Summary

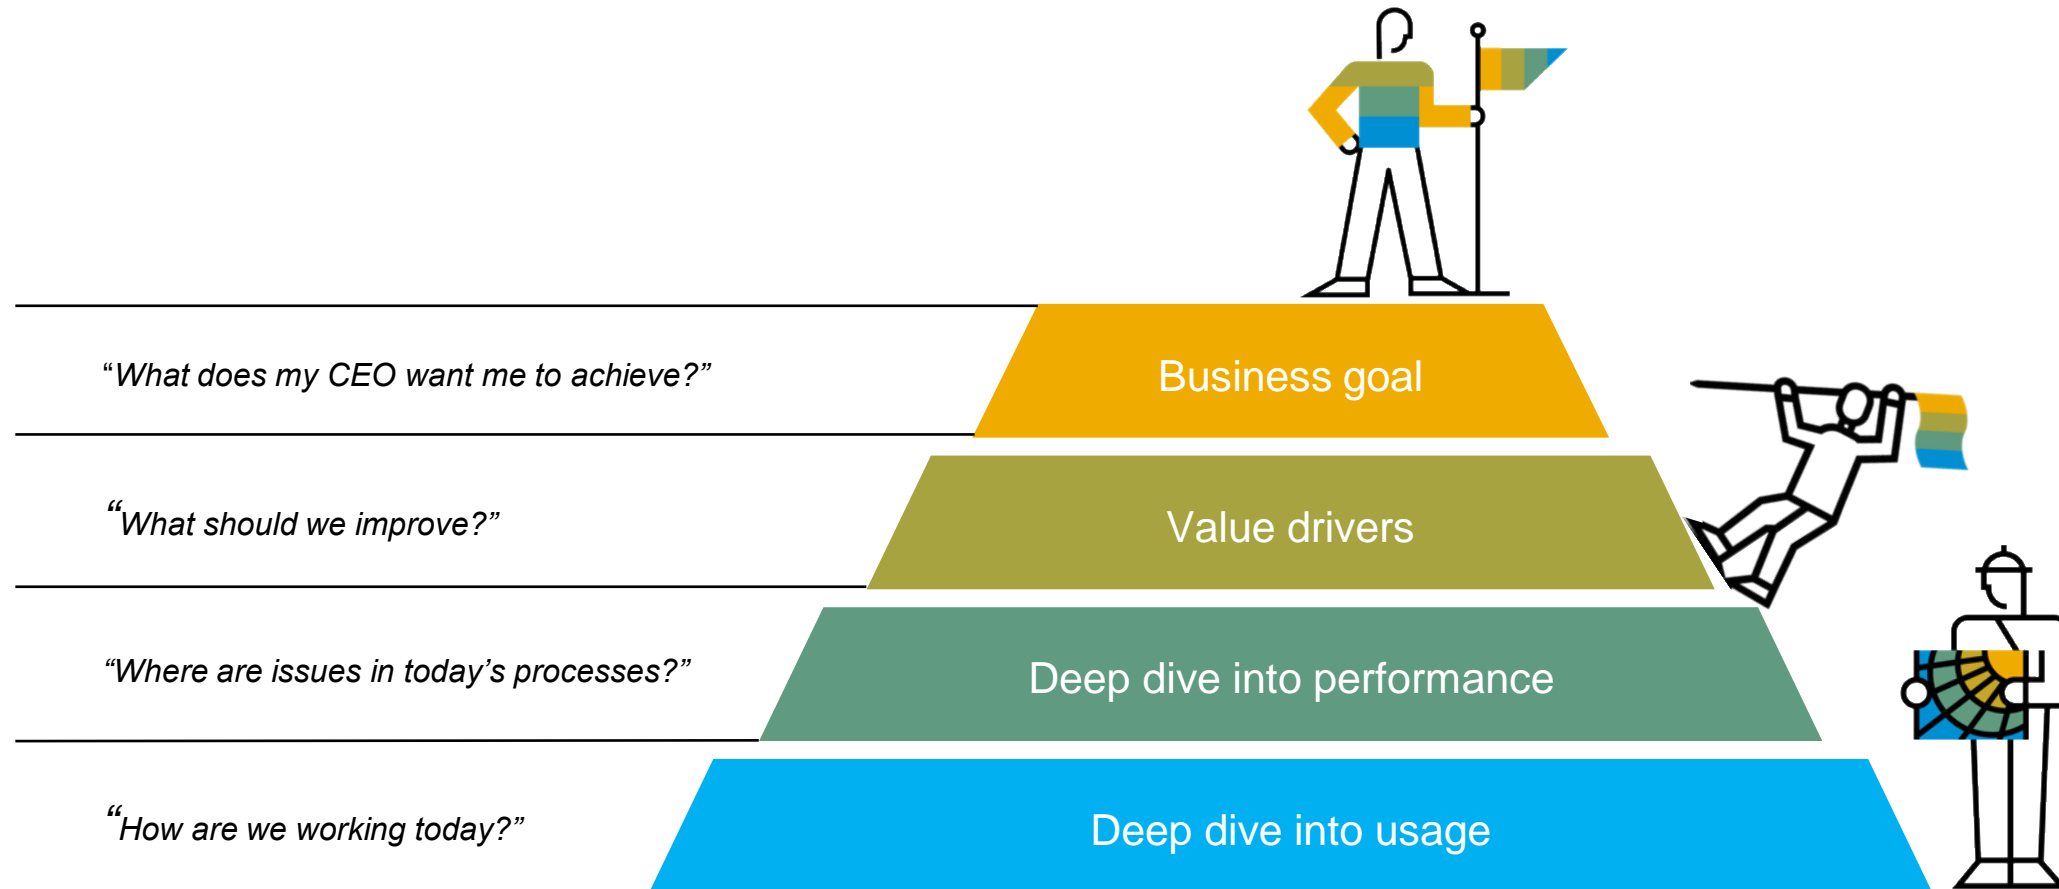

# How to build your case for SAP S/4HANA?

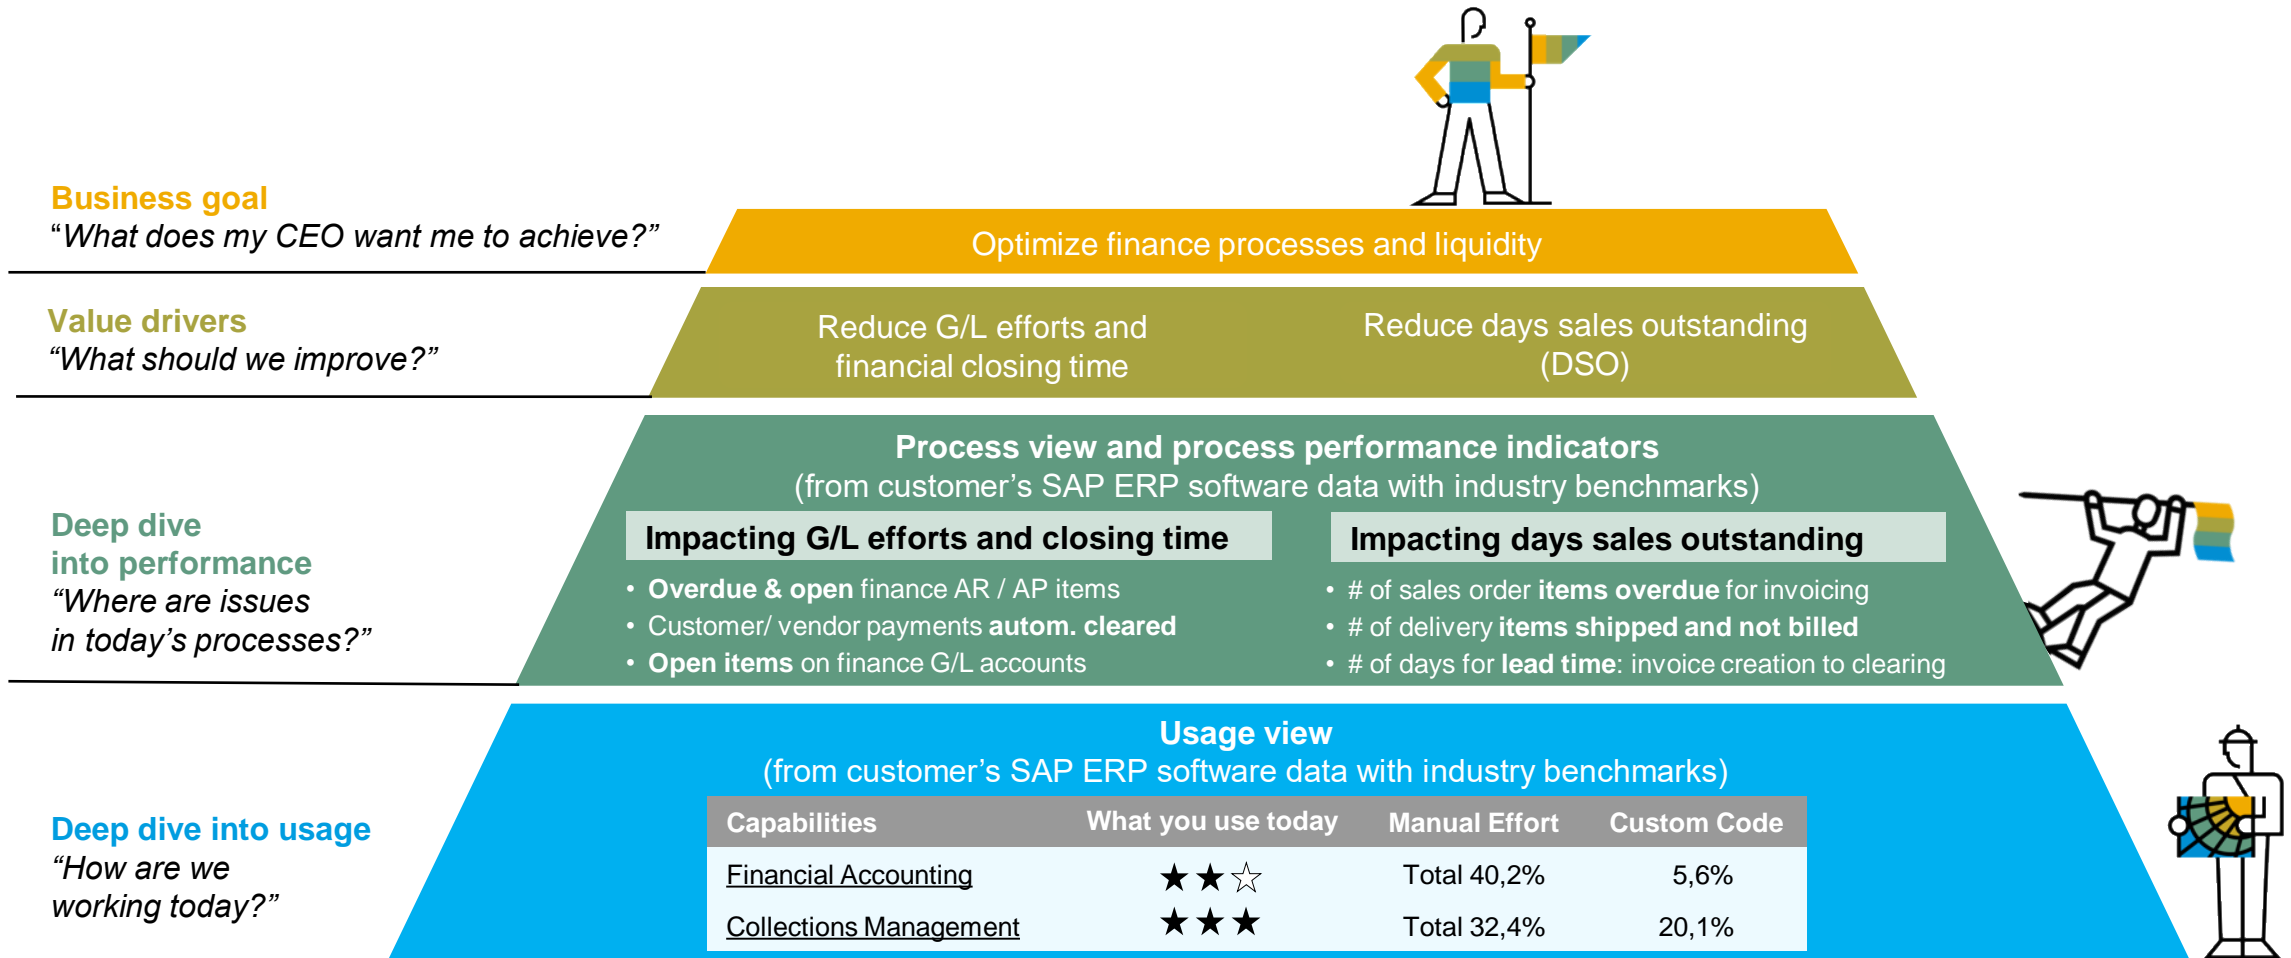

Process Discovery helps business executives understand the value of moving to SAP S/4HANA and intelligent technologies.

