About me

- With **SAP** since 2001
- Implemented the first daily delivery process at SAP with **twogo** (2014)
- Current job: Operations at SAP CP ABAP Environment (a.k.a. Steampunk)
- Co-Organizer DevOpsDays Zurich
<https://devopsdays.ch>
- Conference speaker
<https://doergn.github.io/>
-  [@doergn](https://twitter.com/doergn)

There is no Canonical Definition of DevOps

“a cross-disciplinary community of practice dedicated to the study of building, evolving and operating rapidly-changing resilient systems at scale.”

Jez Humble

“DevOps is... an umbrella concept that refers to anything that smoothes out the interaction between development and operations.”

Damon Edwards

*“DevOps is a cultural and professional movement.
The best way to describe devops is in terms of patterns and anti-patterns.”*

Adam Jacobs

“the emerging professional movement that advocates a collaborative working relationship between Development and IT Operations, resulting in the fast flow of planned work (i.e., high deploy rates), while simultaneously increasing the reliability, stability, resilience and security of the production environment.”

Gene Kim

What's the problem?

What's the solution?

Development + Operations = DevOps

That was easy!

- The term DevOps is **bad**. Really **bad**. Like really really bad!
 - It started as “Agile Operations”, turned into DevOps and at the time everyone realized it was a terrible mistake the term was already established.
- What about...
 - Security?  *DevSecOps?*
 - Business?  *DevBizOps?*
 - Quality?  *DevQOps?*
 - UA?  *DevUAOps?*
 - ...

Don't try to create a new bad term. Let's live with one bad term: DevOps

Tear Down Silos

- **Biggest** problem in most organizations is not in the silos
- **Biggest** problem in most organizations is between the silos

- Create **cross-functional, autonomous** teams
 - All people with a direct impact on the product should work in one team
 - Keep teams small -> Trust is the foundation of DevOps ▶
- **Functional silos** only make sense in **not direct product** related tasks
 - E.g. HR, Legal, ...

In Other Words...

“DevOps: A culture where people, regardless of title or background, work together to imagine, develop, deploy and operate a system.”

Ken Mugrage, Thoughtworks

Agile Organization Setup

Agile Organization Setup

Conway's Law

“Organizations which design systems [...] are constrained to produce designs which are copies of the communication structures of these organizations.”

