Agenda

- ❑ SAP Integration Suite → Edge Integration Cell
- ❑ Document Information Extraction → Premium edition (GenAI capabilities)
- ❑ SAP BTP Guidance Framework → Compass for building and running apps on SAP BTP
- ❑ Q&A

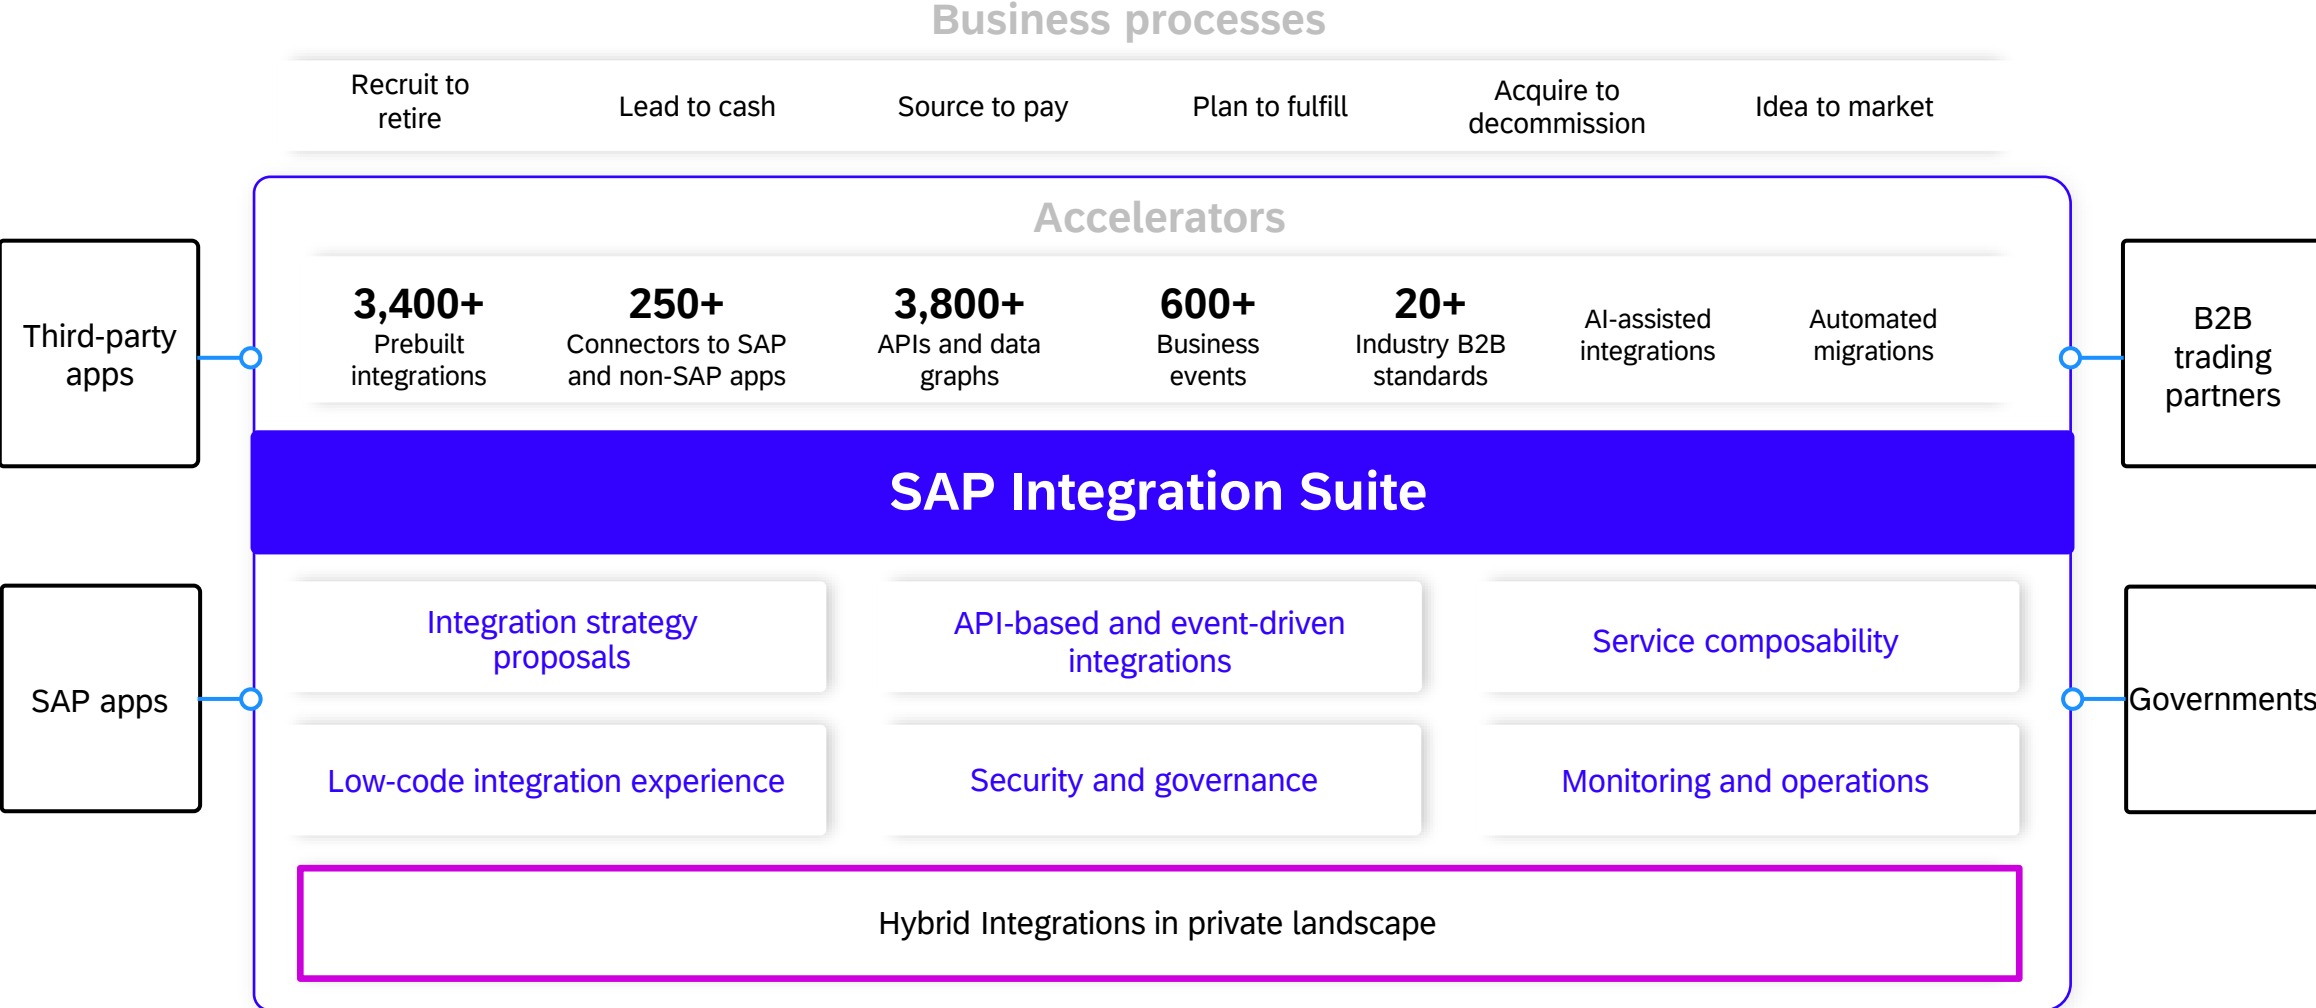

SAP Integration Suite

SAP BTP

Unleash digital innovation
across business functions

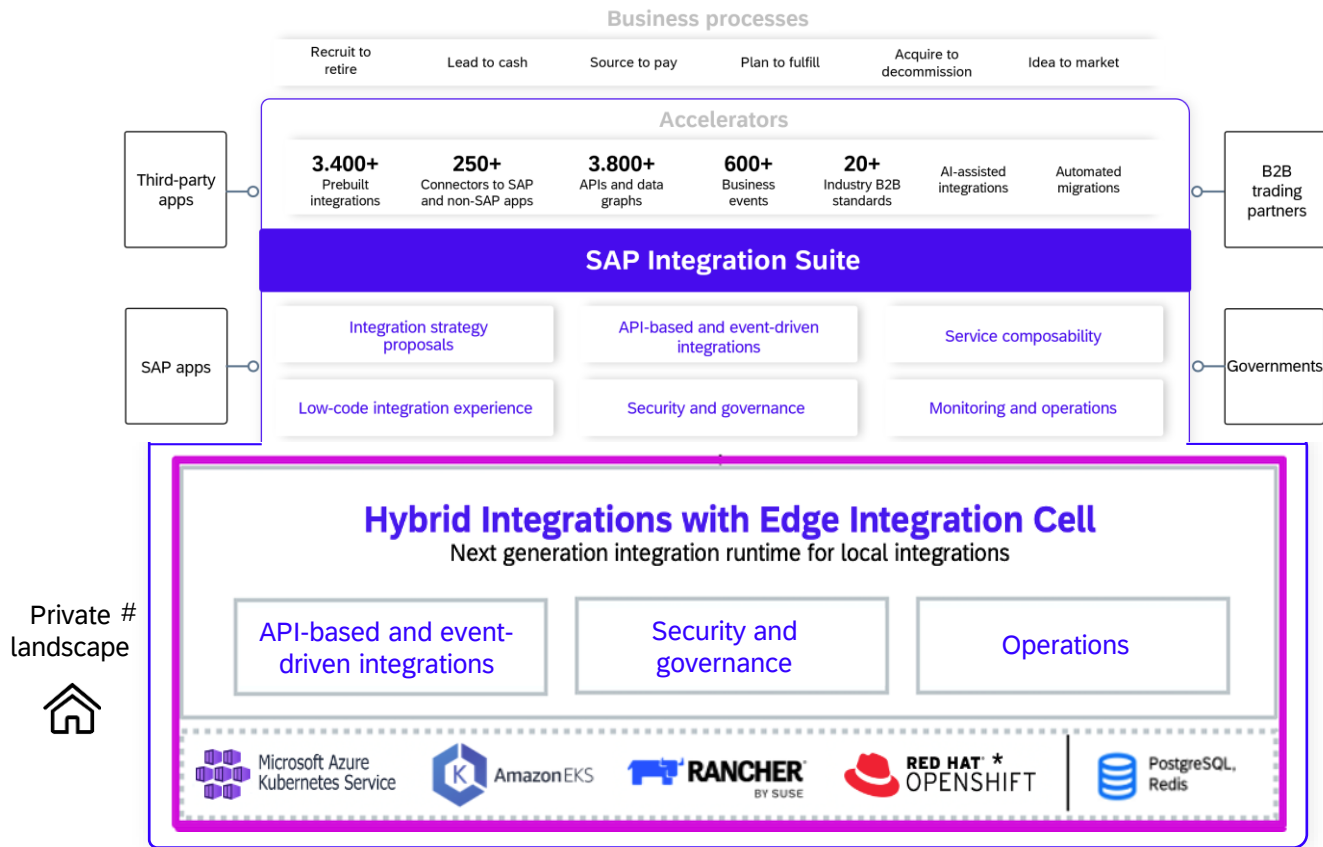

SAP's hybrid integration platform

Edge Integration Cell

Next-generation “hybrid” integration runtime

“Edge Integration Cell” is the new flexible hybrid integration **runtime**, offered as an optional extension to SAP Integration Suite, enabling customers to manage APIs and run their integration scenarios within customer-managed private landscapes.

Flexible deployment in customer environments

Data compliance and governance by processing data locally

Operations (installation, software updates...) managed by customer

Integration studio for design and monitoring **in the cloud**

Integration flows modeled in cloud Integration that are **compatible**

Enablement of **design and management of APIs** with policies

Routing of business events from SAP applications to event brokers

Configuring and managing **multiple cells** with a tenant of SAP Integration Suite

Business continuity during **temporary connectivity loss (up to 4 hr)***

Migration path **for PI/PO customers**

Private landscape corresponds to on-premise or private cloud.

