# Agenda

**SAP Business AI Strategy**

**SAP Business AI Value Proposition**

**SAP Business AI Offerings**

# Recent technology advancements mark a paradigm shift in how SAP will deliver value to customers

# We will fundamentally change the way in which companies operate

## Relevant

The most relevant AI delivered in the context of your business processes.

## Reliable

Uniquely reliable AI trained on the industry's broadest business data sets.

## Responsible

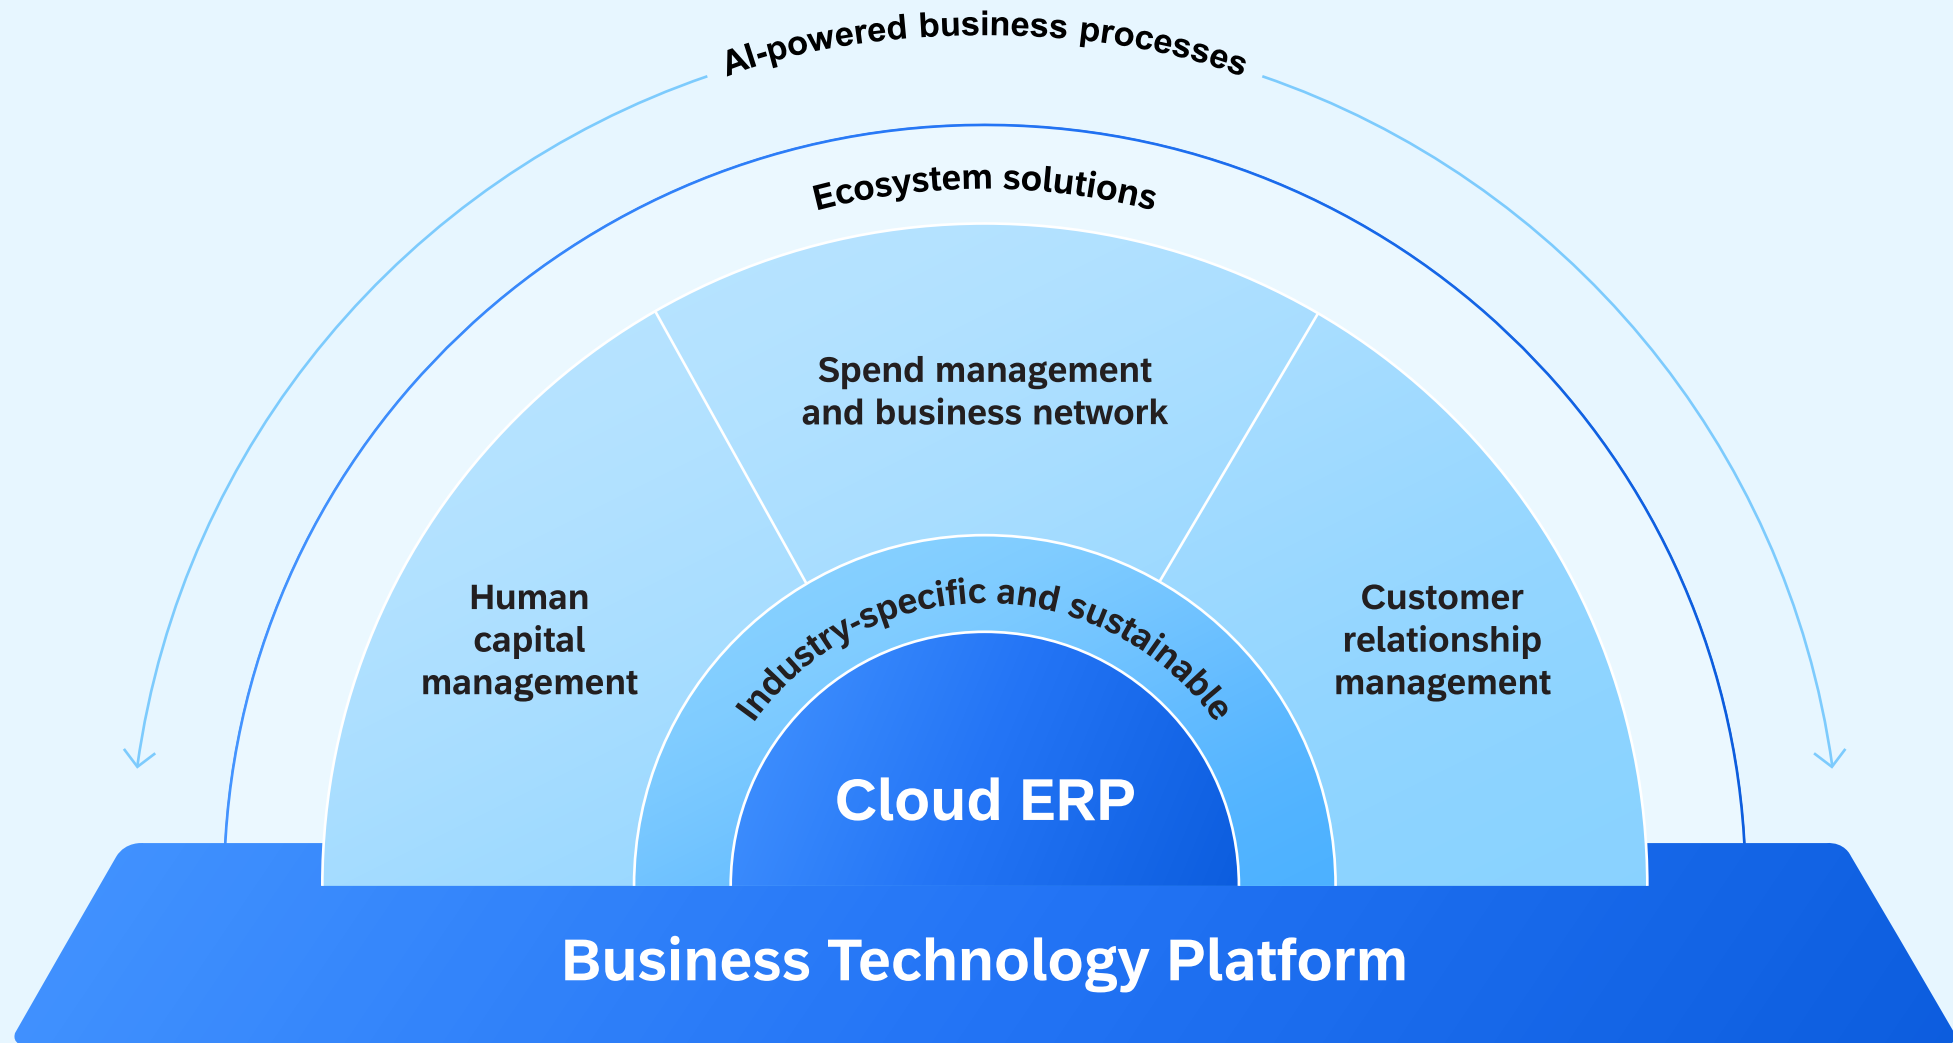

AI built on leading ethics and data privacy standards.

