Agenda

Session Objectives and Takeaways

Why it is so difficult to be license compliant?

Access and how to navigate

Consumption Tab in SAP for Me – Public Cloud

Consumption Tab in SAP for Me – onPremise

System Measurement Preparation for on-Premise

Miscellaneous

Session Objectives and Takeaways

Session Objectives

- Understand the challenges on the license management
- Get to know how to access the license and software usage information
- Learn how to navigate through the available data and functionalities within SAP for Me
- Identify available use case scenarios and map it with individual requirements

Key Takeaways

- Overview of the different areas for license consumption / software usage
- How to access & navigate through the SAP for Me Consumption data
- How to analyze the displayed data

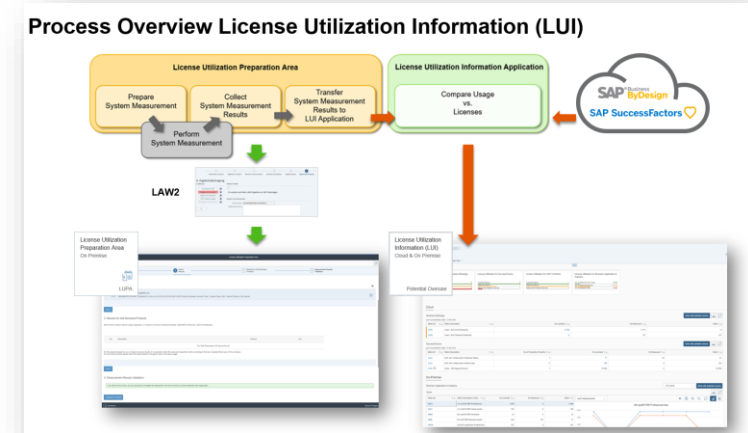

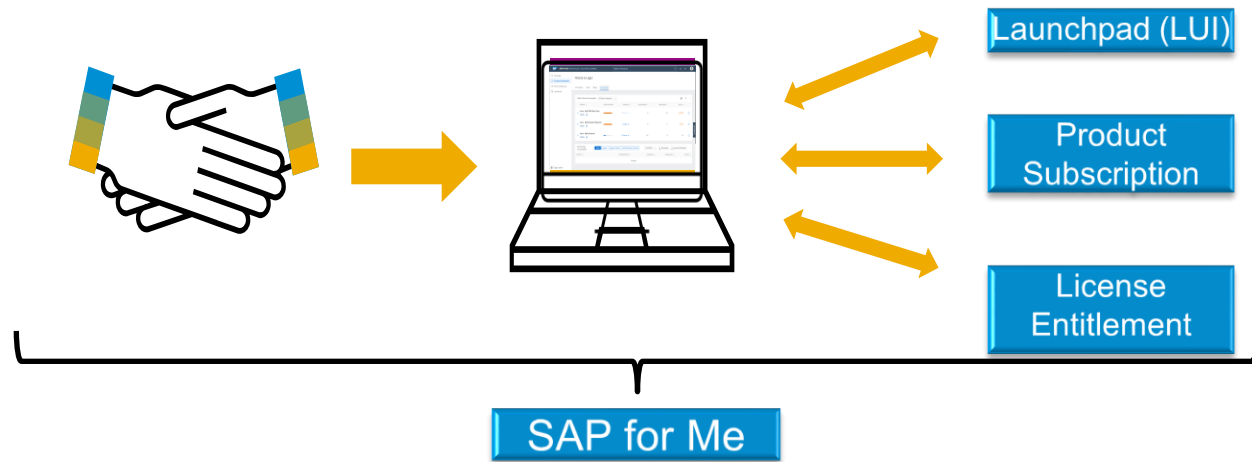

Why it is so difficult to be license compliant?

What our Customer need:

Easy License Monitoring
(Fully) Automated Metering
Measurable Pricing

License Management & Software Usage

[SAP for Me](#) Finance and Legal Dashboard, Consumption Area was created for all SAP customers to provide a comprehensive overview of license entitlement/subscribed products vs. consumption information.

The formerly know License Utilization Information Application has moved into SAP for Me from SAP One Support Launchpad.

Access and How to Navigate

Software usage information is available under the [SAP for Me](#) – Finance & Legal Dashboard – Consumption Tab.

In order to be able to access the usage data the following profiles must be assigned to the individual S Users by the company Super Admin:

- Access License Utilization for Cloud
- Access License Utilization for onPrem

Consumption Tab in SAP for Me – Public Cloud

The Public Cloud Consumption card hold the following information:

1. List of all available metric categories
2. Subscription trends
3. List of all orders with subscribed products and related MetricID
4. Consolidation Date of collection of the results
5. Documentation on MetricID metering

Results are published on a daily basis.

