

Fastest way to adopt SAP Business Technology Platform

SAP SAP BTP Virtual Event – February 2021
Nis Boy Naeve – VP Adoption Enablement – SAP SE

Innovation Within 24hrs – *returning stranded citizen home*

Challenge: Create a highly scalable and stable app for the German Ministry of Foreign Affairs to help German residents stranded abroad due to travel restrictions back to Germany...within a day.

Solution: “Rückholprogramm App” – developed and delivered by SAP **within 24 hours** – based on SAP Cloud Platform. <http://www.rueckholprogramm.de>

Result: ~170.000 residents returned home safely within two weeks

SAP Business Technology Platform

The Platform for the Intelligent Enterprise

DATABASE AND DATA MANAGEMENT

Capture, manage,
and **govern** your data
to drive better business
outcomes

ANALYTICS

Analyze all your data to
accelerate **insights** and
transform the data you have
into the answers you need

APP DEVELOPMENT AND INTEGRATION

Integrate and **extend**
applications – build new
ways to access and
interact with your data

INTELLIGENT TECHNOLOGIES

Data is the fuel
propelling intelligent
technologies forward –
optimizing processes,
and igniting **innovation**

SAP **Business** Technology Platform

The Platform for the Intelligent Enterprise

**DATABASE
AND DATA
MANAGEMENT**

ANALYTICS

**APP DEVELOPMENT
AND INTEGRATION**

**INTELLIGENT
TECHNOLOGIES**

Improve online patient experience using a COVID-19 chatbot

Send electronic invoices via the Peppol Network

Automate Ticket Handling with Service Ticket Intelligence

*Automate data extraction from business documents
with AI and Intelligent RPA*

Retrieve & track vendor invoices from anywhere

Create a modern user experience using SAPUI5 and the SAP Fiori launchpad

Accelerate your business with the power of Machine Learning

Setup for SAP S/4HANA side-by-side UI Extensions on SAP BTP

*Establish a central entry point
with SAP Launchpad service*

Establish single sign-on to your cloud solutions

Getting started ...

Our typical customers

Business case / problem driven

“We need a solution to realize our specific use case!”

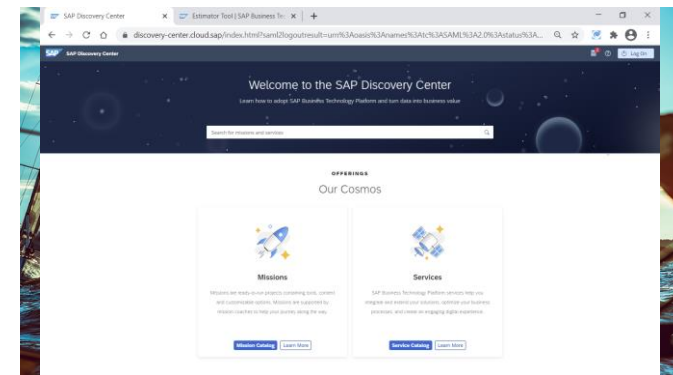

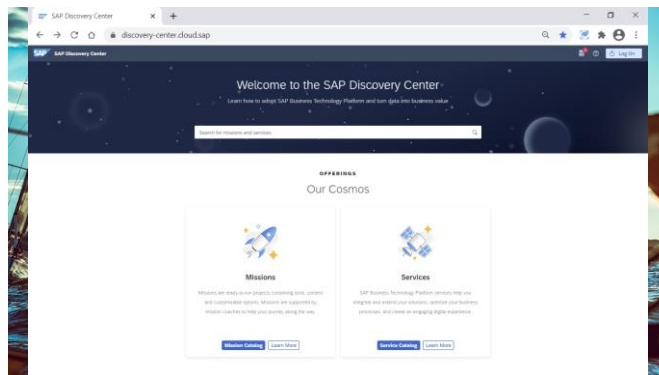

Creativity / technology driven

“How can we innovate even more?”

Demo

SAP BTP Automation with Boosters in Missions

The screenshot displays the SAP BTP Mission Center interface. The main navigation bar includes links for Overview, Project Board, Resources, Support, Members, Customer Stories, Related Missions, and FAQ. The mission card is titled 'Execute Booster for autonomously creating subaccounts and setting it up.' and includes a description: 'Have a look at the video before you start the Booster.' Below the description is a video player showing the SAP Cloud Platform Cockpit interface. The video player shows the 'Global Account: SAP Bluestone - Members' page with a table of members.

