SAP Leonardo – Emerging Technologies Workshop

PURPOSE: In half-day, hands-on workshops you will learn how SAP Leonardo and its technologies can accelerate a company's digital transformation.

Event format:
Half-day workshop hosted by an SAP User Group

Target audience:
The workshop is of interest for executives and experts of business units (LoBs) and IT

Why attend?
- Discuss with peers and SAP experts
- Find out how others tackle their digital transformation with SAP Leonardo
- Discover how a specific emerging technology can help develop a new business model and help solve issues your company is facing

Example Workshop (can be adapted to each SAP Leonardo technology)**:**

SAP Leonardo Machine Learning Hands-on Workshop

13:00-17:00

Enhance decision-making. Drive new business models. Do what you thought was impossible and get up and running quickly as you use the power of AI with machine learning tools. Explore how you can make your enterprise intelligent with machine learning software to unite human expertise and computer insights.

The workshop focuses on how intelligent solutions can create value in your organization today. Discover how SAP Leonardo Machine Learning Foundation help you detect patterns from structured and unstructured data, and use APIs to connect to machine learning services. Learn how to determine if machine learning technology is right for you.

The aim of the workshop is to get practical guidance on how to make your enterprise intelligent.

The workshop is suitable for Development Consultants, Developers and other tech savvy specialists.