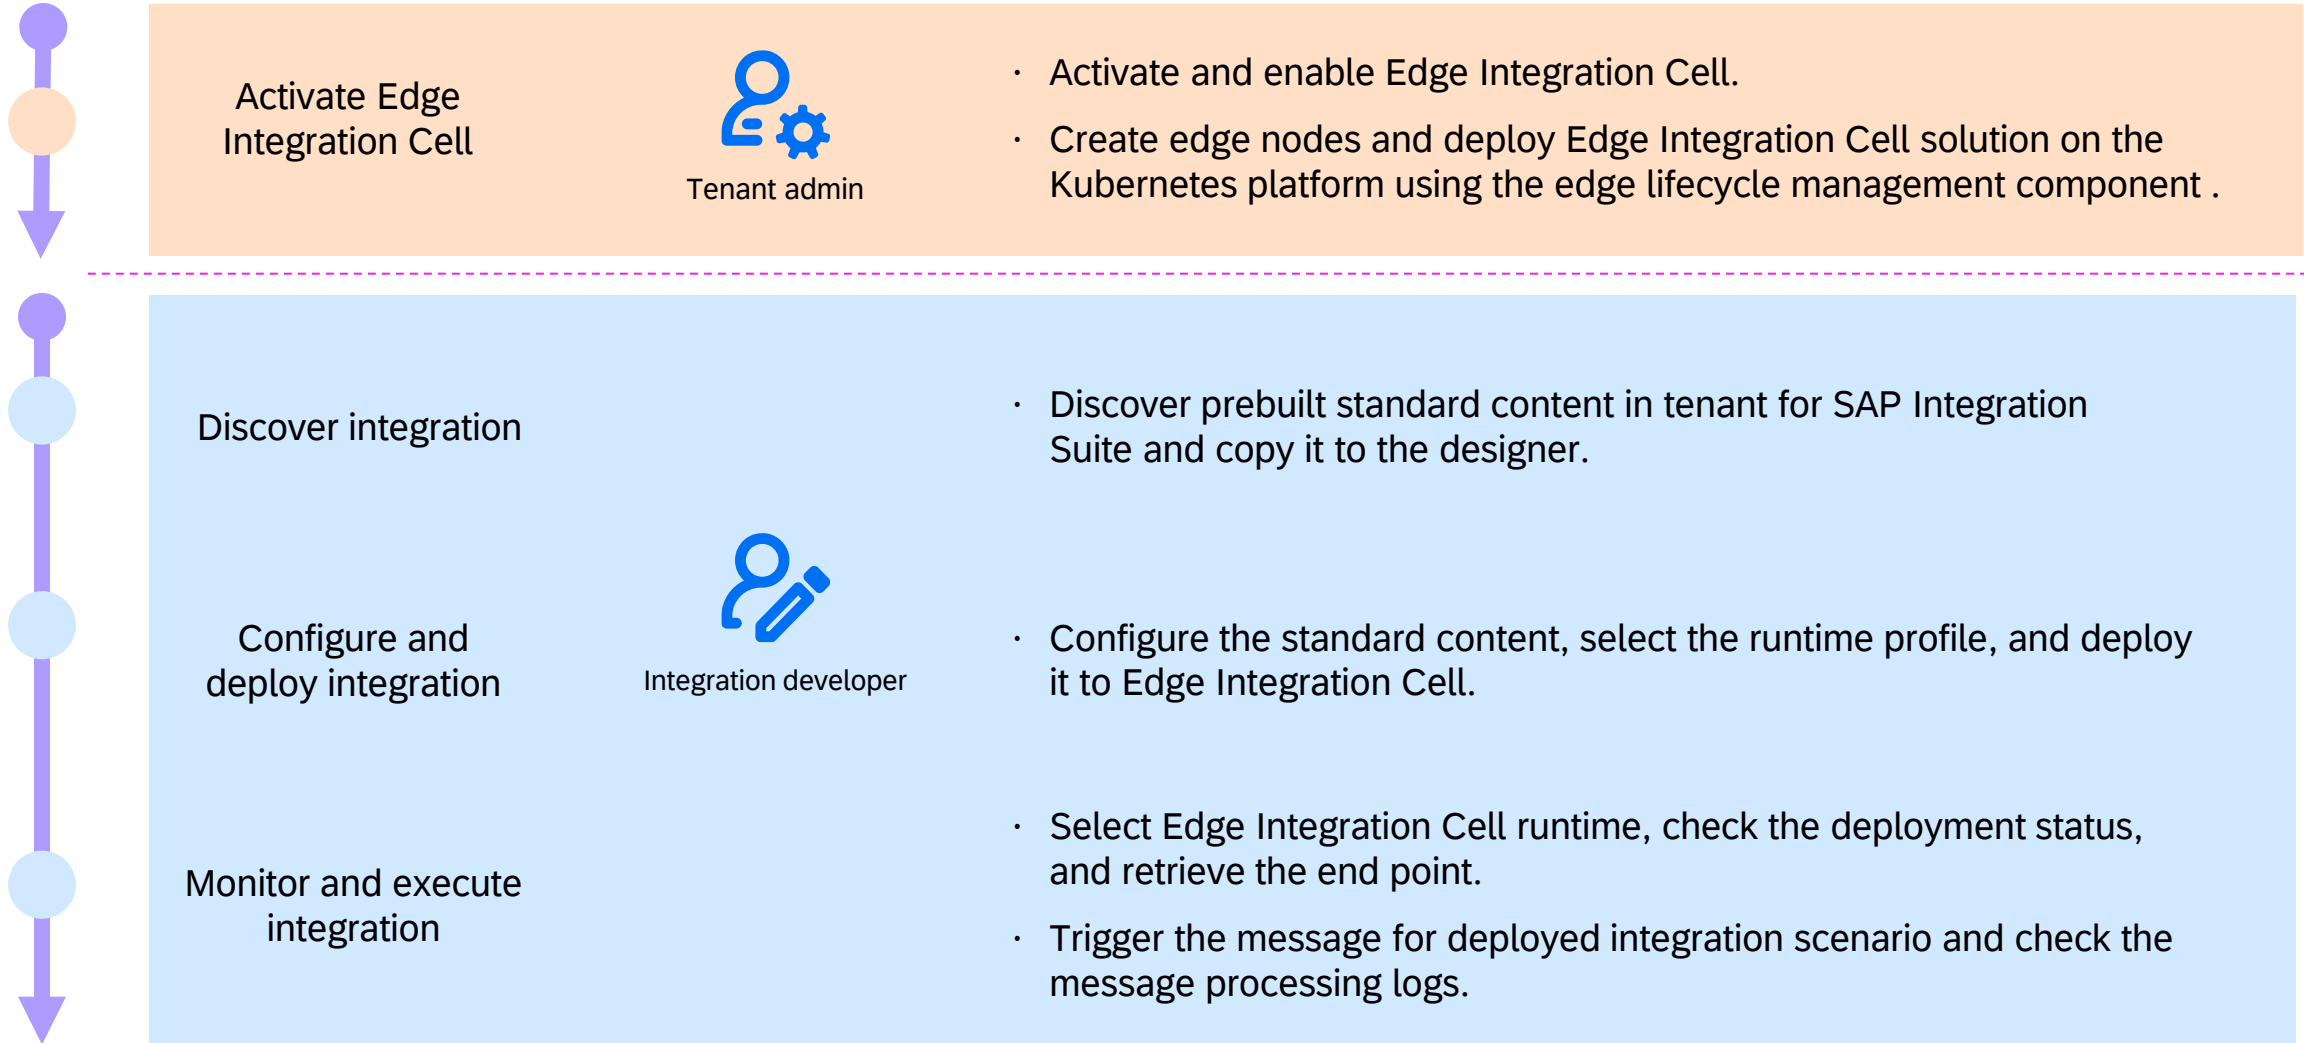

* Part of the road map, beyond GA

Licensing model

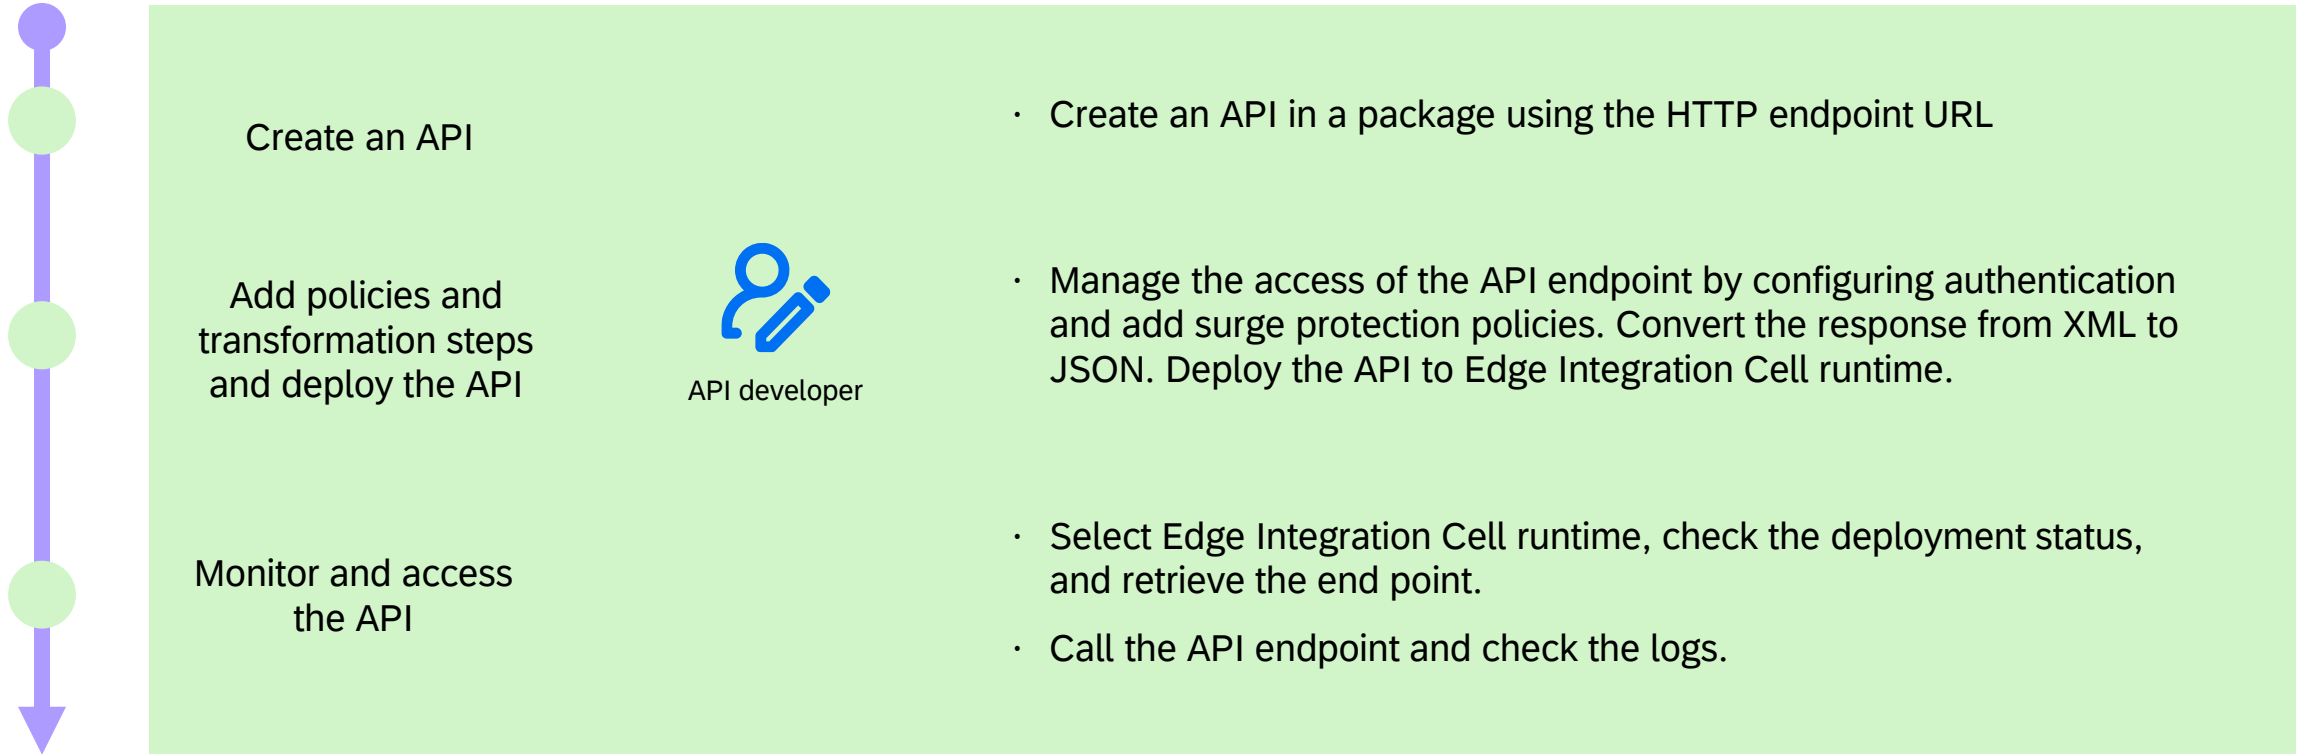

- Edge Integration Cell is included as a part of the existing SAP Integration Suite (for standard and premium editions and CPEA and PAYG).
- Additional Edge Integration Cells can be acquired through a separate add-on SKU.
- Only 50% of the messages that are processed by Edge Integration Cell are chargeable (excluding unmodified standard content for SAP-to-SAP software).