# Understand how to achieve your business goals with SAP innovations

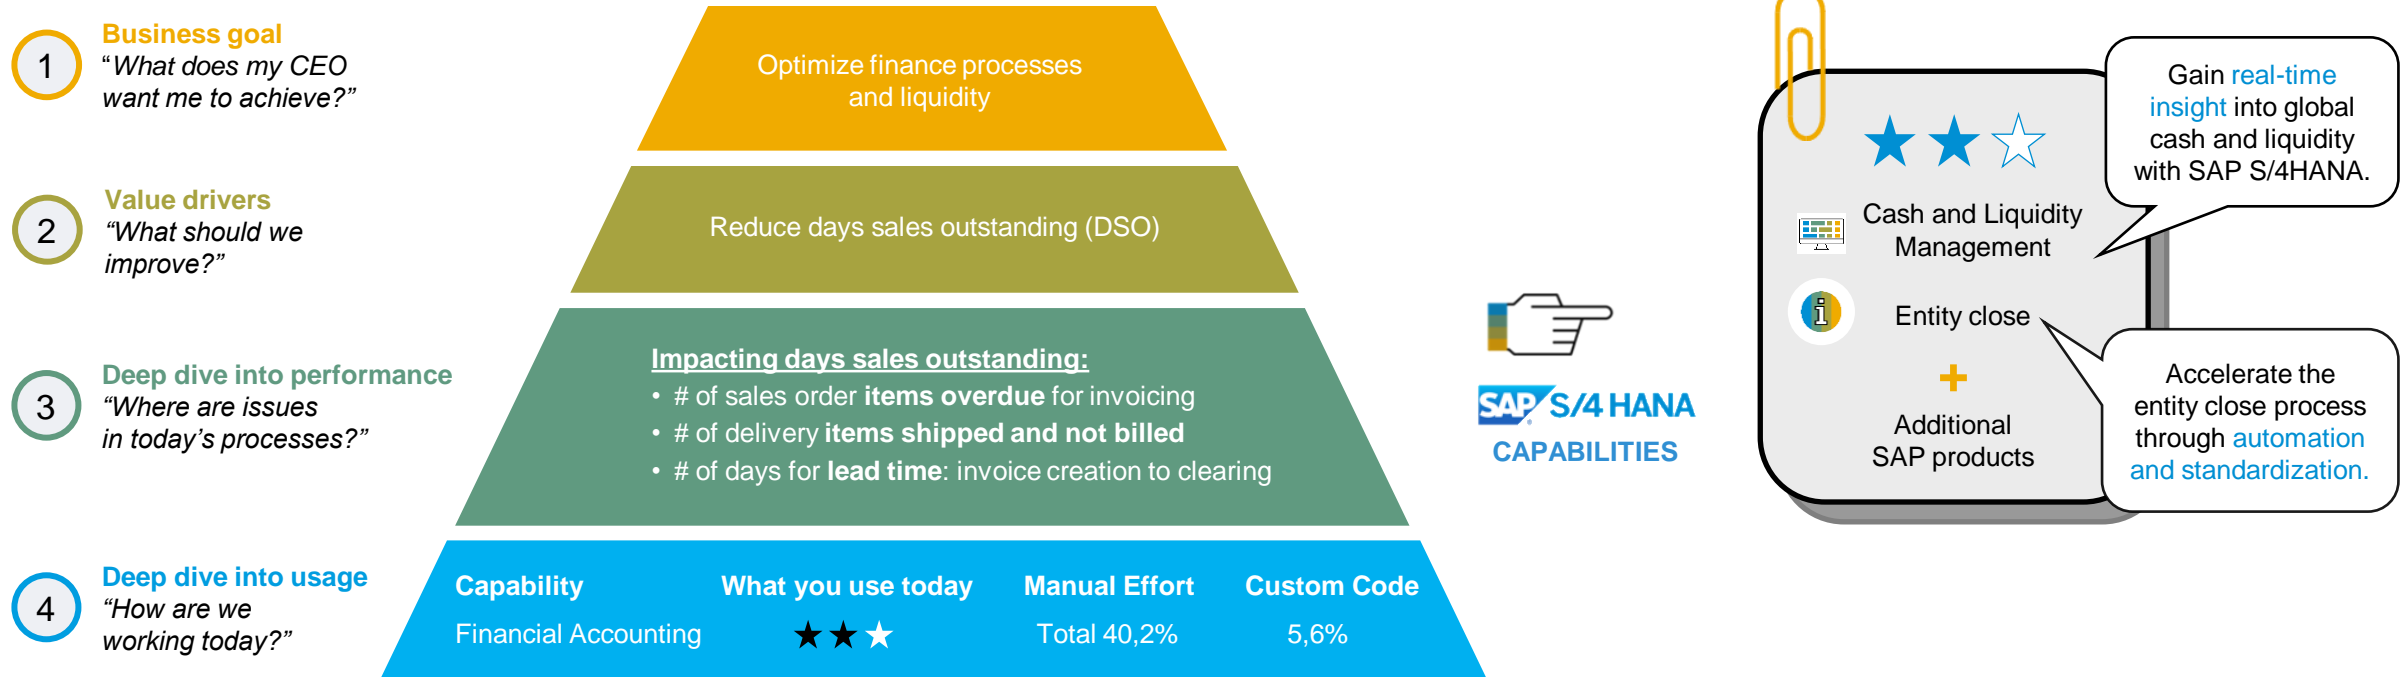

# Understand how to achieve your business goals with SAP innovations

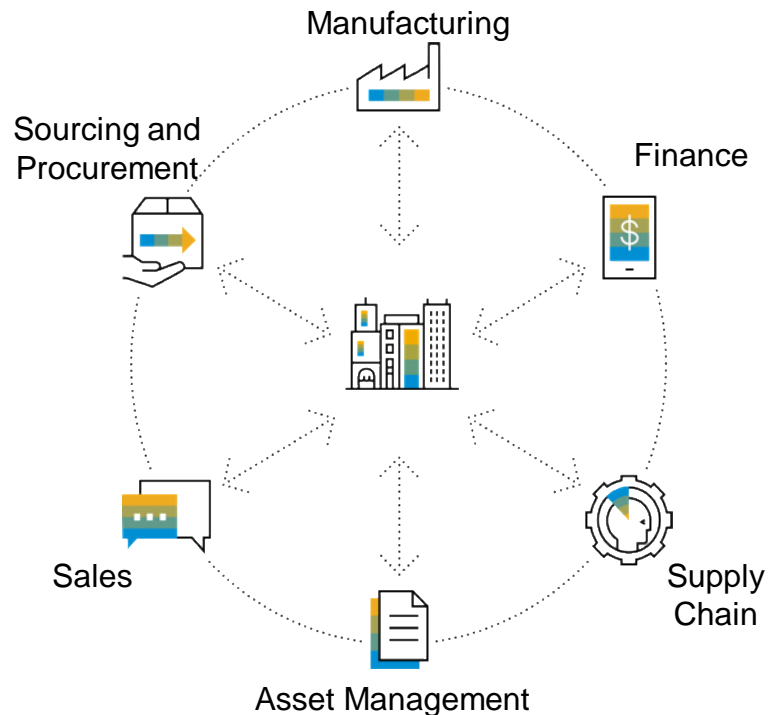

# Understand how to achieve your business goals with SAP innovations

## SAP S/4HANA capabilities recommendations based on your performance and usage

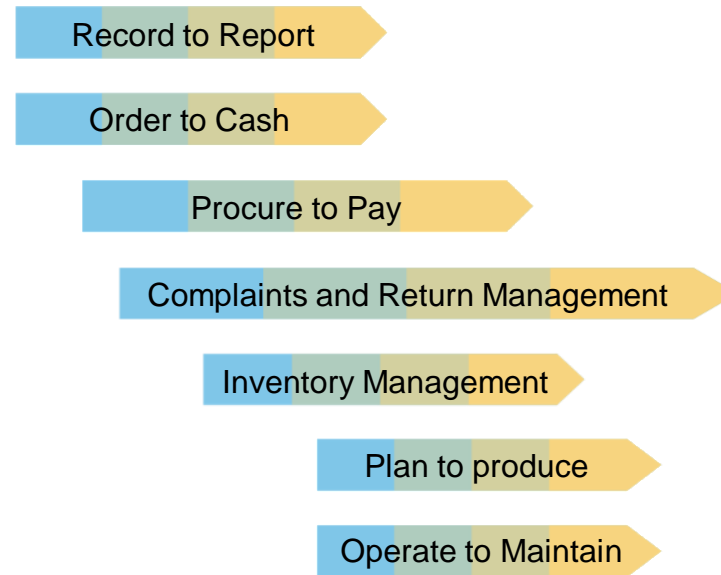

# 12 optimization goals for 6 lines of business across 7 end-to-end processes

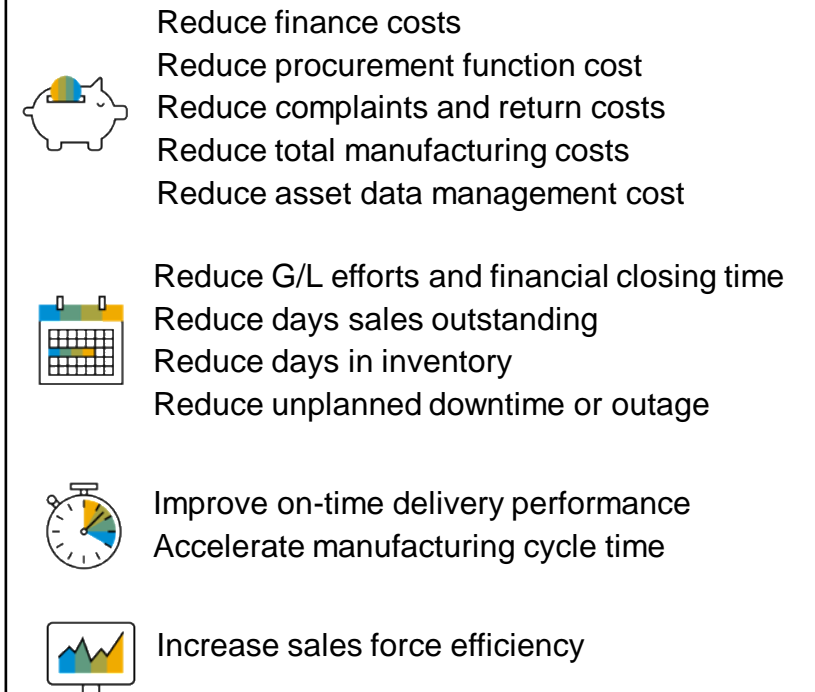

## 6 Lines of Business

## 7 End-to-end Processes

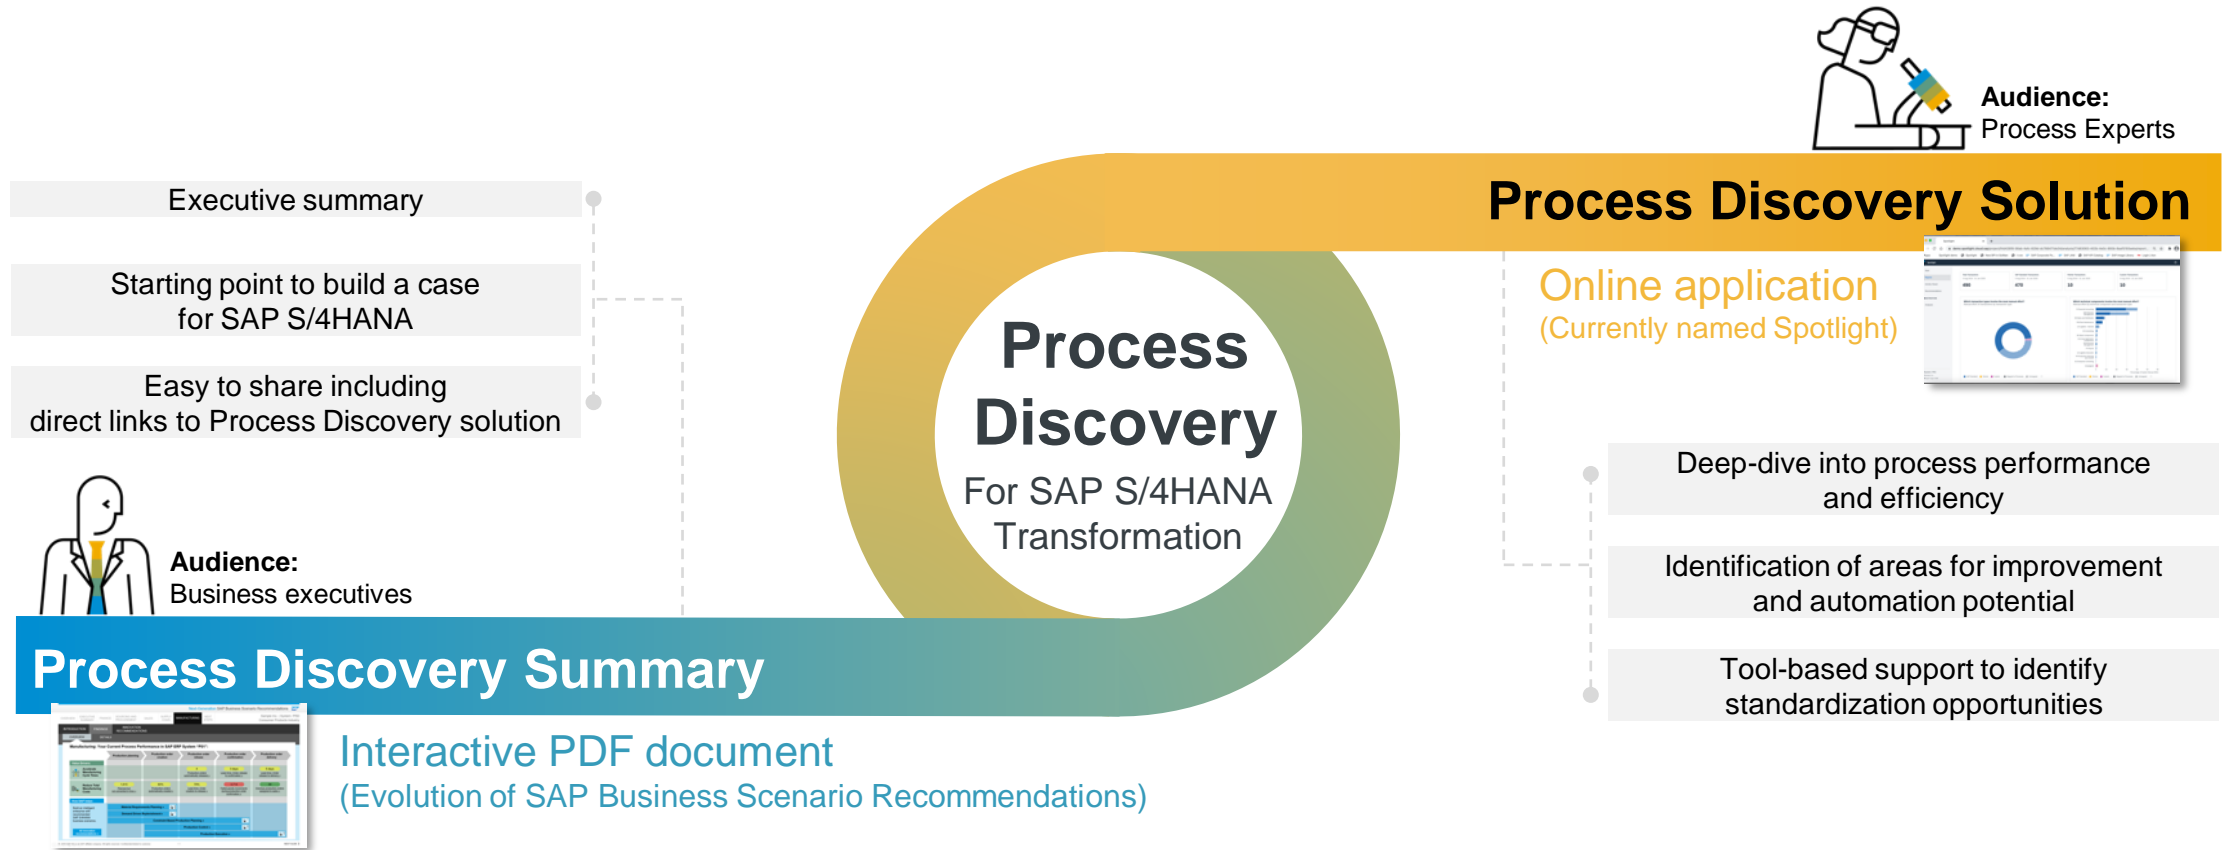

## 12 Optimization goals

~80 process performance metrics selected out of a [set of 1300+ readily available KPIs](#) in SAP Solution Manager, supporting the need to MOVE to SAP S/4HANA, collected from the customer's SAP ERP systems and benchmarked against peers (3000+ data sets per January 2021).

## Process Discovery Summary for SAP S/4HANA Transformation

# Introducing Process Discovery

# Highlights of the Process Discovery Solution

- ..... Helps you transform and automate your processes
- ..... Free cloud-based tool for Experts
- ..... Organized in reports for various roles
- ..... Personalized thanks to a start menu with relevant information
- ..... Insights on custom and partner code
- ..... Possibility to adjust mapping to reflect real usage
- ..... No need of extra work from customer or SAP colleagues

**Recommendations 2/9:**

The various recommendations are gathered by type:

- SAP S/4HANA capabilities
- SAP Fiori apps
- iRPA,