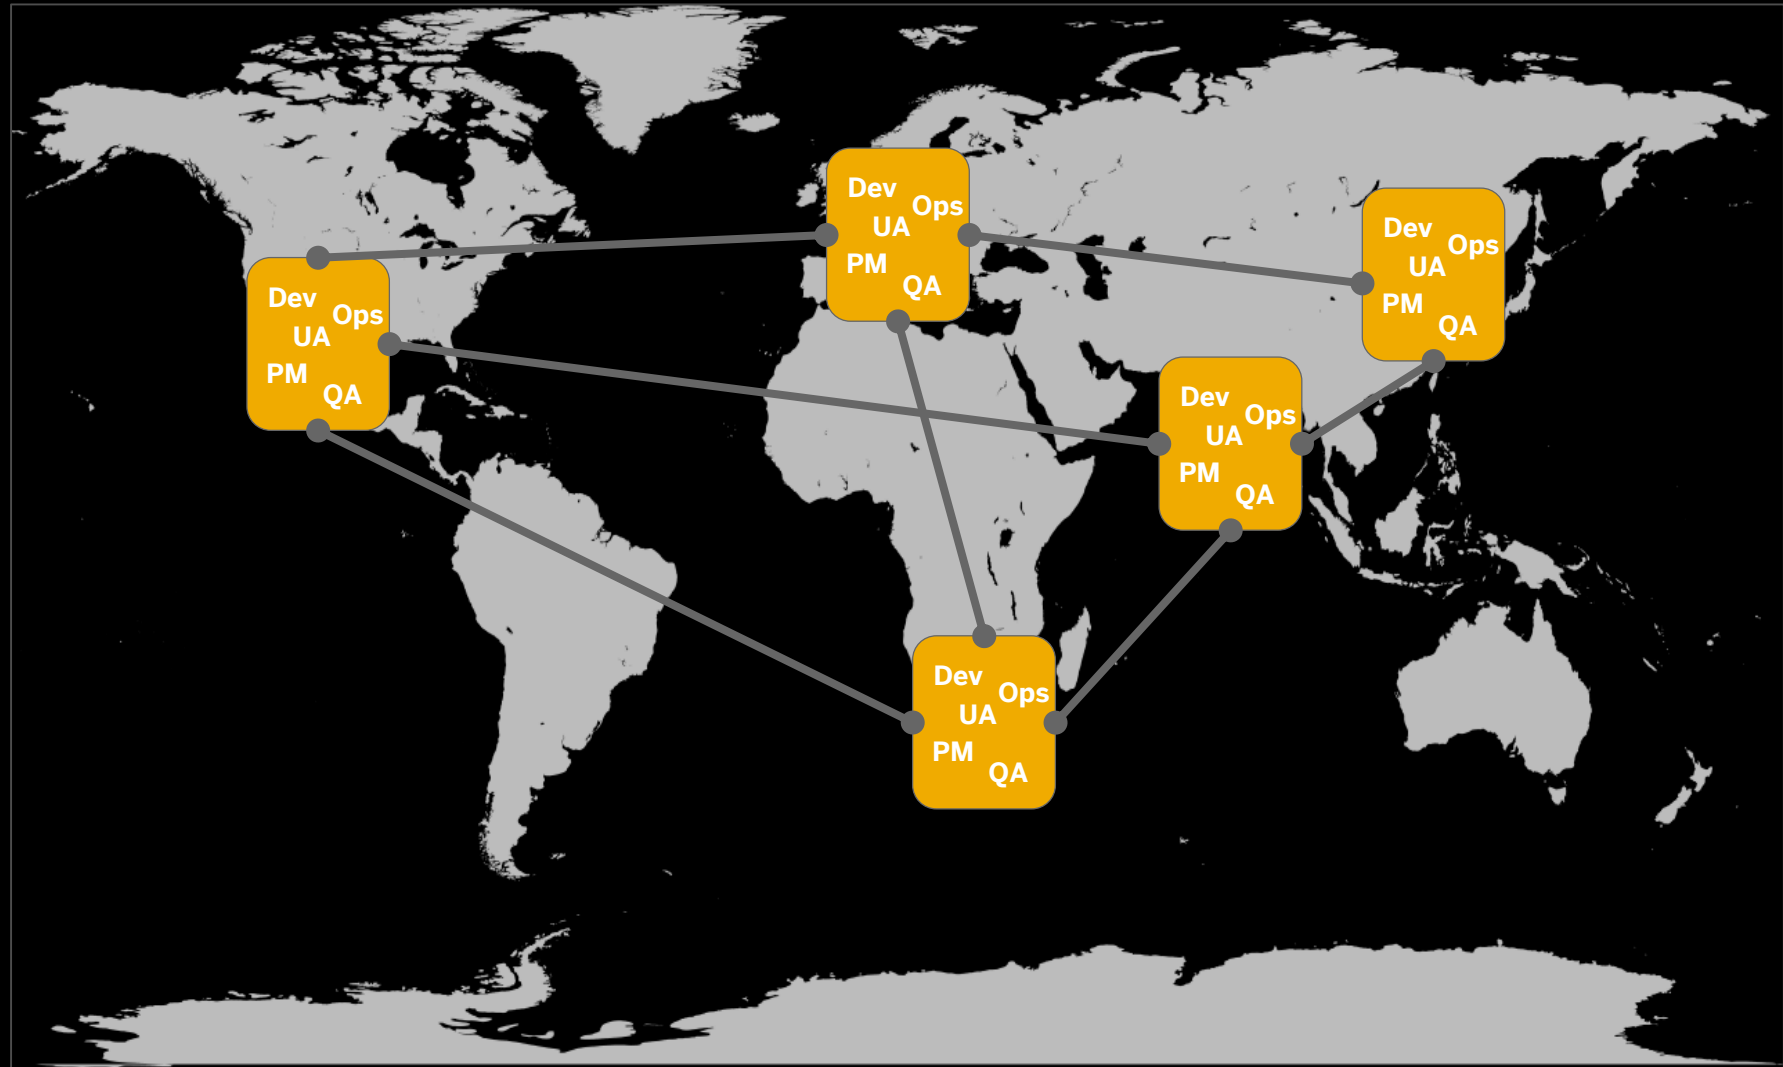

Melvin Conway
Computer scientist

- Architectures are constrained to organizations communication structures
- In doubt, communication