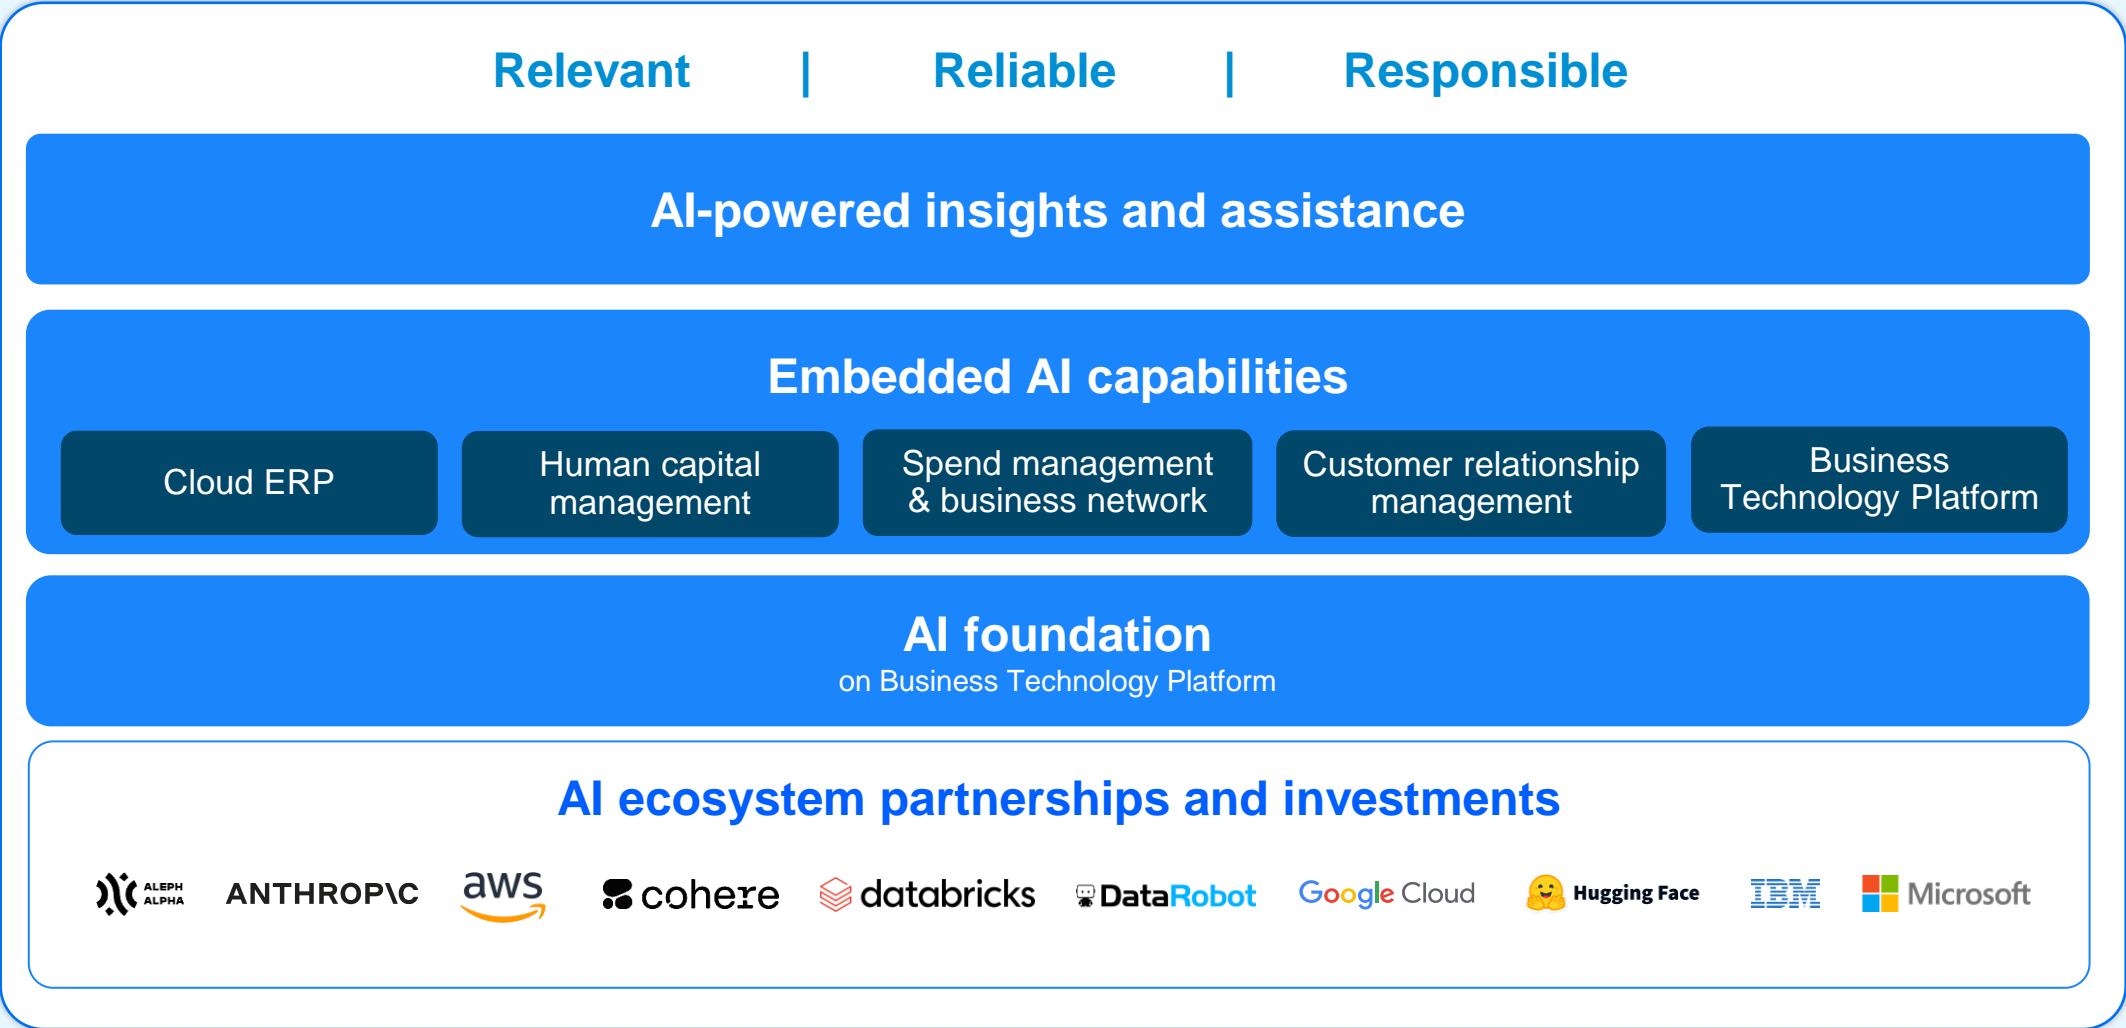

# Real business results

# SAP Portfolio

We believe in providing AI built for business. That is, AI that enriches all your business processes and empowers you to steer your business with agility.

# Relevant AI capabilities delivered through 50 years of deep understanding of business and processes

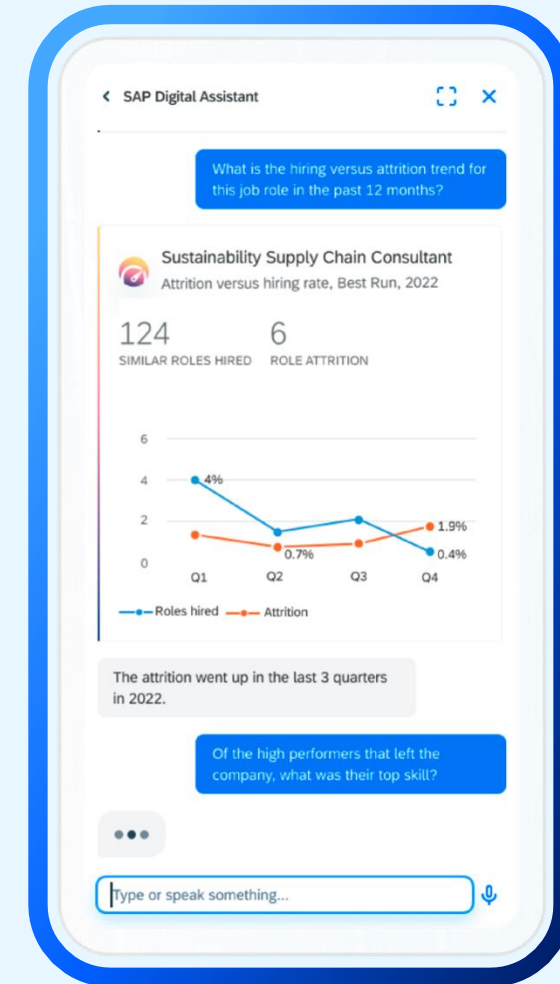

## RELEVANT

**Empower every employee** to interact with SAP application in the most natural way possible

**Benefit from AI embedded** in your applications that improves and optimize your desired business outcomes

**AI trained from real data** that learns and adapts from your utilization

**Accelerate your cloud journey** with automated code generation and migration tools

**Integrating the business and process data that resides within SAP applications with the power of AI to deliver unmatched reliability of output**

## RELIABLE

**Grounded in the truth** of customer business context and SAP's business and process data

**Data protection and privacy standards** that you can trust to run your business on

**World-class authorization concepts** protect employees and business partners from unwanted consequences

# Artificial intelligence built on leading ethics and privacy standards

## RESPONSIBLE

**Guiding principles and policies** that steer the development and avoid biases

**AI designed for people** to get their most valuable work done while keeping humans in the loop

**Governance model** with external AI ethics advisors and cross-functional operationalization

## The AI Ethics Policy.

The AI Ethics Policy clarifies how SAP's Guiding Principles for Artificial Intelligence relate to AI use cases. The policy applies to SAP and all its employees worldwide. It defines intent, expectations and obligations for employees involved in development, deployment and sale of AI systems.

### The Pillars of the Policy.

**“With SAP’s rich history and business process expertise, it is uniquely positioned to deliver AI that helps customers better leverage data to achieve measurable business outcomes.”**

*Ritu Jyoti, IDC, Group Vice President,  
Worldwide Artificial Intelligence and Automation  
Research Practice Global AI Research Lead*

Today, more than 24,000 customers are using SAP Business AI across multiple scenarios, and SAP is further committing to AI as a pillar for future innovation

**24,000+**  
**customers**

**>\$1B** investment via  
venture capital

**\$6.1B** in annual total  
R&D investment

**3** direct investments in  
Generative AI leaders

ANTHROPIC

# Agenda

An aerial view of two men in business suits shaking hands on a paved plaza. The background shows a blue sky and some bare tree branches.

