagement (PPT) and the detailed engagement plan will be presented and discussed
- ABC and John have the call and agree on the next steps
- ABC registers for some ES value maps

Outcomes of the engagement plan

- ✓ ABC receives two documents:
 - A deck which captures key elements (ABC's situation, governance, cadence, high-level plan..etc.)
 - An Excel spreadsheet which captures the prescriptive detailed list of assets relevant to their project

SAP Enterprise Support Guides Demonstration

Next Engagement Points

- ABC and John have regular calls during the project life-cycle as agreed during the onboarding call
- ABC completes the sandbox conversion and discovers downtime issues
- John then adjusts the detailed engagement plan and recommends the new CQC Technical Conversion Optimization
- Close to the go-live, John schedules the relevant CQC services “Analysis session”, “Going Live Support” and “Verification Session”. These services are documented in the detailed engagement plan
- After the go-live, ABC and John have a final exit call

Outcomes of the next engagement points

- ✓ ABC received regular guidance through the prescriptive engagement plan which John adjusts as needed
- ✓ ABC received support from SAP Enterprise Support through the complete project life-cycle

SAP S/4HANA Sandbox conversion prerequisites ⓘ

SAP Enterprise Support Academy

Very often, the workload for the first sandbox conversion in a project is underestimated. This usually translate into increase of delays and costs, with teams waiting for the environment.
In this part 1 of the curriculum, we will help you to:

Goals:

- Understand the main prerequisites to convert a sandbox
- Understand the recommended timelines to implement these actions
- Avoid typical pitfalls and anticipate roadblocks