Document Information Extraction, premium edition

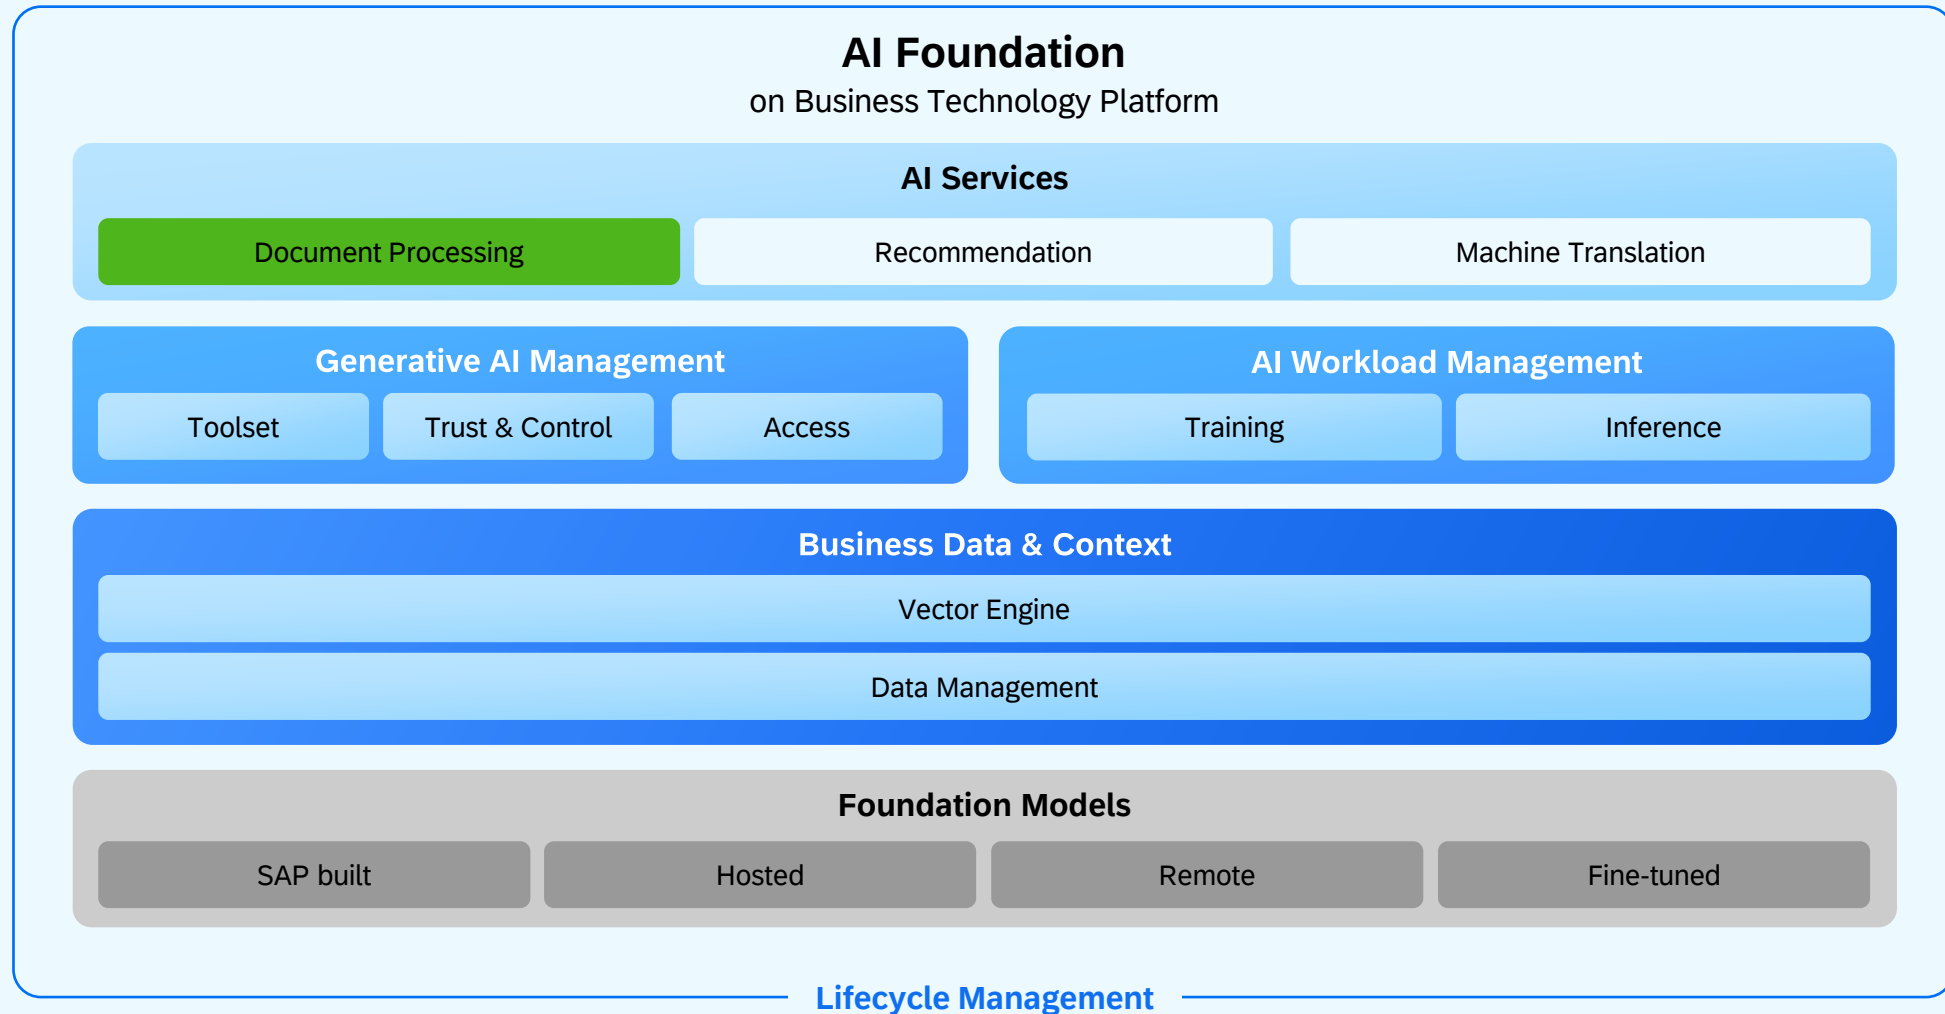

(SAP AI Services)

SAP BTP

Unleash digital innovation
across business functions

AI Foundation on SAP BTP

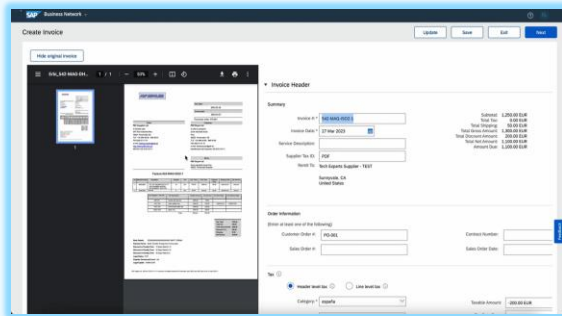

AUTOMATED DOCUMENT PROCESSING

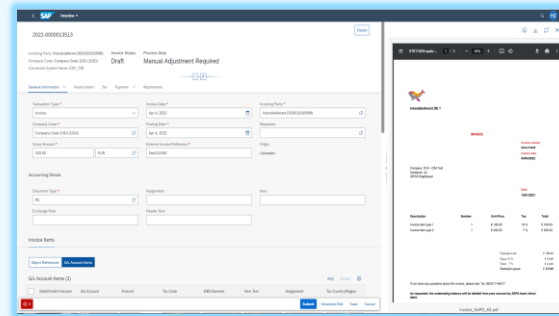

Business process-specific AI for Document Processing in SAP

SAP Business Network Intelligent Invoice Conversion

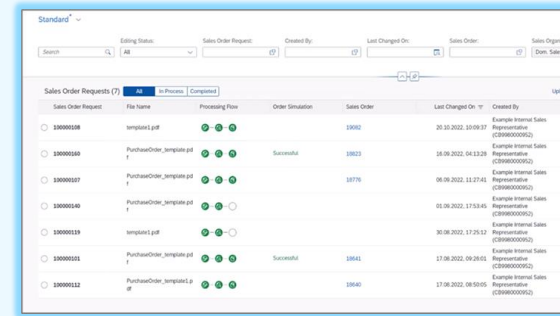

- Improve operational efficiency through simple invoice upload and automation for invoice conversion
- Increase invoice accuracy by reducing manual and error-prone entry
- Accelerate invoice payments by reducing the number rejected invoices by your customers
- See in action: [Intelligent Invoice Conversion](#)

SAP Ariba Central Invoice Management

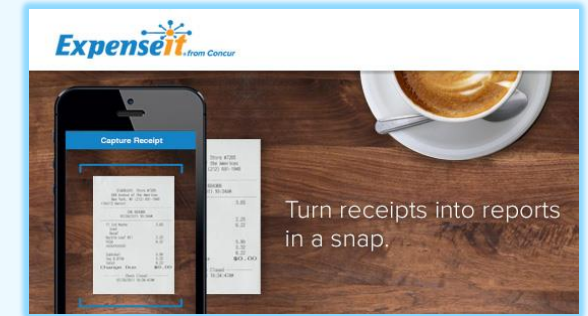

- Provides inbound handling via Business Network and central processing of invoices.
- Deployed on BTP available for SAP S/4HANA Cloud, public edition
- See in action: [Central Invoice Management](#)