**SAP Business AI Strategy**

**SAP Business AI Value Proposition**

**SAP Business AI Offerings**

**AI represents a huge value creation potential across industries, many organizations are actively looking into expanding their adoption**

Generative AI could add  
**\$2.6 to \$4.4 trillion**  
incremental value annually  
to the global Economy

Existing productivity value from  
previous generation of AI and  
analytics

### Widespread adoption, despite early days

**33%**

companies globally are using gen AI regularly in at least one business function

**40%**

organizations will increase their investment in AI overall because of advances in gen AI

**60%**

organizations with AI adoption are using gen AI

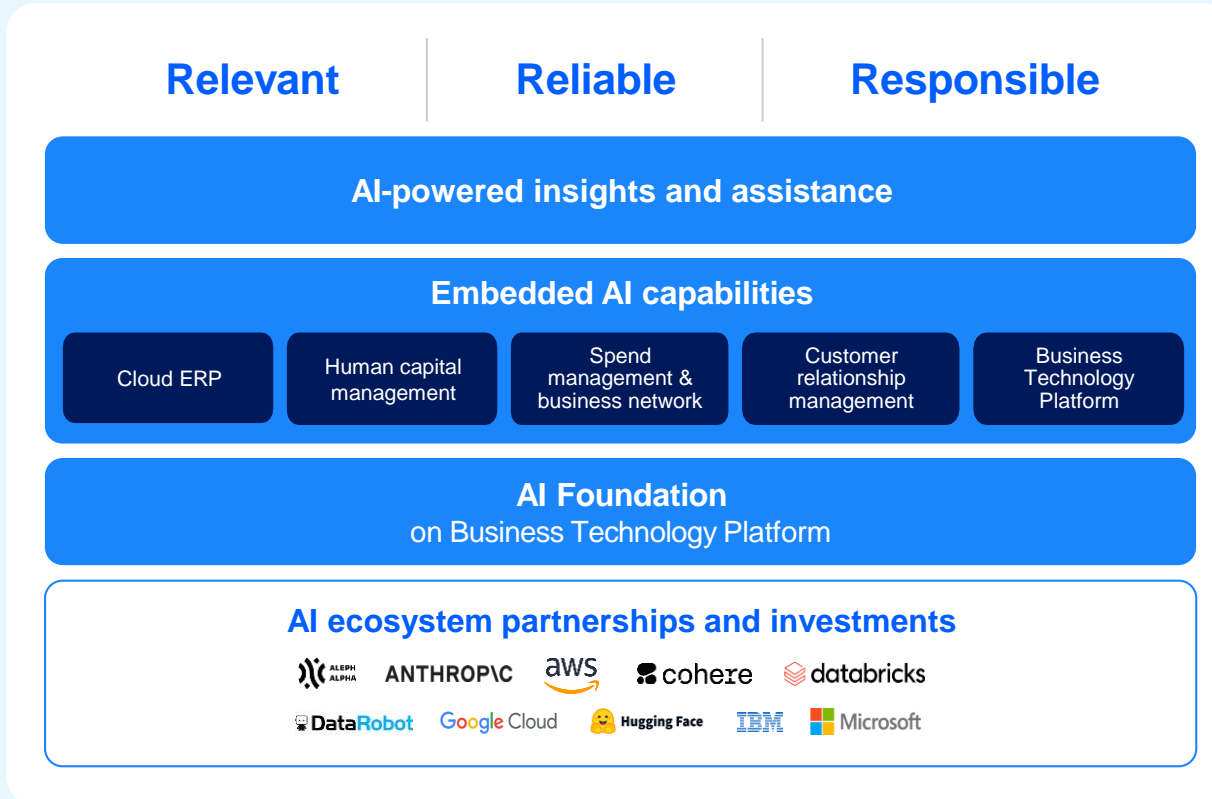

# Organizations are seeing both top and bottom line growth improvement by leveraging AI across functional areas

Revenue and/or Cost improvements from AI adoption in the function using AI capabilities<sup>1</sup>

<sup>1</sup> Source: McKinsey, State of AI in 2023, 1,684 participants globally. Answers shown above only respondents who stated seeing increase in revenue or decrease in costs

# Only SAP Business AI can help customers unlock three sources of value in relevant, reliable and responsible manner for better performance

## NATURAL USER EXPERIENCE

Facilitates human-machine interaction

## AUTOMATION

Enable machines to complete repetitive tasks like humans

## INSIGHTS, OPTIMIZATION, & PREDICTIONS

Augment human decisions and cognition

# Joule - the AI copilot that truly understands your business

**Work faster** with an AI copilot that truly understands your business

**Benefit from smarter insights** and quick answers on demand

**Achieve better outcomes** when creating content, code, and more

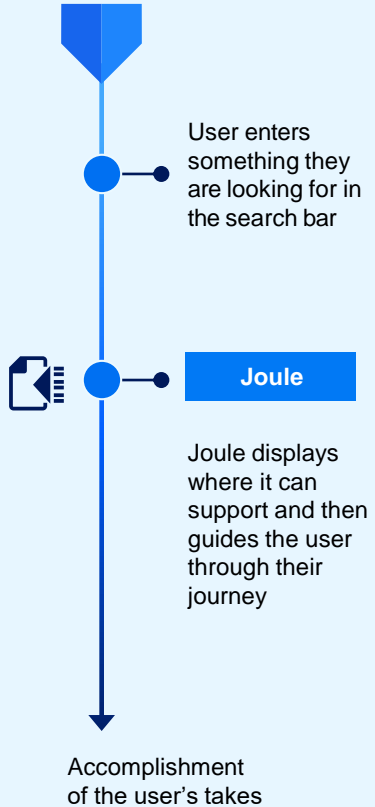

**Maintain full control** over decision-making and your data privacy

Joule

Note: Planned availability in SAP business applications at different times, starting with SuccessFactors and SAP Start in Q4 2023.

# Joule

## Challenge

- Delivering an intelligent user experience is challenging for today's Enterprise and stay competitive with intelligent user experience
- Users want to be guided through the SAP ecosystem to get relevant information or task to be done e.g., Get to the point from an entry page and retrieve the needed support

## Solution

### SAP Start

The central entry point for all SAP business applications – federating information and application into one place

### Joule embedded into SAP Start

- Offers unintrusive his services to the user from the search bar integration
- All Capabilities and content at your fingertips in one place
- Appears as a single line up to the full chat window
- Gives access to all SAP Business Software Systems connected to SAP Start

## Benefits

- Step-by-step augmented user journey gives the adequate help at the right point
- All defined Business Capabilities for Joule are available at the fingertips of the user
- Serves the full variety of the transactional, informational and navigational patterns of Joule
- Augments the SAP Start from a pure Launchpad to a Business Interaction center
- Everything inside the familiar user interface of Joule