- Machine Learning
- Situation handling
- SAP Ariba
- SAP Business Network

You can filter by:

- line of business
- end-to-end process

Or search for specific process.

**Recommendations 3/9:**

The capabilities are rated in terms of relevance and industry popularity.

This rating is based on a 3-dot scale - zero or one dot has a minimal and 3 dots a critical meaning.

Accounting and Financial Close (J58)

Description: This scope item provides a comprehensive overview of external accounting and accounts.

Version: Ireland, SAP S/4HANA Cloud

Language: English

Direct link to scope item: <https://rapid.sap.com/bp/scopeitems/J58>

Overview Country/Region Relevance Details Used In

The central task of general ledger accounting is providing a comprehensive overview of external accounting and accounts. By recording all business transactions, including primary postings and settlements from internal accounting, in a system that is fully integrated with all the other operational areas of a company, you ensure accuracy and completeness for accounting data.

General Ledger Accounting serves as a complete record of all business transactions providing a centralized, up-to-date reference for the rendering of accounts. Actual individual transactions are reviewed with real-time processing, displaying the original documents, line items, and transaction figures at various levels (such as account information, journals, totals, transaction figures, and balance sheets).

This process describes all required period end-closing steps, related to performing local period-end closing and steps that are identical for local and parallel ledger.

