Agenda

- Coherent User Experience for SAP Integration Suite
- Latest AIF features with SAP S/4HANA 2022
- Beta Invitation - SAP Event Mesh: Event Bridge to Microsoft Azure

Integration Suite

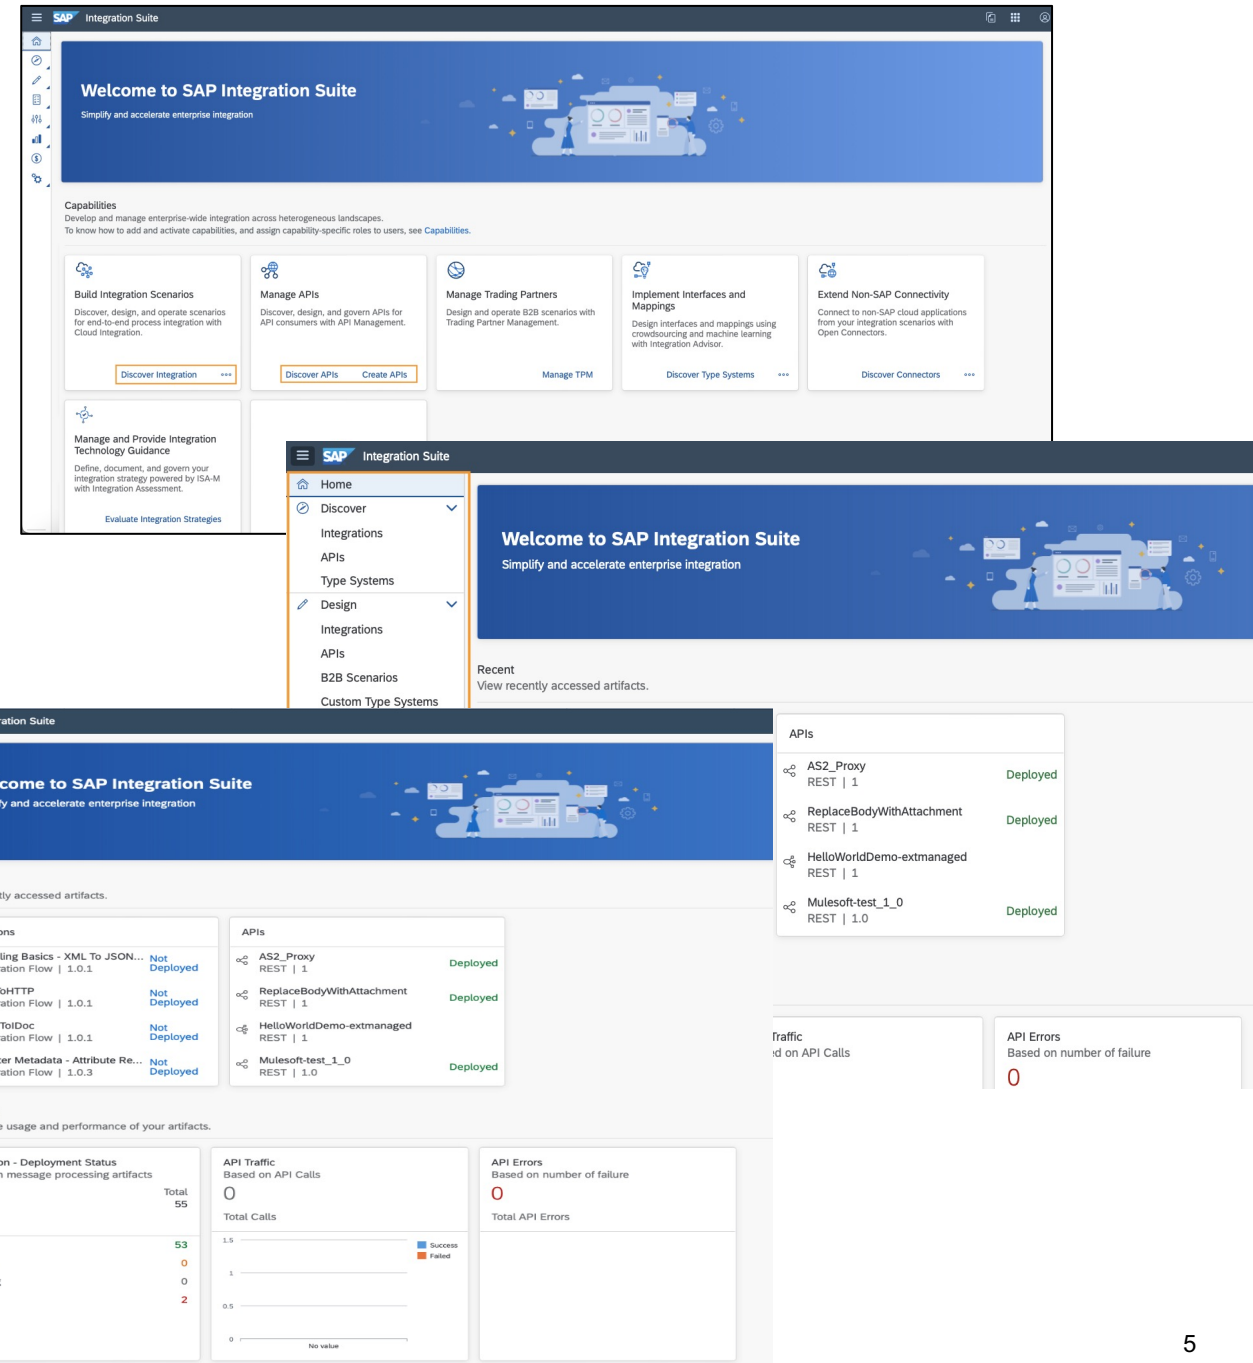

Coherent User Experience

We've launched a new coherent & harmonized user experience that includes:

1. Simplified navigation by using the quick links on each tile
2. New grouping for left-side menu to help you find capabilities easily
3. Quick access tiles for recent activities and monitoring information
4. Combined "What's New"
5. Consolidated view for capability versions in "About"

Blog: [SAP Integration Suite – Availability of a common & coherent User Interface to work with various capabilities](#)

Demo

Process Orchestration and AIF

Latest AIF features with SAP S/4HANA 2022

- Customized deletion of runtime artifacts in SAP Application Interface Framework
- Monitoring of events consumed from SAP Event Mesh
- Updated message category assignment in SAP Application Interface Framework
- Mass change and error handling in SAP Fiori UI message monitor

RSS Feed

SAP runs another Customer Engagement Initiative (CEI) project for **Monitoring and Error Handling in SAP S/4HANA and SAP S/4HANA Cloud** to collect feedback to roadmap topics of **SAP Application Interface Framework (AIF)** as integral part of SAP S/4HANA.

The Customer Engagement Initiative is an influence program which provides you with early insight into new development topics. You have the chance to be an early adopter of our new developments providing feedback, input and ideas at early stages of the development process. You can find more information about the customer influence programs at <https://www.sap.com/about/customer-involvement/influence-adopt.html>.

Within the current CEI project, we would like to cover at least the following topics:

- Recap SAP Fiori UI for mass error handling
- Interface specific extensions such as defining changeable fields, hide fields, maintain interface display name, etc., in SAP Fiori UI
- Improving process status in SAP Fiori UI

Also, check out the AIF roadmap at [SAP Roadmap Explorer](#).

The feedback project will start **begin of 2023**.

If you like to contribute and shape the product, please join the project. You can **register** to the project at <https://influence.sap.com/sap/ino/#/campaign/3288>.

Event-Driven Architecture

Event-driven architectures are one of the hottest trends these days. EDAs offer so many advantages over synchronous, more traditional approaches that lots of customers have started looking into how they can use these architectures to use.