## Average Business Value for Customers

Time gain for occasional SAP users

Up to 10mins<sup>\*\*</sup>  
time saved

per usage on transactional patterns

Up to 10mins<sup>\*</sup>  
time saved

on informational patterns

Up to 5mins<sup>\*\*</sup>  
time saved

per usage on navigational patterns

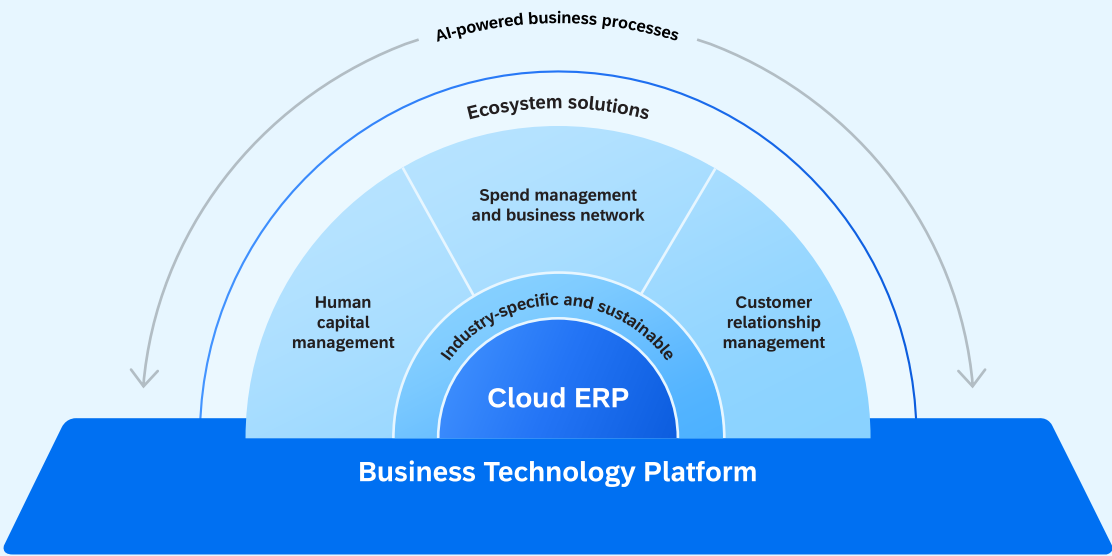

\* Processing time in interaction with Joule leveraging LLM support compared with « classical » approach, based on assumptions:

— Leave for the different help pages of SAP (SAP User Enablement content)

— Search for the policy documents (customer individual) – planned Q1/24

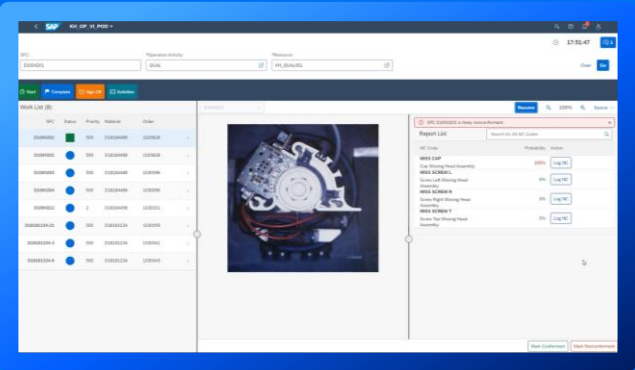

\*\* gained from SAP experiments based on semi experienced users

# Reach new frontier of efficiency with embedded AI into core business processes

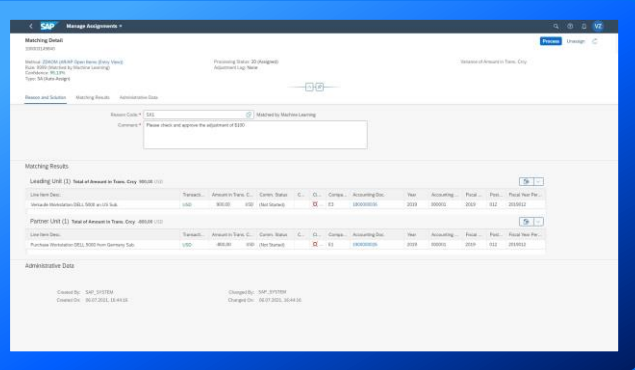

## AI SHOWCASES

Automate visual inspections on the shopfloor

Close your books faster with fewer errors

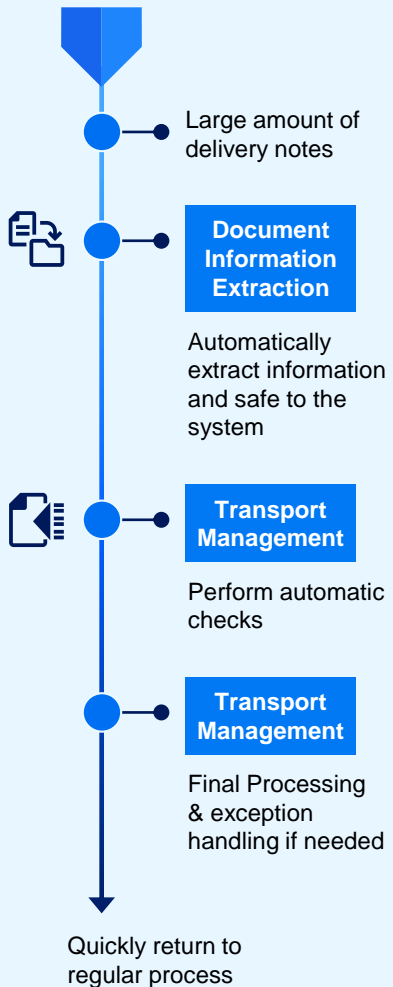

Expedite freight verification and documentation

Detailed value proposition

# Save up to 55% of delivery note processing costs with SAP Transportation Management

## Intelligent goods receipt analysis

### Challenge

- Processing **high volumes** of daily deliveries while ensuring accurate freight orders
- Manual process is time-consuming, error-prone, and leads to **manual rework**, with the potential to cause significant delays and inefficiencies

### Solution

#### Digital Supply Chain – Transportation Management

- Extraction of all relevant information automatically from the document – e.g., Delivery note and post data to the system
- Automating processing incl. Checks
- System can flag exceptions in freight orders, allowing clerks in the back-office to handle them and speed up the process for trucks without exceptions

### Benefits

- Automated checks can be conducted with **greater accuracy**, minimizing errors and **reducing the time** required for manual checks
- Leading to overall a **significant reduction** in the **hours spent** on manual checks and waiting times for logistics carriers
- Ultimately improving operational efficiency and saving valuable time