SAP S/4HANA Sales Order Automation

- Enables faster completion to prevent delays in the sales order delivery
- Reduces redundant tasks to free time for users
- Reduces the risk of human errors in the process
- See in action: [Sales Order Automation with AI](#)

SAP Concur Expenselt

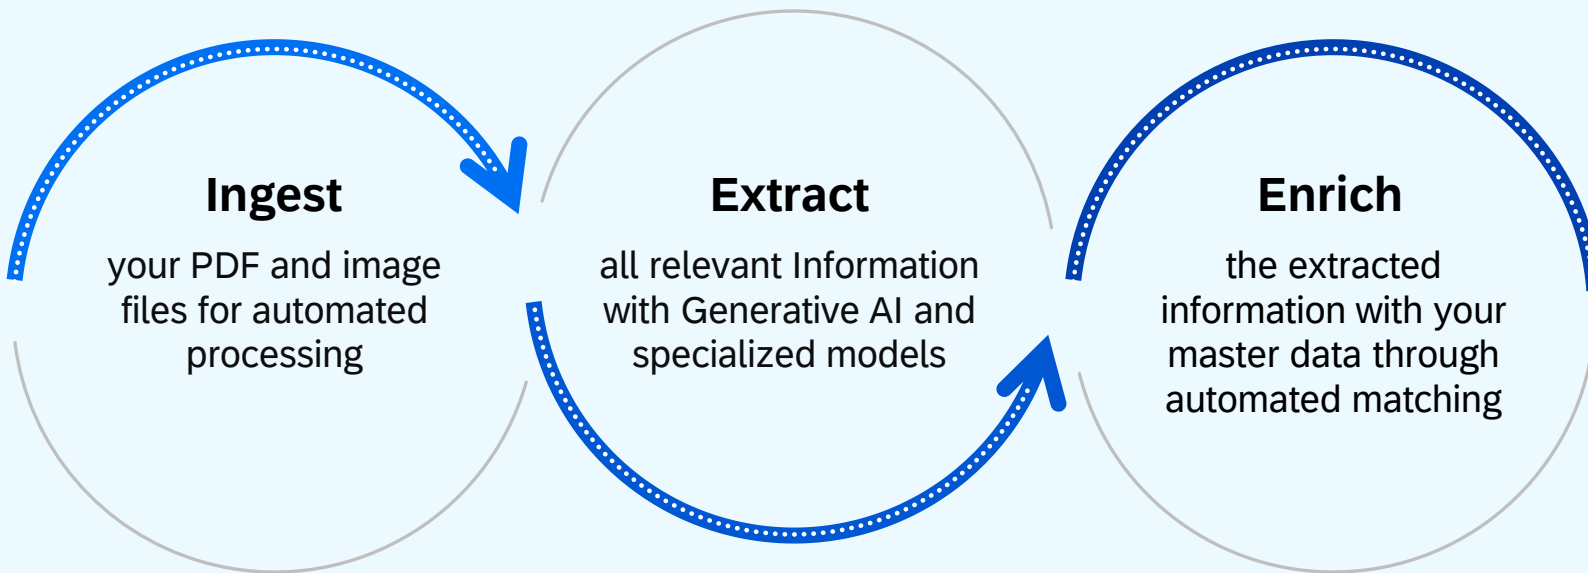

- Images of receipts are captured in the Expenselt app
- Information extraction starts on the device with ML models analyzing the image
- Improved employee productivity and overall audit efficiency
- See in action: [Expenselt](#)

Document Information Extraction

Responsible AI

Document Information Extraction

Intelligent document processing with SAP
available on SAP Business Technology Platform

“

At Aspen Pumps, the Document Information Extraction service from SAP helps us to achieve ~90% of extraction accuracy for supplier invoices out of the box, laying a great foundation for much faster execution of Accounts Payable processes. It helps to save up to 350 hours monthly in invoice processing, so approximately £5000 per month.