ID	User Base	Roles	Actions

The mission card also features a 'Start Booster' button and a 'Mark Card as Complete' button. The background shows the SAP Discovery Center interface with a progress bar and mission phase information.

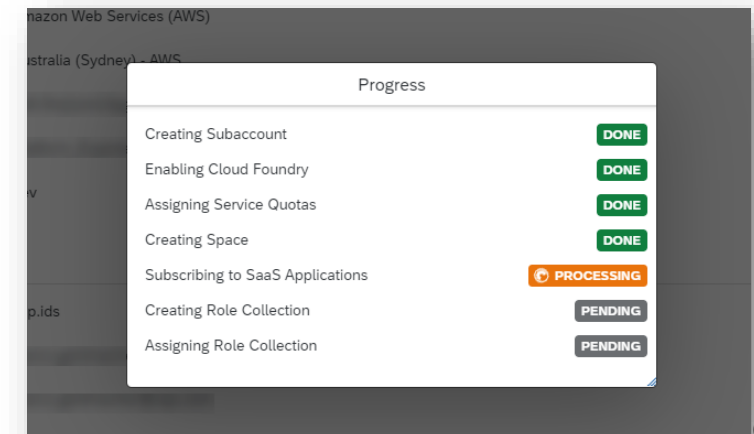

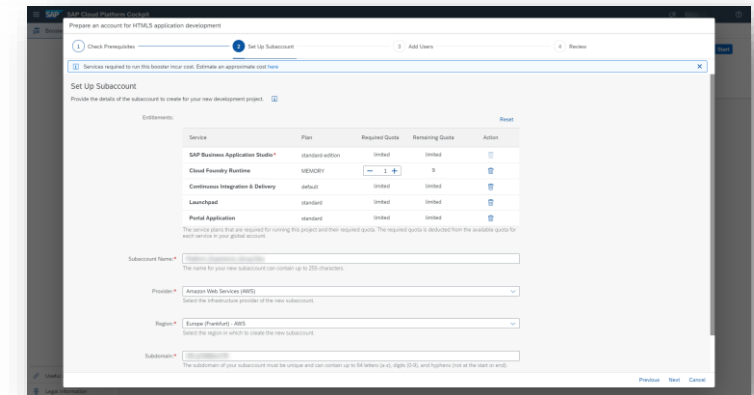

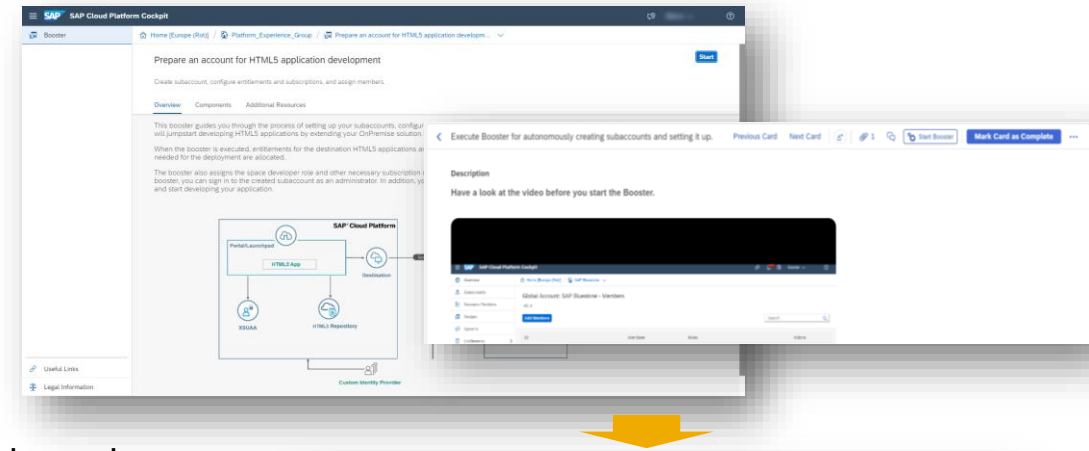

SAP BTP – Boosters

Examples

- Prepare an Account for HTML5 application development
 - Automatic setup of subaccounts, entitlement + subscription configuration and member assignments to jumpstart HTML5 application development
- Setup an Account for Workflow Management
 - Automatic configuration of workflow management services, subscription to the workflow management app, service instance + destination creation and role collection assignments for the workflow management service
- Build a Micro App for SAP Mobile Cards
 - Wizard based setup and activation of selected Mobile Cards in your environment

Find 15* available Boosters in SAP Discovery Center Missions and the SAP Business Technology Platform Cockpit

*8 Boosters also available in the Trial Landscape