### Average Business Value for Customers

Calculation Method / Assumption In Notes

**Saves €0.42**

Per page of a delivery note\*

**Up to 80%  
Instant Accuracy**

### Customer / LoB Spotlight

**Up to ~730k€/yr  
Expected Savings**  
Per Factory

\* Assumptions:  
- Average field recognition rate: 80%  
- Human cost rate: 50,- Euro/hour  
- Today's manual processing time per page: 1 minute  
- Calculated by savings of labor cost minus cost for DOX service

# Obtain optimal recommendations at all times to enhance decision making process

## Automate ordering for a more profitable future

- **Optimize** inventory levels and costs while maximizing product availability and margins
- **Balance** inventory and calculate order proposals that minimize procurement costs
- **Reduce** waste and avoid lost revenue from stock-outs

### SAP Predictive Replenishment

The screenshot displays the 'Manage Order Proposals' interface in SAP Predictive Replenishment. It features a sidebar with navigation options like Business Configurations, Manage Master Data, Configuration Assistant, Manage Order Proposals, Scheduling, and Settings. The main area shows an 'Order Proposals Overview' with a date filter set to 'Tuesday, Aug 22, 2023'. There are five summary cards for different time slots: 04:00, 06:30, 08:00, 09:00, and 10:00. Below these is a table of order proposals with columns for Order Proposal ID, Alerts, Status, Supplier, Supplier Description, Product, Product Description, Order Quantity, and Receiving Location. The table lists various items like 'Farm to fork', 'Hungry Harvest', 'Rainbow Foods', and 'In And Out Grocery' with their respective details.

| Order Proposal ID | Alerts | Status     | Supplier   | Supplier Description | Product           | Product Description                                   | Order Quantity              | Receiving Location |
|-------------------|--------|------------|------------|----------------------|-------------------|---|-----------------------------|--------------------|
| 150100            |        | Unreleased | SP98878112 | Farm to fork         | 237453and 12 more | Heart strawberry 400 GM and 12 more                   | 127 Dams, Unit_3            | LIAT4              |
| 150105            |        | Unreleased | SP98878112 | Farm to fork         | 237463and 10 more | Almond butter & grapefruit Ryeland 800 GM and 10 more | 233 Carton and 4 more       | LIAT4              |
| 150108            |        | Unreleased | CP98767606 | Hungry Harvest       | 25828and 3 more   | Apricot Dry Fruit 500 GM and 3 more                   | 5 HPalat                    | LIAT4              |
| 150109            |        | Unreleased | SP98878112 | Farm to fork         | 237438and 20 more | Chocolate Cream Cheese 500 GM and 20 more             | 42 Dams, Unit_1 and 1 more  | LIAT4              |
| 150106            |        | Released   | D578887759 | In And Out Grocery   | 237463and 1 more  | Real Cabbage 500 GM and 1 more                        | 1 HPalat and 3 more         | LIAT1              |
| 150107            |        | Released   | AB23345452 | Rainbow Foods        | 237477and 5 more  | Black Beans 1000 GM and 5 more                        | 106 Dams, Unit_1            | LIAT5              |
| 150178            |        | Released   | MV00000000 | Rainbow Foods        | 237571and 4 more  | Monopole Strawberry 1000 GM and 4 more                | 66 HPalat                   | LIAT1              |
| 150201            |        | Released   | D578887759 | In And Out Grocery   | 237463and 14 more | Cinnamon Ginger 500 GM and 14 more                    | 42 HPalat                   | LIAT4              |
| 150149            |        | Released   | MV00000000 | Rainbow Foods        | 237512and 4 more  | Sakura Peach 500 GM and 4 more                        | 50 HPalat                   | LIAT7              |
| 150204            |        | Released   | D578887759 | In And Out Grocery   | 237463and 14 more | Black Beans New Bags 500 GM and 14 more               | 260 HPalat                  | LIAT7              |
| 150204            |        | Released   | CP98767606 | Hungry Harvest       | 237465            | Corn and 1 HP   | 17 Dams, Unit_1             | LIAT1              |
| 150204            |        | Released   | MV00000000 | Rainbow Foods        | 237571and 5 more  | Monopole Strawberry 1000 GM and 5 more                | 72 HPalat                   | LIAT4              |
| 150200            |        | Released   | D578887759 | In And Out Grocery   | 237530and 10 more | Cashew nuts 18 GM and 10 more                         | 117 HPalat and 3 more       | LIAT1              |
| 150205            |        | Released   | SP98878112 | Farm to fork         | 237463and 21 more | Almond butter & grapefruit Ryeland 800 GM and 21 more | 200 Dams, Unit_1 and 1 more | LIAT1              |
| 150202            |        | Released   | AB23345452 | Rainbow Foods        | 237477and 10 more | Whisper Golden Free Rice Maple Panna Pudd 10 more     | 10 HPalat and 1 more        | LIAT1              |

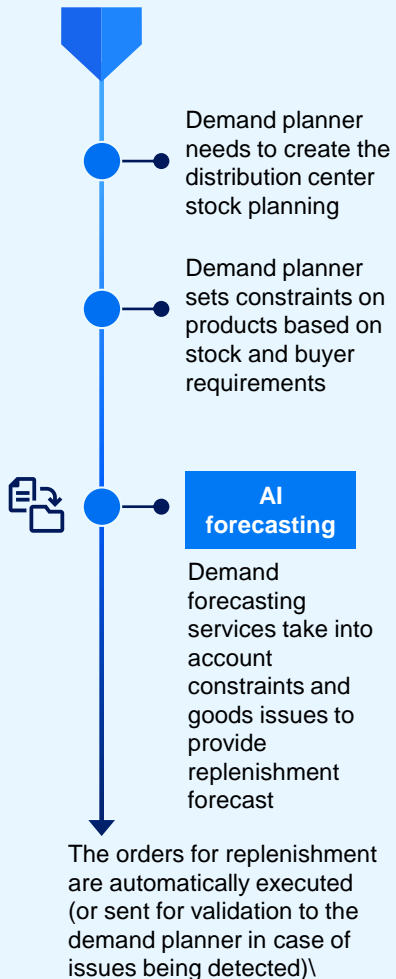

## Visibility into skills & capabilities of your workforce

- **Find** and attract the best talent for new job postings equitably with gender bias detection
- **Help** your workforce reach its potential with personalized development paths
- **Identify** highly qualified talent in less time with intelligent resume analysis