Top Sales Organization Breakdown

Age Distribution

### Finance 6/8:

The aging distribution helps you to understand if these items are actually business relevant today or if this is only old data that need to be archived.

Here the majority of the cases is older than 5 years, these items are not business relevant anymore but still relevant for the IT department.

The big chunk of items less than 3 months old could point out a process issue.

### Description

Absolute number of delivery items, which are already shipped but not billed and the planned billing date is overdue for more than one day.

Identify what transactions have the most users and involve the most manual effort

Aug 2019 → Jan 2020

Total Transactions 5 Aug 2019 - 31 Jan 2020	SAP Standard Transactions 5 Aug 2019 - 31 Jan 2020	Partner Transactions 5 Aug 2019 - 31 Jan 2020	Custom Transactions 5 Aug 2019 - 31 Jan 2020
649	619	10	20

## ERP System Usage 2/6:

Identify which **transactions** have the most users and involve the most manual effort.

The donut chart focuses on the segmentation by transaction type

- The Plain blue part represents the used standard transactions, which were mapped to the used processes
- The larger the share of plain blue, the easier it is to innovate your processes.

On the right side, the segmentation by technical component shows 30% of used transactions are linked to financial accounting and 26% for material management. Those will be a good starting point for IT to innovate the processes of their organization.