Most customers look for the real time benefits first – an event occurring in an SAP backend system and consumers across the customer landscape getting notified of this significant change in real time. There are many advantages though that are often overlooked: loose coupling, incremental development, handling of peak loads to name a few. And easily and efficiently crossing vendor boundaries using events – we will get back to that advantage later.

Just a beginning

Overall, I strongly believe that we are just at the beginning of the rise of Event-Driven Architectures. What follows below is my favourite analogy these days: a lodge, a village and a bigger city.

EXPLORE SAP Event Mesh: Event Bridge to Microsoft Azure Event Grid

Registration ends on Dec 1, 2022 00:59

Status: Active

0

Description :

A lot of our customers are both SAP and Microsoft customers. EDAs are an open approach across vendor boundaries bringing IT worlds together. Microsoft's and SAP's joint vision is that our customers can consume SAP (backend) events on Azure. The new event bridge enables this flow and thus helps customers build such scenarios with ease.

How to participate

- Fill the [TEA form](#) with your S user.
- Once we get a confirmation from TEA team, we would contact you to get the sub-account information (it has to be in the US 20 region) for us to allow your sub-account.
- Create a sub-account in US20 region. Make sure, the BETA feature for the sub-account is enabled.
- Once your sub-account is allowed, you can start creating an instance of the event bridge (event-mesh-connectivity-beta) and start exploring.

Invitation: “**Integration Black Belts**”

“Interact with Integration Blackbelts”

- Speakers from customers / partners / stakeholders / consultants to share their innovations, solution architecture, best practices and integration patterns
- 20 mins slot
- Interested to present? Reach out to gautham.krishna@sap.com

What is #AskAnythingIntegration?

Provides a platform for customers, partners, consultants, and participants to ask their most important and top priority questions and get them answered by the panel of experts.

- Questions can be sent upfront or posted directly in the call
- Questions and answers will then be published as a public FAQ document with regular updates and additions

Panel of Experts: Speakers of the monthly webinar + product Management team

Schedule: Runs every alternate month

Duration: 20 mins

Moderator: Gautham (gautham.krishna@sap.com)

Note: “Interact with #IntegrationBlackBelt” section will transition to alternate months.