### SAP SuccessFactors Job Description & Interview Question Generation

# Automating the optimization of your stock with SAP Predictive Replenishment

## Challenge

- Retailers are challenged by supply chain disruption volatility and therefore are seeking to achieve supply chain resiliency and tackle the delicate balance between missing out on revenue potential and handling excess inventory

## Solution

**SAP Predictive Replenishment provides an automatic ordering of replenishable retail products with the help of forecasted demand and highly automated services**

- Automatic ordering of replenishable products for distribution centers
- Service level-driven replenishment for distribution centers by considering a multitude of aspects such as constraints, demand volatility, and more
- Alerts for monitoring and controlling, order proposal reviews, exception handling
- Easy configuration of planner responsibility and business objectives

## Benefits

- Reduced revenue loss due to stock out
- Lower inventory costs and increased margins
- Increased productivity of replenishment planners
- Decreased manual workload with high levels of automation

## Average Business Value for Customers

Calculation Method / Assumption In Notes

**1%–30%**

Reduced revenue loss due to stock out

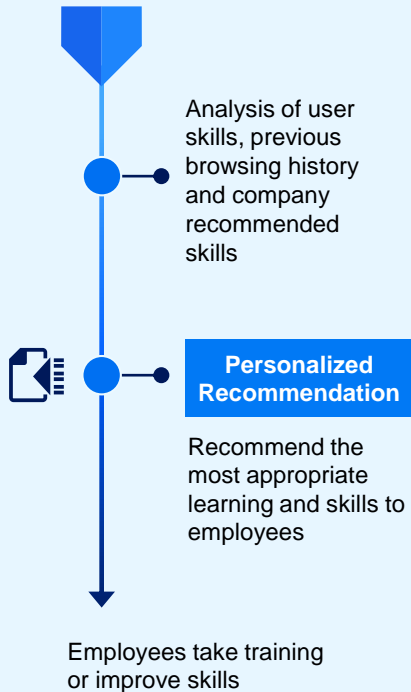

**1%–25%**

Reduced inventory costs

**10%–20%**

Increased order management  
FTE productivity

# Build a future ready workforce with SAP SuccessFactors Learning Recommendation

## Challenge

- Overwhelming volume of learning information that makes it difficult to notice and keep track of useful information, thus lack of individualized learning experience
- Learning is primarily organization driven today with a focus on maintaining compliance and is manual / tactical rather than being strategic and programmatic
- Lack of effective tools that makes it difficult for the employees to find the most useful information or learnings
- Companies need to grow specific skills in their workforce to increase their competitiveness in their market

## Solution

### Talent Intelligence in SAP SuccessFactors

- Connects employees with personalized learning beyond traditional course catalogues to fit their learning goals and situation
- Lets company push forward skills that are expected for the growth of the business
- Significantly improves often chronically low training completion rates
- Analyzes employee profile & interaction history to recommend personalized learnings beyond traditional course catalogues

## Benefits

- Employees see that the company is supporting with suitable learning recommendations for their growth plan
- Personalized / Individualized experience results in enhanced employee engagement / satisfaction
- Make better use of vast amounts of relevant and current learning content available
- Companies grow the skills they target for their future evolution

## Average Business Value for Customers

Calculation Method / Assumption In Notes

**78%** Completion rate for recommended trainings, delivering targeted skills to complete employee profiles

Talent development to build a better workforce

Help organizations create a culture of learning

## Customer / Telefónica

**77%** Of talent profiles completed, enabling intelligent matching of candidates to positions

"With support from SAP, we have been able to extend the functionality in SAP SuccessFactors solutions to create an innovative solution that helps employees identify and develop the skills that will be Vital in the digital world and the future of our company"

Gabriel de Diego, HR Strategy and Transformation Director, Telefónica S. A

# Extend capabilities by deploying and managing new AI models and natively integrate to your SAP systems with SAP Business Technology Platform

## Run AI models cost-efficiently at scale while preserving privacy and compliance

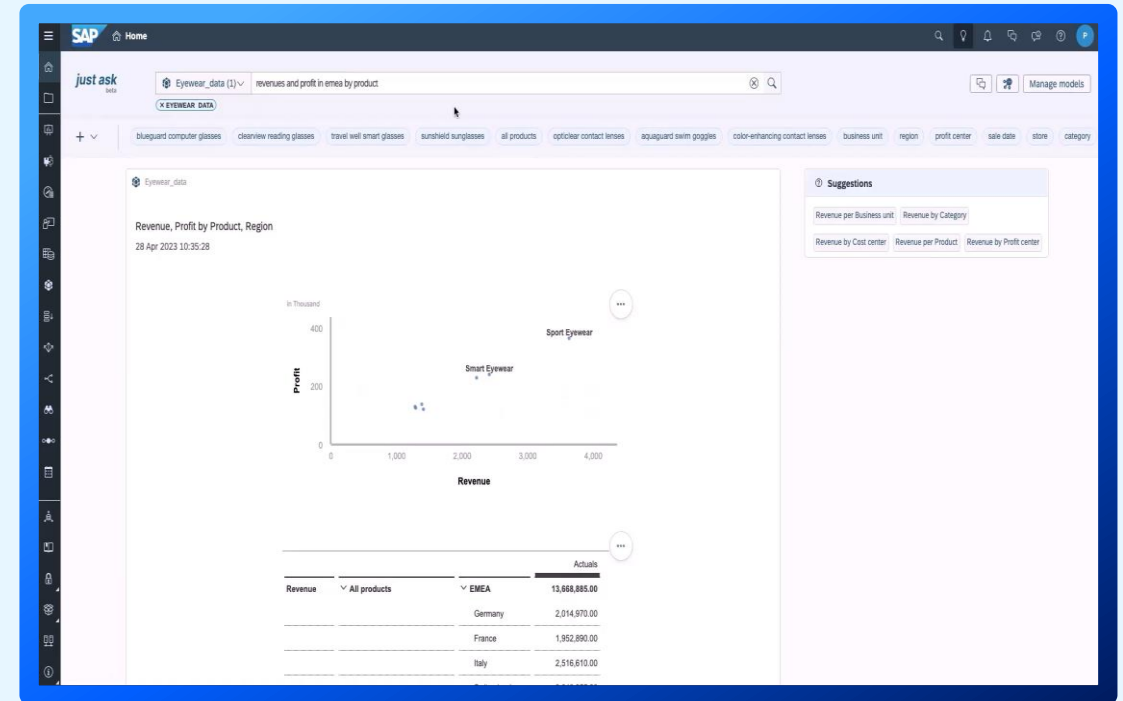

Strike the right balance between cost and performance while gaining peace of mind with fully SAP managed deployments