structures overrule architecture...

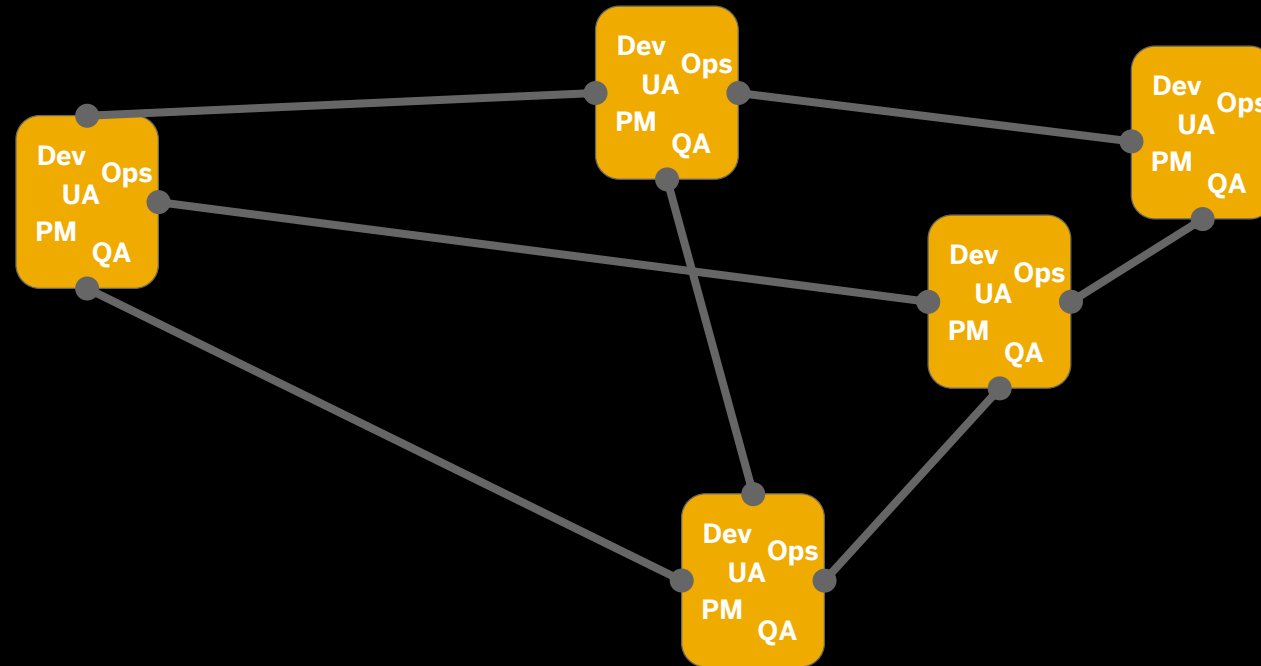

“Culture eats strategy for breakfast”

Peter Drucker

Conway's Law - Reversed

From Organization Setup...