Document Information Extraction

BASE

Automate core business document processing use cases in selected languages.

Use cases (supported languages)

- Invoice (15)
- Payment Advice (2)
- Purchase Order (3)
- Business Card (14)
- Template processing (41)

PREMIUM

Automate all business document use cases in most languages end-to-end.

Out of box support for **40+ languages with easy extensions** for any kind of document.

- Auto extraction based on Generative AI
- Global language coverage
- Soon: Extensions of SAP Standard Schemas
- Outlook: Immediate Improvement

Document Information Extraction, Premium Edition

Wrap up

- ✓ ~80 percent of data is unstructured. Great deal of business data is locked in business documents
- ✓ SAP is at the forefront of adopting Generative AI in reliable, relevant and responsible way
- ✓ SAP provides state-of-the-art GenAI capabilities to process unstructured documents of any kind. Check out:

SAP BTP Guidance Framework

SAP BTP

Unleash digital innovation
across business functions

SAP BTP Guidance Framework

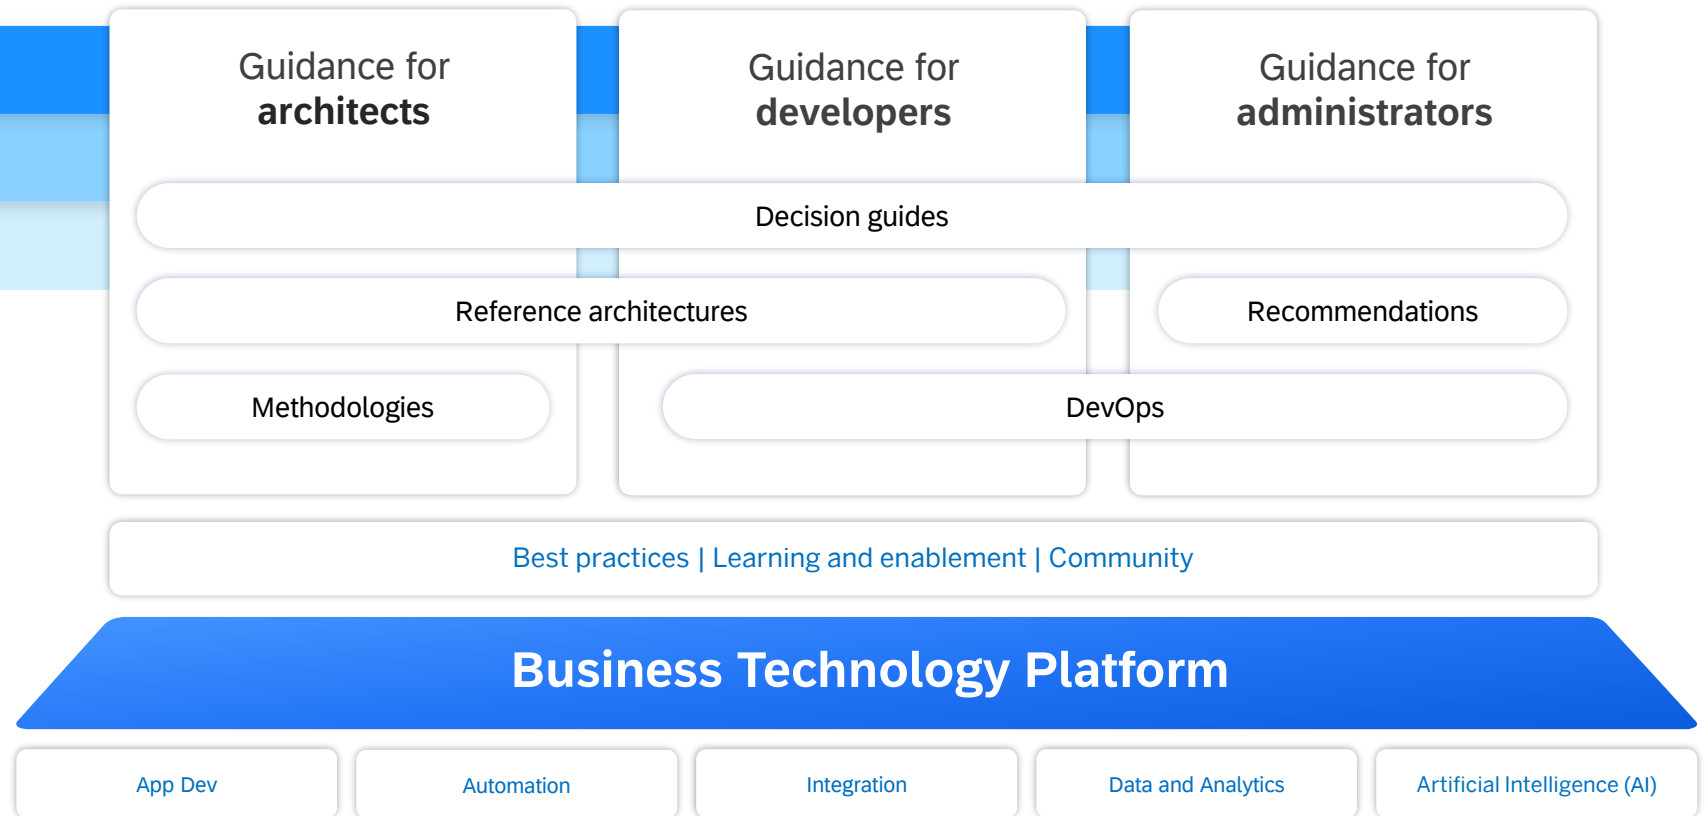

SAP BTP Guidance Framework

WHAT IS IT?

SAP BTP Guidance Framework is your compass for architecting, implementing, and operating solutions on SAP BTP. It provides a central access point for decision guides, reference architectures, methodologies, and many best practices.