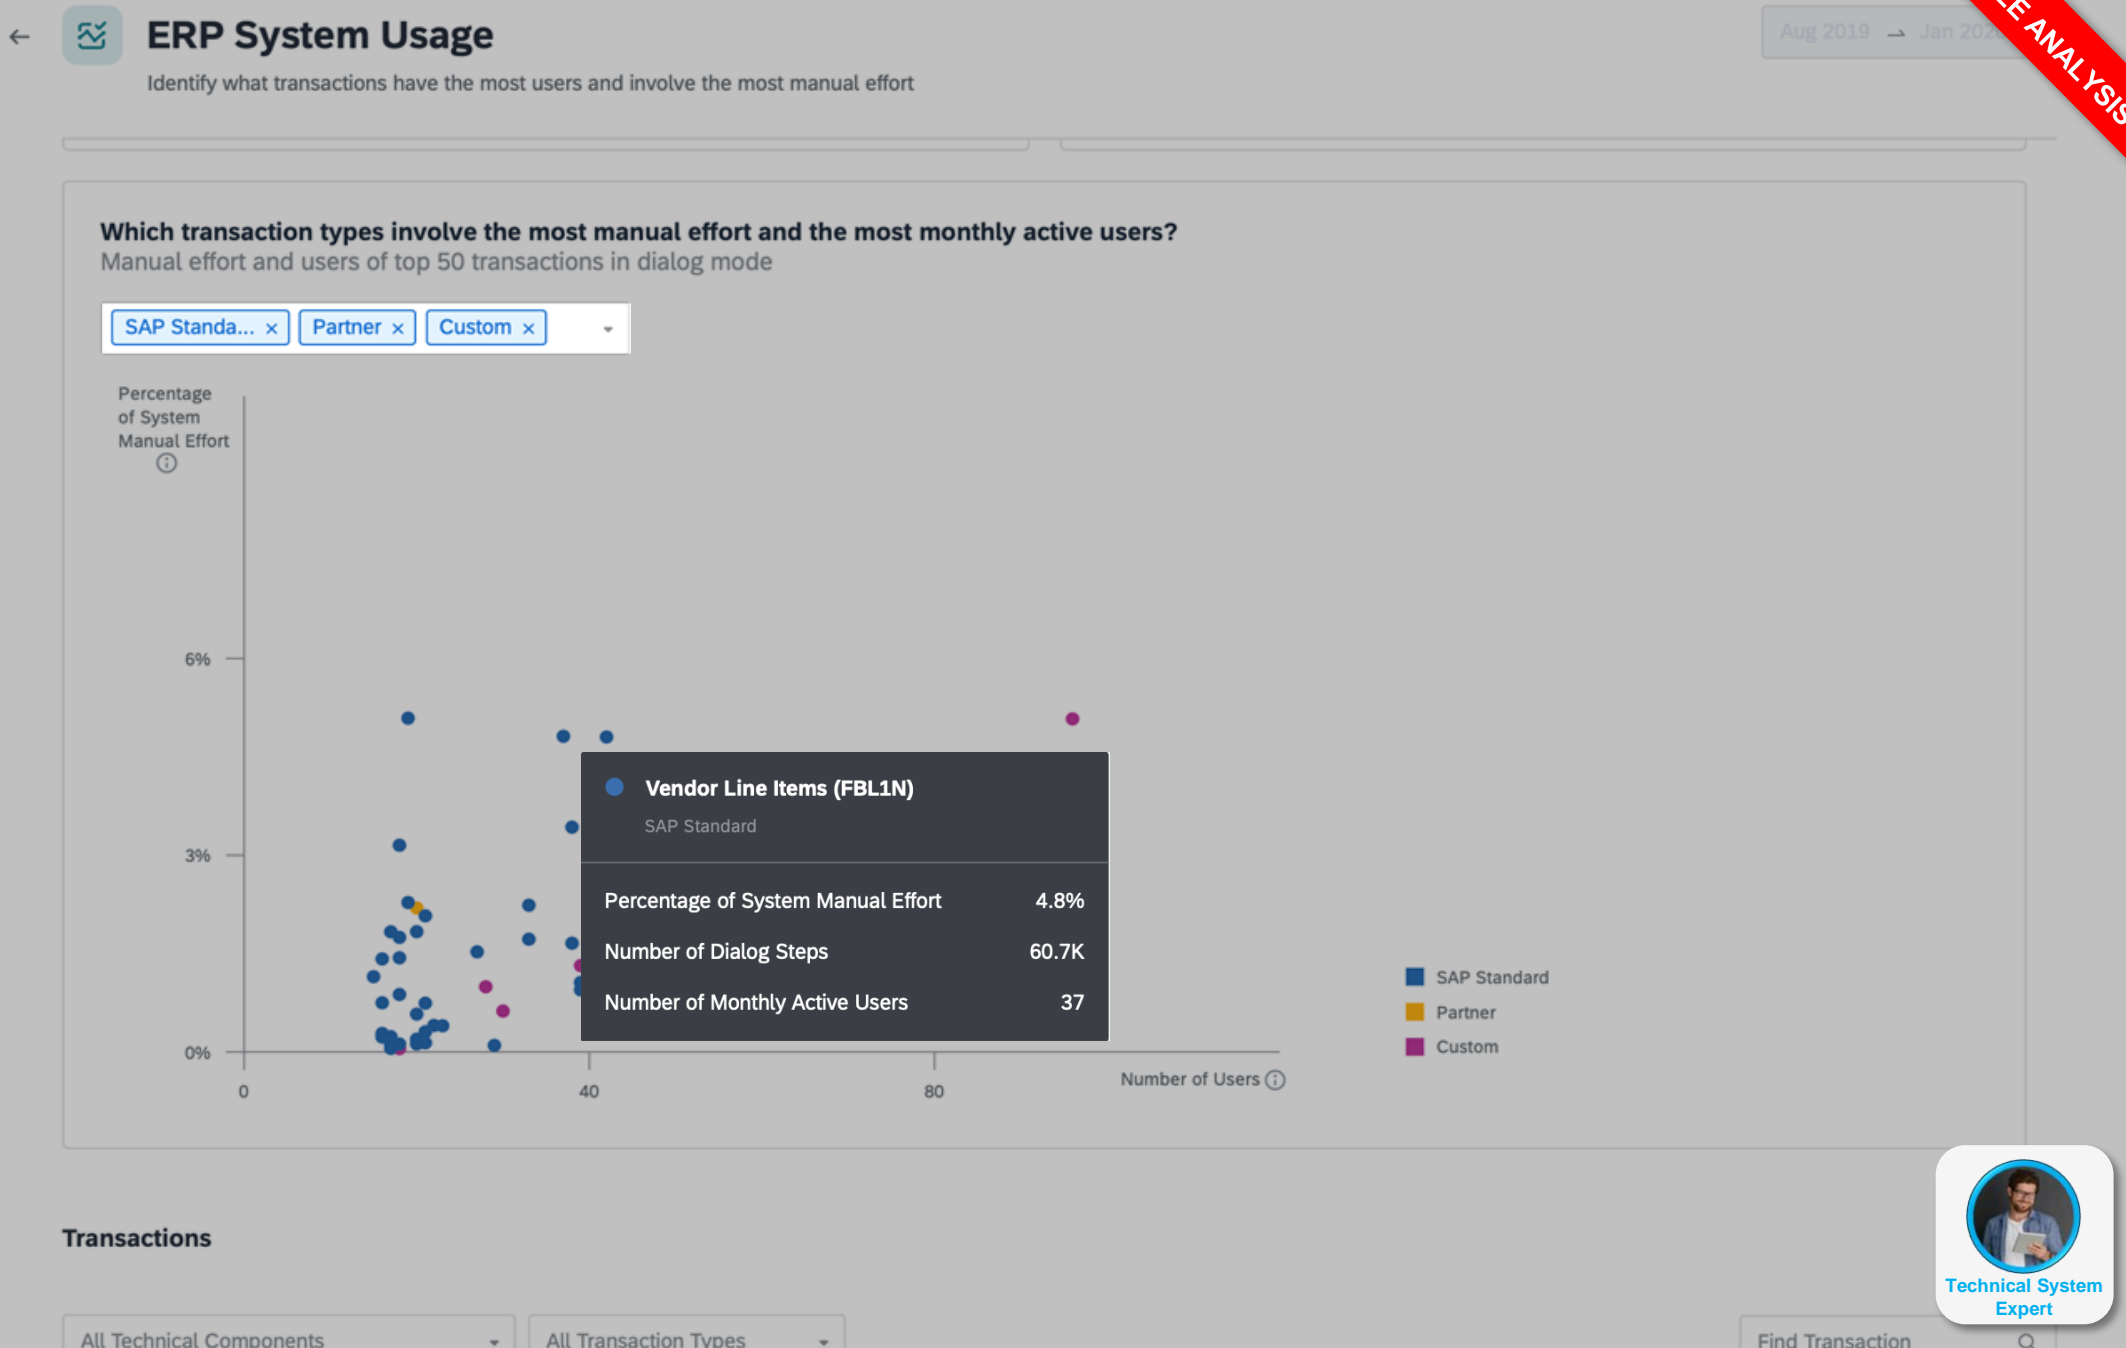

ERP System Usage 3/6:

The next graph provides the matrix of the transactions requiring the most manual efforts and number of users.