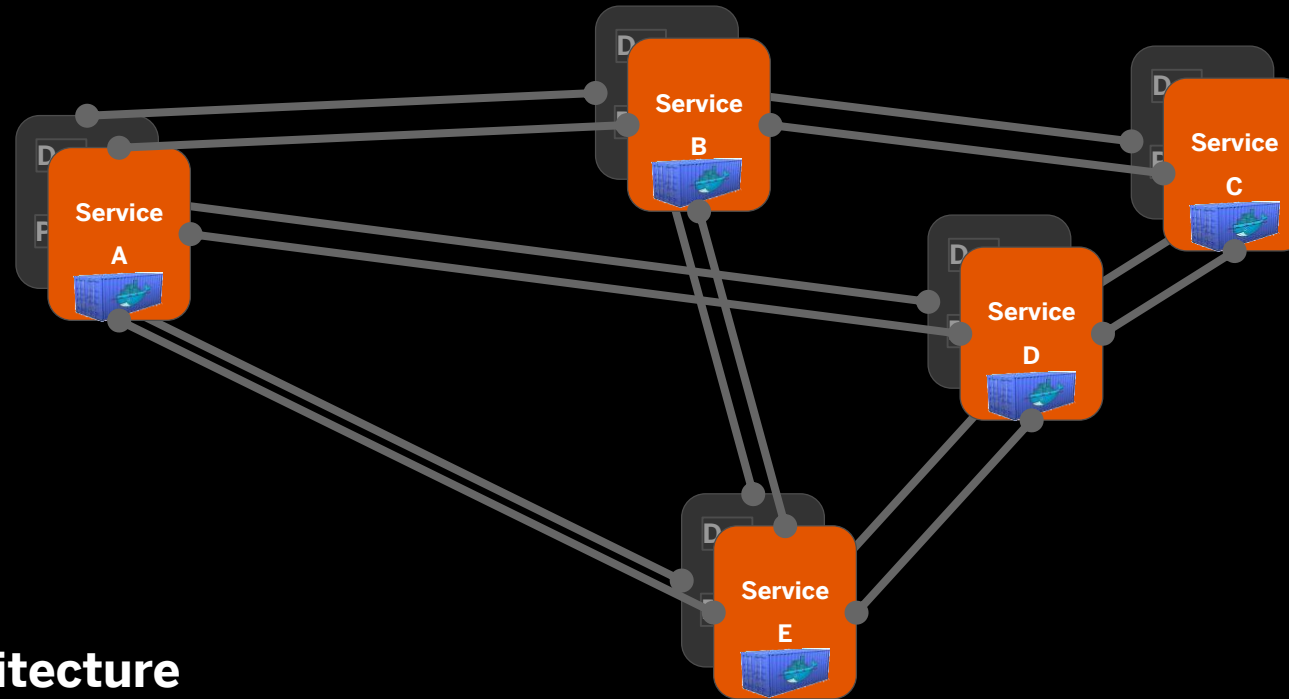

- **Setup your organization**

From Organization Setup...to microservice architecture...

- **Setup your organization in alignment to your architecture**

From Organization Setup...to microservice architecture...to containers

- **Setup your organization in alignment to your architecture and leverage containers as fast, reproducible, encapsulated runtimes**

Cloud Engineering Tools - Deploy with Confidence

Golden Path of Tools to deliver SaaS Apps at Scale, Daily

Legend:

Often several tools can be used to *live* the process. Tools have individual pro/cons. People have choice here and are enabled to optimize for all (inner-source)