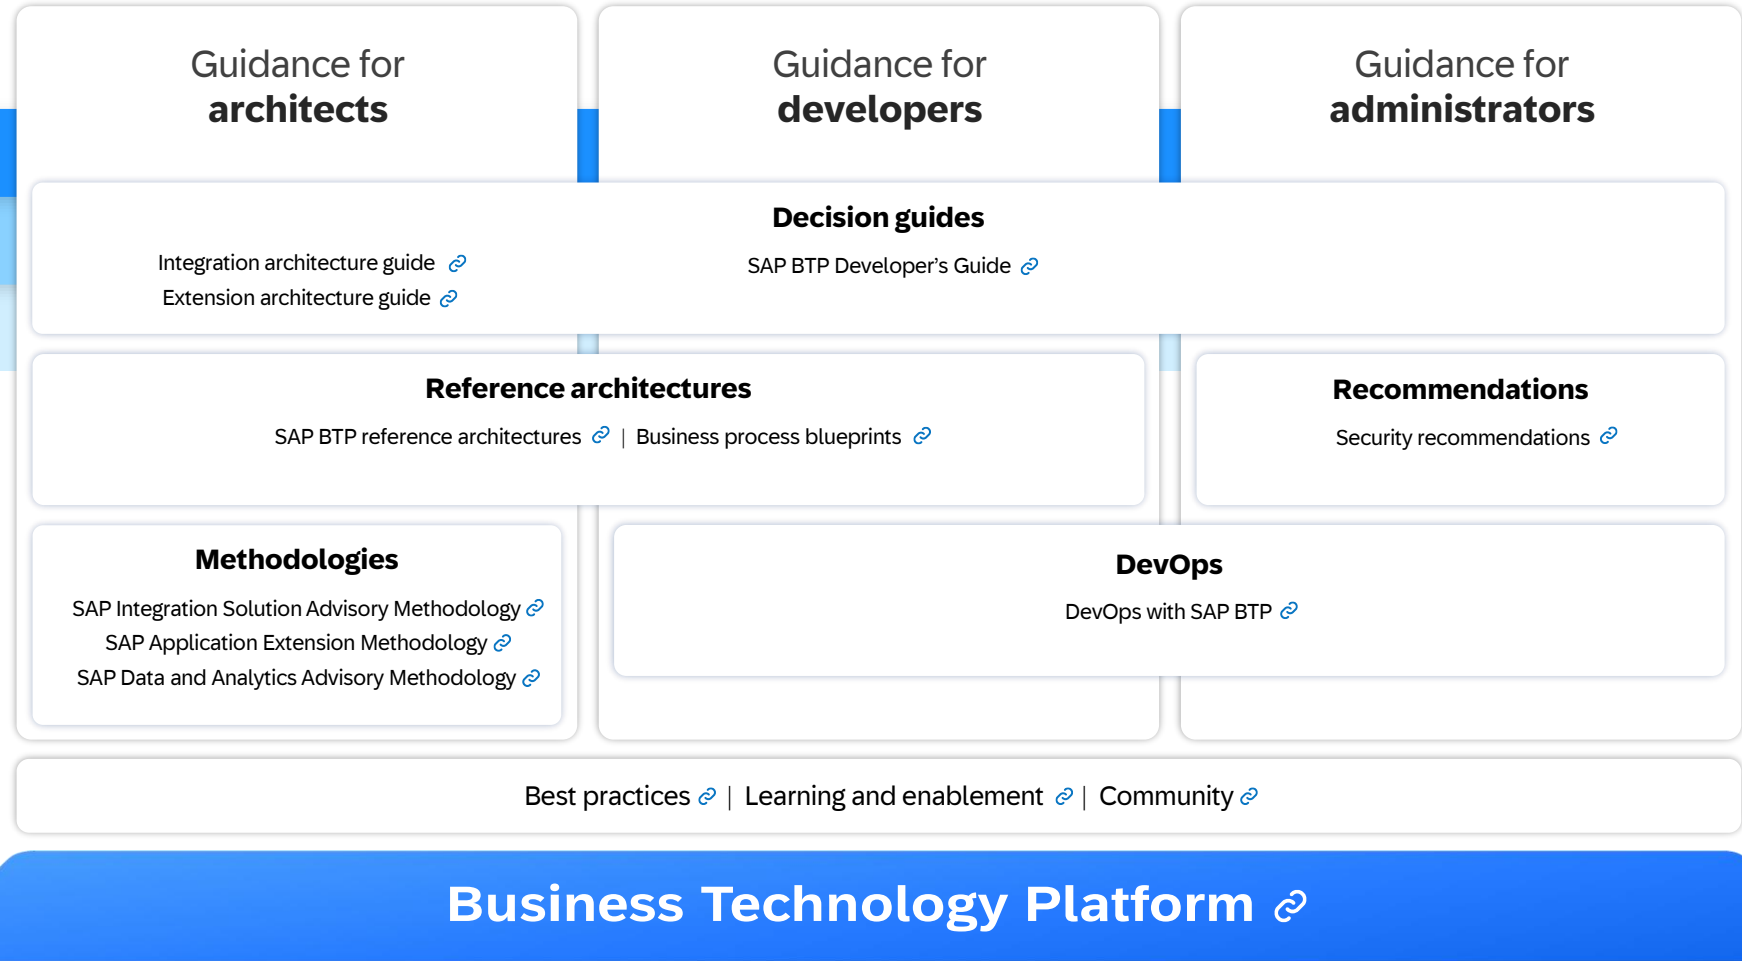

SAP BTP Guidance Framework

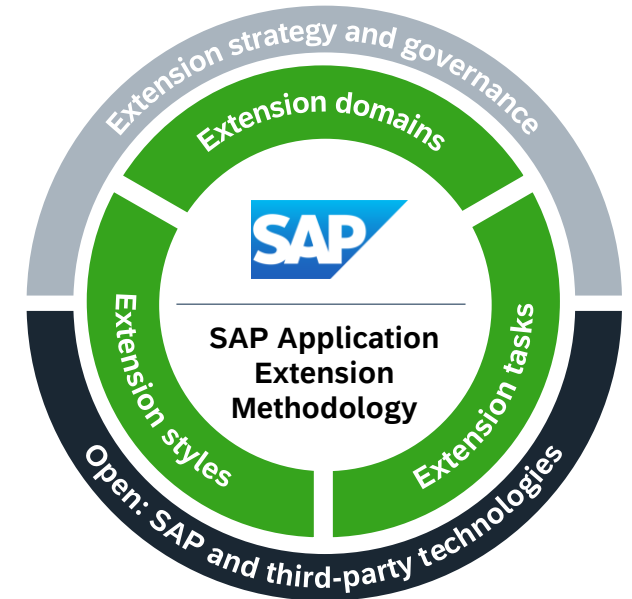

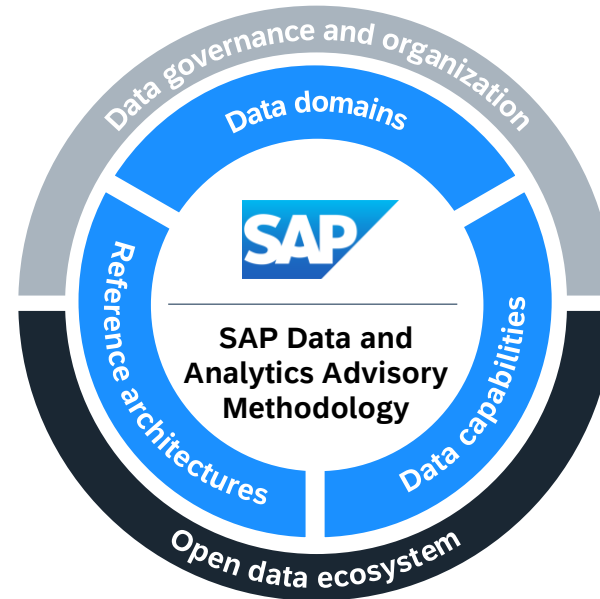

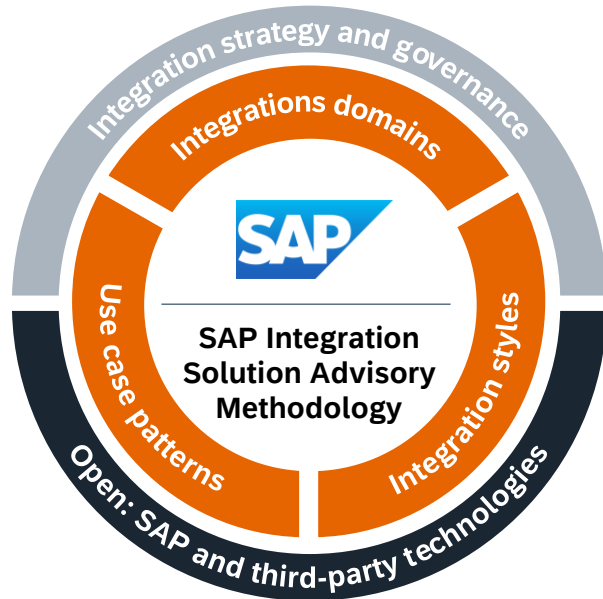

WHAT IS IT?

SAP BTP Guidance Framework is your compass for architecting, implementing, and operating solutions on SAP BTP. It provides a central access point for decision guides, reference architectures, methodologies, and many best practices.