You can filter by standard, partner or custom code.

You can review the metrics for each transaction:

- the percentage in the overall usage
- the number of dialogue steps
- the number of active users

- Start
- Reports
- Activity Viewer
- Recommendations

**ERP System Usage 4/6:**

Further below, the **list of transactions** is shown, involving the highest manual effort or the highest number of users. This is an indicator for potential automation.

You can filter by technical component and transaction type or search for specific process.

ERP System Usage

Identify what transactions have the most users and involve the most manual effort

Aug 2019 → Jan 2020

**ERP System Usage 5/6:**

For each transaction, you can see how many processes are mapped to it.

You can adjust this mapping, to increase the share of mapped transactions to processes. This reflects the real usage of your system and ultimately provides better recommendations.

The percentage of manual effort and number of users are also mentioned.

Transactions

# Process Discovery Summary for SAP S/4HANA Transformation

Evolution of SAP Business Scenario Recommendations on Spotlight

**Customer Name:** Sample Inc.

**Customer Number:** 12345

**Date of analysis:** 16 Jul, 2021

**Country/Region:** Germany

**System ID:** PRD

**Current Release:** SAP ERP - EHP6

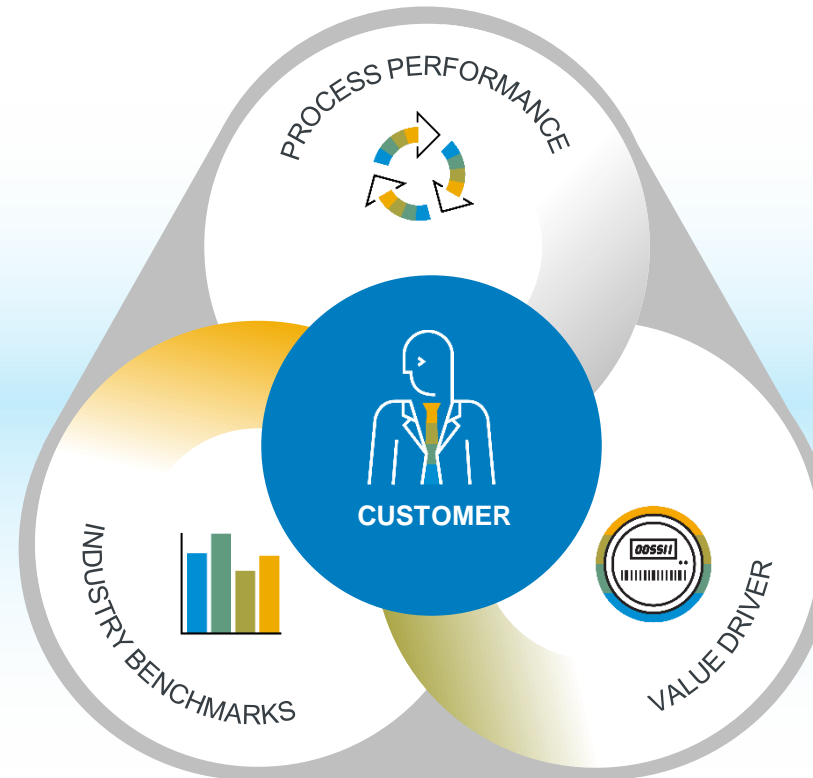

**Database:** Oracle

**Consumer Products Industry**

## What's in it for you:

This summary will help you to receive:

- Insights on your current SAP ERP system and industry trends
- Relevant SAP S/4HANA business scenarios by line of business
- Tailored guidance and recommendations to realize the value from SAP S/4HANA

What we know about Sample Inc.:

- We analyzed business process performance and usage data provided from your SAP ERP system PRD
- 6 lines of business use PRD, including Finance, Sourcing & Procurement, Sales & Service, Supply Chain, Manufacturing & Asset Management

**Business Opportunities with SAP S/4HANA**

## Process Discovery Solution: Online Version

### Your Process Discovery summary is enriched with an online version: Process Discovery solution

In addition to this PDF summary, SAP delivers a lightweight, data-driven analysis on transaction and process usage in your ERP system

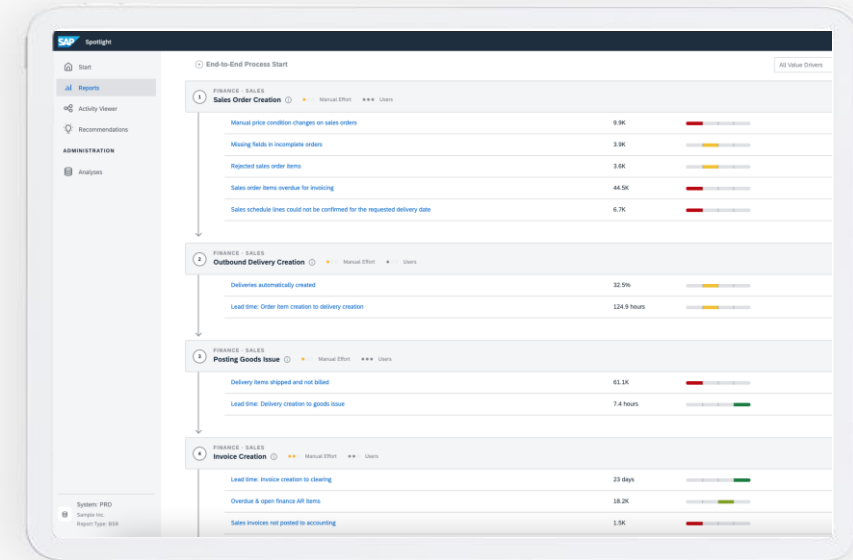

- Understand which ERP components, transactions and processes are heavily used
- Identify areas with highest potential for process improvement and automation
- Find out which SAP solutions can bring immediate value to your business operations

INDUSTRY TRENDS

INDUSTRY ACCELERATORS

## Trends in Consumer Products Industry:

### Key Challenges within your industry

#### Empowered consumers

- Consumers are informed, empowered and always on
- They can shop and buy from anywhere and make choices about where and how they would like to take

#### Expanding ecosystems

- Deliver the supply chain transparency that today's shoppers demand
- Reach consumers across channels directly in moments of need

#### Extraordinary innovators

- Building innovative business models
- Redefining customers expectations and gaining market shares

### Key Trends within your industry

#### Enabling new business models

- Monetizing content or data
- Pursuing innovative partnerships

#### Delivering personalized outcomes

- Build enduring customer and consumer relationships
- By delivering on a set of outcomes, often service driven, that go well beyond traditional product focus

#### Competing as an ecosystem

- Expand the boundaries of consumer products
- By teaming with non-traditional ecosystem partners
- To deliver higher value at no or low incremental cost

### Key Value Drivers within your industry

#### Reimagine order to delivery

- Improve customer service
- Reduce inventory carrying costs
- Reduce logistics costs

#### Reimagine personalized products

- Increase revenue from new products
- Increase revenue growth
- Reduce research and development expense

#### Reimagine operational procurement

- Reduce procurement function costs
- Improve compliance on supplier and price policies, taxation, and regulations
- Improve cash flow with faster payments

Here you can find key assets with additional information, SAP's view on the industry and the SAP portfolio. This includes industry whitepapers, sample architectures, road maps, and more.