Comparing Software Delivery Performance - DORA

Aspect of Software Delivery Performance*	Elite	High	Medium	Low
Deployment frequency For the primary application or service you work on, how often does your organization deploy code to production or release it to end users?	On-demand (multiple deploys per day)	Between once per day and once per week	Between once per week and once per month	Between once per month and once every six months
Lead time for changes For the primary application or service you work on, what is your lead time for changes (i.e., how long does it take to go from code committed to code successfully running in production)?	Less than one day	Between one day and one week	Between one week and one month	Between one month and six months
Time to restore service For the primary application or service you work on, how long does it generally take to restore service when a service incident or a defect that impacts users occurs (e.g., unplanned outage or service impairment)?	Less than one hour	Less than one day ^a	Less than one day ^a	Between one week and one month
Change failure rate For the primary application or service you work on, what percentage of changes to production or released to users result in degraded service (e.g., lead to service impairment or service outage) and subsequently require remediation (e.g., require a hotfix, rollback, fix forward, patch)?	0-15% ^{b,c}	0-15% ^{b,d}	0-15% ^{c,d}	46-60%

* The KPIs define how to measure DevOps capabilities and have been defined in a large study called [DORA State of DevOps](#)

Key Take-Aways

Deploy with Confidence (DwC) is a **SAP-Internal**, proven combination of

- Culture
- Processes
- Tools

 for daily delivery to production. – With Confidence!

SAP Cloud ALM, Live.

From monolithic development to daily delivery!

200 Engineers, 9 months,

- ✓ We deliver Daily.
- ✓ We improve Daily Automation, Co-innovations, Inner-Source, ...
- ✓ We get **faster** every day!