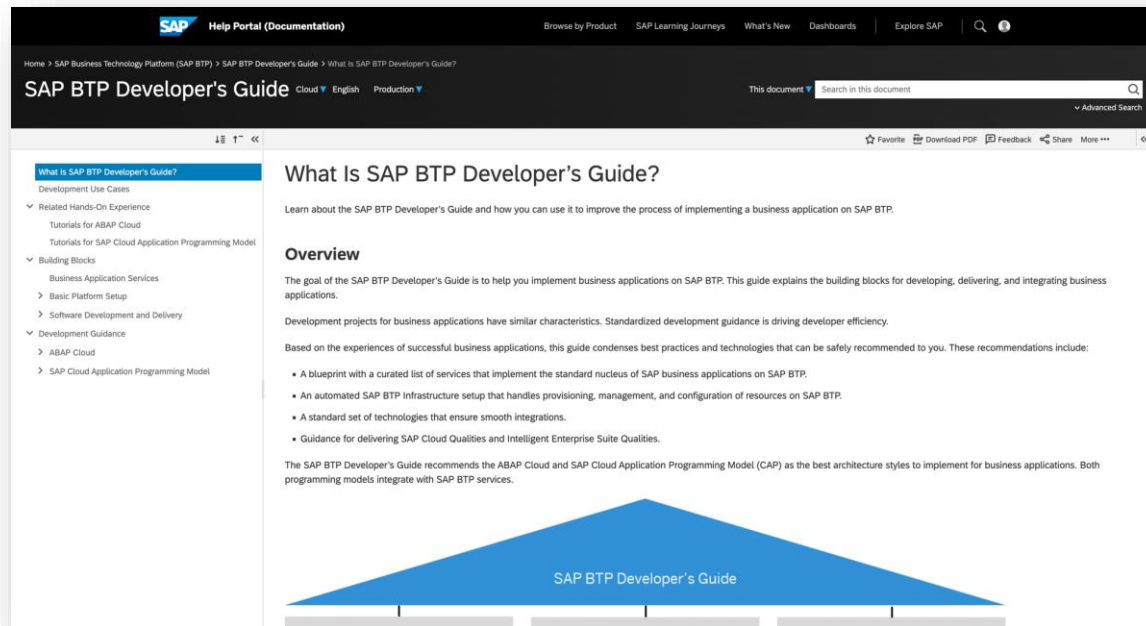

Methodologies

Methodologies provide a structured and technology-agnostic approach to define and execute domain-specific strategies.

SAP BTP Developer's Guide

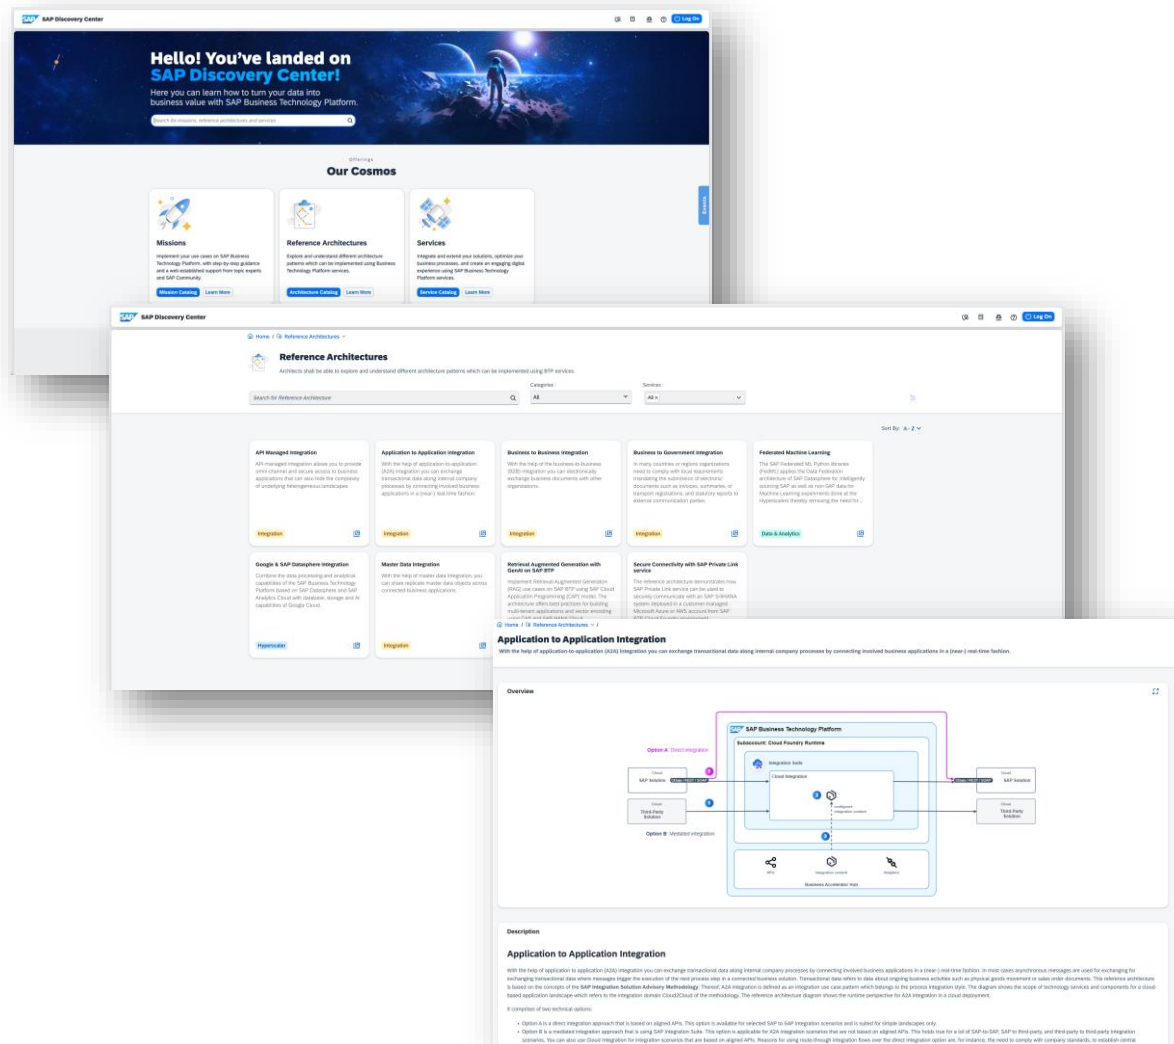

The SAP BTP Developer's Guide offers developer guidance to software developers on how to implement business applications as an integrated part of SAP software on SAP BTP.

It consists of:

- Architecture blueprint with a curated list of services implementing business applications on SAP BTP
- Description of the software development and delivery processes
- Instructions on how to deliver cloud and suite qualities

Reference Architectures

Reference architectures for SAP BTP offer curated template solutions on how to design solution architectures for a particular technology domain on SAP BTP.

A reference architecture consists of:

- Architecture diagram that describes the interaction of technology services with each other and with business applications
- Guiding information such as the data flow, characteristics, and adoption examples in an SAP software context
- Related missions on the SAP Discovery Center site that allow you to start implementing a tailored version of the architecture

Summary

The **SAP BTP Guidance Framework** provides a central access point for architects, developers and administrators to build and run enterprise-grade solutions on SAP BTP.

Explore your compass toward architecting, developing, and operating solutions on SAP BTP. The framework comprises of the following elements:

- **Decision guides** helping you to identify the technology option that best fits your needs.
- **Reference architectures** that allow you to explore how to architect solutions on BTP with the help of curated solution templates.
- **Methodologies** that offer a guided approach toward increasing your cloud technology maturity level, covering both technical and organizational aspects.
- **Recommendations** for different technology domains helping you to evaluate and choose the right implementation option.
- **DevOps** principles that enable your development and operations teams to be more efficient.
- Get started with exploring **best practices**, grow your skills with **learning and enablement** offerings for SAP BTP and engage with us in the **SAP Community**.