## Accelerate time to value with AI designed for SAP applications

Quickly embed AI in SAP applications and business processes while enforcing consistent authorization policies

## Ensure governance and compliance

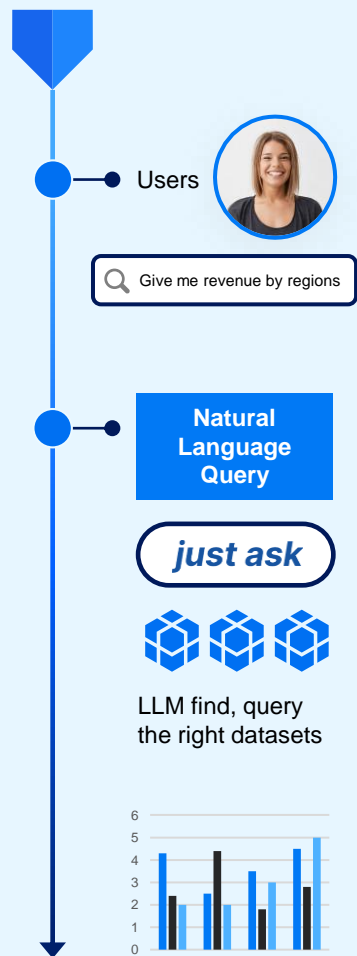

Centralize ML lifecycle management across the enterprise and monitor and continuously improve model performance

**Quickly** access trusted insights via natural language

<sup>1</sup>Source: Vartak, M. (2022). How to Scale AI in Your Organization. In Harvard Business Review.

# Leverage Natural Language-driven Analytics Just Ask + SAP Analytics Cloud

Answers are instantly provided to the end users

## Challenge

- **Missing Skills:** Finding answers in data requires a deep understanding of technological concepts such as data-warehousing
- **Cognitive Overload:** Modern tools are designed for analysis. Dashboards have tried to solve the cognitive load, but they are too rigid to go after general use
- **Data Fragmentation:** Data is fragmented in silos in a way that makes data discovery slow and nearly impossible for non-technical users to enrich the simplest of the answers

## Solution

- **Just Ask:** Natural Language-driven access of your trusted insights with SAP Analytics Cloud enabling fact-based decision-making through natural language queries and conversational analytics.

## Benefits

- **Faster Insights:** Fast natural language querying with all the value of business semantics
- **Trusted Retrieval:** Proprietary LLMs ensure a secure information retrieval preserving data policies
- **Business Agility:** Offers multi-cloud workflow compatibility and integrates external data sources

## Average Business Value for Customers

Calculation Method / Assumption In Notes

**20%** Average time spent in information retrieval by knowledge workers.

**That's 1 resource on a team of 5 persons.**

Source: CB Insights knowledge worker's report

# It's time to realize your potential with Business AI from SAP

**99%**

of incoming payments  
automatically assigned

**15 minutes**

to run forecasts down  
from 3 hours

**350 hours**

saved each month  
by reducing repetitive tasks

**91.5%**

of employees use  
intelligent reskilling  
application

# Agenda

A background image showing a man in a light blue shirt standing and gesturing while presenting to a group of three people (two women and one man) seated at a long white table in a bright, modern office with large windows.

**SAP Business AI Strategy**

**SAP Business AI Value Proposition**

**SAP Business AI Offerings**

# Today, SAP offers a large catalogue of AI-powered scenarios across all business functions

| Finance   | Supply Chain  | Customer Experience  | Procurement   | Human Resources   | IT and Cross-Function  |
|---|---|--|---|---|--|
| <ul style="list-style-type: none"> <li>▪ Tax Compliance</li> <li>▪ Cash Application</li> <li>▪ Intelligent accrual</li> <li>▪ Travel expense auditing</li> <li>▪ Travel expense verification</li> <li>▪ Invoice processing</li> <li>▪ Business Integrity screening</li> <li>▪ Goods and invoice receipt matching</li> <li>▪ Intercompany matching &amp; reconciliation</li> <li>▪ Mobile expense entry</li> </ul> | <ul style="list-style-type: none"> <li>▪ Stock in transit</li> <li>▪ Visual Inspection</li> <li>▪ Demand forecasting &amp; sensing</li> <li>▪ Project-cost prediction</li> <li>▪ Predicted delivery processing</li> <li>▪ Demand-driven replenishment</li> <li>▪ Forward scheduling</li> <li>▪ Field service scheduling</li> <li>▪ Asset prediction &amp; optimization</li> <li>▪ Slow-moving materials prediction</li> </ul> | <ul style="list-style-type: none"> <li>▪ Predicted delivery processing</li> <li>▪ Discount recommendations</li> <li>▪ Intelligent sales execution</li> <li>▪ Relationship intelligence</li> <li>▪ Sales route optimization</li> <li>▪ Sales order automation</li> <li>▪ Opportunity scoring</li> <li>▪ Customer insights</li> <li>▪ Guided selling</li> <li>▪ Lead scoring</li> <li>▪ Product recommendations</li> </ul> | <ul style="list-style-type: none"> <li>▪ Guided buying</li> <li>▪ Sourcing item and supply prediction</li> <li>▪ Material group recommendations</li> <li>▪ Invoice object recommendations</li> <li>▪ Job matching for contingent workforce</li> <li>▪ Resume ranking for contingent workforce</li> <li>▪ O'Net labelling</li> </ul> | <ul style="list-style-type: none"> <li>▪ Skill and career path recommendations</li> <li>▪ Learning recommendations</li> <li>▪ Job analyzer</li> </ul> | <ul style="list-style-type: none"> <li>▪ Joule</li> <li>▪ Process automation</li> <li>▪ Business rule mining</li> <li>▪ Intrusion detection</li> </ul> |