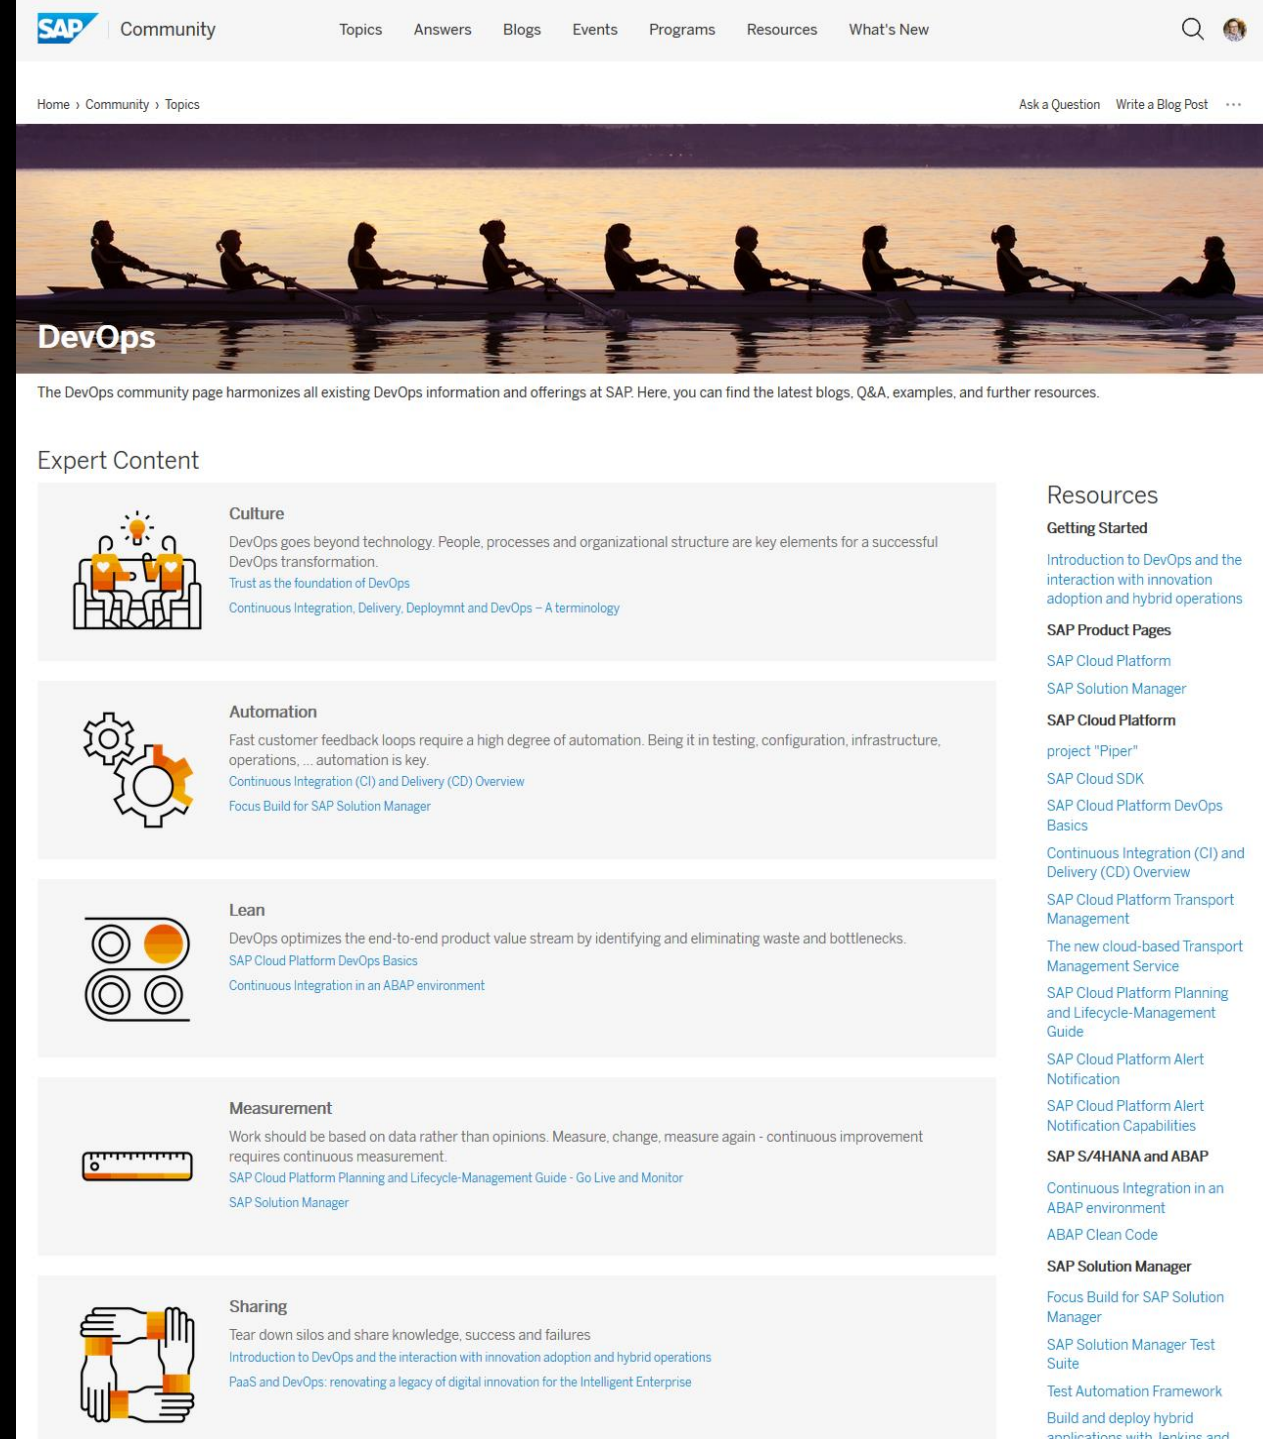

SAP ALM Summit 2020 – Topic 2020-10-09

Track 3 - Cloud Technologies for ALM professionals	
09:30 - 10:15	Introduction to cloud technologies
10:25 - 11:10	Workflow with SAP Cloud Platform
11:20 - 12:10	Introduction to extensions for SAP Cloud Platform with Cloud Foundry, Cloud SDK and SAP API Business Hub