You can see if these positions are actually business relevant today or if this is only old data.

In this case 59% of the items are older than three years. This is probably old data, that is not business relevant anymore. This can probably be archived.

But by looking at the 0-3 months period, the 3-6 months and the 6-12 months period, we see that this company still produces open and overdue accounts payables.

## Entity Close

### Business Scenario Description

Increase accuracy, corporate governance, compliance, and efficiency of the entity close with automation and standardization. Accelerate the entity close process through automation and standardization.

For more details, access [Process Discovery solution »](#)

### Value Drivers

- **Reduce finance cost**  
by enabling automated, highly efficient closing tasks supported by single source of truth
- **Reduce audit cost**  
by providing single source of truth for general ledger and subledgers and real-time integration to logistics with full audit trail
- **Reduce days to close annual books**  
by enabling automated, highly efficient closing tasks supported by single source of truth

### What's new in SAP S/4HANA

- **Enhanced and improved group reporting**  
Capability to navigate from the dashboard to the issue level
- **Predictive accounting**  
With SAP S/4HANA both continuous soft close and predictive accounting are enabled.
- **Cloud-enabled digital platform for extension of innovations and automation**

\* = No SAP standard usage detected in your SAP ERP system. Business scenario possibly runs outside of the SAP ERP system or is a custom-developed solution.

OVERVIEW	EXECUTIVE SUMMARY	FINANCE	SOURCING PROCURE	SAP Discovery Summary	Sample System: P
INTRODUCTION	FINDINGS	RECOMMENDATIONS			
CUSTOMER-SPECIFIC RECOMMENDATIONS	ADDITIONAL BUSINESS SCENARIOS	DETAILS	EXAMPLE	CUSTOMER REFERENCE	

For each line of business, the summary shows typical customer pain points in the traditional end to end scenario and how the future with SAP S/4HANA could look like for each line of business.

For example, here you see the how SAP S/4HANA can enable real-time consolidation or continuous and self-auditing tax monitoring.

## Reimagine Record to Report | Reimagine Order to Cash

### Traditional Scenario:

- **Delayed close activities** that do not begin **until period end**
- **Multiple ledgers** require time-consuming and error-prone **reconciliations**
- Risk of regulatory noncompliance due to lack of transparency and **manual monitoring** of processes
- **Risk of penalties and fines** with insufficient, manual and error-prone tax audit processes
- **Manual, time-consuming and effort-intensive processes**
- Financial data needs to be **replicated** from the financial system into the consolidation system, requiring data aggregation and transformation
- Executive conversation is **limited to static presentations**, and ad hoc questions and analysis need to be taken offline for a later discussion

### The New World With SAP:

- **Event-triggered execution** enabled through real-time derivation of profitability characteristics
- **No reconciliation needed** because of one **universal journal entry** that provides a single source of the truth
- **End-to-end visibility** and steering capabilities for local periodic legal reporting
- **Continuous, self-auditing** tax monitoring processes
- **Faster, efficient, and compliant close process**
- **Real-time consolidation** enabled by instant data access from integrating transaction and master data
- **Transformed board room experience** with real-time business intelligence, ad hoc reporting at a granular level, and what-if analysis to make decisions

When using our apps, vendors and customers need to be sure that their orders are processed correctly and payments are fast and accurate. With SAP S/4HANA, we can handle transactions automatically and securely – and we can continue to do so as the business grows.”</p> <p>Hyunjun Yoon, COO, Woowa Brothers Corp</p>		<p><b>6.3 million</b> Transactions processed automatically in the first seven months</p> <p><b>7 days</b> For account closing – down from 20 days</p> <p><b>0 errors</b> In vendor receipts, thanks to automated reimbursements</p> <p><b>Real-time</b> Fund balance through the daily-balance closure system</p>			

Furthermore, the summary contains proof points about the potential improvements and savings:

Here is a reference customer from South Korea, who accelerated account closing time from 20 days to seven days with SAP S/4HANA.

Studio SAP | 46374 (16/12) © 2016 SAP SE or an SAP affiliate company. All rights reserved.

The end of the PDF summary outlines the next steps, which includes an introduction.

The relevant offerings are grouped into five different phases:  
Analyze, Strategy, Build your case, Select your options and Build your future.

For each phase, the offerings are grouped into three options: Tools, Free Offerings and Additional offerings.

## RISE with SAP to the Intelligent Enterprise with SAP S/4HANA!

### Get prepared

In preparation for your meeting review the available videos and assets available at:

[www.s4hana.com](http://www.s4hana.com) »

### Where to start?

Review the content included in the summary to identify the most prominent line of business where opportunities are shown.

A good way is to look at the process performance indicators that shows highest improvement potential compared to your industry peers.

### What shall I do?

Discuss the summary with your line of business stakeholders.

Typical roles to be involved would be:

- Line of business managers and executives
- Business analysts
- Application experts

### Review the content of the next steps »

The next steps section will guide you through the most relevant offerings from SAP to help you on your journey to the Intelligent Enterprise.

We have grouped the offerings into five different phases:

1. **Analyze** → Understand where you are and how you are running your core processes
2. **Define your strategy** → Understand the potential of the intelligent enterprise
3. **Make the case** → Understand the value and the return of your investment
4. **Consider your options** → Select your technical options to run your project successfully
5. **Build your future** → Start your project in the best way

The possible offerings are grouped into three different options that can be considered either individually or matched together:

TOOLS »

FREE  
OFFERINGS »

ADDITIONAL  
OFFERINGS »

Join the SAP S/4HANA Movement! »

This is a summary of the various offerings available, so you clearly and quickly identify which ones are relevant for you, based on the phase and the type of offering you prefer.

There is also afterwards a page dedicated to each of the five phases.

Summary

# Process Discovery

## Request Process Overview

1

Extract data

- Implement SAP Notes [2745851](#) and [2758146](#) in productive SAP ERP system
- Run data extraction report and download ZIP file

How-To Guide »

2

Initiate your request

- Initiate your request – go to: [www.s4hana.com](http://www.s4hana.com)
- Fill in the form, upload the extracted ZIP file and submit your request

3

Confirm your request

- After submitting your request you receive an e-mail to confirm your e-mail address
- SAP starts to create the PDF summary and the Process Discovery Solution after your confirmation

4

SAP will share results

- SAP sends you the PDF summary and the instruction to activate your Process Discovery Solution account (Spotlight by SAP) via email

# Start your Transformation Journey to SAP S/4HANA with Process Discovery

(evolution of SAP Business Scenario Recommendations on Spotlight)

Understand your current business process performance. Identify new functionalities from SAP S/4HANA, SAP Fiori apps, automation and intelligent technologies to support your business goals.