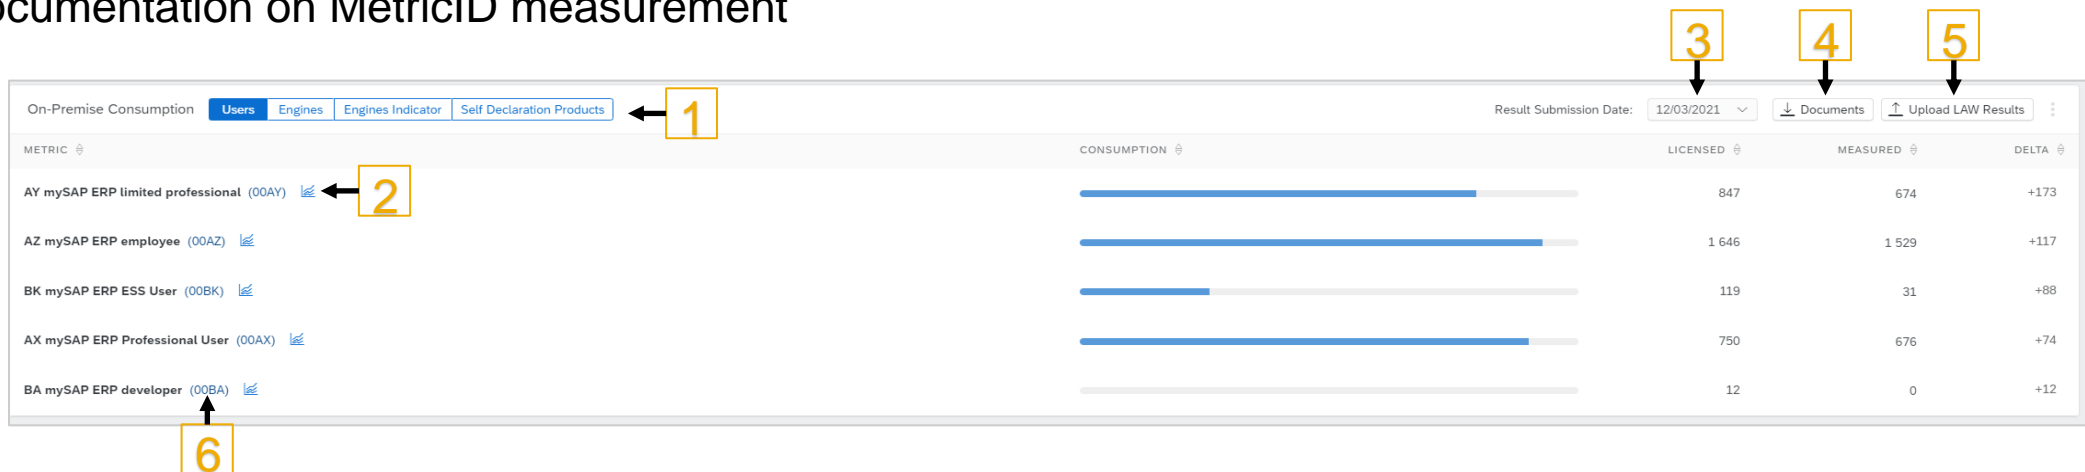

ORDER	PO ID	MATERIAL	FROM	TO	SUBSCRIBED	UNIT
0240367048		SAP ByDesign Base Fee (8000340)	03/05/2021	03/04/2022	1	FF
Total					5	

Consumption Tab in SAP for Me – onPremise

License Entitlement vs. Software usage data is shown automatically once system measurement results have been uploaded by the customer.

The on-Premise Consumption card hold the following information:

1. Results for Users, Engines, Engines Indicators, Self Declaration Products separated for better transparency
2. Measurement Trends
3. Access to historic results
4. Access to all measurement related resources (measurement plan, list with relevant notes)
5. Direct Upload of system measurement results
6. Documentation on MetricID measurement

System Measurement Preparation for on-Premise

The new tab *System Measurement* in the *Systems & Provisioning Dashboard* has been created to review all listed production and development systems and to mark if they are relevant for system measurement

- Each productive and development system can be set to not relevant in case the system is not measurement ready yet

Systems & Provisioning

System Measurement Preparation for on-Premise

- In case a system is not relevant for system measurement, the user can pick the appropriate reason from a predefined list.
- Systems can be set back to relevant at any point in time
- History change is also available from the main card or system detailed page
- All non-relevant systems (DEV / PROD) will still be visible under the respective section on the Measurement Plan document

SAP Test Account - aPaul Pharma

Not Relevant
D034754 | 09/16/2021, 20:07

CHANGED DATE	CHANGED USER	RELEVANCY REASON
09/16/2021, 20:07:22		
09/16/2021, 20:07:50		Wrong System Status, will be changed

Non Relevancy Reason

System Number:
000000000312544299

System ID:
SFS

Non Relevancy Reason:
System will be deleted

- System will be deleted
- Wrong System Status, will be changed
- No system access, belongs to other Company
- Technically not measurable (no ABAP stack)
- System not in use/ not yet productive
- Product currently not in scope
- Disaster Recovery for Production

Thank you.