DevOps Community Topic Page

- One entry page for DevOps with SAP
- Launched Sep/2019
- Community for and by SAP, Customers and Partners

The screenshot displays the SAP DevOps Community Topic Page. At the top, the SAP logo and 'Community' label are on the left, while navigation links for Topics, Answers, Blogs, Events, Programs, Resources, and What's New are on the right. A search icon and user profile are in the top right corner. Below the header, a breadcrumb trail shows 'Home > Community > Topics'. On the right side of this section are links for 'Ask a Question' and 'Write a Blog Post'. The main banner features a rowing team silhouette with the 'DevOps' title overlaid. Below the banner, a paragraph states: 'The DevOps community page harmonizes all existing DevOps information and offerings at SAP. Here, you can find the latest blogs, Q&A, examples, and further resources.'

The page is organized into two main columns. The left column, titled 'Expert Content', contains five thematic sections, each with an icon and a list of links:

- Culture** (Icon: Two people at a table with a lightbulb):
 - DevOps goes beyond technology. People, processes and organizational structure are key elements for a successful DevOps transformation.
 - [Trust as the foundation of DevOps](#)
 - [Continuous Integration, Delivery, Deployment and DevOps – A terminology](#)
- Automation** (Icon: Interlocking gears):
 - Fast customer feedback loops require a high degree of automation. Being it in testing, configuration, infrastructure, operations, ... automation is key.
 - [Continuous Integration \(CI\) and Delivery \(CD\) Overview](#)
 - [Focus Build for SAP Solution Manager](#)
- Lean** (Icon: Four circles in a 2x2 grid):
 - DevOps optimizes the end-to-end product value stream by identifying and eliminating waste and bottlenecks.
 - [SAP Cloud Platform DevOps Basics](#)
 - [Continuous Integration in an ABAP environment](#)
- Measurement** (Icon: A ruler):
 - Work should be based on data rather than opinions. Measure, change, measure again - continuous improvement requires continuous measurement.
 - [SAP Cloud Platform Planning and Lifecycle-Management Guide - Go Live and Monitor](#)
 - [SAP Solution Manager](#)
- Sharing** (Icon: Four hands joined in a circle):
 - Tear down silos and share knowledge, success and failures
 - [Introduction to DevOps and the interaction with innovation adoption and hybrid operations](#)
 - [PaaS and DevOps: renovating a legacy of digital innovation for the Intelligent Enterprise](#)

The right column, titled 'Resources', contains several sub-sections with links:

- Getting Started**
 - [Introduction to DevOps and the interaction with innovation adoption and hybrid operations](#)
- SAP Product Pages**
 - [SAP Cloud Platform](#)
 - [SAP Solution Manager](#)
- SAP Cloud Platform**
 - [project "Piper"](#)
 - [SAP Cloud SDK](#)
 - [SAP Cloud Platform DevOps Basics](#)
 - [Continuous Integration \(CI\) and Delivery \(CD\) Overview](#)
 - [SAP Cloud Platform Transport Management](#)
 - [The new cloud-based Transport Management Service](#)
 - [SAP Cloud Platform Planning and Lifecycle-Management Guide](#)
 - [SAP Cloud Platform Alert Notification](#)
 - [SAP Cloud Platform Alert Notification Capabilities](#)
- SAP S/4HANA and ABAP**
 - [Continuous Integration in an ABAP environment](#)
 - [ABAP Clean Code](#)
- SAP Solution Manager**
 - [Focus Build for SAP Solution Manager](#)
 - [SAP Solution Manager Test Suite](#)
 - [Test Automation Framework](#)
 - [Build and deploy hybrid applications with Jenkins and](#)

DevOps with SAP Vision

“Apply **DevOps** principles to customer’s **SAP technology stack** (and beyond).

Along the **CALMS** pattern, we’ll provide tools, libraries, best-practices, trainings, services and knowledge exchange.”
